SUPERSEDED BY C.O. 2631

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there by any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code; or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Form—244-1935 Certificate of Occupancy. 8A-2087-35-Bu[illegible] 40

DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No.** [illegible] **193** 7

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York March 11, 19 37

THIS CERTIFIES that the building located on Block 729, Lot 20

known as 427 West 21st Street, 25' front

under a permit, Application No. 3505 alt of 1936, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of nonfireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar					Storage
1st Story	120			3	Garage for two (2) cars

This certificate is issued to Arthur Weiser, Architect
240 Madison Avenue, City, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined.

Commissioner of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Joseph E. Herman

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§.646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E 1527-05. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions.

de minimis conditions – are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not *recognized environmental conditions*.

historical recognized environmental condition(s) (HREC) - environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently. The final decision rests with the *environmental professional* and will be influenced by the current impact of the *historical recognized environmental condition* on the *property*. If a past release of any *hazardous substances* or *petroleum products* has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency (for example, as evidenced by the issuance of a no further action letter or equivalent), this condition shall be considered a *historical recognized environmental condition*.

material threat – a physically observable or *obvious* threat which is reasonably likely to lead to a release that, in the opinion of the *environmental professional*, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a *hazardous substance* and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

threat to human health or the environment – a substantial risk of harm to public health or the environment resulting from the presence or likely presence of an existing release, a past release, or a *material threat* of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*. An example might include a release of a *hazardous substance* in concentrations exceeding applicable governmental agency standards under conditions that could reasonably and foreseeably result in substantial exposure to humans or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment.

generally would not be the subject of an enforcement action – the likelihood that an environmental condition would not be subject to enforcement action if brought to the attention of appropriate governmental agencies. If the circumstances suggest an enforcement action would be less likely than not, then the condition is considered to be generally not the likely the subject of an enforcement action.

1.0 EXECUTIVE SUMMARY

WCD Consultants (WCD) retained ATC Associates Inc. (ATC) to perform a Phase II Environmental Site Investigation (Phase II ESI) of the parking lots above the Long Island Railroad (LIRR) 9th Avenue Train Yards. The property consists of three (3) individual parking lots located west of 9th Avenue; two along West 33rd Street and one along West 31st Street in Manhattan, New York (herein after referred to as the "Site"). The Site encompasses approximately 1.57 acres of land and is currently developed with three (3) individual asphalt paved parking lots which are operated by separate management companies. The LIRR 9th Avenue Train Yards are located in a recessed area 60 feet below the parking lots and are, according to the New York City Department of Finance, identified as occupying portions of the same block and lots (Block 729; Lots 50 &60) as the Site. Please note that although the Train Yards occupy the same property, they are not considered part of the Site for this investigation. Refer to Figure 1 for a United Stated Geological Survey (USGS) Site Area Map. The purpose of this investigation was to evaluate the subsurface conditions at the Site to assess whether it has been impacted by the *recognized environmental conditions* identified in the Phase I Environmental Site Assessment (ESA) prepared by ATC and dated September 10, 2007.

The Phase I ESA identified the following *recognized environmental conditions* associated with the Site:

- The Site is identified as having a City Environmental Quality Review (CEQR) Declaration (also known as an "E" designation) for "Hazmat, Noise and Air";
- Historical use of the Site and surrounding area as a train yard, an auto repair/mechanical shop, filling stations, printing facilities, motor shops, metalwork companies and dying facilities; and,
- ATC's review of an Environmental Investigation Report prepared by Hazardous Waste Engineering Consultants (HWE) dated April 9, 1991, identified the presence of petroleum related contamination, metals and polychlorinated biphenyls (PCBs) contamination at the LIRR Train Yards.

It should be noted that although the LIRR Train Yards were included as part of the Phase I ESA and occupy the same block and lots as the parking lots, the LIRR Train Yards were not included as part of the Site for this investigation. Therefore, the *recognized environmental condition* associated with the LIRR Train Yard was not assessed. Section 2.1 discusses the abovementioned *recognized environmental conditions in detail.*

The review of New York City Department of City Planning and New York City Department of Building records, as well as the review of the regulatory agencies database identified the Site as having a City Environmental Quality Review (CEQR) Declaration (also known as an "E" designation) for "Hazmat, Noise and Air". An "E" designation is assigned to certain blocks or lots by a New York City agency (i.e., New York City Department of Environmental Protection, New York City Department of City Planning) as a result of an environmental assessment performed in conjunction with a zoning map amendment. This designation is assigned when there is physical or historical evidence of uses related to hazardous materials, air quality and noise pollution. The scope of this Phase II ESI was developed to assess the hazardous materials portion of the "E" designation for the Site. The Phase II ESI consisted of a geophysical survey and the advancement of fifteen (15) soil borings to facilitate the collection of the thirty-four (34) soil samples; three (3) of which were composite samples of each lot for future analysis should it be required for disposal purposes.

The results of the geophysical survey did not identify any underground storage tanks (USTs) or anomalies consistent in size and shape of USTs in any of the accessible areas of the Site. However, due to the presence of several scattered anomalies, locations of proposed soil borings were relocated to avoid conflict.

Fifteen (15) soil borings were advanced from grade to refusal where bedrock was encountered at depths ranging from 7 to 24 feet below grade. Refer to Figure 2, the attached Soil Boring Location Plan for locations of soil borings. Continuous soil quality field screening was performed at all boring locations. Visual and olfactory methods of screening were utilized during the field efforts to identify evidence of potential contamination. Additionally, a portable photo ionization detector (PID) was used to obtain real-time qualitative measurements of volatile organic vapors. Up to three (3) soil samples were collected from each boring; one from the surface (0-2 feet bgs); one from historic fill material; and one from most impacted zone of each boring based on field screening (e.g., staining, odor, and PID reading). However, with the exception of some minor staining observed at SB-02, none of the soil borings contained evidence of impacts and therefore only two soil samples were collected from each boring; a third sample was collected from the impacted zone at SB-02. Boring logs are provided in Appendix A.

The Site is underlain by fill material consisting of glass, metal, ash, concrete, asphalt, wood fragments, brick, and course to fine sand. The presence of fill materials were most evident in the southern parking lot along West 31st Street in SB-11 through SB-15 where fill material was observed at depths of 10 to 15 feet below grade. In the remaining areas, fill materials were observed to a lesser extent from approximately 6 to 12 feet below grade. Soils encountered below the fill material consisted of course to fine sands with silts and clays ranging in color from light browns to dark reddish browns underlain by heavily weathered Manhattan Schist were encountered below fill materials. Visual evidence of impacts (other than the identified fill material) was observed only in a small interval at SB-02 approximately 11 feet below grade.

A total of thirty-four (34) soil samples were collected and submitted to the laboratory as part of this investigation; three (3) of which were composite samples of each lot for future analysis should it be required for disposal purposes. The remaining thirty-one (31) soil samples were submitted and analyzed for target compound list (TCL) volatile organic compounds (VOCs), TCL semi volatile organic compounds (SVOCs), target analyte list (TAL) metals, polychlorinated biphenyls (PCBs), and pesticides. The soil sampling results were then compared to the New York State Department of Environmental Conservations (NYSDEC) Technical and Administrative Guidance Memorandum (TAGM) 4046 Recommended Soil Cleanup Objectives (RSCOs) to evaluate whether remedial actions were required. Additionally, soil samples whose lead concentrations exceeded Eastern USA Soil Background Levels were analyzed for Toxicity Characteristic Leaching Procedure (TCLP) for lead.

The soil analytical results indicate concentrations of VOCs, SVOCs, metals, PCBs, and pesticides above the laboratory MDL for samples collected. Concentrations of SVOCs above the NYSDEC TAGM RSCOs were detected in seventeen (17) of the thirty-one (31) soil samples analyzed. One or more concentrations of metals were detected above NYSDEC TAGM RSCOs and/or Eastern USA Soil Background Levels in each of the soil samples analyzed. Concentrations of lead in fourteen (14) of the soil samples collected exceed their respective Eastern USA Background levels and were therefore analyzed for TCLP lead. According to the TCLP results, only SB-03 (5-10') contained concentrations of lead in leachate above 5.0 mg/l and therefore meets the EPA definition of hazardous material. Concentrations of VOCs, PCBs, and pesticides were not detected above their respective NYSDEC TAGM RSCOs in any of the soil samples collected.

ATC does not recommend additional Site characterization sampling at this time, provided that any fill

material disturbed during development and/or construction of the Site will be handled as regulated waste by default and sampled appropriately for determination of handling and disposal requirements. Additionally, soils within the vicinity of SB-03 which could potentially contain hazardous concentrations of lead should be handled separately as hazardous material and procedures should be followed to ensure human health is protected during excavation and/or construction activities. At time of construction, procedures should be in place to properly remove, handle and transport UST(s) should they be encountered during excavation and/or construction pertaining to the redevelopment of the Site; however they are not expected to be present. If landscaped areas are incorporated into the development of the Site, ATC recommends a 24-inch certified-clean soil layer or equivalent be placed over on-site soils in these areas.

ATC recommends a submittal of the Phase I ESA, Phase II ESI, a Remedial Action Plan (RAP), and a Construction Health and Safety Plan (CHASP) to the NYCDEP for approval prior to any construction activities proposed for the Site.

2.0 INTRODUCTION

WCD Consultants (WCD) retained ATC Associates Inc. (ATC) to perform a Phase II Environmental Site Investigation (Phase II ESI) of the parking lots above the Long Island Railroad (LIRR) 9th Avenue Train Yards. The property consists of three (3) individual parking lots located west of 9th Avenue; two along West 33rd Street and one along West 31st Street in Manhattan, New York (herein after referred to as the "Site"). The Site encompasses approximately 1.57 acres of land and is currently developed with three (3) individual asphalt paved parking lots which are operated by separate management companies. The LIRR 9th Avenue Train Yards are located in a recessed area 60 feet below the parking lots and are, according to the New York City Department of Finance, identified as occupying portions of the same block and lots (Block 729; Lots 50 & 60) as the Site. Please not that although the Train Yards occupy the same property, they are not considered as part of the Site for this investigation. Refer to Figure 1 for a United Stated Geological Survey (USGS) Site Area Map. The purpose of this investigation was to evaluate the subsurface conditions at the Site to assess whether it has been impacted by the *recognized environmental conditions* identified in the Phase I Environmental Site Assessment (ESA) prepared by ATC and dated September 10, 2007.

2.1 Background

ATC performed a Phase I Environmental Site Assessment (ESA) for Safeguard dated September 10, 2007. The purpose of the ESA was to identify the presence or likely presence, use, or release on the Site of hazardous substances or petroleum products as defined in American Society for Testing and Materials (ASTM) Practice E 1527-05 as a *recognized environmental condition.*

Recognized Environmental Conditions

- The review of New York City Department of City Planning and New York City Department of Building records, as well as the review of the regulatory agencies database identified the Site as having a City Environmental Quality Review (CEQR) Declaration (also known as an "E" designation) for "Hazmat, Noise and Air". An "E" designation is assigned to certain blocks or lots by a New York City agency (i.e., New York City Department of Environmental Protection, New York City Department of City Planning) as a result of an environmental assessment performed in conjunction with a zoning map amendment. This designation is assigned when there is physical or historical evidence of uses related to hazardous materials, air quality and noise pollution. The classification of the Site with an "E" designation is considered to represent a *recognized environmental condition* for the Site.

- The review of the historical uses of the Site identified the Site to be used as a train yard, a car repair shop, filling stations, auto repair and mechanical shop. Identified on the adjoining properties were a filling station, the train yards, printing facilities, motor shops, metalwork companies, and dying facilities. These identified historical activities typically use petroleum products, solvents, and other hazardous chemicals in their routine operations. Therefore, the historical uses of the Site and surrounding area are considered to represent a *recognized environmental condition* for the Site. Additionally, notations regarding the presence of underground storage tanks (USTs) were identified on both the historical Sanborn Fire Insurance Maps obtained from Environmental Data Resources (EDR) and certificates of occupancy obtained from the New York City Department of Buildings. The Site was not identified on any of the NYSDEC petroleum bulk storage databases; however since the structures were demolished more than 40 years ago, no records are expected to be found. Any buried tanks that were not removed during demolition operations could potentially remain on-Site, either located in collapsed basement or buried.

- ATC's review of an Environmental Investigation Report prepared by Hazardous Waste Engineering Consultants (HWE) dated April 9, 1991, identified the presence of petroleum related contamination, metals and polychlorinated biphenyls (PCBs) contamination at the LIRR Train Yards. No remedial action or additional investigation reports were provided for review. Since the contamination may still be present at the Site, ATC considers the reported contamination to represent a *recognized environmental condition* for the Site.

It should be noted that although the LIRR Train Yards were included as part of the Phase I ESA and occupy the same block and lots as the parking lots, the LIRR Train Yards were not included as part of the Site for this investigation. Therefore, the *recognized environmental condition* associated with the LIRR Train Yard was not assessed.

2.2 Scope of Work

The project scope of work included the following:

- Preparation of a Site-Specific Health and Safety Plan consistent with applicable and appropriate requirements;
- A utility clearance in the areas of the proposed soil borings;
- The advancement of fifteen (15) soil borings; and,
- The collection of thirty-four (34) soil samples for laboratory analysis.

3.0 PHYSICAL SITE SETTING

The Site consists of three (3) individual parking lots located west of 9th Avenue; two along West 33rd Street and one along West 31st Street in Manhattan. The general vicinity of the Site is comprised of land that slopes downward to the south and west. The area is characterized by a mixture of commercial and residential usage. Access is available to the northern two lots from the north via West 33rd Street and to the southern lot from the south via West 31st Street.

3.1 Topography

According to the United States Geological Survey (USGS) 7.5-Minute Quadrangle, *Central Park, New York, NY* dated 1995; the Site is located approximately 28 feet above mean sea level (MSL). The contour lines in the vicinity of the Site indicate that the area slopes gradually downward to the southwest. The Hudson River is located approximately one-half of a mile west of the Site. A copy of the topographic map is included as Figure 1.

3.2 Geology

The bedrock in the vicinity of the Site is Precambrian in age and consists of gneiss and schists that are part of the Manhattan Prong sequence, which is a portion of the Appalachian Piedmont. The older of the Manhattan Prong sequence, found in central Manhattan and referred to as the Manhattan Schist, is overlain by the Hartland Formation, a granulite. Both units are of very high metamorphic grade having been metamorphosed at a great depth in the earth's crust and later thrust to the surface during the Appalachian mountain building episode.

During the last glacial period, ending approximately 12,000 to 15,000 years ago and referred to as the Wisconsin, a mantling of glacial drift was deposited over the older bedrock. In places, the glacial

deposits are unsorted until characterized by boulder to pebble-sized rocks erratically intermixed with a clay matrix. Elsewhere, the deposits are sorted and stratified sand and gravel, which is the result of glacial outwash.

The results of the Phase II ESI indicated that shallow bedrock consisting of Manhattan Schist was encountered below the surface at the Site ranging in depth from 7 to 24 feet below grade.

3.3 Soils

The results of the Phase II ESI revealed that soils beneath the Site contain fill materials consisting of glass, metal, ash, concrete, asphalt, wood fragments, brick, and course to fine sand to depths ranging from 6 to 15 feet below grade. Coarse to fine sand with silts and clay underlain by heavily weathered Manhattan Schist was encountered below fill materials.

4.0 GEOPHYSICAL INVESTIGATION

On March 12 and 13, 2008 ATC and NOVA Geophysical & Environmental Services of Forest Hills, New York (NOVA) were on-Site to perform a geophysical survey to identify subsurface structures, utilities, and anomalies in the areas of the proposed soil boring locations, as well as identify the location, size, and orientation of suspected USTs, if present. The geophysical survey cleared all soil borings from subsurface structures and utilities so that they may be avoided during drilling activities. The geophysical survey consisted of Noggins ground penetrating radar with 750 megahertz (MHz) antenna, Mala's Utility Locator and GPR with 350 MHz antenna and Conquest Concrete Image Reader with 1,000 MHz antenna. A survey grid was established across accessible areas of the Site and GPR data was collected in all areas where access was provided. Reconnaissance GPR profiles were completed in various orientations and lengths to determine the general characteristics of the subsurface. Any areas where the geophysical survey identified subsurface structures or utilities located in the vicinity of the proposed soil borings; the locations were relocated to avoid conflict. Figure 2 presents the soil boring locations at the Site.

No suspect USTs or anomalies consistent in size and shape of USTs were identified in accessible areas during the geophysical survey. Due to the presence of several scattered anomalies in locations of proposed soil borings, the locations were relocated to avoid conflict. Refer to Appendix A for a copy of the geophysical survey report.

5.0 SOIL SAMPLING ACTIVITIES

On March 12 and 13, 2008, ATC was on Site with Zebra Environmental Corp. of Lynbrook, New York (Zebra) to perform a Phase II ESI at the Site. The Phase II ESI consisted of the advancement of fifteen (15) soil borings to facilitate the collection of the thirty-four (34) soil samples; three (3) of which were composite samples of each lot for future analysis should it be required for disposal purposes. All soil borings were advanced from grade to refusal where bedrock was encountered at depths ranging from 7 to 24 feet below grade. Groundwater was not encountered at any of the boring locations. Refer to Figure 2, the attached Soil Boring Location Plan for locations of soil borings. Continuous soil quality field screening was performed at all boring locations. Visual and olfactory methods of screening were utilized during the field efforts to identify evidence of potential contamination. Additionally, a portable photo ionization detector (PID) was used to obtain real-time qualitative measurements of volatile organic vapors. Up to three (3) soil samples were collected from each boring; one from the surface (0-2 feet bgs); one from historic fill material; and one from most impacted zone of each boring based on field screening (e.g., staining, odor, and PID reading). However, with the exception of some minor staining observed at SB-02, none of the soil borings

contained evidence of impacts and therefore only two soil samples were collected from each boring; a third sample was collected from the impacted zone at SB-02. Boring logs are provided in Appendix A.

The presence of fill materials were most evident in the southern parking lot along West 31st Street in SB-11 through SB-15 where fill material was observed at depths of 10 to 15 feet below grade. In the remaining areas, fill materials were observed to a lesser extent from approximately 6 to 12 feet below grade. Soils encountered below the fill material consisted of course to fine sands with silts and clays ranging in color from light browns to dark reddish browns with some rock fragments. Visual evidence of impacts (other than the identified fill material) was observed only in a small interval at SB-02 approximately 11 feet below grade. Continuous field screening of soil samples with a PID did not indicated levels of volatile organic vapors in any of the soil samples collected.

Soil samples were placed in appropriate laboratory supplied containers and cooled to 4 degrees centigrade (wet ice) during shipment to the laboratory. ATC completed all chain of custody documents prior to sample shipment. Samples were submitted to AmeriSci Boston Environmental Laboratories (AmeriSci) in Weymouth, Massachusetts (NY State ELAP ID No. 10982) and analyzed for target compound list (TCL) volatile organic compounds (VOCs) via Environmental Protection Agency (EPA) Method 8260, TCL semi volatile organic compounds (SVOCs) via EPA Method 8270, target analyte list (TAL) metals via EPA method 6010, polychlorinated biphenyls (PCBs), via EPA method 8081, and pesticides via EPA Method 8081. The soil sampling results were then compared to the NYSDEC Technical and Administrative Guidance Memorandum (TAGM) 4046 Recommended Soil Cleanup Objectives (RSCOs) to evaluate whether remedial actions were required. Additionally, soil samples with concentrations of lead that exceed Eastern USA Soil Background Levels were analyzed for Toxicity Characteristic Leaching Procedure (TCLP) for lead.

6.0 SOIL ANALYTICAL RESULTS

Thirty-one (31) of the thirty-four (34) soil samples collected from the fifteen (15) soil borings were analyzed for TCL VOCs, TCL SVOCs, TAL metals, PCBs, and pesticides. The remaining three (3) composite soil samples were submitted to the laboratory and help for analysis to be determined. Soil sample analytical results were compared to NYSDEC TAGM RSCOs. A summary of the soil sample analytical results is provided in Tables 1 through 5 and a complete copy of the analytical report is provided in Appendix B.

6.1 Volatile Organic Compounds (VOCs) in Soil

The laboratory analytical results indicate that detected concentrations of VOCs, specifically acetone in SB-07 (5-10’) and SB-11 (0-2’), and tetrachloroethene (PCE) in SB-11 (5-10’), SB12 (0-2’), SB-12 (5-10’), SB13 (0-2’), SB-13 (5-10’), and SB-14 (0-2’) were below their respective NYSDEC TAGM RSCOs. No other VOCs were detected above their laboratory method detection limits (MDL) in the remaining soil samples collected. A summary of the analytical results for TCL VOC analysis is presented in Table 1.

