

Brooklyn Bridge-Montgomery Coastal Resilience Construction Update

CB3 Parks Committee Meeting
BRC Senior Services Center
30 Delancey Street
March 14, 2024

Highlights

- Project Status
- Construction Photos
- Greenway Detour
- Community Resources

BMCR | Project Status

ALL WORK IS SUBJECT TO CHANGE

Current Activities

- Water main upgrades
- Utility relocation & upgrades
- Floodwall construction
- Micropile installation
- Interceptor Gate Building Construction

Upcoming Activities

- Greenway Bike Detour between Old Slip and Montgomery Street

Coordination

- ESCR—PC and PA1 Construction, Utility Work Coordination
- Ongoing coordination with DOT to maintain safe, greenway access
- NYC EDC Brooklyn Bridge Esplanade Project, Dover St. to Catherine Slip

A screenshot of the NYC Lower Manhattan Coastal Resiliency website. The page title is 'Brooklyn Bridge-Montgomery Coastal Resilience'. The navigation menu includes 'Background', 'Progress', 'Resources', and 'Get Involved'. The main content area features a graphic of the project's location and a list of related projects: 'The Battery Coastal Resilience', 'Interim Flood Protection Measure (IFPM)', 'Battery Park City Resilience Projects', 'The Financial District and Seaport Climate Resilience Master Plan', and 'Seaport Coastal Resilience'. A section titled 'Explore the headings below for more information about BMCR and the status of construction:' includes a link to 'NYCEDC LMCR'. Below this is an image of a waterfront park with a blue callout box stating 'The same waterfront that the community enjoys when weather is good...'. Another image shows a close-up of a flood barrier with a blue callout box stating '...transforms into critical flood protection during major flooding events.' At the bottom, there is a 'Learn More about BMCR' section with a list of links: 'About', 'Construction Notices', 'Presentations', 'Newsletters', 'Gallery', 'Community Engagement', 'Contact', and 'FAQs'.

Brooklyn Bridge - Montgomery Coastal Resilience

In the Two Bridges neighborhood, the Department of Design and Construction (DDC) will install a combination of flood walls and deployable flip-up barriers to protect the neighborhood from a 100-year storm surge in the 2050s, while also maintaining access and visibility to the waterfront. New York City Economic Development Corporation (NYCEDC) led the design for the project, which will extend along the waterfront from the Brooklyn Bridge to Montgomery Street. EDC completed design in fall of 2021 and DDC is now managing the construction of BMCR.

This project will reduce flooding risk – from both sea level rise and storm surge – for thousands of residents, while continuing to preserve views and access to the waterfront. These deployable barriers will be permanent infrastructure, hidden until they are flipped up in the event of a storm. The location of the flood walls and posts has been designed to minimize conflict with subsurface infrastructure and to maximize integration of public space amenities such as open-air seating, fitness equipment, and athletic courts.

Explore the headings below for more information about BMCR and the status of construction:
