Dear Dr. Farley,

Placing a size limitation on beverages will not help children make better nutritional choices.

Instead we should focus on teaching children about balanced diets and exercise.

That's why I ask the Department of Health to focus on things that work instead of focusing on beverage size restrictions that won't work.

On behalf of New Yorkers like me, please say "No" to the proposed ban on the sale of beverages over 16 ounces in New York City.

Sincerely,

Joseph Assisi

Subject: Why single out beverages?
Date: Tuesday, July 24, 2012 6:59:24 AM

Dear Dr. Farley,

Placing a size limitation on beverages will not help children make better nutritional choices.

Instead we should focus on teaching children about balanced diets and exercise.

That's why I ask the Department of Health to focus on things that work instead of focusing on beverage size restrictions that won't work.

On behalf of New Yorkers like me, please say "No" to the proposed ban on the sale of beverages over 16 ounces in New York City.

Sincerely,

Vito Di Falco

Date: Monday, July 23, 2012 11:29:24 AM

Dear Dr. Farley,

Instead of proposing ineffective regulations to reduce our waists, government should be looking into ways to reduce its own waste.

Spending time on frivolous regulations is a waste of taxpayer resources and time. Please say "No" to new arbitrary beverage size limits. Keep our city focused on what works and what matters.

Sincerely,

Catherine Thorpe

BRONX, NY 10451

From: [Lauryn Slotnick](#)
To: [Resolution Comments](#)
Subject: Allow large-size sodas ONLY in reusable cups brought by the customer
Date: Monday, July 09, 2012 1:10:34 PM

I am writing to suggest that larger sizes for sodas and similar beverages only be available if you bring your own reusable cup. I would also like to see a high fee for paper and plastic cups in general, say \$0.50-1.00 each, to encourage people to either bring their own reusable cup, or to go without soda. (People with food stamps or other hardship requirements can each receive a reusable cup with their benefits - though they probably shouldn't be using their money for soft drinks anyway). The amount of paper and plastic cup waste in NYC garbage cans is literally insane - and making people think about their cup usage will, in turn, cause them to consider their soda intake. There is no need to advocate a "soda ban" of larger sizes and turn this into a "free market fight"; what we SHOULD do is only allow certain sizes when customers bring their own reusable cups. This will help the city both in terms of trash created, and in terms of our residents becoming more mindful of the soda they drink, without creating any form of "free market" issues.

Dear Dr. Farley,

Right now, what New York City needs are jobs and policies that promote business. What we don't need are useless, ineffective regulations.

Shrinking beverage sizes will only serve to shrink local restaurant and grocery store sales and jobs.

Please stop the proposal to ban beverages over 16 ounces and focus on what works and what really matters-preserving our city's businesses, wages, and jobs.

Sincerely,

Right now, what New York City needs are jobs and policies that promote business. What we don't need are useless, ineffective regulations.

Shrinking beverage sizes will only serve to shrink local restaurant and grocery store sales and jobs.

Please stop the proposal to ban beverages over 16 ounces and focus on what works and what really matters-preserving our city's businesses, wages, and jobs.

Sincerely,

Susan Vazquez

Dear Dr. Farley,

Today, it's mandating the size of my beverage; tomorrow it will be the size of my pizza, the number of scoops in my ice cream sundae, or the number of ounces in my New York strip.

I urge you to help draw the line.

Enough is enough. Please reject the proposed ban on beverages over 16 ounces.

Sincerely, Roberta Licht

Dear Dr. Farley,

I believe education, overall diet, and exercise determine the health of an individual. I also believe obesity cannot-and should not-be solved through a discriminatory ban on a single product.

I ask that the Department of Health reject beverage restrictions that only serve as an illustration of another example of government overreach.

Please stop the ban on the sale of beverages over 16 ounces.

Sincerely,

Sabrina Baez

Dear Dr. Farley,

I believe education, overall diet, and exercise determine the health of an individual. I also believe obesity cannot-and should not-be solved through a discriminatory ban on a single product.

I ask that the Department of Health reject beverage restrictions that only serve as an illustration of another example of government overreach.

Please stop the ban on the sale of beverages over 16 ounces.

Sincerely,

Lisa Hempfling

Subject: I support 16 ounce soda limit - Article 81.
Date: Monday, July 23, 2012 2:59:38 PM

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

Ronald Bogin

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

Loretta Dunn

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

Megan Webster

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

It makes complete sense to control a major factor contributing to rising national health care costs and impairing individual productivity. The entire country will benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I don't live in New York City, but I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Dear Health Board Members,

My brother and my mom died from being overweight.