6.2 Semi-Volatile Organic Compounds (SVOCs) in Soil

The laboratory analytical results indicate that concentrations of one or more of the following SVOCs were detected above NYSDEC TAGM RSCOs in seventeen (17) of the thirty-one (31) soil samples analyzed: benzo(a)anthracene; benzo(a)pyrene; benzo(b)fluoranthene; benzo(k)fluoranthene; chrysene; dibenzo(a,h)anthracene; and indeno(1,2,3-cd)pyrene. With the exception of detectable concentrations of chrysene, fluoranthene, phenanthrene, and pyrene in SB-04 (5-10') and SB-05 (0-2'), none of the remaining samples collected contained detectable concentrations of SVOCs above their respective laboratory MDLs. A summary of the analytical results for TCL SVOC analysis is presented in Table 2.

6.3 Target Analyte List (TAL) Metals in Soil

The laboratory analytical results indicate that concentrations of the following metals were detected above NYSDEC TAGM RSCOs and/or Eastern USA Soil Background Levels in each of the soil samples analyzed: arsenic; barium; cadmium; calcium; chromium; copper; iron; lead; magnesium; mercury; nickel; and zinc. Concentrations of mercury were detected at levels an order of magnitude above Eastern USA Background levels in soil sample SB-09 (0-2') and SB-12 (0-2'). Additionally, concentrations of lead were detected in SB-02 (5-10'), SB-03 (0-2'), SB-03 (5-10'), SB-04 (0-2'), SB-04 (5-10'), SB-06 (0-2'), SB-07 (0-2'), SB-07 (5-10'), SB-08 (0-2'), SB-08 (5-10'), SB-09 (0-2'), SB-11 (5-10'), SB-14 (0-2') and SB-15 (0-2') at concentrations ranging from 501 ppm in SB-04 (0-2') to 2,150 ppm in SB-03 (0-2'). These samples, which exceed the Eastern USA Background levels of 200-500 ppm, were additionally analyzed for TCLP lead to assess whether the elevated concentrations would meet the USEPA definition of hazardous material; i.e., greater than 5.0 milligrams per liter (mg/l) present in the leachate. A summary of the analytical results for TAL Metals analysis is presented in Table 3, and a summary of TCLP lead in soil is presented in Table 6.

6.4 Polychlorinated Biphenyls (PCBs) in Soil

The laboratory results indicate that with the exception of aroclor 1254 in SB-01 (0-2') and aroclor 1260 in SB-02 (0-2') and SB-15 (0-2') detected well below their respective NYSDEC TAGM RSCOs, no detectable concentrations of PCBs were present in any of the soil samples collected. A summary of the analytical results for PCB analysis is presented in Table 4.

6.5 Pesticides in Soil

The laboratory results indicate that concentrations of 4,4'-DDD, 4,4'-DDE, and 4,4'-DDT were detected in samples SB-01 (0-2'), SB-01 (5-10'), SB-02 (0-2'), SB-14 (5-10'), and SB-15 (0-2'). 4,4'-DDT was also detected in samples SB-08 (0-2'), SB-08 (5-10'), SB-09 (0-2'), and SB-10 (0-2'). However, all detectable concentrations of pesticides were found to be at least one order of magnitude below their respective NYSDEC TAGM RSCOs. No detectable concentrations of pesticides were present in any of the remaining soil samples collected. A summary of the analytical results for PCB analysis is presented in Table 5.

7.0 CONCLUSIONS

The Site is underlain by fill material consisting of glass, metal, ash, concrete, asphalt, wood fragments, brick, and course to fine sand. The presence of fill materials were most evident in the southern parking lot along West 31st Street in SB-11 through SB-15 where fill material was observed at depths of 10 to 15 feet below grade. In the remaining areas, fill materials were observed to a lesser extent from approximately 6 to 12 feet below grade. Soils encountered below the fill material consisted of course to fine sands with silts and clays ranging in color from light browns to dark reddish browns with heavily weathered Manhattan Schist. Refusal was encountered on bedrock at all soil boring locations at depths ranging from 7 to 24 feet below grade. Groundwater was not encountered at any of the boring locations. Visual evidence of impacts (other than the identified fill material) was observed only in a small interval at SB-02 approximately 11 feet below grade. Continuous field screening of soil samples with a PID did not indicated levels of volatile organic vapors in any of the soil samples collected.

The soil analytical results indicate concentrations of VOCs, SVOCs, metals, PCBs, and pesticides above the laboratory MDL for samples collected. Concentrations of SVOCs above the NYSDEC TAGM RSCOs were detected in seventeen (17) of the thirty-one (31) soil samples analyzed. One or more concentrations of metals were detected above NYSDEC TAGM RSCOs and/or Eastern USA Soil Background Levels in each of the soil samples analyzed. Concentrations of lead in fourteen (14) of the soil samples collected exceed their respective Eastern USA Background levels and were therefore analyzed for TCLP lead. According to the TCLP results, only SB-03 (5-10') contained concentrations of lead in leachate above 5.0 mg/l and therefore meets the EPA definition of hazardous material. Concentrations of VOCs, PCBs, and pesticides were not detected above their respective NYSDEC TAGM RSCOs in any of the soil samples collected.

8.0 RECOMENDATIONS

ATC does not recommend additional Site characterization sampling at this time, provided that any fill material disturbed during development and/or construction of the Site will be handled as regulated waste by default and sampled appropriately for determination of handling and disposal requirements. Additionally, soils within the vicinity of SB-03 which could potentially contain hazardous concentrations of lead should be handled separately as hazardous material and procedures should be followed to ensure human health is protected during excavation and/or construction activities. Additionally, at time of construction, procedures should be in place to properly remove, handle and transport UST(s) should they be encountered during excavation and/or construction pertaining to the redevelopment of the Site. If landscaped areas are incorporated into the development of the Site, ATC recommends a 24-inch certified-clean soil layer or equivalent be placed over on-site soils in these areas.

ATC recommends a submittal of the Phase I ESA, Phase II ESI, a Remedial Action Plan (RAP), and a Construction Health and Safety Plan (CHASP) to the NYCDEP for approval prior to any construction activities proposed for the Site.

NOTE:
mg/kg - milligram per kilogram
ND - Analyte not detected at method detection limit
SB - Site Background
NS - No Standard
Bold - Concentration above method detection limit
Shading - Detected concentration exceeds TAGM RSCO
Underline - Detected concentration exceeds Eastern Soil Background Concentration
*Background Levels for lead vary widely. Average levels in undeveloped, rural areas may range from 4-61 ppm. Average background levels in metrolpolitan or suburban areas or near highways are much higher and typically range from 200 - 500 ppm.

NOTE:
mg/kg - milligram per kilogram
ND - Analyte not detected at method detection limit
SB - Site Background
NS - No Standard
Bold - Concentration above method detection limit
Shading - Detected concentration exceeds TAGM RSCO
Underline - Detected concentration exceeds Eastern Soil Background Concentration
*Background Levels for lead vary widely. Average levels in undeveloped, rural areas may range from 4-61 ppm. Average background levels in metrolpolitan or suburban areas or near highways are much higher and typically range from 200 - 500 ppm.

Matrix: SOIL

Parameter	Method	Results	Units	PQL	Tech	Analysis Date/Time	Qual
Sample Not Analyzed						00/00/0000 / : 0	

Certifications: MA: MA069 NY:10982 CT: PH0119 RI:A45 NJ: 59744

ND = Not Detected **PQL= Practical Quantitation Limit**

Customer: ATC Associates

Workorder No. 0803-00119

G2	Surrogate recovery was above acceptance limits.
GX	Due to sample matrix effects, the surrogate recovery was outside acceptance limits.
I	Internal Standard recovery was outside of method limits. Matrix interference was confirmed by reanalysis.
R10	The RPD between the primary and confirmatory analysis exceeded 40%. Per method 8000B, the lower value was reported due to apparent chromatographic problems.
RL3	Reporting limit raised due to high concentrations of non-target analytes.

To the best of my knowledge this report is true and accurate.

Authorized By: Nicole Cortese Date: 3-24-08

Nicole Cortese, Environmental Laboratory Manager

NOTE: All solid results are reported on a dry weight basis unless otherwise noted.

Sample Receiving Form

CLIENT:	ATC NY	WORKORDER:	0803-0119
CLIENTS JOB:	9th St train Yard	RECEIVED BY:	MD
RECEIVED DATE:	03.13.07	SHIPPING METHOD:	e.c.
TEMP UPON RECEIPT:	5 °C		

"No" responses must be explained in the comment section below.

Checklist	YES	NO	NA
Were custody seals on shipping container(s) intact? Check "NA" if no seals, or if containers were hand delivered.	✓		
Were Chain of Custody Forms included with the samples?	✓		
Were Chain of Custody Forms properly filled out (ink, signed, etc.)	✓		
Were all containers received in good condition (Check for breakage/ leaks)?	✓		
Were all containers labeled with required information (Sample Id, date, signed, analysis, preservation)?	✓		
Were the correct containers used for the tests indicated?	✓		
Were proper preservation techniques indicated?			✓
Were samples received within holding times? If "NO" nonconformance form is required.	✓		
Were all VOA bottles checked for the presence of air bubbles? If bubbles were found please note in the comment section.			✓
Were samples in direct contact with wet ice? If "NO" check one: ☐ Blue Ice ☐ No Ice	✓		
Is sample temperature recorded ? If "NO" check one: ☐ Unable to record ☐ Temp taken near samples	✓		
Were pHs of samples checked and recorded on the COC forms?			✓
Did the laboratory accept samples?	✓		
Will samples be subcontracted? If "yes" list subcontractor and tests in specified sections below.		✓

Customer: ATC Associates

Workorder No. 0803-00126

Sample: 019 WC (LOT 2)
Collection Date: 03/13/2008 Time: 8:00:00AM **Received Date: 03/14/2008 Time: 9:00:00AM**
Matrix: SOIL

Parameter	Method	Results	Units	PQL	Tech	Analysis Date/Time	Qual
Sample Not Analyzed						00/00/0000 / : 0	

Sample: 020 WC (LOT 3)
Collection Date: 03/13/2008 Time: 11:15:00AM **Received Date: 03/14/2008 Time: 9:00:00AM**
Matrix: SOIL

Parameter	Method	Results	Units	PQL	Tech	Analysis Date/Time	Qual
Sample Not Analyzed						00/00/0000 / : 0	

E	Concentration exceeds the calibration range and result is semi-quantitative.
G2	Surrogate recovery was above acceptance limits.
G6	Surrogate recovery was below acceptance limits.
GX	Due to sample matrix effects, the surrogate recovery was outside acceptance limits.
I	Internal Standard recovery was outside of method limits. Matrix interference was confirmed by reanalysis.
M6	Matrix Spike recovery was outside the method control limits.
MHA	Due to high levels of analyte in the sample, the MS/MSD calculation does not provide useful spike recovery information. See Blank Spike (LCS).
R10	The RPD between the primary and confirmatory analysis exceeded 40%. Per method 8000B, the lower value was reported due to apparent chromatographic problems.
RL3	Reporting limit raised due to high concentrations of non-target analytes.
RL7	Sample required a dilution due to high concentrations of target analytes.

To the best of my knowledge this report is true and accurate.

Authorized By: Robert H. Bell Date: 03-24-08

Robert Bell, Laboratory Director

NOTE: All solid results are reported on a dry weight basis unless otherwise noted.

Certifications: MA: MA069 NY:10982 CT: PH0119 RI:A45 NJ: 59744

ND = Not Detected **PQL= Practical Quantitation Limit**

Sample Receiving Form

CLIENT: ATC NY	WORKORDER: 0803-00126
CLIENTS JOB: 9th Ave Train Yard	RECEIVED BY: MB
RECEIVED DATE: 03-14-08	SHIPPING METHOD: E-C.
TEMP UPON RECEIPT: 5°C	

"No" responses must be explained in the comment section below.

Checklist	YES	NO	NA
Were custody seals on shipping container(s) intact? Check "NA" if no seals, or if containers were hand delivered.	✓		
Were Chain of Custody Forms included with the samples?	✓		
Were Chain of Custody Forms properly filled out (ink, signed, etc.)	✓		
Were all containers received in good condition (Check for breakage/ leaks)?	✓		
Were all containers labeled with required information (Sample Id, date, signed, analysis, preservation)?	✓		
Were the correct containers used for the tests indicated?	✓		
Were proper preservation techniques indicated?			✓
Were samples received within holding times? If "NO" nonconformance form is required.	✓		
Were all VOA bottles checked for the presence of air bubbles? If bubbles were found please note in the comment section.			✓
Were samples in direct contact with wet ice? If "NO" check one: ☐ Blue Ice ☐ No Ice	✓		
Is sample temperature recorded ? If "NO" check one: ☐ Unable to record ☐ Temp taken near samples	✓		
Were pHs of samples checked and recorded on the COC forms?			✓
Did the laboratory accept samples?	✓		
Will samples be subcontracted? If "yes" list subcontractor and tests in specified sections below.		✓	
Subcontractor:	Date Sent Out:

0804-138

Mark,
Please have the following samples from the above referenced project run for TCLP (lead only)

1 SB-02 (5-10')
2 SB-03 (0-2')
3 SB-03 (5-10')
4 SB-04 (0-2')
5 SB-04 (5-10')
6 SB-06 (0-2')
7 SB-07 (0-2')
8 SB-07 (5-10')
9 SB-08 (0-2')
10 SB-08 (5-10')
11 SB-09 (0-2')
12 SB-11 (5-10')
13 SB-14 (0-2')
14 SB-15 (0-2')

We would like standard TAT for these samples (5 days). Let me know if you have any questions or need additional information.

Thanks very much,
Pete Kolodner

Environmental Professional Statement:
We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Denise Cosenza, Project Manager
Environmental Professional

Jed Myers, Ph.D. Senior Project Manager
Environmental Professional

1.2 Findings and Conclusions Summary

Cardno ATC has performed this Phase I Environmental Site Assessment (ESA) of the property located at 401 Ninth Avenue, New York, NY 10001 in conformance with the scope and limitations of ASTM Standard Practice E1527-13. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the property, except for the following:

FINDINGS AND CONCLUSIONS SUMMARY							
Report Section		Further Action?	De minimis Condition	REC and/or CREC	Historical REC	ASTM Non-Scope Condition	Description
4.0	User Provided Information	No					
5.1.1	Federal Database Findings	No					
5.1.2	State and Tribal Database Findings	No		X			See Note 1
5.1.3	Local Environmental Record Sources	No					
5.3	Historical Records Sources	No		X			See Note 2
6.2	Hazardous Substance Use, Storage and Disposal	No					
6.3	Underground Storage Tanks	No					
6.4	Aboveground Storage Tanks	No					
6.5	Other Petroleum Products	No					
6.6	Polychlorinated Biphenyls (PCBs)	No					
6.7	Unidentified Substance Containers	No					
6.8	Nonhazardous Solid Waste	Yes					
6.9	Wastewater	No					
6.10	Waste Pits, Ponds and Lagoons	No					
6.11	Sumps	No					
6.12	Septic Systems	No					
6.13	Stormwater Management System	No					
6.14	Wells	No					
7.0	Subsurface Vapor Migration	No					
8.0	Interviews	No					
9.1	Asbestos-Containing Material (ACM)	No					
9.2	Radon	No					
9.3	Lead in Drinking Water	No					
9.4	Lead-Based Paint (LBP)	No					
9.5	Mold Screening	No					
9.6	Additional User Requested Services	No					

Note 1: The property is listed in the NY E Designation database under block 729 lot 60. The E designation is associated with air, noise and hazardous chemicals (petroleum storage tanks). The effective date is listed as 01/19/2005. The E designation would require that the fee owner of the property conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (NYCOER) before the issuance of a building permit by the New York City Department of Buildings (NYCDOB) pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E designation indicates potential contamination at the property and is considered to represent a *recognized environmental condition* for the property. A Phase II Investigation was conducted in 2008 by ATC Associates, Inc. (now Cardno ATC) and is discussed in detail in Section 5.3.9. The Phase II Investigation identified semi-volatile organic compounds (SVOCs) above regulatory limits in soil on the property and concentrations of lead that exceed their respective Eastern USA Background levels and were therefore analyzed for TCLP lead. According to the TCLP results, only SB-03 (5-10') contained concentrations of lead in leachate above 5.0 mg/l and therefore meets the EPA definition of hazardous material. Reportedly it was proposed that during the development of this property, all soil will be excavated from the property, as well as 10 feet of the underlying bedrock.

Note 2: Part of the property has been utilized as a train yard since at least 1911. In its current condition, the property is bifurcated from the railroad by a concrete platform, built in 2014. A prior report included an investigation that was conducted on the soil in the train yard in 1991. This investigation identified petroleum related contamination, metals and polychlorinated biphenyls (PCBs) contamination on the railroad bedding at the property. No remedial action or additional investigation reports were provided for review. Therefore, the contamination may still be present and is considered to be a *recognized environmental condition.*

1.3 Significant Data Gap Summary

Data gaps may have been encountered during the performance of this Phase I ESA and are discussed within the section of the report where they were encountered. However, according to ASTM Standard Practice E1527-13, data gaps are only significant if "other information and/or professional experience raise reasonable concerns involving the data gap." The following is a summary of *significant data gaps* identified in this report.

SIGNIFICANT DATA GAP SUMMARY		
Report Section		**Description**
3.5	**Current Uses of Adjoining Properties**	No *significant data gap* identified.
4.2	**Environmental Liens or Activity and Use Limitations (AULs)**	No *significant data gap* identified.
5.1	**Standard Environmental Records**	No *significant data gap* identified.
5.2	**Physical Setting Sources**	No *significant data gap* identified.
5.3	**Historical Records Sources**	No *significant data gap* identified.
6.1	**Methodology and Limiting Conditions**	No *significant data gap* identified.
7.0	**Interviews**	No *significant data gap* identified.

1.4 Recommendations

Based on information collected from this Phase I ESA, Cardno ATC offers the following recommendations:

- Fill material and soil removed during future development and/or construction should be handled as regulated waste and sampled in accordance with the receiving (disposal) facility protocols;
- Soil within the vicinity of SB-03, which could potentially contain hazardous concentrations of lead, should be delineated and handled separately as hazardous material.
- Health and Safety procedures should be followed to ensure human health is protected during excavation and/or construction activities involving impact soil;
- At time of construction, procedures should be in place to properly remove, handle and transport UST(s) should they be encountered during excavation and/or construction pertaining to the redevelopment of the property; however they are not expected to be present.
- Proper documentation should be provided to confirm that all required NYCOER approvals have been obtained associated with the E-designation of the property and current excavation activities.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this Phase I ESA was to identify *recognized environmental conditions* in connection with the property at the time of the site reconnaissance. The scope of work for this Phase I ESA may also include certain potential environmental conditions beyond the scope of ASTM Standard Practice E1527-13 as listed below. This report documents the findings, opinions and conclusions of the Phase I ESA.

2.2 Scope

This Phase I ESA was conducted in general accordance with the ASTM Standard Practice E1527-13, consistent with a level of care and skill ordinarily practiced by the environmental consulting profession currently providing similar services under similar circumstances. Significant additions, deletions or exceptions to ASTM Standard Practice E1527-13 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the property through a review of referenced sources such as topographic maps and geologic, soils and hydrologic reports.

- Usage of the property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews.

- Observations and interviews regarding current property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, nonhazardous solid wastes and wastewater.

- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties in, on or at the property.

- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the property.

- Potential for subsurface vapor migration in, on or at the property as described in Section 7.0.

The scope of the assessment also included consideration of the following potential environmental issues or conditions that are beyond the scope of ASTM Standard Practice E1527-13:

- The scope of work for the Mold Screening was intended to be consistent with ASTM E 2418-06: Standard Guide for Readily Observable Mold and Conditions Conducive to Mold in Commercial Buildings: Baseline Survey Process. The scope of work, including potential deviations from the Standard Guide, is described as follows. The interview was limited to at least one knowledgeable person from property management or engineering staff. The document review was limited to only those relevant documents made readily available to Cardno ATC in a timely manner. The physical observations were limited to certain Heating, Ventilation and Air Conditioning (HVAC) system areas and other readily accessible building areas likely to become subject to water damage, plumbing leaks, and flooding. Unless noted otherwise herein, Cardno ATC observed the HVAC equipment room(s) and accessible mechanical rooms and, in buildings with package units in the ceiling, at least one unit per floor. Also, unless noted otherwise, Cardno ATC observed accessible areas of the basement (or lowest level), the top floor, the roof (including any penthouse areas) and at least one mid-level floor (if applicable). For multi-story buildings, the total

number of floors observed (inclusive of those already mentioned) was intended to be up to 10% of the total number of floors (if readily accessible). For hotel and multi-family buildings, Cardno ATC targeted the lowest and highest levels and roof as described above and up to 10% of units, including one per floor if readily accessible. The Mold Screening did not include destructive methods of observation. No sampling or laboratory analyses were conducted. The Mold Screening service as described herein was limited in scope and by the time and cost considerations typically associated with performing a Phase I ESA. No method can guarantee that a hazard will be discovered if evidence of the hazard is not encountered within the performance of the Mold Screening as authorized and that opinions and conclusions must, out of necessity, be extrapolated from limited information and discrete, non-continuous data points. Unidentified mold or other microbial conditions may exist on the property.

