		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT325	Demilitarized Zone (DMZ) Staging Network Engineer-reviewing and evaluating network design issues, ensuring efficient data flow, scalability, cost-efficiency, and client needs specific to the datacenter relocation initiative	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT327	VMWare Architect-Performing duties required to expand the virtualized computing environment using tools that include vCenter, vSphere, and Lab Manager. Provide expertise in the design and maintenance required to ensure the high availability of the virtualized computing environment. Provide technical expertise and performing tasks for all related infrastructure projects, including business continuity. Architecting and implementing solutions in a multi-tenant environment.	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT328	Vmware Consultant 1-- Installation, Configuration and maintenance of Hosted VMware products. Design, Implementation, Testing and Deployment of VMware Infrastructure. Installation, Configuration and Administration of VMware VSphere4, ESX 3.5 and ESXi Server, VMware View. VMware vSphere client, Virtual vCenter Server. Virtual Networking(Virtual Switches, VM Kernel Ports)	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT329	VMWare Consultant 2-Installation, Configuration and maintenance of Hosted VMware products. Design, Implementation, Testing and Deployment of VMware Infrastructure. Installation, Configuration and Administration of VMware VSphere4, ESX 3.5 and ESXi Server, VMware View. VMware vSphere client, Virtual vCenter Server. Virtual Networking(Virtual Switches, VM Kernel Ports)	7/1/2015	6/30/2016	Task Order	1	None	0

New Procurements DoITT

Plan ID #	Description of Services to be Procured	Anticipated Contract Info				Similar Agency Roles	
		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT330	VMWare Agency Dedicated Consultant-Installation, Configuration and maintenance of Hosted VMware products. Design, Implementation, Testing and Deployment of VMware Infrastructure. Installation, Configuration and Administration of VMware VSphere4, ESX 3.5 and ESXi Server, VMware View. VMware vSphere client, Virtual vCenter Server. Virtual Networking(Virtual Switches, VM Kernel Ports)	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT331	ACS Project Manager - • Responsible for the completion of the specific phase of Data Center consolidation assigned. Data Center consolidations are broken into three phases; Requirements and Evaluation, Planning and Execution. Each Phase requires a resource loaded project plan and work products that the Project Manager drives to completion. • Responsible for developing and maintaining project plans that are resource balanced and accurately depict resource needs from the agency engaged in migration. • Maintain and escalate risks associated to their relevant projects to the DoITT PMO and Executive staff. Manage all risks to completion. • Import project plans into the standard DoITT tool (Clarity) to maintain project visibility across the organization.	7/1/2015	6/30/2016	Task Order	1	Infrastructure Project Manager	2
FY16NDoITT332	ACS Migration Specialist - • The Migration Specialist will be responsible for leading and executing technical discovery, design, and deployment deliverables for Agency migrations. • This will include conducting deep dive evaluation and documentation of technical requirements, architecture designs, configuration request forms, and operational run books. • The Migration Specialist will work closely with DoITT service owner teams and ACS stakeholders to ensure efficient provisioning of DoITT service offerings (Server, Storage, Network, Database, and Service Desk) to align with ACS hosting requirements. The migration specialist will have an extensive technical background covering all aspects of data center migration and hosting.	7/1/2015	6/30/2016	Task Order	1	None	0