I am lucky because I recognized that sugar drinks are big trouble for weight gain and diabetes.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

In fact, if there was a way to make sugar drinks illegal, I would vote for it. They are causing sever diabetes in lots of people.

Sincerely,

Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

Jacqueline Lasahn

With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I am a Registered Dietitian and know and have seen the consequences of people consuming too many sugar sweetened beverages. There is research that supports the fact that your body metabolizes these beverages differently from other calories consumed and there are absolutely no benefits nutritional or otherwise gained from these products. This limit would not prevent anyone from continuing to consume as much as they want, it would just bring attention to the need to be conscious of the huge sizes and portions we have become to accept as normal.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Dear Health Board Members,

New York led the way in banning cell phone use while driving a car. While I don't know the statistics, this no doubt has resulted in preventing numerous deaths that would otherwise have occurred.

New York can again be the leader in the "battle" against the obesity epidemic that is going to break our health care system. Limiting the size of high sugar, high calorie, nutrient-free soft drinks will be a big step forward in slowing the obesity epidemic.

It's not about micromanaging other people's choices, it's about taking steps to slow the obesity epidemic that is resulting in costly medical care for diabetes, heart disease, high blood pressure, and other obesity-related diseases.

thank you!

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

J Davis

Dear Health Board Members,

More than two-thirds of adults and more than one-third of children are overweight or obese in this country. Sugary drinks are the biggest contributor to the excess calories added to the average American diet since the 1970s. They are the primary source of added sugars in children's diets. With every additional sugary beverage a child drinks daily, his/her odds of becoming obese increase by 60%.

I don't live in New York City, but I would benefit from New York City adopting Mayor Bloomberg's proposal to limit the size of sugary drinks sold in New York City food service establishments to 16 ounces. Article 81 will decrease sugary beverage consumption in New York but it will also make New York City a role model for cities across the country looking to combat sugary beverage overload.

I support Mayor Bloomberg's proposal. Please approve it. I am looking to New York City to lead the way to a healthier tomorrow.

Sincerely,

Gladys Sagastume

Date: Wednesday, July 18, 2012 7:09:25 PM

Dear Dr. Farley,

As a New York City resident, I am writing you today to ask that you please reject the proposed ban on the sale of fountain and bottled beverages over 16 ounces.

Restricting the sale of certain beverage sizes in New York City hurts our restaurants, theaters, sports venues, coffee shops, food trucks, street carts, and all those who are dependent on beverage sales for their livelihoods.

Furthermore, I believe it should be up to me, and not my government, to choose my serving sizes. The answer to curbing obesity is diet, exercise, and a healthy lifestyle, not restrictions on soft drinks, juice drinks, sports drinks, and teas.

On behalf of New Yorkers like me, please say "No" to the proposed ban on the sale of beverages over 16 ounces in New York City.

Sincerely,

Kanaev

As a New York City resident, I am writing you today to ask that you please reject the proposed ban on the sale of fountain and bottled beverages over 16 ounces.

Restricting the sale of certain beverage sizes in New York City hurts our restaurants, theaters, sports venues, coffee shops, food trucks, street carts, and all those who are dependent on beverage sales for their livelihoods.

Furthermore, I believe it should be up to me, and not my government, to choose my serving sizes. The answer to curbing obesity is diet, exercise, and a healthy lifestyle, not restrictions on soft drinks, juice drinks, sports drinks, and teas.

On behalf of New Yorkers like me, please say "No" to the proposed ban on the sale of beverages over 16 ounces in New York City.

Sincerely,

Danielle Green

Dear Dr. Farley,

New York City is a good place to live-but we pay dearly for the privilege. Between rising food and housing costs, high unemployment, and the general excise tax, New York City's cost of living far outpaces any other U.S. city.

In this economy, shouldn't we be focusing on jobs and wages instead of focusing on soda sizes? Please reject the ban on the sale of beverages over 16 ounces.

Sincerely, Jillian Camera

Dear Dr. Farley,

New York City is a good place to live-but we pay dearly for the privilege. Between rising food and housing costs, high unemployment, and the general excise tax, New York City's cost of living far outpaces any other U.S. city.

In this economy, shouldn't we be focusing on jobs and wages instead of focusing on soda sizes? Please reject the ban on the sale of beverages over 16 ounces.

Sincerely,

carol chiarello
