

# Second Quarter 2016

## City of New York – Stable Income Fund

The Stable Income Fund is managed to protect principal while providing the potential for higher rates of return than other conservative investments, such as money market funds. To achieve this, the Fund invests in instruments which are not expected to experience price fluctuation in most economic or interest rate environments. Examples of these assets include guaranteed investment contracts (GICs), bank investment contracts (BICs), and security backed contracts.

### Glossary

#### Blended Yield

- The weighted average yield of the portfolio's holdings, net of all fees.

#### Book Value Contracts

- Bank Investment Contract (BIC):

A contract in which a bank guarantees to return the principal amount deposited by the contract holder on a specified date and at a specified rate of interest.

- Guaranteed Investment Contract (GIC):

A contract in which an insurance company guarantees to return the principal amount to the contract holder on a specified date and at a specified rate of interest.

- Security Backed Contracts:

A contract issued by a bank or insurance company in which an underlying portfolio of fixed income securities back the contract. Security backed contracts guarantee a minimum rate of return.

### Investment Strategy

The Fund invests in a diversified pool of investment contracts issued by high quality financial institutions. The fixed income portfolios within the security backed contracts are managed by several nationally known fixed income managers in order to provide diversification by investment style. This Fund is appropriate for investors seeking more income than a money market fund without the price fluctuation experienced in many other funds.

### Fund Management

As of 06/30/16, the fixed income portfolios within the Fund were managed by BlackRock, ICMA-RC, NISA Investment Advisors, LLC, Goldman Sachs Asset Management, JPMorgan, Prudential Fixed Income, Babson Capital Management, and Pyramis Global Advisors.
