

## **1 RCNY §10-01**

### **CHAPTER 10 DRUMS FOR DERRICK LOAD AND BOOM HOISTS**

#### **§10-01 Requirements.**

Drums for derrick load and boom hoists shall be contained on the same bed frame [sic] operated independently by one or more engines.

Each drum shall have a separate hand brake and clutch or power down mechanism in lieu of a clutch, as well as a positive dog on the drum and a dog on the brake pedal.

The hoisting mechanism shall be in full view and under the control of a licensed hoisting machine operator at all times.
