

HEPATITIS C

Get Tested. Get Cured!

Hep C treatment is now shorter,
easier and more effective.

Before	Now
Often lasted 1 year	Usually lasts 2 to 3 months
Weekly injections and pills	Pills , often just 1 a day
Severe side effects (flu-like symptoms, depression, anemia)	Mild side effects (headache, nausea)

Over 90% of patients can be cured.

The new treatments have been studied in large clinical trials over many years, and are found to be safer than past treatments.

They stop replication of the virus, which means **it's not just remission, it's a cure.**
