

2011 YOUTH RISK BEHAVIOR SURVEY

New York City High School Survey Survey Summary

The 2011 Youth Risk Behavior Survey (YRBS) was completed by 11570 students in 102 public high schools in New York City during the fall of 2011. The school response rate was 93%, the student response rate was 79%, and the overall response rate was 73%. The results are representative of all students in grades 9-12. The weighted demographic characteristics of the sample are as follows:

| | | | | | |
|--------|-------|------------|-------|------------------|-------|
| Female | 50.0% | 9th grade | 29.7% | Asian | 15.0% |
| Male | 50.0% | 10th grade | 27.2% | Black* | 34.6% |
| | | 11th grade | 22.1% | Hispanic/ Latino | 35.4% |
| | | 12th grade | 20.5% | White* | 14.1% |
| | | Other | 0.4% | All other races | 0.4% |
| | | | | Multiple races | 0.5% |

Students completed a self-administered, anonymous, 99-item questionnaire. Survey procedures were designed to protect the privacy of students by allowing for anonymous and voluntary participation. Local parental permission procedures were followed before survey administration.

The YRBS is one component of the Youth Risk Behavior Surveillance System (YRBSS) developed by the Centers for Disease Control and Prevention in collaboration with representatives from state and local departments of education and health, other federal agencies, and national education and health organizations. The Youth Risk Behavior Surveillance System was designed to focus the nation on behaviors among youth related to the leading causes of mortality and morbidity among both youth and adults and to assess how these risk behaviors change over time. The Youth Risk Behavior Surveillance System measures behaviors that fall into six categories:

1. Behaviors that result in unintentional injuries and violence;
2. Tobacco use;
3. Alcohol and other drug use;
4. Sexual behaviors that result in HIV infection, other sexually transmitted diseases, and unintended pregnancies;
5. Dietary behaviors; and
6. Physical activity.

The YRBS also measures asthma and self-reported height and weight to allow calculation of body mass index for assessment of overweight and obesity. More information about the Youth Risk Behavior Surveillance System can be obtained from <http://www.cdc.gov/yrbss>.
