PETER FRANCONERI, P.E.
Assistant Commissioner/Operatic

Issuance # 187

OPERATIONS
POLICY AND PROCEDURE NOTICE # 10/89

To: Distribution

From: Peter Franconeri 

Date: August 24, 1989

Subject: Amusement Ride Inspections - Referrals to the
Construction Division

Referenced: Memorandum, September 30, 1982, Amusement Ride
Inspections, from Irwin Fruchtman, P.E., Volume 12, P. 1884-5.

Purpose: To establish a procedure for amusement ride inspection
referrals made to the Construction Division by other inspectorial
divisions.

Specifics: If during the course of any amusement ride inspection
by the Elevator Division or Bureau of Electrical Control,
an inspector observes any enclosed amusement rides or attractions
that require emergency lighting, smoke detectors, sprinklers,
etc. in accordance with Reference Standard RS 18-10, he will
refer these amusements or attractions to his supervisor for
referral to the Construction Division. Referrals must specify
the condition or areas which require attention.

As appropriate, supervisors present all information in writing
to their unit director for evaluation. The Director of
the Elevator Division or the Director of the Bureau of Electrical
Control then forward in writing the inspection referral to
the proper Construction Chief.

Construction Chiefs take appropriate action based upon the
specifications of the referral.