- Visual observation of suspect asbestos-containing materials (ACM), consisting of providing an opinion on the condition of suspect ACM on the property based upon visual observation during the site reconnaissance. No sampling of suspect ACM was conducted.

- Radon document review, consisting of the review of published radon data with regard to the potential for elevated levels of radon gas in the surrounding area of the property.

- Lead in Drinking Water Data review, consisting of contacting the water supplier for information regarding whether or not the potable water provided to the property meets the drinking water standards for lead.

- Visual observation of Lead-based paint (LBP), consisting of providing an opinion on the potential for suspect LBP based on the construction date of buildings on the property and visual observation of the condition of suspect LBP.

- Wetlands document review, consisting of a review of a current National Wetlands Inventory map of the surrounding area to note if the property is identified as having a wetland.

- Flood plain document review, consisting of a review of a reasonably ascertainable flood plain map of the surrounding area to note if the property is identified as being located within a flood plain.

- Regulatory Agency File and Records Review, consisting of conducting a file review (i.e., via Freedom of Information Act (FOIA) request or alternative method/source) for the property and/or one adjoining property at one regulatory agency, as warranted by the findings of the ESA.

2.3 Significant Assumption

The assumptions in this report were not considered as having significant impact on the determination of *recognized environmental conditions* associated with the property.

2.4 Limitations and Exceptions

Cardno ATC has prepared this Phase I ESA report using reasonable efforts to identify *recognized environmental conditions* associated with hazardous substances or petroleum products in, on or at the property. Findings contained within this report are based on information collected from observations made on the day(s) of the site reconnaissance and from reasonably ascertainable information obtained from certain public agencies and other referenced sources.

The ASTM Standard Practice E1527-13 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* – A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any property.

- *Not Exhaustive* – A Phase I ESA is not an exhaustive investigation of the property and environmental conditions on such property.

- *Past Uses of the Property* – Phase I requirements only require review of standard historical sources at five year intervals. Therefore, past uses of property at less than five year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E1527-13 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

Cardno ATC makes no representation or warranty that the past or current operations at the property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, Cardno ATC is not responsible for consequences or conditions arising from facts not fully disclosed to Cardno ATC during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by Cardno ATC's observations or other credible referenced sources reviewed during the assessment. Cardno ATC shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

Cardno ATC makes no warranty, guarantee or certification regarding the quality, accuracy or reliability of any prior report provided to Cardno ATC and discussed in this Phase I ESA report. Cardno ATC expressly disclaims any and all liability for any errors or omissions contained in any prior reports provided to Cardno ATC and discussed in this Phase I ESA report.

Cardno ATC used reasonable efforts to identify evidence of aboveground and underground storage tanks and ancillary equipment on the property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced public records and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley

Act or any United States Securities and Exchange Commission reporting obligations, and may not be used for such purposes in any form without the express written permission of Cardno ATC.

Cardno ATC is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the property in this report, represent a comprehensive definition or precise delineation of property ownership or boundaries.

The Environmental Professional Statement in Section 1.1 of this report does not "certify" the findings contained in this report and is not a legal opinion of such *Environmental Professional*. The statement is intended to document Cardno ATC's opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the *Environmental Professional* were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E1527-13 and the scope of work for this assessment.

Per ASTM Standard Practice E1527-13, Section 6, User Responsibilities, the User of this assessment has specific obligations for performing tasks during this assessment that will help identify the possibility of *recognized environmental conditions* in connection with the property. Failure by the User to fully comply with the requirements may impact their ability to use this report to help qualify for *Landowner Liability Protections* (LLPs) under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Cardno ATC makes no representations or warranties regarding a User's qualification for protection under any federal, state or local laws, rules or regulations.

In accordance with the ASTM Standard Practice E1527-13, this report is presumed to be valid for a six month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice E1527-13 and therefore, the entire report must be updated to reflect current conditions and property-specific information.

Other limitations and exceptions that are specific to the scope of this report may be found in corresponding sections.

2.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of, and may be relied upon by, Brookfield Office Properties and any of its affiliates, and third parties authorized in writing by Brookfield Office Properties and Cardno ATC, including the lender(s) in connection with a secured financing of the property, and their respective successors and assigns. Any third party agrees by accepting this report that any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that hidden conditions may exist at the property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of Cardno ATC, is at the sole risk and expense of such third party.

Cardno ATC makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either express or implied. Unless otherwise agreed upon in writing by Cardno ATC and a third party, Cardno ATC's liability to any third party authorized to use or rely on this report with respect to any acts or omissions shall be limited to a total maximum amount of $100,000.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

The property consists of Block 729, Lot 60 and is addressed as 401 Ninth Avenue, New York, NY 10001. The property is located on the southwestern quadrant of the intersection formed by West 33rd Street and Ninth Avenue in the Borough of Manhattan in New York City. According to the New York City Department of City Planning zoning map, the Site is currently zoned as C6-4 "Commercial District" in a Specialty District identified as HY – Hudson Yards. The current owner is identified as "9th and 33rd Associates".

The Site Vicinity Map is located in Appendix A. The Site Plan is located in Appendix B. Site Photographs are provided in Appendix C.

3.2 Surrounding Area General Characteristics

The property is located in an area consisting mainly of commercial and residential buildings. The surrounding area slopes toward the west-southwest. Specific adjacent and abutting properties are summarized in Section 3.5.

3.3 Current Use of the Property

The southern part of the property consists of Long Island Railroad and Amtrak train tracks located approximately 60 feet below grade and covered by a concrete platform. The depressed train yards were not accessible for inspection as they are separated by the platform. The northeastern portion of the property, along West 33rd Street, has several trailers and is being used for staging of equipment and materials associated with the construction of a larger concrete platform that covers the entire portion of the lot above the train yard and ultimately the development of the property with a structure. The northwestern portion of the property is currently undergoing excavation. In addition, there are mechanical equipment/fans located within cinderblock structures on the western portion of the platform that are not operational at this time, but will be utilized to evacuate smoke should there be a fire in the train yards below the platform.

3.4 Description of Property Improvements

The following table provides general descriptions of the property improvements.

PROPERTY IMPROVEMENTS	
Size of Property (approximate)	1.852 acres
General Topography of Property	Flat with a slight downward slope towards the west-southwest. The train yards at the property are located 60 feet below the street level concrete platform of the property.
Adjoining and/or Access/Egress Roads	Access to the property available along West 33rd Street and Ninth Avenue
Paved or Concrete Areas (including parking)	Concrete sidewalks along the exterior of the property. Concrete platform along the southern and northeastern portions of the property.
Unimproved Areas	The property is fully improved.
Landscaped Areas	No landscaped areas were observed at the property.
Surface Water	No surface water was observed on or near the property.
Potable Water Source	New York City Department of Environmental Protection (NYCDEP)
Sanitary Sewer Utility	NYCDEP
Storm Sewer Utility	NYCDEP
Electrical Utility	Consolidated Edison (Con Ed)
Natural Gas Utility	Con Ed

PROPERTY IMPROVEMENTS	
Current Occupancy Status	0% occupied
Unoccupied Buildings/Spaces/Structures	None
Number of Occupied Buildings	Three trailers on the northeastern portion of the property. One-story concrete cinderblock structure on the western portion of the property.
General Building Description	Two office trailers and one restroom trailer
Number of Floors	1-story
Total Square Feet of Space (approximate)	Not applicable (N/A)
Construction Completion Date (year) (approximate)	The train yard on the property was constructed by approximately 1911. The trailers were brought on site during recent construction activities. The one-story cinderblock structure was completed in 2014.

3.5 Current Uses of Adjoining Properties

Current uses of the adjoining properties were observed to be as follows:

Direction from Property	Address	Occupant(s) Name	Current Use	Potential Environmental Conditions
North	424 -434 West 33rd Street	Multi-tenant Office Building	Commercial	Refer to Section 5.1.2
North	411 Ninth Avenue	Under Construction	Under Construction	None
North	414 West 34th Street	St. Michaels Church and School	Commercial	See Section 5.1.2
Northeast	420 Ninth Avenue	B&H Photo	Commercial	None
Northwest	448 West 34th Street	Unknown	Parking Lot	None
West	450 West 33rd Street	Commercial (office building)	Commercial	Refer to Section 5.1.1 and Section 5.1.2
East	372 Ninth Avenue	United States Postal Service	Post Office	Refer to Section 5.1.2
South	Block 729 Lot 50	Not Occupied	Train Yard with overhead Concrete Platform	None
South	Block 729 Lot 51	Not Occupied	Train Yard with overhead Concrete Platform	None

Several listings for the surrounding properties were identified on the Federal and State regulatory databases (See Section 5.1 for details).

4.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by Brookfield Office Properties (User) with regard to the Phase I ESA. Documentation may be found in Appendix D or where referenced in this report.

4.1 Title Records

The User provided no title records information.

4.2 Environmental Liens or Activity and Use Limitations (AULs)

The User provided no information regarding property environmental liens or activity and use limitations (AULs). Cardno ATC contracted Environmental Data Resources, Inc. (EDR) to perform an environmental lien search for the property. According to EDR, no environmental liens or AULs (such as engineering controls, land use restrictions or institutional controls) were identified for the property. A copy of the EDR Environmental Lien and AUL Search is included in Appendix L.

4.3 Specialized Knowledge or Experience of the User

According to the User, the site currently has an E designation and the site owner is currently pursuing a notice to proceed from the New York City Office of Environmental Remediation.

4.4 Significant Valuation Reduction for Environmental Issues

The User provided no information regarding a significant valuation reduction for environmental issues associated with the property.

4.5 Owner, Property Manager and Occupant Information

The User identified Ms. Patricia Bertuccio as the point of access to the property. The User indicated that the property is currently developed with train yards below grade.

4.6 Reason for Performing Phase I ESA

According to information provided by the User, this Phase I ESA will be used in connection with the redevelopment of the property to identify *recognized environmental conditions* associated with the property.

4.7 Other User Provided Documents

The User provided a previous Phase I Environmental Site Assessment as described in the ASTM Standard Practice E 1527-13.

OTHER USER PROVIDED DOCUMENTS		
Title	**Date (if known)**	**Author and/or Source (if known)**
Phase I Environmental Site Assessment of 9th Avenue Train Yards, New York, NY	September 10, 2007	ATC Associates Inc.

OTHER USER PROVIDED DOCUMENTS		
Title	**Date (if known)**	**Author and/or Source (if known)**
Phase II Environmental Site Investigation Parking Lots at the 9th Avenue Train Yards, Portions of Block 729; Lots 50 & 60, New York, New York 10001	May 7, 2008	ATC Associates Inc.

A copy of the abovementioned report is provided in Appendices H.

5.0 RECORDS REVIEW

5.1 Standard Environmental Records

The regulatory agency database report discussed in this section, provided by EDR of Shelton, Connecticut, was reviewed for information regarding reported use or release of hazardous substances and petroleum products on or near the property. Unless otherwise noted, the information provided by the regulatory agency database report and other sources referenced in this report, were considered sufficient for *recognized environmental condition (REC)*, *controlled recognized environmental condition (CREC)*, *historical recognized environmental condition (HREC)* or *de minimis condition* determinations without conducting supplemental agency file reviews. Cardno ATC also reviewed the "unmappable" (also referred to as "orphan") listings within the database report, cross-referencing available address information and facility names. Unmappable sites are listings that could not be plotted with confidence, but are potentially in the general area of the property, based on the partial street address, city, or zip code. Any unmappable site that was identified by Cardno ATC as being within the approximate minimum search distance from the property, based on the site reconnaissance and/or cross-referencing to mapped listings, is included in the discussion within this section. It is noted that the search radius for the LTANKS database has been reduced from one-half mile to one-quarter mile based on the densely developed urban nature of the property area. The complete regulatory agency database report may be found in Appendix E.

The following is a summary of the findings of the database review.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Site Listed?**	**# Sites Listed (including the Site)**
Federal National Priority (NPL)	1 mile	No	1
Federal Delisted NPL	½ mile	No	0
Federal Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) list	½ mile	No	1
Federal CERCLIS No Further Remedial Action Planned (NFRAP)	½ mile	No	1
Federal Resource Conservation and Recovery Act (RCRA), Corrective Action facilities (CORRACTS)	1 mile	No	0
Federal RCRIS non- CORRACTS Treatment, Storage, and Disposal Facilities (TSD)	½ mile	No	0
Federal RCRA Generators	Property & Adjoining	No	1
Federal Institutional Control/Engineering Control Registry	Property	No	1
Federal Emergency Response Notification System (ERNS) list	Property	No	0
Federal Facility Index System (FINDS)	Property	No	0
State and Tribal NPL	1 mile	No	0
State and Tribal CERCLIS	1 mile	No	1
State and Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	2
State and Tribal Leaking Aboveground or Underground Storage Tanks (LTANKS)	¼ mile	No	37
State and Tribal Registered Underground Storage Tanks (UST)	Property & Adjoining	No	2
State and Tribal Registered Aboveground Storage Tanks (AST)	Property & Adjoining	No	3
NY Spills	Property & Adjoining	No	1

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	**Approx. Minimum Search Distance**	**Site Listed?**	**# Sites Listed (including the Site)**
NY Historical UST	¼ mile	No	0
NY Chemical Bulk Storage (CBS) AST	¼ mile	No	2
State and Tribal Institutional Control/Engineering Control Registry	Property	No	0
State and Tribal Voluntary Cleanup Site	½ mile	No	0
State and Tribal Brownfield Sites	½ mile	No	0
NY Solid Waste Recycling Facilities (SWRCY)	½ mile	No	0
E Designation	Property	No	0
RCRA-Nongen/NLR	¼ mile	No	77
NY Manifest	¼ mile	No	85
NJ Manifest	¼ mile	No	19
NY Drycleaners	¼ mile	No	1
EDR Manufactured Gas Plants (MGP	1 mile	No	6
Historical Drycleaners	¼ mile	No	7
Historical Auto Stations	¼ mile	No	37

5.1.1 Federal Agency Database Findings

The property was not identified on any of the Federal databases researched.

The following listing with a known or significant potential for release and impact on the property were identified in the federal agency databases researched:

Evergreene Painting Studios
450 West 31st Street – 7th Floor
New York, NY
Databases: RCRA- Large Quantity Generator (LQG), NY Manifest
Approximate Distance from the Site: Adjacent to the Southwest
Assumed Groundwater Gradient: Crossgradient
Regulatory Data Summary: According to the regulatory agency database report, this tenant of the 7th floor of this adjoining property is listed in the RCRA-LQG database with multiple reported violations between 2007 and 2012. The violations were described as “written-informal” and all have achieved compliance. Historically this facility was listed as a RCRA SQG in 1998, 2006 and 2007. As reported in the NY Manifests, this facility has disposed of ignitable hazardous wastes, halogenated solvents and non-halogenated solvents. Additionally, this facility disposed of unknown waste between 2000 and 2006.
Discussion: This adjoining property is connected to the municipal sanitary/sewer services. Based on the fact that the reported violations have achieved compliance, the tenant occupies an upper floor of the building and the long-term connection of the area to the municipal sewer system; Cardno ATC does not consider this listing to represent a *recognized environmental condition* for the property.

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the other sites listed in the federal agency databases searched are considered to represent a likely past, present or material threat of release in, on, or at the property. Given the physical setting characteristics of the property and surrounding area, supplemental agency file reviews were not warranted to verify the database report information

5.1.2 State and Tribal Database Findings

Although the EDR did not identify the property on any of the state or tribal databases, based on the review of the New York City Searchable Property Environmental E-database (NYC SPEED), the property is listed on the E-designation database as summarized below.

Lot 60, Tax block 729
9th Avenue
Manhattan, NY
Databases: NY E DESIGNATION
Approximate Distance from the Site: property
Assumed Groundwater Gradient: N/A
Regulatory Data Summary: The property is listed in the NY E Designation database under Block 729, Lot 60. The E designation is associated with air, noise and hazardous chemicals (petroleum storage tanks). The property is listed on the E designation database with E-No. E-137, CEQR No.03GCP031M. The effective date is listed as 01/19/2005. An E designation, as listed in Appendix C of the Zoning Resolution, indicates that environmental requirements pertaining to potential hazardous material contamination, or noise or air quality impacts, have been established on one or more tax lots. Such requirements result from the environmental analysis that is prepared in conjunction with an amendment to the zoning maps or text or any other action under the Zoning Resolution. If the environmental analysis indicates that an impact is possible due to noise or air quality, or potential hazardous material contamination; then an E designation is likely to result. The E designation placed on the property provides notice of the presence of an environmental requirement pertaining to potential hazardous materials contamination. The E designation would ensure that sampling and remediation take place on the property, and would avoid any significant impacts related to hazardous materials at the property. The E designation would require that the fee owner of the property conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the New York City Office of Environmental Remediation (NYCOER) before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The E designations also include a mandatory construction-related health and safety plan which must be approved by NYCOER.
Discussion: The E designation indicates potential contamination at the property and is considered to represent a *recognized environmental condition* for the property. The environmental requirements of the E designation may have to be satisfied before a permit from the NYCDOB will be issued. A Phase II Investigation was conducted in 2008 and is discussed in detail in Section 5.3.9. The Phase II Investigation identified SVOCs above regulatory limits in soil on the property. The Phase II also identified concentrations of lead in eleven (11) of the soil samples collected that exceeded their respective Eastern USA Background levels and were therefore analyzed for TCLP lead. According to the TCLP results, only SB-03 (5-10') contained concentrations of lead in leachate above 5.0 mg/l and therefore meets the EPA definition of hazardous material. Reportedly it was proposed that during the development of this property, all soil will be excavated from the property, as well as 10 feet of the underlying bedrock.

The following listings with a known or significant potential for release and impact in, on, or at the property were identified in the state and tribal databases researched:

St Michael's School
425 West 33rdStreet
New York, NY
Databases: Aboveground Storage Tanks (AST), Leaking Underground Storage Tanks (LTANKS)
Approximate Distance from the Property: Adjacent to the north
Assumed Groundwater Gradient: Downgradient

Regulatory Data Summary: This adjoining site is listed in the AST database with one (1) "in-service" 7,500-gallon No. 2 fuel oil AST that was reportedly installed in 1970. This northern adjoining site was identified on the LTANKS database under NY Spill No. 9608649 on October 11, 1996 when 25 gallons of No. 4 fuel oil was released due to an overfill of the on-site tank. The release was cleaned up and this LTANKS case was closed by NYSDEC on the same day that it was opened. LTANKS Case No. 0606006 was opened on August 24, 2006 when 200 gallons of No. 4 oil was released from an on-site AST into a vault. No drains were reportedly affected and the concrete below the tank appeared to be in good condition. The release was cleaned up and the school was preparing to replace this tank. New York Department of Environmental Conservation (NYSDEC) closed this spills case on September 11, 2006.
Discussion: Based on the regulatory closure and the assumed groundwater gradient, this facility is not considered to represent a *recognized environmental condition.*

Planned Parenthood/424 W33rd Street Associates
434 West 33rd Street/424 West 33rd Street
Manhattan, NY 10001
Databases: AST, NY Spills
Approximate Distance from the Property: Adjacent to the north
Assumed Groundwater Gradient: Upgradient
Regulatory Data Summary: This adjoining site is listed in the AST database with one (1) "active" 7,500-gallon No. 6 fuel oil AST and one (1) "in-service" 775-gallon No. 2 fuel oil AST. This western adjoining site was identified on the NY Spills database under NY Spill No. 0807448 on October 2, 2008 when a letter opened contained a small quantity of white powder. The powder was contained and the New York City Police Department (NYPD) was involved. NYSDEC closed this case on the same day as it was opened.
Discussion: Based on the nature of the reported spill, regulatory closure and the assumed groundwater gradient; this facility is not considered to represent a *recognized environmental condition.*

NY Clearinghouse – TTF /450 Partners LLC
450 W33rd St / 450-460 West 33rd St
New York, New York
Databases: Underground Storage Tank (UST), AST, LTANKS
Approximate Distance from the Property: Adjacent to the west
Assumed Groundwater Gradient: Downgradient
Regulatory Data Summary: This adjoining site is listed in the AST/UST databases with one (1) "in-active" 3,000-gallon UST, one (1) "in-service" 3,000-gallon UST, one (1) "active" 3,000-gallon diesel AST, one (1) "active" 5,000-gallon diesel AST and one (1) "active" 4,000-gallon diesel AST. This western adjoining site was identified on the LTANKS database under NY Spill No. 1205721 on September 8, 2012 when an on-site tank failed a tank tightness test. The tank was uncovered and corrosion was identified on the tank top. Repairs were made and the tank passed both a "tank only" tightness test as well as a complete system tightness test on October 11, 2012. Reportedly the closure report submitted to NYSDEC indicated that no petroleum impacted soil was observed during the tank repairs. NYSDEC closed this LTANKS listing on February 28, 2013.
Discussion: Based on the regulatory closure and the assumed groundwater gradient, this facility is not considered to represent a *recognized environmental condition.*

Based on distance, topography, assumed groundwater gradient, current regulatory status, and/or the absence of reported releases, none of the remaining sites listed in the state and tribal databases are considered to represent a likely past, present or material threat of release in, on, or at the property. Given the physical setting characteristics of the property and surrounding area, supplemental agency file reviews were not warranted to verify the database report information.

