Your provider has prescribed medicine to treat your **tuberculosis (TB) infection**. It is important to continue and complete your treatment, even if you feel healthy.

This medicine tracker will help you stay on track and complete your treatment. Taking your medicine can help protect your loved ones and community, and prevent you from getting sick with active TB disease, a more serious illness, in the future.

Medicine Schedule

Instructions for provider: Circle the name of the medicine you have prescribed. Fill in the number of pills, frequency and duration of the treatment.

TB Infection Medicine	How often to take the medicine	Number of pills to take each time	Days of the week to take the medicine	How long to take the medicine
Isoniazid and Rifapentine: _____ milligrams (mg)				
Rifampin _____ mg				
Isoniazid _____ mg				

Instructions For Patient: The medicine you are prescribed will determine how long you will use the tracker. Most people can take TB infection medicine without any side effects. Talk to your provider, nurse or pharmacist if you have any concerns. If you have bad side effects, you may be able to take a different medicine to treat TB infection.
