

Project # SANDTWOBOR | Borough: Manhattan | Date Issued: 11/01/2023

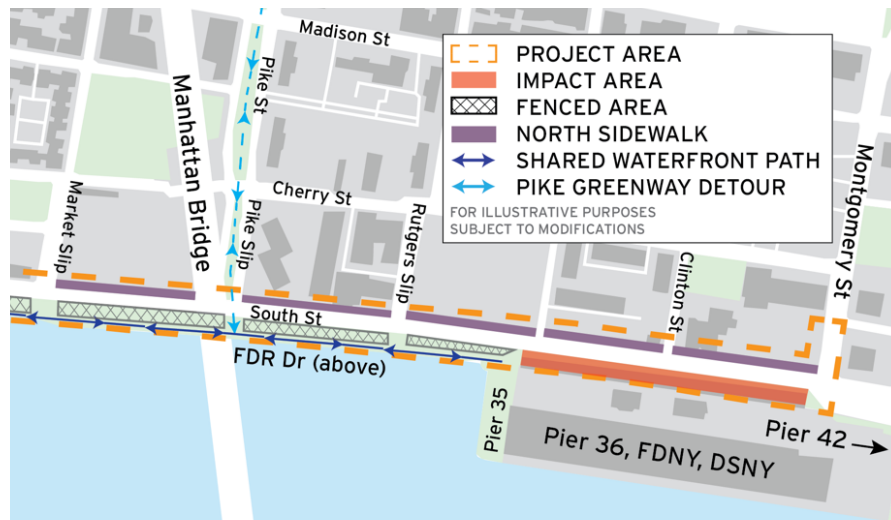

The Brooklyn Bridge - Montgomery Coastal Resilience (BMCR) Project is an initiative to provide long-term flood protection on the south side of Manhattan.

## Detour of Bikers and Pedestrians

### On South Street from Pier 35 to 36 Starting November 6, 2023, and ongoing until further notice.

To safely accommodate gas main installation, and floodwall construction, the enclosed work zone must be extended between Piers 35 and 36. Bikers should follow the existing East River Greenway Detour at Pike Slip or consider alternate routes. Pedestrians should use the available sidewalk on the north side of South St. To access Pier 35 and the waterfront pathway, cross at Rutgers Slip, Pike Slip, Market Slip, or Catherine Slip.

Please follow all posted signage.
