

**City of New York**  
**Department of Information Technology and Telecommunications**  
**Job Posting Notice**

<b>Civil Service Title:</b> Computer Specialist (Operations)	Level:
<b>Title Code No:</b> 13622	Salary: \$69,253/\$79,641 - \$108,100
<b>Business Title:</b> Migration Specialist	Work Location: Brooklyn, NY
<b>Division/Work Unit:</b> IT Services	Number of Positions: 1
<b>Job ID:</b> 232327	Hours/Shift: Day - Due to the necessary technical support duties of this position in a 24/7 operation, candidate may be required to work various shifts such as weekends and/or nights/evenings.

**Job Description**

DoITT provides for the sustained, efficient and effective delivery of IT services, infrastructure and telecommunications to enhance service delivery to New York City's residents, businesses, employees and visitors. As the City's technology leader, DoITT is responsible for maintaining the foundational IT infrastructure and systems that touch every aspect of City life from public safety to human services, from education to economic development crossing the full spectrum of governmental operations.

The successful candidate will serve as a Migration Specialist reporting to the IT Services Division. Responsibilities will include: Build VM's, manage VM templates, execute technical discovery, design, and deployment deliverables for VM migrations; provide performance management of a large, pre-production and production Virtual Environment primarily of vSphere/ESXi 5.1 5.5 and 6.0 environments across several physical locations; convert legacy Solaris systems to Unix/Linux servers; test and document implementation guidelines for new VMware technologies being deployed in the data center(s); and perform special projects and initiatives as assigned.

**Minimum Qualification Requirements**

(1) A four-year high school diploma or its educational equivalent plus a certificate from an accredited technical school (approximately 675 hours) with a specialization in computer operations, and three years of satisfactory, full-time large-scale mainframe computer operations or three years of satisfactory data communication network experience in a mainframe environment, gained since June, 1996, one year of which must have been in a project leader capacity or as a major contributor on a complex project;

-or-

(2) A baccalaureate degree from an accredited college and four years of satisfactory, full-time experience as described in 1 above, including one year of which must have been in a project leader capacity or as a major contributor on a complex project;

-or-

(3) A four-year high school diploma or its educational equivalent and five years of satisfactory, fulltime experience as described in 1 above, including one year of which must have been in a project leader capacity or as a major contributor on a complex project;

-or-

(4) A satisfactory combination of education and/or experience which is equivalent to 1, 2, or 3 above. However, all candidates must have at least a four-year high school diploma or its educational equivalent and three years of satisfactory, full-time large-scale mainframe computer operations or three years of satisfactory data communication network experience in a mainframe environment, gained since June, 1996, one year of which must have been in a project leader capacity or as a major contributor on a complex project.

NOTE: In order to have your experience accepted as Project Leader or Major Contributor experience, you must explain in detail how your experience qualifies you as a project leader or as a major contributor. Experience in computer software development and maintenance, technical support, quality assurance (QA), hardware installation, or as an end user will not be accepted for meeting the minimum qualification requirements.

**Preferred Skills**

The preferred candidate should possess the following: 5+ years of experience within a related role in troubleshooting, analyzing and problem solving, and successfully resolving issues with Windows/Linux/Unix virtual servers and all tiers; experience working with Windows Servers 2003, 2008, 2008/R2 and 2012; exchange and/or SQL experience a plus; knowledge of TCP/IP network and switch and load balancer configuration; VSAN and EMC Virtual Storage Integrator, experience with DNS, DHCP, Remote Desktop Session Host, DFS, and Microsoft Failover Clusters; experience in VMWare (ESXi) support; experience in vCenter Operations Manager, and SRM; experience in VMware /RHELextensive technical background covering all aspects of data center migration and hosting; strong knowledge in network and SAN design; hands-on experience in supporting highly available network and SAN infrastructure in a fast paced, large scale environment; extensive hands on experience administering EMC VMAX and Xtremio storage and associated Management Tools; fiber channel switch management with Brocade Fabric Switches, including DCX; knowledge of Virtual Fabrics, DCC along with basic zoning concepts; knowledge of NetApp and Hitachi storage: knowledge of Symantec NetBackUp; knowledge of standard network protocols, load balancing and firewalls; experience with remote access and file transfer tools and V2V and P2V migration tools (Platespin, VMWare VConverter, Solaris P2V; recovery planning and implementation; excellent communication skills, interpersonal and organizational skills; and the ability to manage multiple tasks under tight deadlines.