New Procurements DoITT

Plan ID #	Description of Services to be Procured	Anticipated Contract Info				Similar Agency Roles	
		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT333	ACS Tech Lead - • Develop technical solutions and migrate ACS data centers into a DoITT environment. Agency systems require specific knowledge of not only their environment but DoITT existing environment and how they can provide the same service. • Create technical requirements and designs. • Provide deployment and problem resolution. • Manage all technical aspects of Data Center migration phases (Evaluation, Planning, Execution) • Manage testing lifecycle for all applications being transitioned to DoITT (Design, Build, Testing, Deployment and Operational Transition) • Interface with ACS technical subject matter experts and drive to conclusion any technical open issues.	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT334	DOHMH Project Manager - • Responsible for the completion of the specific phase of Data Center consolidation assigned. Data Center consolidations are broken into three phases; Requirements and Evaluation, Planning, and Execution. Each Phase requires a resource loaded project plan and work products that the Project Manager drives to completion. • Responsible for developing and maintaining project plans that are resource balanced and accurately depict resource needs from the agency engaged in migration. • Maintain and escalate risks associated to their relevant projects to the DoITT/DOHMH PMO and Executive staff. Manage all risks to completion. • Import project plans into the standard DoITT (Clarity) and DOHMH tools to maintain project visibility across the organization. • Forecast critical path for migrations and maintain project plan baselined dates. • Coordinate team resources and DoITT/DOHMH internal resources needed for successful completion of relevant Data Center migration phases.	7/1/2015	6/30/2016	Task Order	1	Infrastructure Project Manager	2
FY16NDoITT335	DOHMH Technical Lead - • Develop technical solutions and migrate DOHMH data centers into a DoITT environment. Agency systems require specific knowledge of not only their environment but DoITT existing environment and how they can provide the same service. • Create technical requirements and designs. • Provide deployment and problem resolution. • Manage all technical aspects of Data Center migration phases (Evaluation, Planning, Execution) • Manage testing lifecycle for all applications being transitioned to DoITT (Design, Build, Testing, Deployment and Operational Transition) • Interface with DOHMH technical subject matter experts and drive to conclusion any technical open issues.	7/1/2015	6/30/2016	Task Order	1	None	0

FY16NDoITT336	DOHMH Migration Specialist - • The Migration Specialist will be responsible for leading and executing technical discovery, design, and deployment deliverables for Agency migrations. • This will include conducting deep dive evaluation and documentation of technical requirements, architecture designs, configuration request forms, and operational run books. • The Migration Specialist will work closely with DoITT service owner teams and DOHMH stakeholders to ensure efficient provisioning of DoITT service offerings (Server, Storage, Network, Database, and Service Desk) to align with DOHMH hosting requirements. The migration specialist will have an extensive technical background covering all aspects of data center migration and hosting. • Provide technical expertise and performing tasks for all related infrastructure projects. • Architecting and implementing solutions in a multi-tenant environment. • Providing solutions across multiple vendor platforms	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT337	DOHMH Migration Specialist - • The Migration Specialist will be responsible for leading and executing technical discovery, design, and deployment deliverables for Agency migrations. • This will include conducting deep dive evaluation and documentation of technical requirements, architecture designs, configuration request forms, and operational run books. • The Migration Specialist will work closely with DoITT service owner teams and DOHMH stakeholders to ensure efficient provisioning of DoITT service offerings (Server, Storage, Network, Database, and Service Desk) to align with DOHMH hosting requirements. The migration specialist will have an extensive technical background covering all aspects of data center migration and hosting. • Provide technical expertise and performing tasks for all related infrastructure projects. • Architecting and implementing solutions in a multi-tenant environment. • Providing solutions across multiple vendor platforms	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT338	DOHMH Security / Testing Specialist - • The Security / Testing Specialist will be responsible for leading and executing IT Security specific technical discovery, design, and deployment deliverables for Agency migrations. • This will include conducting deep dive evaluation and documentation of technical requirements, architecture designs, configuration request forms, and operational run books. • The Security / Testing Specialist will work closely with DoITT service owner teams and DOHMH stakeholders to ensure secure design and provisioning of DoITT service offerings to align with DOHMH hosting requirements and Citywide IT Security protocols. The security / testing specialist will have an extensive technical background covering all aspects of IT Security. • Provide technical expertise and perform tasks for all IT Security related efforts associated to the DMZ migration. • Create and document technical requirements and designs.	7/1/2015	6/30/2016	Task Order	1	None	0