5.1.3 Local Environmental Records Sources

New York State Department of Environmental Conservation (NYSDEC)

The NYSDEC maintains files of incidents involving environmentally regulated materials. The records maintained by the NYSDEC include reports of spills of hazardous chemicals and citizen's complaints on environmental issues. NYSDEC information concerning the property was requested in a Freedom of Information Letter (FOIL). Cardno ATC has not received a response from the NYSDEC at the time this report was issued. Cardno ATC will issue an addendum to this report if additional information received warrants modifications to the conclusions included herein.

New York City Department of Environmental Protection (NYCDEP)

The NYCDEP maintains files of incidents involving environmentally regulated materials. The records maintained by NYCDEP include reports of hazardous chemical spills and citizen's complaints on environmental issues. NYCDEP information concerning the property was requested in a FOIL. Cardno ATC has not received a response from the NYCDEP at the time this report was issued. Cardno ATC will issue an addendum to this report if additional information received warrants modifications to the conclusions included herein.

New York City Fire Department (FDNY)

As required by the agency, Cardno ATC requested in writing from the FDNY, any environmentally significant information related to the property. At the time of completion of this report, this information remained outstanding. Upon receipt and review, any pertinent information will be forwarded to the Client.

Water & Sewer Departments

Within the City of New York, potable water is supplied to Manhattan primarily from upstate New York reservoirs. ATC reviewed New York City's most recent Drinking Water Supply and Quality Report made available through the NYCDEP website (http://www.nyc.gov/html/dep/home.html) for the year 2013. Review of the analytical data provided in the report confirmed that the municipally supplied water meets all drinking water standards established by the United States Environmental Protection Agency Safe Water Drinking Act, including those for lead. No drinking water supply wells exist at the Site.

The NYCDEP is responsible for the municipal combined sanitary and stormwater sewer system. This system is operational in all five boroughs of New York City, with the exception of certain remote areas of the City, namely Queens and Staten Island, which have separate operating systems for sewage and stormwater.

New York City Department of Health and Mental Hygiene (NYCDOHMH)

The NYCDOHMH maintains files of health-related environmental incidents in the City of New York. These incidents may include spills of hazardous chemicals, citizen complaints regarding asbestos issues, lead-based paint violations, or reports of chemical odors or fumes. NYCDOHMH information concerning the property was requested in a FOIL. Cardno ATC has not received a response from the NYCDOHMH at the time this report was issued. Upon receipt of this information, Cardno ATC will review the response and, if conclusions and recommendations contained within this report are affected, we will submit revised recommendations to the client.

Electrical Utility Company

The local utility, Consolidated Edison (Con Ed.), provides electric service to the property.

Other Local Environmental Records Sources

No additional local environmental records sources were reviewed.

5.2 Physical Setting Sources

5.2.1 Topography

Based on the United States Geological Survey (USGS) 7.5-Minute Series Topographic Map, *Central Park, NJ-NY* Quadrangle, dated 1995, the property is located approximately 28 feet above mean sea level (MSL). The property is relatively level with a slight slope toward the west-southwest.

A copy of the topographic map is included in Appendix A.

5.2.2 Geology

According to the New York Department of Environmental Conservation, Water Power and Control Commission report titled Ground Water in Bronx, New York, and Richmond Counties, with Summary Data on Kings and Queens Counties, New York City, New York, the Site Area is located in a southern extension of an upland area that covers a large part of New England. Manhattan has been extensively eroded by pre-glacial stream action, modified by later glacial erosion and deposition. A thick layer of unconsolidated glacial and glaciofluvial deposits are present beneath the section of Manhattan in which the Site is located. The sediments were deposited into a deep north-south oriented depression in bedrock in the area. The process that formed the depression is unknown, but may be attributable to the differential weathering rates of various rock types through pre-glacial alluvial erosion. In addition, a major east-west oriented fault is present in bedrock in the area. The thickness of the unconsolidated sediment beneath the Site is 40 to 100 feet. Bedrock outcrops were noted along the northern portion of the Site.

5.2.3 Soils

According to EDR, soils beneath the property are classified as Urban Land, with variable soil textures. Urban Land refers to soils that have been altered by urban development such as buildings and streets, where at least 85 percent of the surface is covered with asphalt, concrete or other impervious building material. Typically, these soils have been mixed with other materials, such as brick and concrete, and characteristics can only be determined by on-site investigation.

5.2.4 Hydrology

No past groundwater investigations have been identified for the property; thus, no site-specific groundwater information was available. However, regional groundwater flow direction is generally influenced by major hydrogeologic features such as a river or lake. Surface and/or bedrock topography may also influence regional groundwater flow direction. Local hydraulic gradient at the property was interpreted based on a review of the *Central Park, NY-NJ* USGS topographic map. The available hydrogeologic information indicates that the presumed local groundwater flow direction is to the southwest towards the Hudson River, located approximately 1,300 feet west-southwest of the property. It should be noted that local geologic features may cause local groundwater flow direction to differ from the regional flow direction. Therefore, in assessing potential external environmental impact, properties located directly east-northeast (presumed up-gradient) of the property are of primary concern. A complete hydrogeologic investigation would be necessary to determine groundwater flow direction.

Estimated groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, geology, underground structures, or de-watering operations.

5.2.5 Other Physical Setting Sources

Flood Plain Map

A review of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM), Community/Panel Number 3604970039B, revealed that the property is located within Zone X, which is classified by FEMA as areas outside the 500-year flood plain. A copy of the flood plain map that includes the property is included in Appendix L.

Wetlands Map

According to the U.S. Department of the Interior Fish and Wildlife Service (USFWS) National Wetlands Inventory Map, federally designated wetlands are not depicted on the property. A copy of the digital wetlands map obtained through the USFWS website is included in Appendix L.

5.3 Historical Records Sources

The following table summarizes the findings of the research presented below pertaining to historical property and surrounding area uses.

HISTORICAL USE SUMMARY				
Period	**Identified Historical Uses**		**Source(s)**	**Intervals/Comments**
	Property	**Surrounding Area**		
Prior to 1940	Residential/ Commercial (1890-1899) Train yard / Residential / Commercial since 1911.	Train Yard Commercial Light Industrial	Sanborn maps City Directories Aerial Photographs Topographic Maps	First Map reviewed dated 1890. Data gaps between 1899 and 1911, and between 1912 and 1920
1940 - 1960	Train yard, repair shop, filling station and parking lots	Train Yard Commercial Residential	Sanborn maps City Directories Aerial Photographs Topographic Maps	No significant gaps
1961 - 1980	Train yard and vacant lot	Train Yard Commercial Residential	Sanborn maps City Directories Aerial Photographs Topographic Maps	No significant gaps
1981 - 2000	Train yard and vacant lot	Train Yard Commercial Residential	Sanborn maps City Directories Aerial Photographs Topographic Maps	No significant gaps
2001 - present	Train yard and vacant lot	Train Yard Commercial Residential	Sanborn maps City Directories Aerial Photographs	No significant gaps

In accordance with ASTM standards, Cardno ATC attempted to review the historical uses of the site back to obvious first development, or back to 1940, whichever is earlier. Despite the data gaps noted in the Historical Use Summary table, the property usage appeared unchanged over the period in which the gaps were identified. Historical information sources researched in this assessment allowed uses of the property to be traced from the present back to 1890. This does not predate the property's obvious first developed use, per ASTM Standard Practice E 1527-05 § 8.3.2., and therefore constitutes historical data failure. Based on the documented use of the property, this historical data failure does not significantly impact the findings of this report. As such, the requirements of ASTM Standard Practice E 1527-05 §8.3.2.1 §8.3.2.2 have been satisfied and, as stated in ASTM Standard Practice E 1527-05 §8.3.2.3, the historical research is considered complete.

5.3.1 Aerial Photographs

Cardno ATC reviewed the 1924, 1940, 1943, 1951, 1954, 1961, 1966, 1974, 1976, 1984, 1994, 1995, 2006, 2008, 2009, 2010, and 2011 aerial photographs for the property available through EDR. The 1924 aerial photograph depicts the property as a train yard with multiple structures on the northern portion. Train yards adjoin the property to the south, east and west and the adjoining areas along the north and south sides of West 33rd, which borders the property to the north, are densely developed with multi-level structures. The property and surrounding area appear relatively unchanged in the 1940 aerial photograph with the exception that the existing United States Post Office is depicted to the east. The 1943, 1951, 1954 aerial photographs depict the property as a train yard with parking on the northern portion. The 1961, 1966 and 1974 aerial photographs, depict the property as it was in the previous aerial photograph; however, Dyer Avenue now borders the property to the west. In general the surrounding area appears to be becoming increasingly developed with larger commercial type structures. Due to the poor image quality of the 1976 aerial photograph, meaningful information regard property development could

not be attained. The 1984, 1994, 1995, 2006, 2008, 2009, 2010, and 2011 aerial photographs depict the property as a train yard with a parking lot on the northern portion. The shape and outline of the adjoining properties appear to be consistent with the shape and outline of the existing commercial office / residential buildings now located in the surrounding area. The current and historic use of the property as a train yard is considered to be a *recognized environmental condition.* In addition, based on a prior report discussed in Section 5.3.9, petroleum related contamination, metals and polychlorinated biphenyls (PCBs) contamination is present on the railroad bedding at the property.

5.3.2 Fire Insurance Maps

A search for fire insurance maps (aka Sanborn maps) for the property and surrounding area was conducted by EDR. The following are descriptions and interpretations from the fire insurance map reviews. Documentation is included in Appendix G.

FIRE INSURANCE MAP SUMMARY	
Year	**Comments**
1890, 1899	**Property:** The property is depicted with multiple multi-story residential and commercial buildings. Including a fire house on the northwestern portion. **Surrounding Area:** The property is bound by West 32nd Street to the south, West 33rd Street to the north and Ninth Avenue to the east. Surrounding properties consist of residential and commercial properties as well as a church and school located to the south.
1911, 1930	**Property**: The property is depicted with a train yard on the southern portion, multiple residential structures on the northern portion including a fire house. **Surrounding Area**: The surrounding areas to the south, east and west are depicted as train yards. The properties to the east and west along West 33rd Street and to the north across West 33rd Street are depicted with a church and a school and as commercial and residential properties.
1950	**Property:** The property is depicted with a train yard on the southern portion and contractor's yard and a building labeled "machine shop" on the northwestern portion and with auto parking and a filling station on the northeastern portion. **Surrounding Area**: The surrounding properties appear relatively unchanged from the 1930 Sanborn map.
1976, 1979, 1980, 1982, 1985, 1987, 1988, 1991, 1992, 1993, 1994, 1995, 1996, 2001, 2002, 2003, 2004, 2005	**Property**: The property is depicted with a train yard on the southern portion and the northern portion is labeled as "parking". **Surrounding Area**: A roadway labeled "approach to the Lincoln Tunnel" (now identified as Dyer Avenue) borders the property to the west, beyond which is a hi-rise office building that is labeled "built over the Pennsylvania RR Yard". Train yards are depicted to the south and the United States Government Post Office is depicted to the east across Ninth Avenue. The properties to the north appear relatively unchanged from the previous Sanborn map.

According to the review of the historical Sanborn maps, the train yards that currently occupy the property were built in approximately 1911. Prior to their construction, the property was depicted with dwellings and commercial structures including a fire house starting in 1890 until at least 1930. In 1950 the property is depicted with a contractor's yard and a building labeled "machine shop" on the northwestern portion and with a filling station on the northeastern portion. From at least 1976 until 2005 the northern portion of the property was utilized as a parking lot prior the commencement of the existing construction activities.

Surroundings properties were historically used as dwellings, commercial buildings, the train yards and a post office.

The review of historical information identified the property as a train yard, auto filling station and a machine shop. These identified historical activities typically use petroleum products, solvents, and other hazardous chemicals in their routine operations. A Phase II Environmental Site Investigation (ESI) conducted on the property in 2008 by ATC Associates identified SVOCs above regulatory standards in the street level portion of the property, as well as high levels of lead in the area of one of the soil borings. Reportedly development plans include the excavation of soil as well as 10 feet of bedrock. In addition,

based on a prior report discussed in Section 5.3.9, petroleum related contamination, metals and PCBs contamination are present in the railroad bedding at the property. Based on this information, the historical uses of the Property and surrounding area are considered to represent a *recognized environmental condition* for the property. Copies of the fire insurance maps are provided in Appendix G.

5.3.3 Property Tax Files

Cardno ATC reviewed available tax information from the NYCDOF website (http://www.nyc.gov/html/dof/html/home/home.shtml) for ownership information on the property. Records revealed that the property is located on Block 729, Lot 60. The review of available tax assessment rolls for the property indicated that the current owner 9th and 33rd Associates has owned the property since at least 1986. The review of tax files did not identify past uses indicating *recognized environmental conditions* at the property.

5.3.4 Recorded Land Title Records

The acquisition of recorded land title records was not required by the scope of work for the Phase I ESA.

5.3.5 Historical USGS Topographic Maps

Cardno ATC reviewed reasonably ascertainable historical USGS topographic maps information regarding past use of the property obtained from EDR. Available topographic maps were dated 1897, 1947, 1956, 1966, 1979, and 1995. Each of the topographic maps depicted the property and surrounding areas within a heavily developed urban area, consistent with the historical descriptions provided in previous sections of this report. Specific buildings or structures are not illustrated on the property or adjoining properties.

The review of historical USGS topographic maps did not identify past uses indicating *recognized environmental conditions* in, on, or at the property or surrounding area.

5.3.6 City Directories

Research regarding the availability of historical city directories was conducted by EDR. Directories reviewed were dated between 1920 and 2013 in approximate 5-year intervals.

The property address, 401 Ninth Avenue was identified with what appear to be residential listings in 1920 and 1931, with a garage/service station from 1923 through 1958 and with parking from 1963 through 1978. An alternate property address of 407 Ninth Avenue, New York, NY was identified with a printer/press from 1927 through 1942 and the alternate property addresses of 406 and 408 West 33rd Street appear to be residential listings from 1920 through 1931. The property was not identified in the remaining years of the city directories researched. The northern adjoining property 424 West 33rd was listed with office tenants from 1983 until 2006. The western adjoining office building was listed with what appear to be office tenants from 1983 through 2013. No listings for the other adjoining sites were identified in the city directories search.

The review of city directories identified past uses of the property including a garage/service station and a printing press, indicating *recognized environmental conditions* at the property.

5.3.7 Building Department Records

Cardno ATC reviewed available building department information, provided by the NYCDOB via the on-line Building Information System (BIS) website (http://a810bisweb.nyc.gov/bisweb/bsqpm01.jsp). The NYCDOB website indicated there is one (1) “open” environmental control board (ECB) violation that appears to be associated with on-site construction safety and not with environmental issues.

The review of building department records did not identify past uses indicating environmental concerns for the property.

5.3.8 Zoning/Land Use Records

Cardno ATC obtained zoning information pertaining to the property from the NYCDCP website. According to Zoning Map 8D, the property is zoned as Transportation and Utility "C6-4" in the specialty district identified as "HY" – Hudson Yards. Historical zoning information would require a manual search of past zoning maps at the NYCDCP. Since historical information regarding the property dating back to the late 1800s was obtained from other sources used for this assessment and no significant data gaps were identified, Cardno ATC did not request a search of past zoning maps. As previously noted, the property is identified as having a City Environmental Quality Review (CEQR) Declaration (also known as an (E) designation).

5.3.9 Prior Reports

The following provides a summary of information from prior reports made available to ATC for review. Documentation is included in Appendix H.

OTHER USER PROVIDED DOCUMENTS		
Title	**Date (if known)**	**Author and/or Source (if known)**
Phase I Environmental Site Assessment, 9th Avenue Train Yard, New York, NY	September 10, 2007	ATC Associates, Inc. (ATC Associates or ATC)
Phase II Environmental Site Investigation Parking Lots at the 9th Avenue Train Yards, Portions of Block 729; Lots 50 & 60, New York, New York 10001	May 7, 2008	ATC Associates, Inc.

<u>Phase I Environmental Site Assessment, 9th Avenue Train Yard, New York, NY, dated September 10, 2007 prepared by ATC Associates</u>

ATC Associates performed a Phase I ESA of the property as well as the adjoining properties to the north and east in 2007. The following *recognized environmental conditions* were noted:

(1) The review of New York City Department of City Planning and New York City Department of Building records, as well as the review of the regulatory agencies database identified both lots as having a City Environmental Quality Review (CEQR) Declaration (also known as an "E" designation) for "Hazmat, Noise and Air". An "E" designation is assigned to certain blocks or lots by a New York City agency (i.e., New York City Department of Environmental Protection, New York City Department of City Planning) as a result of an environmental assessment performed in conjunction with a zoning map amendment. This designation is assigned when there is physical or historical evidence of uses related to hazardous materials, air quality and noise pollution. The classification as an "E" designation is considered to represent a *recognized environmental condition* for the property.

(2) The review of the historical uses of the property identified the property to be used as a train yard, an auto repair, filling station, printer and mechanical shop. Identified on the adjoining properties was a filling station, the train yard, printing facilities, motor shops, metal work companies and dying facilities. These identified historical activities typically use petroleum products, solvents, and other hazardous chemicals in their routine operations. Therefore, the historical uses of the property and surrounding area are considered to represent a *recognized environmental condition* for the property. Additionally, the historical UST identified in the historical Sanborn maps and certificates of occupancy on the southern adjoining site were not identified on the NYSDEC database; however since the structures were demolished more than

40 years ago, no records are expected to be found. Any buried tanks that were not removed during demolition operations could potentially remain either located in a collapsed basement or buried.

(3) ATC's review of a property investigation report prepared by Hazardous Waste Engineering Consultants (HWE) dated April 9, 1991, identified the presence of petroleum related contamination, metals and PCBs contamination in the railroad bedding at the property. No remedial action or additional investigation reports were provided for review. Since the contamination may still be present, ATC considered the reported contamination to represent a *recognized environmental condition* for the property.

Based on information collected from the property I ESA, ATC recommended the performance of a Phase II Environmental Site Investigation (ESI) at the property. The Phase II ESI proposed the collection of soil and groundwater samples to assess whether the subsurface of the property had been impacted by the environmental conditions identified during the Phase I ESA. As part of the Phase II ESI, a geophysical survey was also proposed to assess if USTs are buried beneath the property.

Phase II Environmental Site Investigation Parking Lots at the 9th Avenue Train Yards, Portions of Block 729; Lots 50 & 60, New York, New York 10001, prepared by ATC Associates and dated May 7, 2008;

ATC performed a Phase II ESI in March 2008 which included three (3) individual parking lots located west of 9th Avenue; two along West 33rd Street and one along West 31st Street in Manhattan, New York. This included the property as well as an additional parcel. It should be noted that the Train Yards are located in a recessed area 60 feet below the parking lots and are, according to the New York City Department of Finance, identified as occupying portions of the property. Although the Train Yards are technically part of the property, they were not addressed during the Phase II Investigation. Therefore, the *recognized environmental condition* associated with the Train Yards was not assessed. It was reported that all soil and approximately ten feet of bedrock will be removed prior to construction of the proposed development.

A geophysical survey did not identify anomalies associated with USTs. The Phase II ESI in the area of the property consisted of the advancement of nine (9) soil borings (SB-01 through SB-09) that facilitated the collection of nineteen (19) soil samples. One sample was collected from the surface (0-2 feet bgs) interval and one from the identified historic fill material. Soil boring SB-02 had an additional soil sample collected at approximately 11 feet below grade due to the presence of minor staining. All soil borings were advanced from grade to refusal where bedrock was encountered at depths ranging from 7 to 24 feet below grade. Groundwater was not encountered at any of the boring locations. The presence of fill materials was observed at shallow depths from 6 to 12 feet and consisted of glass, metal, ash, concrete, asphalt, wood fragments, brick, and course to fine sand.

