### INTRODUCTION/NARRATIVE STATEMENT

DESIGN AND PLANNING MDIM 8 BROADVIEW ROAD WOODSTOCK, NY 12498

111 Noble Street Brooklyn, NY 11222

Narrative Statement:

Dear Chair of the Board and Members of the Board

111 Noble Street is a 2 story building that was built around 1855 by William Williams for investment purposes. The building was originally built in the traditional Italian style that was common for the 1850's and 60's, had a wood facade, a wooden porch, the overall appearance was well crafted, proportions and materials chosen worked well in the context provided by Noble Street.

Over the years renovation work was performed and the front was heavily altered, the original wood columns as well as the greatly detailed, fragile steel railings were removed, the columns, as well as the railings were replaced with brick columns and a brick railings. The wooden facade was removed and replaced with asphalt shingles and later, plastic siding was installed to cover the asphalt shingles. In addition the windows were replaced, the fence on the porch and on the property line were replaced, all in all the original facade was completely changed and altered over time.

The new owners first retained our firm to look into the feasibility of renovating and restoring the existing structure. We recommended to the owners to hire a structural engineering firm to determine if the existing structure was compromised over the years and to determine costs of needed repairs. During the assessment it became clear that all of the original materials were removed and that the building has significant structural deficiencies, however, that some of original framing as well as the brick basement walls can be kept and repaired.

The team concluded after initial tests performed that due to the nature of alterations as well as existing structural damage, our team will retain some of the original elements and will present a building extension to the landmarks commission and the community board. The new design copies the visual appearance of the original building dated 1855 and stays within the context of adjacent buildings as well as other buildings on Noble Street.

Attached graphical presentation will give you a good idea what our team is aiming for and we look forward to the opportunity presenting the project to the board.

respectfully