New Procurements DoITT

Plan ID #	Description of Services to be Procured	Anticipated Contract Info				Similar Agency Roles	
		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT339	NYCServ ResPass Network Engineer - This resource will perform the following functions: • The design, analysis, and implementation of the network designed using CISCO technology for Site B Business Continuity and Recovery System (BCRS) • Ensure IP routing, Internet and networking technologies, NAT, routing protocols, and network security, Firewalls, Proxies and VPN are working as planned • Optimizing network to provide anticipated performance as per design requirements • End to End validation to ensure connectivity, routing, and automatic Site B failover working as design	7/1/2015	6/30/2016	Task Order	1	Network Engineer	3
FY16NDoITT340	NYCServ ResPass IT Security Engineer - This resource will perform the following functions: • The design, analysis, and installation and configuration of the network security devices from Juniper, CISCO, Checkpoint, Actiance, MAZU as per BCRS design specification using Juniper, CISCO, • Ensure Ports, and protocols are configured and the right access is in place IP routing, Internet and networking technologies, Network addresss translation (NAT), routing protocols, and network security, Firewalls, Proxies and VPN are working as planned • Optimizing security network devices to provide anticipated performance as per design requirements • End to End validation to ensure security access, connectivity, routing, and automatic Site B failover working as design	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT341	NYCServ ResPass Developer/Implementation Specialist - This resource will perform the following functions: • Capture NYCSERV/RESPASS agencies' requirements necessary for migration • Assess current NYCSERV/RESPASS environment and develop migration plan • Migrates database from old environment to new environment • Analyze database requirements for Batch, Online transaction processing (OLTP) • Review physical data models for design integrity and adherence to published database standards. • Develop and execute appropriate Data Definition Language (DDL) to support projects. • Provide query performance monitoring and tuning recommendations. Validation and Certification Task o Assess planning and alignment with business o Develop validity for Unit and Integration Software migration DB2, WAS, environment o Detailing and tracking issues through to resolution o Executing Plan and finding root cause to issues	7/1/2015	6/30/2016	Task Order	1	None	0

New Procurements DoITT

Plan ID #	Description of Services to be Procured	Anticipated Contract Info				Similar Agency Roles	
		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT342	Cisco Implementation Services - CityWide Session Initiation Protocol (CW SIP) - Design and configure SIP integration between carriers and the City's infrastructure.	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT343	AS Installation Services - CityNet Internet Protocol (IP) Routing - Cisco Central Engineering Services will provide Subject Matter Experts to deliver best practice designs, configurations, lab testing, implementation support and leveraging various Cisco tools including the following: • Design Availability Analysis Procedure Tool to model proposed design for high availability • Cariden Tool for capacity planning • VITL tool for migration/implementation planning • Risk Analysis Tool for Software recommendations and bug scrubs	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT344	Ironport Vendor dedicated Cisco engineer will report to the project management team and work with infrastructure partners; responsibilities include: Vetting solution design, Solution installation and optimization, Initial migration activities	7/1/2015	6/30/2016	Task Order	1	None	0

New Procurements DoITT

Plan ID #	Description of Services to be Procured	Anticipated Contract Info				Similar Agency Roles	
		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT345	End of Life (EOL) Network Resource - tasked with: planning, design and engineering, configuration and implementation of the replacement of EOL hardware. Specifically, the End of Life project requires an Network Engineer resource to stage and deploy replacement of old DoITT network devices (Routers/Switches). The consultant will be required coordinate after hour changes with various agencies and manage the change control process. The consultant will also be required to implement the DoITT Router/Switch standard configuration template during the deployments and verify Layer1-3 connectivity.	7/1/2015	6/30/2016	Task Order	1	Network Engineer	3
FY16NDoITT346	Citrix Deployment Services - Provide analysis, design, and implementation of Citrix technologies. Onsite engineer from Two-Factor for implementation of the product with responsibilities: • Requirements gathering, confirmation of requirements and remote access and use cases • Design recommendations • Installation and configuration • Deployment of pilot users • Production roll-out, enrolling and authentication production users	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT347	Specialist II - Citrix Engineer - Citrix Remote Access project requires professional services resource to architect and build infrastructure to on-board new agencies to the Citrix platform; to migrate current agencies from old platform within DoITT data centers at 2MTC and New Jersey. Additional tasks include replacing end-of-life hardware as well as installation of new Netscaler appliances and XenApp. These tasks and responsibilities require each individual resource for a period of one year.	7/1/2015	6/30/2016	Task Order	1	None	0