Soil samples collected were analyzed for target compound list (TCL) volatile organic compounds (VOCs) via Environmental Protection Agency (EPA) Method 8260, TCL semi volatile organic compounds (SVOCs) via EPA Method 8270, target analyte list (TAL) metals via EPA method 6010, polychlorinated biphenyls (PCBs), via EPA method 8081, and pesticides via EPA Method 8081. The soil sampling results were then compared to the NYSDEC Technical and Administrative Guidance Memorandum (TAGM) 4046 Recommended Soil Cleanup Objectives (RSCOs) to evaluate whether remedial actions were required. Additionally, soil samples with concentrations of lead that exceed Eastern USA Soil Background Levels were analyzed for Toxicity Characteristic Leaching Procedure (TCLP) for lead.

Concentrations of SVOCs were detected above the NYSDEC TAGM RSCOs in eight (8) of the nineteen (19) soil samples collected from the property. Concentrations of lead in eleven (11) of the soil samples collected exceed their respective Eastern USA Background levels and were therefore analyzed for TCLP lead. According to the TCLP results, only SB-03 (5-10') contained concentrations of lead in leachate above 5.0 mg/l and therefore meets the EPA definition of hazardous material. Concentrations of VOCs, PCBs, and pesticides were not detected above their respective NYSDEC TAGM RSCOs in any of the soil samples collected.

Based on the findings of the investigation, ATC recommended the following:

- Additional property characterization was not required at the time of the issuance of the report, provided that any fill material and soil removed during development and/or construction is handled as regulated waste and sampled in accordance with the receiving facility protocols.

- Soil within the vicinity of SB-03, which could potentially contain hazardous concentrations of lead, should be delineated and handled separately as hazardous material.

- Procedures be followed to ensure human health is protected during excavation and/or construction activities.

- At time of construction, procedures should be in place to properly remove, handle and transport UST(s) should they be encountered during excavation and/or construction pertaining to the redevelopment of the property; however they are not expected to be present.

5.3.10 Other Historical Sources

No other historical sources were reviewed.

6.0 SITE RECONNAISSANCE

The following is a summary of visual and/or physical observations of the property on the day of the site visit. Representative site photographs can be found in Appendix C.

6.1 Methodology and Limiting Conditions

Ms. Denise Cosenza conducted the site reconnaissance on December 22, 2014 and was escorted by Ms. Patricia Bertuccio with Brookfield Office Properties and a representative of the property owner. The site reconnaissance consisted of visual and/or physical observations of: the property and improvements; adjoining sites as viewed from the property; and, the surrounding area based on visual observations made during the trip to and from the property. Unimproved portions of the property (if any) were observed along the perimeter and in a general grid pattern in safely accessible areas, if accessible and possible. Building exteriors (if any) were observed along the perimeter from the ground, unless described otherwise. Building interiors (if any) were observed as they were made safely accessible, unless described otherwise. On the date of site reconnaissance, the weather was sunny with an ambient temperature of approximately 35 degrees Fahrenheit.

6.2 Hazardous Substance Use, Storage, and Disposal

Cardno ATC did not observe the use or storage or hazardous substances or materials on the property.

6.3 Underground Storage Tanks (USTs)

Cardno ATC did not observe evidence of USTs on the property. A geophysical survey conducted as part of the Phase II ESI in 2008 did not identify USTs on the property. Any buried tanks that were not removed during demolition operations could potentially remain on-Site.

6.4 Aboveground Storage Tanks (ASTs)

Cardno ATC did not observe evidence of ASTs on the property.

6.5 Other Petroleum Products

Cardno ATC did not observe evidence of the use, storage or disposal of other petroleum products in, on or at the property.

6.6 Polychlorinated Biphenyls (PCBs)

Cardno ATC did not observe evidence of the use, storage or disposal of PCB-containing electrical or hydraulic equipment on the property.

6.7 Unidentified Substance Containers

Cardno ATC did not observe unidentified substance containers on the property.

6.8 Nonhazardous Solid Waste

No municipal waste is currently generated at the property. Construction related debris is periodically removed from the property by an outside vendor.

6.9 Wastewater

Cardno ATC did not observe evidence of wastewater generated, treated or discharged (including sanitary sewage and stormwater) in, on or at the property or to adjoining properties.

6.10 Waste Pits, Ponds and Lagoons

Cardno ATC did not observe evidence of waste pits, ponds or lagoons in, on or at the property.

6.11 Drains and Sumps

Cardno ATC did not observe evidence of drains or sumps in, on or at the property.

6.12 Septic Systems

Cardno ATC did not observe evidence of a septic system in, on or at the property.

6.13 Stormwater Management System

Cardno ATC did not observe any evidence of surface water, surface impoundments, retention ponds, dry wells, or other stormwater management systems at the property.

The stormwater either infiltrates the ground or flows over land to stormwater catch basins that are connected to the municipal stormwater management system located along the street curbs.

6.14 Wells

Cardno ATC did not observe evidence of wells on the property.

7.0 SUBSURFACE VAPOR MIGRATION

Hazardous gases (vapor) from subsurface sources, such as contaminated soil or groundwater can migrate into residential, commercial, and industrial buildings with any foundation type, including basements, crawlspaces, or slabs. According to EPA guidance, three conditions must exist for hazardous vapors to reach the interior of buildings from the subsurface environment underneath or near a building. First, a source of hazardous vapors must be present in the soil or in groundwater underneath or near a building. Second, vapors must form and have a pathway along which to migrate toward the building. Third, entry routes must exist for the vapors to enter the building, and driving forces must exist to draw the vapors into the building.

ASTM's Vapor Encroachment guidance indicates that when groundwater flow direction can be estimated or determined, the cross-gradient or downgradient radius distances can be significantly reduced. The EDR VES report calculates the reduced AOC distances when considering groundwater flow direction by utilizing the following default distances, which were determined using the Buonicore Methodology: (non-petroleum hydrocarbon COCs) 1,760 feet in the upgradient direction; 365 feet in the cross-gradient direction; and 100 feet in the downgradient direction and (petroleum hydrocarbon COCs) 528 feet in the upgradient direction; 165 feet in the cross-gradient direction if Light, Non-Aqueous Phase Liquid, (LNAPL i.e. floating product) is suspected; 95 feet in the cross-gradient direction if no LNAPL is suspected; 100 feet in the downgradient direction (LNAPL suspected); and 30 feet in the downgradient position (LNAPL not suspected).

Cardno ATC reviewed potential sources of COCs from the sites reported on the EDR database report and VES report. No VECs were identified in connection with the Property.

Cardno ATC considered the nature and extent of on-site and nearby sources of potential subsurface vapor migration by evaluating the current and historical usage of the property, the construction type and history, the physical setting, and the potential sources of subsurface vapor migration through the review of regulatory agency database information that was summarized in Section 5.0. Based on the evaluation of the known or suspected releases of hazardous substances or petroleum products, distance from the property, potential pathways, soil type, and property use, the remaining sites evaluated under the VES either were ruled out or could not be ruled out because of the possibility of nearby, known or suspected contamination, but vapor impact to the property was considered not likely.

8.0 INTERVIEWS

The following persons were interviewed to obtain information regarding *recognized environmental conditions* in connection with the property:

INTERVIEW SUMMARY				
Role	**Name**	**Title/Company**	**Years Assoc. With Property**	**Interview Type**
Owner	Ms. Patricia Bertuccio	Assistant Director, Construction / Brookfield Office Properties	2	In person
Local Govt. Official	Representative	New York City Department of Environmental Protection (NYCDEP)	NA	Written
Local Govt. Official	Representative	Fire Department of New York (FDNY)	NA	Written
State Govt. Official	Representative	New York State Department of Environmental Conservation (NYSDEC)	NA	Written

Pertinent information from the interviews is discussed in applicable sections of this report.

9.0 OTHER ENVIRONMENTAL CONDITIONS

9.1 Asbestos-Containing Materials (ACM)

The property is unimproved. Therefore, a survey for the presence of ACM was not included as a supplement to this Phase I ESA.

9.2 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The EPA guidance action level for annual residential exposure to radon is 4.0 picoCuries per liter of air (pCi/L). The guidance action level is not a regulatory requirement for private owners of commercial real estate, but is commonly used for comparison purposes to suggest whether further action at a building may be prudent.

Cardno ATC's review of published radon data indicates that the property is located in EPA Radon Zone 3 (Low Potential) where the average indoor concentration of radon is less than 2 pCi/L, which is less than the United States Environmental Protection Agency (USEPA) Action Level of 4.0 pCi/L. Additionally, the New York State Department of Health (NYSDOH) maintains a database of radon test results on a local and county level. According to the NYSDOH, a total of 91 radon tests have been conducted in New York County. The average radon level was found to be 1.59 pCi/L. This is below the USEPA action level of 4.0 pCi/L. In addition, according to the NYSDOH approximately 92.3% of basements screened in the Bronx had radon levels below 4.0 pCi/l. A radon survey was not conducted as a supplement to this Phase I ESA.

9.3 Lead in Drinking Water

Cardno ATC reviewed New York City's most recent Drinking Water Supply and Quality Report made available through the NYCDEP website for the year 2013. Review of the analytical data provided in the report confirmed that the municipally supplied water meets all drinking water standards established by the United States Environmental Protection Agency Safe Water Drinking Act, including those for lead. No drinking water supply wells exist at the property. Lead in drinking water testing was not conducted for this Phase I ESA.

9.4 Lead-Based Paint (LBP)

The property is unimproved. Therefore, consideration of LBP on painted surfaces was not included as a supplement to this Phase I ESA.

9.5 Mold Screening

The property is unimproved. Therefore, a mold screening survey was not completed as a supplement to this Phase I ESA.

9.6 Additional User Requested Conditions

No additional User requested services were included in the scope of work for this ESA.

11.0 TERMINOLOGY

The following provides definitions and descriptions of certain terms that may be used in this report. Italics indicate terms that are defined by ASTM Standard Practice E1527-13. The Standard Practice should be referenced for further detail (such as the precise wording), related definitions or additional explanation regarding the meaning of terms.

recognized environmental condition(s) (REC) - the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

material threat - a physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional (EP), is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage such that it may cause or contribute to tank integrity failure with a release of contents to the environment.

de minimis condition – is a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies. An example might include a release of *hazardous substances* or *petroleum products* that could reasonably and foreseeably result in a concentration exceeding the applicable regulatory agency risk-based residential standards or substantial damage to natural resources. The risk of that exposure or damage would represent a threat to human health or the environment. If an enforcement action would be less likely than not, then the condition is considered to be generally not likely the subject of an enforcement action. A condition determined to be *de minimis* is not a *REC* or *controlled recognized environmental condition (CREC)*.

historical recognized environmental condition(s) (HREC) - a past release of any *hazardous substances* or *petroleum products* that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a *HREC*, the EP must determine whether the past release is a *REC* at the time the assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a *REC* at the time the Phase I ESA is conducted, the condition will be reported in Section 1.2 the Findings and Conclusions Summary table as a *REC*.

controlled recognized environmental condition (CREC) - a *recognized environmental condition* resulting from a past release of *hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitation, institutional controls, or engineering controls). Per E1527-13, a *CREC* will be reported in the Section 1.2 Findings and Conclusions Summary table as a *CREC* and a *REC*.

migrate/migration - refers to the movement of *hazardous substances* or *petroleum products* in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 09/29/2014 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS	***NO STREET APPLICABLE***	***WNW 1/4 - 1/2 (0.471 mi.)***	***0***	***8***

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 10/25/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS	***NO STREET APPLICABLE***	***WNW 1/4 - 1/2 (0.471 mi.)***	***0***	***8***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 10/25/2013 has revealed that there is

EXECUTIVE SUMMARY

1 CERC-NFRAP site within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/10/2014 has revealed that there are 5 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/10/2014 has revealed that there are 12 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/10/2014 has revealed that there are 22 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 09/18/2014 has revealed that there is 1 US ENG CONTROLS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS	***NO STREET APPLICABLE***	***WNW 1/4 - 1/2 (0.471 mi.)***	***0***	***8***

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 09/18/2014 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 09/24/2014 has revealed that there is 1 NY SHWS site within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

NY SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the list.

A review of the NY SWF/LF list, as provided by EDR, and dated 10/07/2014 has revealed that there are 2 NY SWF/LF sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 08/18/2014 has revealed that there are 122 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY TANKS: This database contains records of facilities that are or have been regulated under Bulk Storage Program. Tank information for these facilities may not be releasable by the state agency.

A review of the NY TANKS list, as provided by EDR, and dated 09/30/2014 has revealed that there are 4 NY TANKS sites within approximately 0.25 miles of the target property.

NY CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 NY CBS AST site within approximately 0.25 miles of the target property.

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 08/18/2014 has revealed that there are 50 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/10/2014 has revealed that there are 77 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

CONSENT: Major Legal settlements that establish responsibility and standards for cleanup at NPL (superfund) sites. Released periodically by U.S. District Courts after settlement by parties to litigation matters.

A review of the CONSENT list, as provided by EDR, and dated 12/31/2013 has revealed that there is 1 CONSENT site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS	***NO STREET APPLICABLE***	***WNW 1/4 - 1/2 (0.471 mi.)***	***0***	***8***

ROD: Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid the cleanup.

A review of the ROD list, as provided by EDR, and dated 11/25/2013 has revealed that there is 1 ROD site within approximately 1 mile of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 6 EDR MGP sites within approximately 1 mile of the target property.

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 37 EDR US Hist Auto Stat sites within approximately 0.25 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 7 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

HUDSON RIVER PCBS (Continued) **1000384273**

Scoring: 4

Summary Details:

Conditions at listing September 1983): The Hudson River PCBs Site is a 40-mile stretch of the Hudson River between Mechanicville and Fort Edward, New York. General Electric Co. discharged an estimated l.l million pounds of PCBs into this stretch of river. The State has identified 40 hot spots, defined as sediments contaminated with greater than 50 parts per million ppm) of PCBs. Also included in the site are five remnant areas, which are river sediments exposed when thelevel of the river was lowered due to removal of the Fort Edward Dam. The State has taken initial measures to stabili e the remnant areas from erosion. In September 1980, Congress passed an amendment to the Clean Water Act CWA) that included the Hudson River PCB Reclamation Demonstration Project. Under this legislation, the EPA Administrator could authori e a 75 percent grant, not to exceed 20 million. EPA issued a final Environmental Impact Statement in October 1982 evaluating various dredging alternatives for a demonstration project. EPA has prepared a feasibility study to evaluate alternative remedial actions under CERCLA. The Administrator has determined that CERCLA funds may be used for remedial action atthe remnant areas and for evaluating the effectiveness of the water supply system at Waterford, New York. Status June 1984): EPA has completed a draft feasibility study identifying alternatives for remedial action. A search for partiespotentially responsible for wastes associated with the site has been completed, and EPA has sent letters to two potentially responsible parties notifying them of possible legal action under CERCLA.

Site Description: The Hudson River PCBs Site includes a nearly 200 river-mile stretch of the Hudson River in eastern New York State from the Village of Hudson Falls to the Battery in New York City. The Hudson River has been designated an American Heritage River because of its important role in American history and culture. This federal Superfund Record of Decision (ROD) addresses the risks to people and ecological receptors associated with polychlorinated biphenyls (PCBs) in the in-place sediments of the Upper Hudson River. The Site is divided into the Upper Hudson River which is the length of river between Hudson Falls and the Federal Dam at Troy, New York and the Lower Hudson River which is the length of river between Federal Dam at Troy and the Battery. For purposes of this project, EPA further divided the Upper Hudson River area into three main sections known as River Section 1, River Section 2, and River Section 3. The Site also includes five Remnant Deposits, which are areas of PCB-contaminated sediment that became exposed after the river water level dropped following removal of the Fort Edward Dam in 1973. The Upper Hudson River portion of the Site extends from the Fenimore Bridge in Hudson Falls to the Federal Dam at Troy, a distance of just over 43 river miles. The Lower Hudson River extends from the Federal Dam to the southern tip of Manhattan at the Battery in New York City. The Mid-Hudson River, which is primarily a subset of the Lower Hudson River, extends from the Federal Dam at Troy to just south of

HUDSON RIVER PCBS (Continued) **1000384273**

Poughkeepsie. The predominant sources of PCB contamination to the Upper Hudson River were two capacitor manufacturing plants owned and operated by GE. The plants are located adjacent to or near the Hudson River in the Village of Hudson Falls and the Town of Fort Edward. Over a 30-year period, the plants discharged a substantial amount of PCBs into the river. At the GE Hudson Falls plant, leakage of non-aqueous phase PCB-bearing oils through bedrock to the river continues to be a source of PCB contamination. Regarding the former outfall to the Hudson River from the GE Fort Edward plant, New York State Department of Environmental Conservation (NYSDEC) issued a Record of Decision in January 2000 that calls for the excavation of PCB-contaminated soil and sediment in this area of the Upper Hudson River shoreline in order to eliminate this source of PCBs to the river. EPA's analysis assumes a significantly reduced PCB loading to the river from these sources once the State's plans for remediation are implemented. PCBs, the chemicals of concern addressed in this decision document, have been classified by EPA as probable human carcinogens. They are also linked to other serious non- cancer adverse health effects based on observations in animals and emerging evidence in humans. Once discharged from the GE plants, the PCBs adhered to river sediment and accumulated downstream as they settled in impounded pools and other depositional areas. Historic fish and sediment data indicated PCBs were accumulating downstream of the old Fort Edward Dam as well as accumulating behind the dam. The removal of the dam in 1973 resulted in a remobilization and downstream distribution of PCBs that had accumulated behind the dam. Historically, the highest PCB sediment concentrations have been detected in the cohesive sediments within the Upper Hudson River. River scouring/ erosion and other mechanisms have mobilized PCB- contaminated sediments from the extensive cohesive deposits, redepositing them farther downstream all the way to the Battery. The preponderance of data indicates that burial of contaminated sediment by cleaner materials is not universally or uniformly occurring. Data also indicate that contaminated sediments in River Sections 1, 2 and 3 continue to serve as the major source of PCBs to the water column and the fish within the Upper Hudson River. During an approximate 30-year period ending in 1977, PCBs were used in capacitor manufacturing operations Hudson Falls and Fort Edward, New York facilities. PCB oils were discharged both directly and indirectly from these plants into the Hudson River. This included both non-permitted and permitted discharges. Even after permits were received in 1975, permit exceedances occurred. Estimates of the total quantity of PCBs discharged directly from the two plants into the river from the 1940s to 1977 are as high as 1,330,000 pounds (about 605,000 kg). Many of the PCBs discharged to the river adhered to sediments and accumulated with the sediments as they settled in the impounded pool behind the Fort Edward Dam, as well as other depositional areas farther downstream. Because of its deteriorating condition, the Fort Edward Dam was removed in 1973. Five areas of PCB-contaminated sediments were exposed due to the lowering of the river water level when the Fort Edward Dam was removed. These five areas are known as the Remnant Deposits. During subsequent floods, PCB-contaminated sediments from the Fort Edward Dam area were scoured and transported downstream. EPA notified the company that had the two plants of the remedy selected in the 1984 ROD and offered the company the opportunity to implement the selected remedy with respect to the Remnant Deposits and the Waterford drinking water supply evaluation. The company declined EPA's offer. NYSDEC, with funding provided by EPA, conducted the evaluation at the Waterford Water Works. In addition, NYSDEC prepared a design for the in- place containment of the Remnant Deposits. This design was completed in 1988. In March 1989, the company offered to assume responsibility for the implementation of the in-place containment remedy for the Remnant Deposits. EPA issued a September 27, 1989 Administrative Order on Consent to the company which required the company to prepare a remedial design

HUDSON RIVER PCBS (Continued) **1000384273**

report for the construction of access roads to the Remnant Deposits and to submit a design for the in-place containment of the Remnant Deposits incorporating the NYSDEC-prepared design, plus any EPA-approved refinements to that design. EPA also issued a September 27, 1989 Administrative Order to the company requiring the company to construct and maintain the access roads to the Remnant Deposits. The company constructed the in-place containment of the Remnant Deposits under a 1990 Consent Decree with EPA. EPA will evaluate the need for further remedial action for the Remnant Deposits after completion of a 5-year review of the Remnant Deposit containment remedy, performed pursuant to CERCLA ?121(c). The company's manufacturing plants in Hudson Falls and Fort Edward are listed under the New York State Inactive Hazardous Waste Disposal Sites Remedial program. The company currently is conducting remedial activities near the Hudson Falls and Fort Edward plants pursuant to Orders on Consent with NYSDEC. The company has thus far declined to implement the January 2000 NYSDEC Record of Decision for the Fort Edward plant Outfall 004. The NYSDEC is conducting the remedial design for that ROD. As one of America's great rivers, the Hudson has played and will continue to play a major role in the history, culture, and economy of the area. The Hudson has been designated an American Heritage River because of its important role in American history and culture. Current and reasonably-anticipated future land use and surface water use are described below. Current land use includes a variety of residential, commercial and industrial activities. Use of the river and lands surrounding the river are projected to remain the same. At this time, no changes in future land use are known, nor are any new uses expected. The Site passes through 14 different counties as the river flows to its final discharge point in New York Harbor. Four counties (Albany, Washington, Rensselaer, and Saratoga) lie adjacent to the more highly contaminated portions (areas of proposed active remediation in River Sections 1, 2 and 3) of the Upper Hudson River between Troy (Federal Dam) and Hudson Falls. Within these four counties, forests and farmlands surround urban centers and historic villages. There are apple orchards and dairy farms, parks, nature preserves and gardens. In addition to the GE Hudson Falls and Fort Edward plants, the area is home to technology companies, oil service companies and food companies. Saratoga and Washington Counties have experienced population growth between 1990 and 1999 of 10.2 percent and 1.4 percent, respectively, while Rensselaer and Albany Counties have experienced population declines of 1.9 percent and 0.3 percent, respectively. Total population of these four counties, according to July 1999 estimates by the US Department of Commerce Bureau of the Census, is just under 700,000. Warren County, in which the City of Glens Falls is located, has a population of just over 60,000 and is just to the northwest of the Hudson River PCBs Site. A Record of Decision (ROD) addressing operable unit 1 (OU 01) was completed in September 1984. A Record of Decision addressing OU 2 was completed in February 2002.

