How to Order Naloxone

All pharmacies can fill naloxone prescriptions. The following information describes ordering and billing procedures for pharmacies.

Ordering

There are currently four naloxone products available:

	Intranasal	Narcan®	Intramuscular	Evzio®
Medication	NDC 76329-3369-01 Amphastar	NDC 69547-353-02 Adapt	NDC 00409-1215-01 Hospira or NDC# 67457-292-02 Mylan	NDC 60842-030-01 Kaleo
Devices Required	MAD 300 (atomizer) nasal devices available from Teleflex (866-246-6990) or Safety Works Inc. (800-723-3892)	N/A	3 mL, 25 G, 1 inch syringes	N/A

Billing

- Naloxone is covered by some insurance plans, including some managed care plans.
- Check the patient's coverage and dispense naloxone formulation based on coverage and the patient's preference.
If the patient cannot afford to pay, offer a listing of NYC Opioid Overdose Prevention Programs where naloxone can be accessed free of charge: www.health.ny.gov/overdose.
- The mucosal atomizer device (MAD) does not currently have an NDC, and therefore cannot be billed through usual pharmacy billing routes. Devices are approximately \$5 each. Check to see if your pharmacy can cover the cost. If not, patients will need to pay for the device.

Side Effects: Anxiety, sweating, nausea/vomiting and shaking. This is not a complete list of possible side effects. Encourage patients to talk to their doctor about these or any other side effects.

Email questions or concerns related to naloxone to pharmacynaloxone@health.nyc.gov.

To learn about dispensing non-patient specific prescriptions for naloxone under New York City Health Department's standing order, visit nyc.gov/health and search for "Pharmacy Naloxone."