New Procurements DoITT

FY16NDoITT348	Specialist II - Citrix Engineer - Citrix Remote Access project requires professional services resource to architect and build infrastructure to on-board new agencies to the Citrix platform; to migrate current agencies from old platform within DoITT data centers at 2MTC and New Jersey. Additional tasks include replacing end-of-life hardware as well as installation of new Netscaler appliances and XenApp. These tasks and responsibilities require each individual resource for a period of one year.	7/1/2015	6/30/2016	Task Order	1	None	0
FY16NDoITT349	Advanced Intercative eXective (AIX) Systems Engineer - responsible for: • Lead Build and Deployment activities for NYCServ infrastructure project; Defining project scope and deliverables; Defining detailed technical tasks and estimating resource requirements for deployment of new UNIX hardware and software • Design/Architecture of large-scale IBM AIX Tivoli Storage Manager (TSM)/Configuration Manager (CM) environments with a focus on high availability including the creation of detailed technical blueprints; Installation, configuration, tuning, and security analysis of IBM AIX hardware; Server sizing and capacity planning • Creating and maintaining project plans and timelines for project lifecycles • Reporting to upper management regarding project deliverables and status working with other technologists and application team members on deployment of complex projects on the IBM AIX platform	7/1/2015	6/30/2016	Task Order	1	AIX Systems Engineer	4
FY16NDoITT350	Advanced Intercative eXective (AIX) Systems Engineer - responsible for: • Lead Build and Deployment activities for NYCServ infrastructure project; Defining project scope and deliverables; Defining detailed technical tasks and estimating resource requirements for deployment of new UNIX hardware and software • Design/Architecture of large-scale IBM AIX Tivoli Storage Manager (TSM)/Configuration Manager (CM) environments with a focus on high availability including the creation of detailed technical blueprints; Installation, configuration, tuning, and security analysis of IBM AIX hardware; Server sizing and capacity planning • Creating and maintaining project plans and timelines for project lifecycles • Reporting to upper management regarding project deliverables and status working with other technologists and application team members on deployment of complex projects on the IBM AIX platform	7/1/2015	6/30/2016	Task Order	1	AIX Systems Engineer	4

New Procurements DoITT

Plan ID #	Description of Services to be Procured	Anticipated Contract Info				Similar Agency Roles	
		Contract Start	Contract End	Procurement Method	Fiscal Quarter	Job Titles	Headcount
FY16NDoITT351	Apple Support Specialist - Assist Apple Support and Operations with the support, management and deployment of Macintosh workstations throughout the City of New York during a staff search and high priority projects. Tasks will include hardware and software troubleshooting, updating and installing software, imaging workstations, deploying various Mac OS and iOS hardware, assisting with special projects, and assisting with the department's asset inventory.	7/1/2015	6/30/2016	Task Order	1	Apple Support Specialist	2
FY16NDoITT352	Backup Specialist - Maintain Backup software, disk based storage appliances & tape libraries. Troubleshoot client, server & appliance configurations to deliver optimal backup times & efficient use of resources. Provide the technical Backup and Recovery expertise to administer the NYCServ system and integrate it into DoITT's Backup and Recovery environment. • Working on the Backup, design, development, and support creation of all file system layouts, database environments, referential integrity relationships/constraints, security environment roles, etc. • Creating Backup backup/recovery process and design/implement the D/R plan (Site-B plan). • Developing NYCServ Backup operational procedures. • Developing UNIX shell scripts, design and set up the DB2 data archiving strategy, support ongoing NYCSERV Backup enhancements. • Setting up and administering the NYCServ Backup security environment. • Reviewing Backup design specifications to ensure adherence to best practice methods for database usage.	7/1/2015	6/30/2016	Task Order	1	NetBackup Administrator	4
FY16NDoITT353	Backup Specialist - Maintain Backup software, disk based storage appliances & tape libraries. Troubleshoot client, server & appliance configurations to deliver optimal backup times & efficient use of resources. Provide the technical Backup and Recovery expertise to administer the NYCServ system and integrate it into DoITT's Backup and Recovery environment. • Working on the Backup, design, development, and support creation of all file system layouts, database environments, referential integrity relationships/constraints, security environment roles, etc. • Creating Backup backup/recovery process and design/implement the D/R plan (Site-B plan). • Developing NYCServ Backup operational procedures. • Developing UNIX shell scripts, design and set up the DB2 data archiving strategy, support ongoing NYCSERV Backup enhancements. • Setting up and administering the NYCServ Backup security environment. • Reviewing Backup design specifications to ensure adherence to best practice methods for database usage.	7/1/2015	6/30/2016	Task Order	1	NetBackup Administrator	4