DEC Memo:	10/02/08 - Raphael Ketani. I spoke to Officer Thomas at (646) 610-5580. She said that 10 people were in Planned Parenthood when one worker opened a letter with a post mark from San Diego. The letter contained a very small amount of a white powder. The office was closed. The worker who opened the envelope was sent to Bellvue Hospital for testing. All of the powder was contained and there is no further action by NYPD or the NYFD.Based upon the containing of the white powder, I am closing the spill case.
Remarks:	WHITE POWDER WAS FOUND IN AN ENVELOPE. FDNY AND NYPD HAZMAT ON SCENE.

Historical Generators:
Date form received by agency: 01/01/2006
Site name: KNICKERBOCKER GRAPHIC SERVICES
Classification: Not a generator, verified

Date form received by agency: 09/10/1993
Site name: KNICKERBOCKER GRAPHIC SERVICES
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste name: POTASSIUM CYANIDE

Waste code: P106
Waste name: SODIUM CYANIDE

Waste code: D000

ARTCARVED INC (Continued) **1000168015**

Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F006
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

Waste code: F007
Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS

Waste code: F008
Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: F009
Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS WHERE CYANIDES ARE USED IN THE PROCESS.

Waste code: K050
Waste name: HEAT EXCHANGER BUNDLE CLEANING SLUDGE FROM THE PETROLEUM REFINING INDUSTRY

Waste code: P030
Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

Waste code: P098
Waste name: POTASSIUM CYANIDE

ARTCARVED INC (Continued) **1000168015**

Waste code: P099
Waste name: ARGENTATE(1-), BIS(CYANO-C)-, POTASSIUM

Waste code: P104
Waste name: SILVER CYANIDE

Waste code: P106
Waste name: SODIUM CYANIDE

Waste code: U002
Waste name: ACETONE (I)

Waste code: U019
Waste name: BENZENE (I,T)

DEC Memo: TTF was sent out toBROADWAY REAL ESTATE SERVICES450-460 WEST 33RD STREET NEW YORK, NY 10043 ATTN: JAVIER CORRIPIO ** PBS 2-456721 **2/26/13 TJDFile review. Tank failed tightness test on 9/8/12 - intially reported as a wet leak. Tank was uncovered and corrosion was identified at tank top fittings and associated piping. Repairs were performed and a tank only (isolation test) was performed on 10/2/12 which passed. A complete system tightness test was then permformed on 10/11/12, also with passing results. Contractor has provided the following statement in their closure report, "Throughout excavation operations, close inspections indicated neither visual nor olfactory evidence of petroleum contamination, confirming that there was no loss of product into the subsurface." all required closure documentation has been submitted and uploaded to EDOCS. No further action is required at this time.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS

USPS - JAF BUILDING (Continued) **1000705567**

USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D029
Waste name: 1,1-DICHLOROETHYLENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - Records/Reporting
Date violation determined: 10/06/1999
Date achieved compliance: 11/06/1999
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 10/06/1999
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Registry ID: 110000878131

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 130-529:03/23/00 15:4 M.Reiter (27277) reports while doing a routine inspection found oil spill in V-3420 (feeder 16m64) at 406 w.31st st. Have 5 gallons of dielectric transformer fluid on the floor mixed in with dirt. There is also 1 ounce of water. Spill can be contained in 1-55 gallon drum. Took sample for PCB analysis. Cleanup is pending removal of unit. No entry into sewer or waterways. Will do a partial cleanup now.Lab Results Are As Follows: Aroclor 1260 - 18 PPM. Lab Seq #00-02731Clean up completed at 0900 hours on 3/29/2000 utilizing flush truck. Transformer was removed and replaced on the same day.
Remarks:	unk equipment failure caused spill - clean up being started now con ed -130529

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D011
Waste name: SILVER

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER"12/15/2003 Sangesland spoke with Matthew Stanley (212-273-5097) of NY State Dormatory Authority. His group is looking at buying this building to use as a college dorm.As part of a phase 1/2 the consultant saw a sealed fill port and an active fill port. Both had evidence of oil staining around them. 2 borings were done adjacent to these fill ports and heavy contamination was found down to approx 4-5 ft deep. At 6-8' deep there did NOT appear to be any problems.Sent Contaminated Soil Letter to:406 Realty LLCc/o The Expansion Group Inc.250 West 57th StreetNY, NY 10107Attn: Johny Melohn12/21/05 Sharif// I spoke with Matthew Stanley of NYS Dormatory Authority . He said the property is currently owned by Fashion Institute of Technology(FIT)and they are building a residential unit for students. NYS Dorm. Authority is providing the financial assistance to FIT for building the Dorm.Mr. Paul

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: D026
Waste name: CRESOL

Waste code: X002

AMTRAK PENN STATION NY (Continued) **1000552164**

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

EVERGREENE ARCHITECTURAL ARTS (Continued) **1000308227**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

GRUMBACHER INC (Continued) **1000296761**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

DEC Memo:	Sangesland left a voice mail for Rick Kasten at Stuyvesant Fuel asking if the work has been completed.Rick called back to say Mystic Transportation actually made the spill and then cleaned the site. PTC was on site the next day to do some tank work and Rick asked PTC to inspect the cleanup. PTC said the cleanup was done well
Remarks:	office was on #2 temp. tank and requested that #6 be delivered to the original tank, but the temp. tank was not disconected ; cot yet cleaned;

Hazardous Waste Summary:
Waste code: NONE
Waste name: None

Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS

21 PENN PLAZA (Continued) **1000994305**

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	During quartely monitoring of tranformers, crew noticed stains in four locations. of the four, three were minor though one was heavily stained. this area is a tight space adjacent to the building. Currently there is a different contractor working the area further hampering the cleanup. They are scheduled to work on friday. The oil does not contain pcb's (r-temnp)though they will contact us back with numbers. He will forward report when complete, manifrests and analytical are in.DECPiper- I recieved and reviewed closure report documenting removal of contaminated soil and ballast. Endpoints revealed low level SVOC's. Area was backfilled. Based on work to date, this spill is closed. See e-docs if warranted.
Remarks:	slow leak discovered in transformer in rail yard today, unk how much leaked or when the leak started.

LIRR - WEST SIDE YARDS (Continued) **S106127120**

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"12/18/03 TJDVapors are eminating from an ejector pit (est. capacity 100k gal) A thin layer of diesel was floating on top of water inside pit. LIRR was directed to pump pit, removed debris and pressure wash collecting wash water. All work performed in accordance with directive. Trackdown investigation did not reveal source. LIRR directed to monitor pit for minimum of two weeks.12/19/03 TJDVapors returned in afternoon. DEC responded. DEP notified and responded. DEP investigation revealed that LIRR yard is hydraulically seperate from NYC sewer system, therefore, vapors must be eminating from LIRR property. Trackdown investigation again did not reveal source. Vapor condition began to disipate inside control tower bldg. LIRR directed to ventilate space and continue to monitor.12/22/03 TJDLIRR contacted. Vapors have not returned. Continuing to monitor.1/23/04 TJDThe following notes are copied from an e-mail meesage received from LIRR pertaing to this spill event:Per my discussions earlier today with Tim Fiske (LIRR Electrician), the Control Tower and ejector pit have been monitored since December 18, 2003 for the presence of petroleum odors and oil sheens. The petroleum odor, previously detected throughout most of the building, has dissipated; however, a faint odor remains in the ejector pit. Additionally, a light oil sheen has once again been detected at the bottom of the ejector pit. The current sheen may be the result of oil residue that has been hung up in the yard's drainage system. Recent precipitation may have resulted in this release. The LIRR plans to once again clean the ejector pit and all pumping equipment. Additionally, booms will be placed at both influent pipes at the bottom of the pit. The booms will help to isolate any residual oil that may enter the pit and will aid in identifying the source of the oil. A monitoring log will continue to be maintained for ejector pit observations and the documentation of petroleum odors in the building.I have scheduled an onsite meeting for Monday January 26th at 9:00 AM with AB Oil to plan the clean out and pumping of the ejector pit. If AB's personnel and equipment are available, work will be performed on Tuesday January 27th. I will advise you of our plans after meeting with AB Oil.Lew WunderlichEnvironmental Engineer - LIRR System Safety718-558-32523/23/05 - Austin - Transferred from DeMeo to Tibbe - end06/8/05: LIRR cleaned pit again on 01/27/04. Sample of water taken from the pit. Results: ND. Pit was monitored thru April 13, 2004 without reoccurance of odor or sheen. At least one heavy rain event but still no odor or sheen. MCT.

Remarks: LIRR reporting the control tower at West Side Storage Yard is being impacted by Diesel vapors. FDNY responded and temporarily evacuated bldg. LIRR to investigate problem.

DEC Memo:	5/3/2002-VOUGHT-See spill #9704661, #9200058, #9506257 at same location. DO NOT CLOSE THIS SPILL UNTIL THE ABOVE REFERENCED SPILLS ARE ADDRESSED.11/18/03 Transferred from Vought to Foley. File review (KMF)Depth to groundwater 5-10 ft bgs. Depth to bedrock approx 1.5-8.5 ft bgs. Most likely impacted. Delta submitted Monitoring Well Abandonment Report on 7/3/03. MW-2 through MW-5 were abandoned because of unknown construction, the well did not exhibit significant impacts, the well no longer served a productive purpose in the monitoring network, and/or the well presented a risk of cross contaminating deeper strata. MW-1, MW-6 and MW-7 remain in place.Delta submitted First Quarter 2003 Monitoring Report on 10/1/03. LNAPL present in MW-7 since April 2002. BTEX concentrations fluctuating but above GWQS, except for MW-5. MTBE concentrations are consistently above GWQS. Max conc of total BTEX 3680ug/L (MW-4)Max conc of MTBE 34200ug/L (MW-2)12/15/03 2Q2003 monitoring report received. Sampling event from 5/9/03 showed 0.42' of LNAPL in MW-7 and high BTEX and MTBE in other wells. MW-2, MW-3, MW-4 and MW-5 have been adandoned since.5/7/04 Portfolio meeting: shallow bedrock, DTW 4-9'bgs. Diesel/#2 fuel oil detected in MW-1. Bedrock fracture

BP AMOCO STATION #11248 (Continued) **S106003274**

analysis shows possible source as adj. commercial property. Need to
invetigate further. Will continue monitoring. Need to collect sample
from MW-7(new well). Upgrade to be done this year as part of spill
prevention initiative.7/8/04 Received 3Q03 & 4Q03 monitoring reports.
0.41 ft(3Q03) and 0.04ft(4Q03) of product in MW-7.7/27/04 Stipulation
due 8/17/04.8/17/04 1Q04 monitoring report received. Shallow bedrock.
Three wells on site. BTEX from 69ppb(MW-6) to 1152ppb(MW-1). MTBE
from 38000ppb(MW-6) to 117000ppb(MW-1). 0.07' LNAPL in MW-7.2Q04
monitoring report received. BTEX from 110ppb(MW-6) to 648ppb(MW-1).
MTBE from 2190ppb to 58700ppb.8/19/04 Stip signed and
returned.8/23/04 Stip fully executed by T.
Kunkel.

----------10/26/04 Investigation summary report received.
Historic Investigations:7/1/91 Amoco Oil activated a lease agreement
with Spartan, the current property owner. Spartan conducted a
baseline gw quality assessment, the results which detected dissolved
product in gw.11/20/01 Delta, as part of an assessment to support
lease termination, advanced four soil borings (SB-1 thru SB-4) by
Geoprobe. They were advanced around the tank mat and pump islands to
refusal between 1-3'bgs. Four existing wells were identified and
samples were taken from MW-1 and MW-2 on 11/20/01 (MW-3 & MW-4 were
obstructed). Total BTEX from 35ppb(MW-1) to 2124ppb(MW-2). MTBE was
detected at 129000ppb in MW-2 and 130000ppb in MW-1.4/3/02 Three
additional wells (MW-5,6,7) were advanced at previously installed
boring locations SB-1, 2, and 3. Bedrock was encountered between 1.5
and 3.5 ft bgs and GW in bedrock fractures between 8 and 11'bgs in
MW-6 and MW-7. Bedrock GW not encountered in MW-5. The MWs were
advanced thru bedrock to depths between 16-26'bgs. Also cleared
obstructions in MW-3 and MW-4. BTEX ranged from 50ppb(MW-3) to
4383ppb(MW-4). MTBE from 49ppb(MW-3) to 40700ppb(MW-2). Trace LNAPL
was detected in MW-7 and was sampled. Results identified it as highly
weathered regular grade gasoline that does not contain MTBE.12/10/02
Geophysical survey conducted. Identifed competent bedrock between 1
and 8'bgs.6/12/03-6/24/03 Rehabilitated MW-1, MW-6 and MW-7 for use
in fracture survey. Abandoned MW-2, MW-3, MW-4 (unknown construction)
and MW-5. All were uncased and had potential of contaminating the
bedrock GW.7/2/03 Fracture survey conducted. Possible path from south
pump island to MW-1 identified.2/4/04 0.02' LNAPL observed in MW-1.
Identified as 90% weathered/highly degraded diesel/fuel oil
distillate and 10% weathered/degraded premium gasoline.4/15/04
Installed sorbant socks in MW-1 and MW-7.The lease may be terminated
prior to its scheduled end during December 2006. At the time of the
lease termination, BP will remove all USTs and related piping. If it
is to be razed within the timeframe noted in the CAP, Delta intends
to address the overburden impacts via excavation. If the site will
not be razed within the noted timeframe, Delta will develop an
interim remedial plan to effectively address the overburden site
impacts until excavation can occur. Quarterly GW monitoring to
continue
concurrently.

----------11/12/04 3Q04 monitoring report. Three wells on site.
0.32' free product in MW-7. BTEX ranged from 226ppb(MW-6) to
6095ppb(MW-7). MTBE from 20900ppb(MW-7) to 36100ppb(MW-1).2/17/05
4Q04 monitoring report. BTEX ranged from 177ppb(MW-1) to
2876ppb(MW-7). MTBE from 7980ppb(MW-7) to 38200ppb(MW-1). DTW

BP AMOCO STATION #11248 (Continued) **S106003274**

7-10'bgs.4/27/05 Portfolio meeting- No source identified,assumed to be tanks. Subsurface impacts in the capillary fringe, vadose and saturated zones in the NE part of the site. Hydrophobic socks installed in MW-1, MW-7 to address LNAPL and subsequently removed to evaluate recharge. LNAPL not present currently. Vapor evaluation done in 10/04 for adjacent property. MPE well in area of bedrock depression(MW-8) installed 4/05. Pilot test tomorrow. Reinvestigate vapor recovery system as potential source of vapor complaints during fuel delivery. To be demolished in 18 months. RAP by 6/15/05.7/1/05 Received pilot test report for portable multi-phase extraction(MPE). Pilot performed on MW-8 on 4/28 and 4/29/05. DTW at 6.26'bgs. The stinger was set at 8'bgs(1.5' below the watertable.) The test was run at 25%, 50%, 75% and 100% vaccuum levels while monitoring response levels. No influence was recorded at nieghboring wells but vapors were recovered with decent recovery rates. Delta proposes extraction by a portable MPE unit.7/8/05 Received RAP for portable MPE unit. Pilot test removed hydrocarbons from capillary fringe and unsaturated zone, but due to a lack of overburden groundwater, removal from the saturated zone was not achieved. Propose to use twice a month and reevaluate after two months. 7/27/05 1Q05-DTW 6.51-9.25'bgs. Total BTEX from 313ppb(MW-6) to 806ppb(MW-7). MTBE from 990ppb(MW-7) to 16900ppb(MW-6).8/1/05 2Q05-DTW 6.60-9.38'bgs. Total BTEX from 104ppb(MW-1) to 350ppb(MW-6). MTBE from 929ppb(MW-7) to 9810ppb(MW-6).8/24/05 Conditionally approved RAP to be implemented by 12/24/05. Six-month evaluation(6/06) of MPE to include proposal to address saturated zone contamination. To include contaminant mass estimation. It is unclear if recovery well, MW-8, will be sufficient to address entire impacted area.11/8/05: Reviewed quarterly monitoring report dated November 3, 2005. Only three of four MW's were sampled on September 15, 2005 because MW8 was dry and MW's 2,3,4 and 5 were abandoned because they could not be converted into cased, open-borehole bedrock wells. No free product present. Groundwater flow beneath the site is dictated by the bedrock fracture pattern. Max BTEX is 2,774 ppb (MW-7) and max MTBE is 14,200 ppb (MW6). Only monitoring occurred this quarter (no remedial action). There was a large increase in MW7 BTEX and MTBE concentrations, as well as MW 1 and MW6 MTBE concentrations. A tightness test should be conducted on existing tanks.12/20/05 Received Subsurface Hydrocarbon Assessment report dated 12/6/05 which documents installation of MW-8 on 4/4/05. Soil sample collected from 5-8.5'bgs. Too many cobbles in split spoon to submit sample. Completed to 8.5'bgs within overburden, not bedrock like MW-1,6,7. DTW was 7.3'bgs at installation. GW sample collected 5/20/05, total BTEX 181ppb and MTBE 2340ppb.12/21/05 Received copy of "Notice of No Objection" from Darryl Cabbagestalk, NYCDEP, addressed to L. Osorio, Manhattan Borough Commissioner for NYCDOB. High Point Engineering sent in plans to demolish the existing structures and remove the USTs, piping and contaminated soil. They are not planning to change use to residential. The property has been designated with a Hazardous Materials and Noise "E" as part of the Hudson Yards Rezoning action.2/1/06 Spoke to Julie, Galli Engineering, representing prospective purchaser who will be constructing a residential high rise. Planning to blast out bedrock down to 20'bgs. Based on current data, not expecting to dewater but after blasting will possibly need to dewater. Will submit construction details, to include vapor barrier. Also to submit a remedial action plan, which will include contingency plans. May propose a surface application such as ORC and effectiveness monitoring depending on water