DOITT	ECTP Business Analyst to provide analysis and assessment of technical solutions for Public Safety. Identify, define ,and document detailed function/non- functional requirements and uses cases. Translate requirement and use cases into test procedures for SIT, SAT, and UAT with expected results for the solution, performance, and user acceptance testing.	1/1/2016	12/31/2016	Task Order	Business Analyst	6	11/20/2015

DOITT	ECTP NYPD and FDNY Radio SME to provide subject matter expertise for implementation of FDNY and NYPD radio at PSAC 2	1/1/2016	12/31/2016	Task order	None	0	11/20/2015
DOITT	ECTP Network Engineer to provide services related to Network device cabling and port assignments, network cabinet configuration and rack elevation diagrams, and documenting and updating Network related documents for PSAC2.	3/1/2016	2/28/2017	Task Order	Network Engineer	8	11/20/2015
DOITT	ECTP Sr. Network Architect to serves as a subject matter expert in relation to E911 operations, provide technical input to public safety operations, and interact with the NYPD and FDNY to facilitate technical resolution.	1/1/2016	12/31/2016	Task Order	None	0	11/20/2015
DOITT	ECTP Network SME to ensure the system design and architecture meet core technology requirements for the ECTP program	4/1/2016	3/31/2017	Task order	Network Engineer	8	11/20/2015
DOITT	ECTP Network SME to ensure the system design and architecture meet core technology requirements for the ECTP program.	4/1/2016	3/31/2017	Task order	Network Engineer	8	11/20/2015
DOITT	ECTP Business Analyst to provide analysis and assessment of technical solutions for Public Safety. Identify, define ,and document detailed function/non- functional requirements and uses cases. Translate requirement and use cases into test procedures for SIT, SAT, and UAT with expected results for the solution, performance, and user acceptance testing.	1/1/2016	12/31/2016	Task Order	Business Analyst	6	11/20/2015
DOITT	ECTP Public Safety IT Systems SME to review incidents associated with the production environment, monitor and report on performance an operational condition for Public safety systems and evaluate system efficiencies.	1/1/2016	12/31/2016	Task Order	None	0	11/20/2015
DOITT	ECTP E911 Project Management SME provide subject matter expertise and support to project lead in Telephony for the E911 work stream	4/1/2016	3/31/2017	Task Order	Telephony Project Manage	1	11/20/2015
DOITT	PSAC Text to 911 SME services to include delivering a Roadmap that must identify and document the steps and activities required to assess, plan, design, test, implement and maintain a comprehensive Text To 911 system, covering both Public Safety Answering Centers. This includes providing high level timelines and identifying the key decision points and critical dependencies that are necessary for the successful implementation of a Text To 9-1-1 system	1/1/2016	12/31/2016	Task order	None	0	11/20/2015
DOITT	Public Safety Answering Center (PSAC) Next Generation 911 SME for Emergency Communications Transformation Program-services to include delivering a roadmap that must identify and document the steps and activities required to assess, plan, design, test, implement and maintain a comprehensive 911 system, covering both two Public Safety Answering Centers. This includes providing high level timelines and identifying the key decision points and critical dependencies that are necessary for the successful implementation of a NG9-1-1 system.	1/1/2016	12/31/2016	Task Order	None	0	11/20/2015
DOITT	ECTP FDCAD GIS CT Engineer to research and evaluate Computer Aided Dispatch communications software and related solutions for the FDNY. Review and oversee the implementation of vendor developed system and product diagrams, documents, test plans and results to ensure the design and delivery of a sound CAD system that meets City needs.	4/1/2016	3/31/2017	Task Order	None	0	11/20/2015
DOITT	ECTP Net Scout Engineer to provide requirements gathering, design and implementation tasks related to successfully building a complex E911 monitoring system	1/1/2016	12/31/2016	Task Order	None	0	11/20/2015
DOITT	ECTP Remedy PM SME to project management and subject matter expertise related to Remedy upgrades and implementation.	1/1/2016	12/31/2016	Task Order	None	0	11/20/2015
DOITT	ECTP Monitoring Technical PM to provide technical project management services related to the successful design and build of a e911 monitoring system	1/1/2016	12/31/2016	Task order	None	0	11/20/2015

DOITT	Systems Integrator or related professional services for the ECTP in support of design, build, and implementation of several work streams for the program including; Networks, Logging and Recording, E911, CAD, Radio, Workforce Scheduling. Roles to include Subject Matter Experts, Engineers, Business Analyst, Integration Architects, E911 SME's, IT Security Specialist, and other consultants to provide Public Safety IT expertise.	1/1/2016	12/31/2017	Task Order	None	0	11/20/2015
DOITT	Systems Integrator or related professional services in Support of Public Safety Technology Refresh in support of several work streams for the program including; Networks, Logging and Recording, E911, Radio. Roles to include Subject Matter Experts, Engineers, Business Analyst, Integration Architects, E911 SME's, IT Security Specialist,, and other consultants to provide Public Safety IT expertise.	1/1/2016	12/31/2018	Task Order	Network Engineer, Telephony PM. Business Analyst, Radio Engineer	16	11/20/2015
DOITT	Development, Enhancement and Maintenance of the Build it Back CMS - Professional services are required to develop additional modules in Dynamics CRM, make enhancements to existing features, and perform maintenance of the system, including bug fixes. Additional development is needed to complete new modules that are needed to support new high priority programmatic initiatives, with a focus on post-construction activities including warranty, recapture and subrogation, auditing, financial closeout and record archiving.	1/1/2016	6/30/2019	Task order	Project Manager, Business	30	11/20/2015
DOITT	Data Integration and Exchange -Professional services are required to develop new data exchanges with private and public entities, and maintain existing exchanges. Depending on the business need and the technology capability of the other party, data exchange and integration projects may be unidirectional, bidirectional and utilize a variety of formats such as text files and xml. This project includes enhancement and maintenance of HRO reporting databases, business intelligence portal and data repositories. This work will fulfill the information technology needs of the Build it Back program as homes complete construction, followed by additional data integration needs due to financial activities associated with recapture and subrogation, ICC (Increased Cost of Compliance) claims, and fulfillment of CDBG-DR reporting requirements.	1/1/2016	6/30/2019	Task Order	Data Integration Business Analyst, Data Integration QA Analyst, Integration and Reporting Developer, QA Analyst	18	11/20/2015
DOITT	Infrastructure Professional services are needed for new infrastructure initiatives within the Microsoft Azure hosting environment utilized by HRO, such as a full IT security audit (including ethical hacking), core software upgrades, and reengineering the MS SharePoint architecture. In addition, as part of the Build it Back program close out process, the production CMS applications and associated components will need to be migrated to a reduced footprint in a city-specified permanent location. Maintenance will be required, including server administration and patching, system performance monitoring, and maintenance of local desktops and IT infrastructure	1/1/2016	6/30/2019	task order	Senior QA	4	11/20/2015
DOITT	IT Security Specialist for PSAC Refresh to provide subject matter expertise as it relates to IT Security, evaluate the current technology in PSAC and develop a strategy to upgrade that technology to that of PSAC 2	1/1/2016	12/31/2016	Task order	None	0	11/20/2015
DOITT	IT Security Specialist for PSAC Refresh to provide subject matter expertise as it relates to IT Security, evaluate the current technology in PSAC and develop a strategy to upgrade that technology to that of PSAC 2	1/1/2016	12/31/2016	Task order	None	0	11/20/2015

DOITT	Grant Tracking System (GTS), a technology system that can address the needs of the Homeland Security Grant Tracking processes. The system must fully meet the functional requirements of the current system in place as well as address the new requirements and enhancements that we have received from our user community. These requirements include improving the current reporting abilities, and provide better user experience overall through an intuitive user web interface and easily adaptive screen experience. The current GTS system has been operational in a web platform as well as a on a Windows Mobile platform using Motorola MC-50 devices. The new GTS will improve and enhance the user experience and the mobile apps have to be device neutral and fully functional on iOS, Android, and Windows Mobile platforms.	1/1/2016	12/31/2016	Intergovernmental	none	0	11/20/2015