BP AMOCO STATION #11248 (Continued) **S106003274**

infiltration.3/3/06 4Q05- 3 of 4 wells sampled on 11/16/05. DTW 6.75-9.61'bgs, in bedrock. 0.02' LNAPL detected in MW-1. BTEX from 21ppb(MW-8) to 1872ppb(MW-7). MTBE from 129ppb(MW-8) to 5550ppb(MW-6).3/16/06 Met with BP and Delta. Source removal to be conducted 4/06. Remediation contract starts after demolition contract.3/21/06 Conference call with Nick Onufrak, BP, and Paul Meyer, Delta, to discuss future of site. Delta will do EFR events to try and recover product from wells prior to doing source removal down to bedrock. Recommended they coordinate with buyer. Bottom of slab is going to be at 30'bgs. Tanks already pulled. 3 bedrock wells to be destroyed during construction. Possibly to install slotted piping for subslab depressurization.4/11/06 Update from P. Meyer, Delta. Delta has completed seven 8-hour days of bedrock groundwater remediation at the site. The work was completed using a mobile Multi-PhaseExtraction system to remove LNAPL, groundwater, and soil vapors from the underlying bedrock. It appears that the residual amount of LNAPL (0.02 ft) that was noted in MW-1 during the fourth quarter of 2005 has been successfully remediated. No LNAPL was observed subsequent to Delta's remediation work. Delta collected ground water samples from monitoring wells MW-1 and MW-7 following conclusion of the bedrock remediation activities. Laboratory analytical results indicate stable or reduced concentrations of BTEX and MTBE for both monitoring wells with the exception of MW-1 which showed an increase in the xylenes concentration.4/17/06 MPE O&M report received for Oct & Nov 2005. 1lb BTEX, 0.15lbs MTBE, and 61lbs TPH have been recovered.4/25/06 Conference call with N. Onufrak, BP, and P. Meyer, Delta. Paul will submit groundwater results. Construction is to start next week. No additional groundwater sampling is proposed due to construction. All source soils are to be removed. Expecting to have report submitted by 6/1/06.4/26/06 Sent email to P. Meyer, Delta. VOCs remain elevated. Petition for closure is denied. If excavation is to be the groundwater remedy, then it must be demonstrated that the contaminant concentrations will decrease to standards through degradation/retardation/dispersion in a reasonable timeframe. 5/11/06 Spoke to Nick Onufrak, BP. Nine abandoned 550s were uncovered and expect three more. Will register and close out properly. There has been some water accumulation on bedrock at some elevations and they have been pumping it out. Sometimes groundwater has a sheen. He also said that Delta would be looking for locations to install wells to show a reduction in concentrations. Expect to be on site for next two weeks. They are developing a plan for groundwater monitoring. P. Meyer, Delta, anticipates demonstration of contaminant reduction in the ground water through comparison of the present site conditions with modeled results of expected contaminant levels following removal of the source. During the source removal activities they are collecting sidewall samples for closure purposes as well as samples of the excavated material (i.e. the overburden soil that is being removed from the site) for modeling purposes. Soil removal work commenced on Monday May 1st and is anticipated to be completed by Friday May 19th.6/8/2006 - Feng - project reassigned to RJFeng. (RJF)8/11/2006 - Feng - Spill Site Inactivation Report, June 29, 2006, by Delta Environmental. The bedrock is extended from 1' to 2' bg at the south and southwest and 10' to 13' bg at the north and northeast. On May 2006, Delta removed 16 USTs, all the soil overburden and weathered bedrock off site. Before the removal activities, Delta did an 8 hours per day, 7 days EFR on a bedrock well, W-1 which has been detected free product (0.02') and W-7. The

BP AMOCO STATION #11248 (Continued) **S106003274**

last groundwater sampling results (4/3/2006) show that W-1 has found 2,174 ppb BTEX and 9,830 ppb MTBE, and W-7 has found 141 ppb BTEX and 411 ppb MTBE. Since Delta was not able to collected groundwater sample due to the wells abandonment, Delta did a contaminant fate and transport model using WinFlow/WinTran software. The result from the model indicated that there will be no BTEX or MTBE concentration in groundwater after 187 days. Delta requested to close the spill. Emailed to Joe Haas (Region 1) for comments on the application of WinFlow/WinTran on bedrock site like this. In his reply, he stated "Based upon the limiting assumptions in associated with WinFlow, any WinFlow / WinTrans application to flow and chemical transport in fractured rock is immediately suspect and likely inappropriate".Discussed with Joe Sun and A. Obligado about the site closure. The closure is denied due to the continued presense of elevated level of groundwater contamination. The WinFlow/WinTran model is not apporiate to apply in the bedrock situation. As BP and Delta mentioned in the meeting of 7/20/2006, the new developer will blast the bedrock down to 20 feet below grade and dewatering process would be needed at that time is expected. So DEC requires the following items: 1) Monthly influent groundwater samples from the dewatering system. 2) Installation of water-proofing vapor barrier. The DEC will re-consider closure after completed vapor barrier installation and based on dewatering system data. In case groundwater contamination remains, additional remediation might be required. Emailed Nick Onufrak (BP) about DEC's requirement and asked for a pre-construction meeting with BP and the new developer. (RJF)9/22/2006 - Feng - Quarterly Monitoring Report, 1Q2006, 7/27/2006, by Delta. Groundwater sampling and gauging on 1/4/2006. Groundwater depth at 6.15' to 9'. MW-1, 0.02 feet of free product. MW-6, 217 ppb BTEX, 5,290 ppb MTBE. MW-7, 394 ppb BTEX, 328 ppb MTBE. MW-8, 5.8 ppb BTEX, 1.4 ppb MTBE. (RJF)9/29/2006 - Feng - Portfolio meeting with BP and Delta. Construction on hold. The new owner couldn't get the loan from the bank due to open spill. Delta provided 2 options. Option 1, provide some data or drill some bedrock well (may not be the same fracture as previous). Option 2, close the spill based on the current data and re-open spill if contamination encountered during the construction. DEC will discuss internally about this matter. (RJF)11/7/2006 - Feng - Updates from Nick Onufrak (BP). Delta will try to install 3 wells and will collect groundwater samples. And will put all the new data into the closure petition report. (RJF) 1/22/2007 - Feng - Letter from Delta serves as Post Remedial Subsurface Hydrocarbon Assessment Report, dated 1/17/2007. On December 1 and 4, 2006, Delta has installed 3 new bedrock wells. DTW 14.05' at MW-1A, 42.54' at MW-6A, 10.22' at MW-7A. Groundwater samples collected from these 3 wells. MW-1A, 143 ppb BTEX, 1,710 ppb MTBE. MW-6A, 244 ppb BTEX, 9,480 ppb MTBE. MW-7A, 1,947 ppb BTEX, 358 ppb MTBE. Delta will continue to sample the wells on a quarterly schedule and will re-evaluate site conditions and the remedial alternatives. 4/19/2007 - Feng - Portfolio meeting with BP and Delta. RAP for Fenton or persulfate injection might be proposed. Pre-injection data, and post injection data will be collected. Injection plan will be submitted. BP is still willing to comply with the items set forth in the previous BP's letter. (RJF) 8/15/2007 - Feng - 4Q2006, 7/2/007. Groundwater sampled 12/13/2006. All 3 monitoring wells were sampled. DTW 10.22' to 42.54' bg. No LNAPl. MW-1A, 143 ppb BTEX, 1,710 ppb MTBE. MW-6A, 244 ppb BTEX, 9,480 ppb MTBE. MW-7A, 1,947 ppb BTEX, 358 ppb MTBE. (RJF)8/14/2007 - Feng -

BP AMOCO STATION #11248 (Continued) **S106003274**

1Q2007, 7/10/2007. Groundwater sampled 2/22/2007. All 3 monitoring wells were sampled. DTW 10.31' to 14.26' bg. No LNAPL. MW-1A, 106 ppb BTEX, 1,680 ppb MTBE. MW-6A, 189 ppb BTEX, 11,200 ppb MTBE. MW-7A, 2,432 ppb BTEX, 18.7 ppb MTBE. (RJF)10/10/2007 - Feng - Portfolio meeting with BP and Delta. The site is currently vacant. The developer planning to build 28-story hotel with 2-story basement. Removing bedrock down to 30 feet is in the plan. In the future, BP and Delta will coordinate with the new owner during the development to: 1) provide for disposal of impacted bedrock in any, 2) provide for treatment of groundwater removed during the dewatering process as needed, 3) provide for installation of vapor barrier under and around the building foundation. And prepare the closure report for completion of the subsurface remediation work. (RJF)1/15/2008 - Feng - Email to E. Larson (BP) and Delta on the requirement of RAP for the site. (RJF)1/31/2008 - Feng - Email from E. Larson and requested to close out the onsite monitoring wells, MW-1A, 6A and 7A.2/11/2008 - Feng - Approved the closure of onsite monitoring wells MW-1A, 6A and 7A since BP has done the baseline groundwater sampling on 12/18/2007. Email from E. Larson, the closure of the monitoring wells will no later than 2/22/2008. 2/27/2008 - Feng - Reviewed the Remedial Action Plan Addendum, dated 2/7/2008, prepared by Delta. The new building will consist with 2-story basement, and foundation excavation depth will be extended down to 25 feet bg. The excavated bedrock/soil will be disposed off site. A dewatering plan will be implemented and regular influent and effluent groundwater will be sampled for NYCDEP permit. BP will arrange onsite groundwater treatment and daily sampling if the effluent exceed NYCDEP's limit. At the conclusion of dewatering, an additional groundwater will be collected and sampled. If the contaminants level exceeded DEC standard, remediation/investigation will be arranged. 3/7/2008 - Feng - Letter is received via email from M. Ahmed (Fleming-Lee Shue). 3/17/2008 - Feng - Email is received from M. Ahmed (Fleming-Lee Shue). 3/19/2008 - Feng - Approval letter to BP and cc to Delta and Fleming-Lee Shue. (RJF)3/20/2008 - Feng - eDoc Quarterly Monitoring Report 3Q2007 and 4Q2007. (RJF)5/20/2008 - Feng - Reviewed RAP dated 4/25/2008. The site owner's development schedule is unclear at this time and the March 19, 2008 approved RAP Addendum will not be implemented at this time. It is, however, BP's desire to continue its remedial effort in bringing the spill number toward closure and therefore this RAP is proposed. The RAP details the proposed work to re-install three onsite bedrock monitoring wells and to continue implement quarterly monitoring well sampling program. As per the conversation between you and the Department staff, the scheduled investigation/remediation work are:- Monitoring wells installation will be completed by June 2008- Monitoring wells sampling will be completed by July 2008- First quarter of monitoring wells sampling will be completed by October 2008- Second quarter of monitoring wells sampling will be completed by January 2009- Evaluating the collected groundwater data and discussing the appropriate remedy by March 2009 (the RAP proposed MNA, but we will discuss whether MNA is effective or not)Approval letter to BP and cc to Delta. (RJF)6/26/2008 - 3Q2007, 2/25/2008. Vacant undeveloped lot. The monitoring well network was gauged and sampled on 9/20/2007. 3 monitoring wells. DTW 10.01' to 11.84' bg. Flows in bedrock, not determined. NO LNAPL. BTEX range 10.7 ppb (MW-1A) to 959 ppb (MW-7A). MTBE range 219 ppb (MW-7A) to 4,630 ppb (MW-6A). 4Q2007, 2/27/2008. Vacant undeveloped lot. the monitoring well network was gauged and sampled 12/18/2007. 3 monitoring wells.

BP AMOCO STATION #11248 (Continued) **S106003274**

DTW 9.76' to 11.29' bg. NO LNAPL. BTEX range 6.3 ppb to 684 ppb (MW-7A). MTBE range 107 (MW-7A) to 4,350 ppb (MW-6A). (RJF)10/28/2008 - 3Q2008, 9/5/2008, by EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled on 7/2/2008. MW-1B, MW-6B and MW-7B were installed on 6/17 and 6/18/2008. Boring logs are attached. 3 wells were gauged. No LNAPL. DTW 9.08' to 43.15' bg. 3 wells were sampled. Max benzene 53 ug/L (MW-6B). Max BTEX 550.7 ug/L (MW-7B). Max MTBE 2,300 ug/L (MW-6B). (RJF)3/4/2009 - 4Q2008, 1/5/2009, by EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled 10/13/2008. 3 wells were gauged. NO LNAPL. DTW 9.50' to 13.52' bg. Flows in bedrock. 3 wells were sampled. Max benzene 33 ug/L (MW-6B). Max BTEX 79.2 ug/L (MW-7B). Max MTBE 980 ug/L (MW-6B). (RJF)6/8/2010 - 4Q2009, 1/8/2010, by EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled on 11/2/2009. 3 wells were gauged. NO LNAPL. DTW 8.62 - 11.46' bg. Unknown flow (bedrock wells). 3 wells were sampled. Max benzene 27 ug/L (MW-6B). Max BTEX 122.5 ug/L (MW-7B). Max MTBE 1,100 ug/L (MW-6B). 1Q2010, 4/2/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 1/24/2010. 3 wells were gauged. NO LNAPL. DTW 9.09 - 14.83' bg. unknown flow. 3 wells were sampled. Max benzene 12 ug/L (MW-6B). Max BTEX 53.7 ug/L (MW-7B). Max MTBE 740 ug/L (MW-6B). 7/27/2010 - 2Q2010, 6/17/2010, by Delta. NO LNAPL. 3 wells. Max BTEX 24.3 ug/L (MW-7B). Max MTBE 730 ug/L (MW-6B).8/6/10 Spill case temporarily transferred from June Feng to J.A. Maisonave. - JAM11/10/10: Spill case temporarity transferred from J. Maisonave to J. Kolleeny. - JK4/11/2011 - Spill transferred back to JFeng.6/17/2011 - email to Chris Meyer of Anteagroup "Chris,We had some discussion about this site and we need some more information. Do you have the information on how the sampling was actually done, such as depth to water, how much water was purged, final water depth, and how did you sample? "7/5/2011 - received 2Q2011. eDoc. Reveiewed the report. The groundwater samples were collected on April 22, 2011. 3 wells were sampled. Max BTEX 31.7 ug/L (MW-6B). Max MTBE 510 ug/L (MW-6B). JF11/3/2011 - 3Q2011, 9/27/2011, by Antea Group. The groundwater samples were collected on July 8, 2011. 3 wells were sampled. MW-1B, 3.9 ug/L BTEX, 300 ug/L MTBE. MW-6B, 8.51 ug/L BTEX, 560 ug/L MTBE. MW-7B, 59.2 ug/L BTEX, 45 ug/L MTBE. 1/6/12 - Raphael Ketani. I spoke to Chris Meyer of Antea Group (800) 477-7411. He said that a closure report was written for the site and sent to the DEC in October 2011. I told him that we had not seen it. Mr. Meyer said that he will re-send it. I told him to send it to me and I will review it.1/11/2012 - 4Q2011, 12/29/2011, by Antea Group. Groundwater samples were collected on 10/28/2011. 3 wells. MW-1B, 13.8 ug/L BTEX, 1,200 ug/L MTBE. MW-6B, 16.1 ug/L BTEX, 570 ug/L MTBE. MW-7B, 60.2 ug/L BTEX, 26 ug/L MTBE.2/8/12 - Raphael Ketani. Nick Onufrak of BP (410) 825-8213/cell (443) 838-7143 called me today to discuss the case. Bedrock is anywhere from at the surface to 15 feet below grade. Marriott will build a hotel on the site with a parking garage 30 feet below grade. He added that sometimes the wells are dry and sometimes the water is at 7 feet below grade. He will send me the 2011 closure report for my review.2/8/12 - Raphael Ketani. Mr. Onufrak sent the Delta 12/31/09 Remedial Action Completion Report (RACR), the Delta 11/15/10 Follow Up and Mobile Multi-Phase Extraction Event Report (MMPEE) and the Antea Group 9/27/11 Third Quarter 2011 Monitoring Report (GWMR). I reviewed all three reports. The RACR described the remaining soil contamination that was present after the tanks had been pulled and most of the soil

BP AMOCO STATION #11248 (Continued) **S106003274**

contamination had been removed. PBS case #2-272523 indicates that 16 tanks were removed. The end point results were very high along the northern border of the property with the five story brick building. However, there was a note on the map that these results were from before this soil was removed down to bedrock. There were high hits in the endpoint samples (5/1-19/06) from SW-4 (2.5') and SW-8 (11.5'), but these were at the western sidewalk. The MMPEE report stated that 525 gallons of total liquids had been extracted from the 3 wells.The GWMR contained data from the 7/8/11 sampling round for wells MW-1B, MW-6B and MW-7B. The majority of the analytical results were non-detect to 40 ppb of total xylenes. However, MW-1B had 300 ppb of MTBE, MW-6B had 560 ppb of MTBE and MW-7B had 45 ppb of MTBE.I determined that the 7/8/11 groundwater results were not a significant issue. Though Mr. Onufrak had sent me the 2011 closure report, I could not close the spill case. Certain pieces of documentation were missing. These were an architectural plan depicting the subterranean garage, its total depth, and the inclusion of a vapor barrier. Also, the developer needed to submit a statement in a letter indicating how much more excavation will take place, whether the soil under the sidewalk will be removed, and if not removed, what they will do about any contamination under there. 5/1/2012 - 1Q2012, 3/28/2012, by Antea Group. Groundwater sampled on 1/11/2012. MW-1B, 110 ug/L MTBE. MW-6B, 1.7 ug/L benzene, 610 ug/L MTBE. MW-7B, 1.6 benzene, 15 ethylbenzene, 80 xylenes, 25 ug/L MTBE. The next sampling will be in April 2012. Attached with the Mobile Multi-Phase Extraction Event report dated 11/15/2010 with the Remedial Action Completion Report dated 12/31/2009. Antea requests spill closure. DEC Hassan Hussein, Raphael Ketani and June Feng spoke to Mohamed Ahmed who is the consultant for the developer. He stated that they are the developer's consultant who is responsible for meeting the OER's e-designated requirement for the site. They will be overseeing whatever work that BP will be doing onsite. 5/2/2012 - email Chris Meyer for the clarification on what BP will be doing in addressing the soil (i.e. as shown in the endpoint smaples SW-4 and SW-8 located at the 10th Ave and 34th Street sidewalk) and the groundwater issues (i.e. BTEX and MTBE in the monitoring wells that installed into bedrock). DEC Raphael Ketani spoke to Chris Meyer. DEC required BP to remove the soil hot spots in the sidewalk, remediate the groundwater. And restating the requirement for building plan depicting the subterranean garage, its total depth, and the inclusion of a vapor barrier. And if they could not feasiblily fulfill our requirements, they need to have a statement letter stating why they can't do it. Mr. Meyer understand our requirements. 8/27/2012 - 2Q2012, 6/29/2012, by Antea Group. The groundwater was sampled 4/16/2012. The next sampling will be in 7/2012. MW-1B, BTEX ND, <0.5 MTBE. MW-6B, 27.5 BTEX, 570 MTBE. MW-7B, 93.8 BTEX, 33 MTBE. 3/29/2013 - 4Q2012, 12/27/2012, by Antea Group. The groundwater was sampled on 10/11/2012. the next sampling will be in 1/2013. MW-1B, 8.81 BTEX, 460 MTBE. MW-6B, BTEX ND, 470 MTBE. MW-7B, 42.4 BTEX, 28 MTBE. Observed increase or fluctuation of MTBE. 4/11/2013 - review 1Q2013. MW-1B, BTEX ND. 13 MTBE. MW-6B, 46.8 BTEX, 430 MTBE. MW-7B, 12 BTEX, 12 MTBE. Antea continues to conduct quarter monitoring and the previously requested monthly vacuum extraction events on the 3 bedrock wells. In the mean time, Antea Group requests to consider their previous submitted request for closure. 4/17/2013 - Present the spill closure to Jeff Vought. Spill closure based on: 1) Source removal: Tanks excavation in 2006 and removed soil down to bedrock. The weathered bedrock was removed and the bedrock was power

BP AMOCO STATION #11248 (Continued) **S106003274**

washed.2) 2 out of 12 soil samples collected from the excavation show exceedances. These are SW-8 (11.5') and SW-4 (2.5') along sidewalk of 10th Ave and 34th Street which makes the remediation of the soil reached the extent of feasible. 3) Groundwater concentration is low. Groundwater is in bedrock. Remediation of the groundwater is reached to the extent of feasible. 4) No development has been happened in the last few years. At this time, there is no development plan has been submitted to DEC. Noted in the Spill Closure Letter "As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts must be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations."4/19/2013 - Spill closure letter sent to BP, Antea Group and the owner/developer, 34-10 Development, LLC and ATRIA Builders, LLC. 5/23/2013 - received Well Abandonment Letter, dated 5/22/2013, by Antea Group.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110004477147

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"e2mis no. 130551:03/24/00 14:45 R.Palladino (10563) while doing a routine inspection found unknown fluid in V-1606(16m71) at 368-80 10th Ave and it appears to have migrated via a weep hole to the adjacent structure-V-8173(16m69) at the same location. It appears to be diesel fuel but not sure. Taking 2 samples in each vault for ID,PCB analysis,and for flashpoint. Have 50 gallons of water total in both structures. No cracks in either structure. Unplugged sump pump. Entry into sewer or waterways is unknown at this time. Will dissasemble sump and the piping to determine same. Unknown fluid amount is 25 gallons. Cleanup pending results.04:45 am As of this time analysis indicates the presence of a substance similar to light fuel oil (lab seq# 00-02807). Lab results are as follows for two vaultsLocation: 368-380 10 Ave. v-1606 16m71ppm <1.00Aroclor-NoneLocation:368-380 10Ave. v-8173 16m69ppm <1.00Aroclor-None01.Date: 3/27/0002.Time: 120003.Incident No: 13055104.Structure: V160605.Location: 368 10TH AVE07.Cleanup Type: <5025.Final Cleanup: Yes31.Sample No: 00-0280633.PCB Count: <1.061.Cleanup Info: 03-26-2000 REMOVED 100 GALS OF OILY WATER FROM VAULT FLOOR AND PIT. FINAL CLEAN UP WHEN CAN GET FLUSH TRUCK. TIME 1645 TO 1815. 03/27/2000 CLEANED VAULT WITH FLUSH TRUCK FROM 281 11TH AVE. REMOVED ALL SOLID WASTE. DOUBLE WASHED VAULT WITH OIL FREE AND REFLUSHED WITH FLUSH TRUCK. CLEAN UP COMPLETE,REMOVED OIL TAG #18083.
Remarks:	VAULTS ARE CONNECTED - BELIEVED OIL IS DIESEL - ITS ON 50 GALLONS OF WATER - CLEAN UP PENDING TEST RESULTS - REF #130551

DEC Memo:	11/24/08 - See eDocs for Con Ed report detailing cleanup and closure.Sangesland spoke to Dave Duke at Con Ed and Nick Chronopoulos at PetroSpill was from a vent line during a delivery. Less than 5 gal sprayed on side of building and onto sidewalk. Oil pads were laid

CATCH BASIN (Continued) **S109372994**

Remarks: down. Con Ed says some of the oil came "near" their sidewalk box (Con Ed men were working there when spill happened). Spill was cleaned. Very Heavy Rain in the 2-3 hours after the spill. Whatever was not cleaned up immediately by Petro was washed away in the downpour. Caller is 3rd party reporting above spill. Unknown clean up at this time. Nick Chronopoulos from Petro oil (718-628-3305) called hotline at 10:51 a.m. to state approx 1 quart of oil spilled to sidewalk out of a vent from an overfill, due to a faulty gauge. Stated a pad was put down and does not believe any oil went into the catch basin. Oil was being delivered to 450 West 33rd. st..

Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO/DO"12/19/02 - AUSTIN, DDO - TTF LETTER SENT1/11/06- DEC Piper spoke w/ Eugene Degan, (PRev. Owner Rep 845.294.7509) regarding tank test. He could not be sure though he thinks the tanks are still empty. He will look into this. Piper then contacted new owner Dov Hertz, Extell Group. 212.712.0633. He knows nothing and will have previous owner get info. Galden Frankel performed Phase I and II on property. Left message at GF requesting call back.1/18/06- DEC Piper spoke w/ property manager, Rob Scharf 212.712.6111. Stewart Dean Co. -212.695.3180. He will fax info. DEC Piper to review and inform Rob of additional work if warranted.2/6/06- DEC Piper spoke w/ Rob S. I explained to him that he was still in violation of PBS code. I have received analytical suggesting that there was no release at the site. The tank test results indicated a dry ullage leak. The tank is empty and still needs to be removed or closed iin place. As per Rob, he will be sending in the new appplication this week. I instructed him to include a line item that that due to the razing of the building, that they will remove the tank when the activities have been completed. Afterwards, he will need to update the PBS records to insicate that the tank has been removed. Upon review of a limited phase II investigation of the site performed by Galden Frankel, of the six soil samples taken from various locations throughout the site, no elevated constituents were detected. However, three GW samples were collected. The results indicate 1,040 ppb of MtBE and slightly elevated levels of PERC and its byproducts. 5/15/06- DEC Piper. Referred to Remediation.5/31/06 - reviewed file: MTBE was detected without other VOCs usually present in a petroleum release. The MTBE is likely the leading edge of an off-site impact. Low level of CVOCs are also detected. These CVOCs are only detected in GW with no soil contamination or other sources on site. Spill is closed, no NFA issued since no remediation was ever conducted at site. - KST

DEC Memo:	Sangesland spoke to Al Albano. Spill from a locomotive into a series of floor drains in Penn Station. They are working on cleaning the spill and will report back on 10/6/201010/8/10 Sangesland received this e-mail from Al Albano:The following provides details on how the above-referenced spill occurred and what was done to clean it up. Attached are the waste manifests for the removal/disposal of impacted material. Spill SummaryOctober 5th, at approximately 11 AM, a compressor line on locomotive # 514 failed while it was parked at the west end of 18-Track at the LIRR's West Side Yard. West Side Yard is located in between 10th and 12th Avenue between 31st and 33rd Streets, in Manhattan. Lubricating oil from the ruptured line flowed into a retention tank on the underside of the locomotive until it overflowed the tank. Approximately 15 - 20 gallons of oil spilled onto concrete (under the tracks) and then into an adjacent storm drain. Upon discovery (within minutes of when the spill occurred), granular oil absorbent was spread over the spill area and into the catch basin to prevent the oil from migrating. In addition, several catch basins that were located "down-stream" of the initial catch basin were inspected to determine if the oil had spread through the piping network. Based on the inspection, it was determined that the oil (mixed with water) had been carried through a number catch basins to the south, before terminating in the line prior to reaching the catch basin at 4-Track. A catch basin at 11-Track that was readily accessible was plugged with absorbent pads to restrict the passage of any additional oil downstream. The storm drain on 4-Track is the next to last drain on the property and it was also plugged with oil absorbent pads to catch any oil that got through the plugged storm drain at 11-Track. When the LIRR's environmental cleanup contractor

WEST SIDE YARD (Continued) **S110540912**

arrived (approximately 3:30) they cleaned up the used granular absorbent that was spread at the scene of the spill at 18-Track. They also plugged the outlet pipe in the storm drain on 4-Track with oil absorbent booms and removed/disposed the used pads from the storm drains at 4 and 11-Tracks. Starting at the storm drain at 18-Track, drains were flushed using a fire hose to push the oil all the way to the drain at 4-Track. As these drains were being flushed a pump truck was sucking up all the oil and water coming through the drainage system. The flushing continued in each storm drain until there was no visible oily sheen on the water. Oily sand at the bottom of the drain at 4-Track was removed. The outlet pipe boom was then removed in the drain at 4 -Track and placed on the bottom of the drain at 4-Track to catch any stray bits of oil. This boom will be removed at a later date. A total of 1,090 gallons of oily water were sucked out of the drains during the flushing and 600 hundred pounds of oil soaked debris (pads, granular absorbent and miscellaneous material pre-existing in the catch basins) were removed. As mentioned above, copies of the waste manifests are attached. There was no rain during the cleanup effort to overwhelm the drainage system and no oil left the property. Based on the information provided above, it is requested that this spill be closed by the Department. If you have any questions or need any additional information, please don't hesitate to contact me.Thank you,Albert S. AlbanoLong Island Rail Road

DEC Memo:	07/13/10 - DEC Piper spoke with Al Albano (347) 494-6020 of LIRR. Contractor spilled dielectric fluid around pad when changing gaskets. Leak occurred overnight and found this am. ABC tank en route with vactor. They will excavate and collect at least 1 endpoint. Results will be sent to DEC Ketani.9/21/10 - Raphael Ketani. I received the 9/9/10 remediation report for the spill from Mr. Albano of the LIRR. I reviewed the report. Based upon the data and pictures contained therein, I determined that the spill had been cleaned up.As the spill had been cleaned up and as the data in the remediation report indicated that there were no PCBs or oil left in the soil, I have determined that the spill poses little or no threat to the public or the environment. Therefore, I am closing the spill case.
Remarks:	Gasket failure onto soil. Clean up enroute today.

Contact:	Not reported
Contact address:	9TH AVE & 30TH ST NEW YORK, NY 10001
Contact country:	US
Contact telephone:	Not reported
Contact email:	Not reported
EPA Region:	02
Land type:	Facility is not located on Indian land. Additional information is not known.
Classification:	Non-Generator
Description:	Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:

Owner/operator name:	TSNY REALTY CORP
Owner/operator address:	NOT REQUIRED NOT REQUIRED, WY 99999
Owner/operator country:	US
Owner/operator telephone:	(212) 555-1212
Legal status:	Private
Owner/Operator Type:	Owner
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Legal status:	Private
Owner/Operator Type:	Operator
Owner/Op start date:	Not reported
Owner/Op end date:	Not reported

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No

GREAT BEAR (Continued) **1000158436**

Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Site name: GREAT BEAR
Classification: Not a generator, verified

Date form received by agency: 07/08/1999
Site name: GREAT BEAR
Classification: Not a generator, verified

Date form received by agency: 02/12/1987
Site name: GREAT BEAR
Classification: Small Quantity Generator

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - General
Date violation determined: 09/21/1989
Date achieved compliance: 09/21/1989
Violation lead agency: State
Enforcement action: Not reported
Enforcement action date: Not reported
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: Not reported
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"e2mis 149379On 7/17 @ 04:29, Griffing # 14428 of FOD reported to me that he found approx 5 gallons of unknown oil in V-6145. The source and the cause of the spill is unknown. The spill

SPILL NUMBER 0304131 (Continued) **S106016256**

was on the concrete structure floor. At that time he saw what might be oil in the sump but no indication at that time that there might be a release. After further investaigation where the finder used his flashlight to see into the sump he noticed that the drain pipe was coated with oil on the inside of the pipe, but not full of oil - there may possibly be a release to the environment.Two samples are being taken by the finder for PCB and ID.UPDATE 7/19 @ 05:26 Conduit Plate # 23-D-2 shows that the bank of vaults with ath above structure in it is connected to M-6088 which has a sewer connection. At this time a partial cleanup is in progress and the unit will be drained and disconnected as soon as the feeder is taken out of service. Capacity of unit is 380 gallon and oil reading is just above the below min line. Unit has been drained of 375 gallons and the Unit also has been disconnected.Lab Sequence Number: 03-05966-001 PCB 6 ppm7/21/03 M. Prystupa # 02394 went to the location on this day at 10:00 & found that the transfomer was diconnected & he found that there is no evidence of any oil in the trap just water. The transformer is ready to be removed.9/5/03 clean up is complete as of this time as repoted by E.Hulser #39723 O.S Cable Dept. One barrel of rock & soil was filled,flush truck removed water & oil mix. Vault was washed twice with slix, and tag #34595 was removed. Supervisor Hulser confirmed the removal of the transformer.

Remarks: VAULT 6145. 5 GALLONS UNKNOWN OIL FOUND IN THE VAULT. THERE IS A PIPE IN THE VAULT THAT LEADS TO A SEWER, AND THERE'S OILY RESIDUE ON THE PIPE. THEY ASSUME THAT OIL GOT INTO THE SEWER. SAMPLES TO BE TAKEN. CLEAN UP PENDING RESULTS. CON EDISON REFERENCE NUMBER NOT AVAILABLE AT THIS TIME.

DEC Memo:	e2mis 152543D Pace # 13149 of I&A reported to me that Esposito # 13588 found while working in V-7168 on an "ABF" situation on Feeder M76 approx 1.5 gallons of unknown oil on top of leaves and debris. No sewer/waterway affected. The source and cause are unknown at this time. The spill is on the concrete structure. There is no standing water. There is a sewer connection. The sump pump was found disconnected upon arrival. The crew is taking apart the sump to verify that there was no release to the environment. Environmental tag # 41999 was hung. Two samples for PCB and ID will be taken. No cleanup action taken at this time.Pagano spoke to Pace of I&A and he informed me that when the trap was taken apart there was no sign of oil. There was just plain water.D Pace verified that there exists a bottom leak and the oil seems to have come from the unit, but the leaves and debris are keeping him from making a positive conclusion. Lab Sequence Number: 04-02036-001: TOTAL PCB 28 ppmLab Sequence Number: 04-02040-001: Analysis indicates the presence of a substance similar to a dielectric fluid.A partial cleanup was done on 5/17/04 It was started at 15:00 & finished at 23:30. The tanker removed 380 gallons of water/oil from the floor of the vault and removed 250 gallons of oil out ofthe transformer. 5/18/04 07:10 V. Mirance # 58484 Cable/Cleanup supervisor called & spoke to M. Casalta # 12684 and stated that the final cleanup was completed at 07:00 on 5/18/04. The structure was double washed with slix & rinsed down. Spill tag # 41999 was removed. The source of the spill was the transformer and it was removed & replaced.
Remarks:	1/2 GAL OF UNKNOWN OIL FOUND IN A MANHOLE. NO CLEAN UP IN PROGRESS.

Hazardous Waste Summary:

MURRAY HILL PROPERTY MGMT (Continued) **1001079904**

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

DEC Memo:	12/16/09-HRAHMED-Received closure from Petroleum Tank Cleaners (PTC). PTC disconnected the leaking fill line sealed it at the street. PTC claened the spill on concrete and power washed the floor. Spoke to Mark Salamack of PTC. As per him, the leak was inside the coal chute. They claened the contaminated material from the chute. Closure report with disposal manifest uploaded to eDocs. This case is closed.
Remarks:	approx 20 gallons onto condrete floor; no drains affected; owner will contract for clean up

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: K086
Waste name: SOLVENT WASHES AND SLUDGES, CAUSTIC WASHES AND SLUDGES, OR WATER WASHES AND SLUDGES FROM CLEANING TUBS AND EQUIPMENT USED IN THE FORMULATION OF INK FROM PIGMENTS, DRIERS, SOAPS, AND STABILIZERS CONTAINING CHROMIUM AND LEAD.

Violation Status: No violations found

Registry ID: 110004531935

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

DEC Memo:	email from Paul Matli"We came to do a phase II investigation at the property 440 10 Avenue in Manhattan, which is located in the northwest-adjacent vicinity of a former gasoline station 436 -438 10 Avenue at which, a spill case # 0201270 was closed conditionally back in April 2013. The findings of our Phase II at the 440 10 Avenue revealed the presence of soil vapor beneath the slub and likely

COMMERCIAL/RESIDENTIAL BUILDING (Continued) **S116155976**

impact to indoor air. I appreciate if you can advise what agency; NYSDEC or NYSDOH should be notified of this findings and find out the requirements to install a vapor mitigation system at 440 10 Avenue, which is a mixed use commercial and residential facility. "1/9/2014 - J. Vought and J. Feng talked to Paul Matli. They did a Phase II in the 440 10th Ave where next to the former BP site 436 10th Ave. They collected soil and soil vapor samples in the boundary next to the former BP site. They also collected soil samples around the AST onsite, no sign of contmaination. The property is now used as commercial/residential building with tire shop in the bottom. No other agency has been involved, but probably an e-designated site. They also collected indoor air and outdoor air sample and show some hits. They will submit a work plan for an active SSDS and will need NYSDOH to review and approve it.1/29/2014 - received the SSDS design work plan from HydroTech. Forwarded it to Mike Hughes of NYSDOH for review and comments.2/4/2014 - Comments from NYSDOH Mike Hughes "I reviewed the SSDS Design Work Plan for the 440-442 10th Ave. site. I have one specific comment on the methodology which is if any air samples are to be collected it is very important that the list of analytes be expanded to include compounds not normally present in the TO-15 lab standard. DOH guidance (http://www.health.ny.gov/environmental/indoors/air/guidance.htm), details the necessary compounds to be included for various types of petroleum mixtures. For example, the indicator compounds for gasoline should include BTEX, trimethylbenzene isomers, the appropriate oxygenate additives (MTBE, ethanol, etc.), and the individual C-4 to C-8 aliphatics (e.g., hexane, cyclohexane, dimethylpentane, and 2,2,4-trimethylpentane [iso-octane]).My other comment is more general, in that collecting indoor air samples post SSDS installation may not be the most prudent approach to verify if the system is working effectively. It is my understanding that the two buildings are occupied and include residential and commercial tenants, one of which is a "tire shop" on the ground floor. Interpretation of indoor air samples can be difficult under the best of circumstances, let alone when known interference's are likely to be present. Such an evaluation will require the analysis of concurrent sub-slab vapor samples to be able to compare the vapor composition. A better evaluation of the SSDS system would be a pressure field extension test to measure depressurization under the slab outwards to the perimeter of the building footprint. I understand there may be some logistical access issues, but it should be considered.I have discussed this issue with Jeff in the past, but let me know if you need anything else."2/27/2014 - Received revised SSDS Design work plan and forwarded to NYSDOH and NYCDOH for comments.3/10/2014 - email from Mike Hughes. he did review the revised work plan and has no comment.3/13/2014 - sent approval letter to Madison Capital Realty and cc HydroTech.

DEC Region:	2
DER Facility ID:	284732
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"Sent TTF letter to consultant:Maria Ramirez, GZA, 65 Willowbrook Blvd, Wayne, NJ 0747011/5/2003 Sangesland spoke with Maria Ramirez at GZA. She says the building is converting to natural gas and the 10,000 gal tank will be abandoned in place. Tank is below the basement floor under an electrical utility room. They cleaned out

SMITH BARNEY (Continued) **S104502515**

the tank and found holes in the top 1/3 of the tank. They will take borings through the bottom of the tank to determine if the area is contaminated.12/4/2003 e-mail message from Maria Ramirez said the soil borings through the bottom of the tank would take place around 12/12/03.12/11/2003 Sangesland reviewed a submittal from Maria Ramirez of GZA dated Nov 19, 2003. This outlined the the work discussed above and stated that 4 holes will be drilled through the bottom of the tank and samples will be collected for testing (if possible-it may be in cement). If the samples are clean, the tank will be abandoned in place with foam.12/22/2003 Sangesland spoke with Fran Schultz of GZA about this site. They made 4 holes in the bottom and sides of this tank and hit cement. Water is entering the tank. To date approx 700 gal of water has entered the tank. They believe the water is from a broken water main. Sangesland asked GZA to test the water for VOC and SVOC. GZA said they would also test for Floride and Clorine to determine if this water is city tap water or groundwater.If the water samples come back clean, then GZA will prepare an arguement that the tank is in a subbasement vault. All records of the building (blueprints) are gone (they were in 7 World Trade Center). There are lots of utilities nearby. The tank is being abandoned in place. GZA will request closure of the spill number.3/15/2004 Sangesland reviewed a report from Maria Ramirez of GZA. Based on the description of the tank location (below ConEd electrical equipment), the drilling of holes through the bottom and sides of the tank (all into cement), results of water tests on the water that came into the tank after drilling (no petroleum but did have Floride & Chlorine). Based on all of this information, the DEC will allow GZA to go ahead with abandonment of the tank. After proper abandonment is complete, GZA will submit a final report with a request for spill closure.11/14/05 - Larry Alden - Reviewed file and concur with assessment of Sangesland (3/15/04). Reviewed PBS# 2-606121, which showed that 10,000-gallon tank was closed in-place on 7/8/04. With absence of any contamination, and tank subsequently closed, this spill can be closed.

Remarks: failed a tighteness test but could not isolate a specific pipe - testwas performed as part of a closure.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"11/26/02 - The amount of spill is about 300 to 400 gal which calculated from tank contains and delivery. Nothing visible on street. RP assuming that product seeped in the building wall to soil. Ken's Marine is hired. DEP and Con Ed were notified. DEC Vought went on scene. jz side fill line broke. nothing visible outside street assuming product seeped into building wall to the soil.11/27/2002-Vought-Spoke with Maria Ramirez (GZA). Sidewalk has been removed and excavated to a depth of 4'. Fill line was cut and plugged. Small pinholes found in fill line. Excavation dimensions are 15'x9'x8'. Six endpoint samples collected for analysis. Impacted material still present against building. Water line 8' deep and 6' away from building wall running parallel to wall. GZA will remove impacted material from under water line on 12/2/02. Fill line will be replaced Tues 12/3/02 and NYSDEC will receive report by 1/15/03.Gerry Marzano 212 615-9915 cell 646-296-0538 7/24/2003-Vought-File review by Vought:Remedial Action Report-Jan 2003-GZA-Report requests No Further Action. Spill occurred during oil delivery on 11/26/2002 during which oil was observed seeping up through seam between sidewalk and building. Spill cleaned using speedy dry and sorbent pads. Several hours later oil was observed seeping through basement wall near fill line. Based on petrometer readings and estimated 300-400 gallons of oil was discharged. Fill line was removed and replaced and endpoint samples indicated residual fuel oil impacts in soil. Groundwater estimated at a depth of 20' and flows towards the west. Excavation initially took place to a depth of 7' and was backfilled. On 12/8/02 fill line was replaced. Endpoint samples from inital excavation did not pass TAGM 4046. On-site structural engineer advised that excavation depth not exceed 12'. After 12'depth was reached two additional endpoints were taken. Excavation was

SOLOMON SMITH BARNEY/CITI (Continued) **U003790870**

backfilled and repaved. No sewers or drains affected. The final area of the excavation measured 8 feet wide(north to south) and 12 feet long (east to west) with the additional area meausuring 2 feet wide and 4 feet long on the northern portion of the excavation. Fill line was rusted with corrosion holes. Groundwater was not encountered. A total of eight endpoint soil samples were taken. Bottom endpoint soil samples had minor PAH exceedanced due to fill nature of material. Southern sidewall had 47200ppb napthalene and 13000ppb xylene however futher excvation was performed and only minor PAH exceedances were detected from subsequent endpoint samples. A total of 53 tons of impacted soil was removed from the Site (disposal manifest provided). Spill closed by Vought.

Remarks: CORRODED FILL LINE

DEC Memo:	1/23/07 - Raphael Ketani. I spoke to Robin Wilson at (212) 967-2212. She said that the spill happened when one of the workers disconnected a hose from a machine. She said that it was all cleaned up.Based upon my conversation with Ms. Wilson and the successful cleanup of the small amount of oil spilled, I am closing the spill case.
Remarks:	SPILL WAS ON SOIL AND ASPHALT, SPILL AMOUNT ROUGHLY 1 QUART:

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
