INTRODUCTION

These *Statements of Community District Needs*, prepared by New York City's community boards, provide a context for development and assessment of their budget priorities. Pursuant to Sections 230 and 231 of the City Charter, community boards submit annual expense and capital budget priorities which must be considered by city agencies in the preparation of their departmental budget estimates.

Material preceding each statement, supplied by the Department of City Planning, summarizes district demographic and land use characteristics. The district profiles include:

- o Population counts from the 1980, 1990, and 2000 censuses. 2008 population estimates are listed for the City and borough totals based on Department of City Planning estimates as adopted by the Census Bureau in July 2008. For more information on the City's population data, see <http://www.nyc.gov/html/dcp/html/census/popdiv.shtml>;
- o Resident births and deaths within New York City, 2000 and 2007, from data prepared by the New York City Department of Health;
- o 2005 and 2009 income support levels -- Public Assistance, Supplemental Security Income and Medicaid-Only (excluding nursing home cases) -- provided by the New York City Human Resources Administration from their Medicaid Eligibility File;
- o Total land area from the Department of City Planning's 2007 LION street and District base map files; and
- o Land use in 2009, from the city's Real Property File providing the number of tax lots, lot area and percentage of total lot area in each land use category.¹ Lot area is in thousands of square feet and excludes lots with missing dimensions. Lots with certain classifications, such as land under water, are categorized as "Miscellaneous". The land uses of joint interest areas, which are not part of any community district, are assigned to appropriate categories in the borough and citywide profiles. For example, Central Park is counted as "Open Space Recreation" in the Manhattan and New York City profiles. City and borough land use totals may therefore exceed the sum of the community districts.

This edition of *Community District Needs* features listings of parklands and other publicly accessible open spaces. Based on 2009 data, maps of each community district show the location of parks and other public open spaces on both private and public properties. The maps are keyed to lists of the parks and open spaces with addresses, regulatory authorities and size.

Also featured this year are population estimates and other selected characteristics from the American Community Survey based on 55 Public Use Microdata areas (PUMAs) that approximate NYC community districts but are not coterminous with them. The American Community Survey is a Census Bureau nationwide survey designed to provide annual updates for geographic areas. Based on 2006 – 2008 three year population estimates, listings for each community district (and PUMA areas) feature updated estimates for native and foreign born residents, employment status for population 16 and over, median household income, and poverty level indicators. A map is provided showing PUMAs and community districts. To learn more about ACS see <http://www.census.gov/acs/www/index.html>.

¹Condominiums, which have separate tax lots for each unit, are aggregated to a single tax lot per block. Only one address per condominium complex (structures under the same condominium association) is counted.

This edition continues to include borough maps of City Council districts and computer-generated base maps of community districts. The base maps are available on the Department's website. Summary 2000 census data are provided. Each district profile also contains a listing of line-item projects funded in the Fiscal Year 2010 Capital Budget. More information by community district, including land use maps and selected community facilities, is available at <http://www.nyc.gov/html/dcp/html/lucds/cdstart.shtml>.

The Department hopes that these statements will prove useful to communities and agencies planning for future programs and services. We welcome suggestions for the next edition of Community District Needs.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

INTRODUCTION

Community Board 1, Queens' District covers the area bounded by Bowery Bay on the north, on the south by Queens Plaza North, Northern Boulevard and the LIRR Tracks, on the west by the East River, and on the east along the west bound curve of the Brooklyn Queens Expressway to the Grand Central Parkway and 82nd St. We service the communities of Astoria and portions of Long Island City, Woodside and Jackson Heights.

Our zoning is mixed with residential, manufacturing and commercial areas. There are two Industrial Business Zones (IBZ) within our boundaries. The District abuts LaGuardia Airport, along with several major roads that provide access through our community to and from Rikers Island. District 1 is home to the largest number of energy power plants that provide electricity to New York City.

According to the U.S. Census Bureau, the population in Community Board 1's District has increased from 188,549 in 1990 to 211,220 in 2000. The District's population is one of the most ethnically diverse in Queens.

Our community has many desirable qualities that include a beautiful waterfront, cultural establishments such as the Museum of the Moving Image, the Noguchi Museum and Socrates Sculpture Park. A replica of an ancient Greek Amphitheater at Athens Square Park is the site of numerous ethnic entertainment events during the summer months.

We are also home to the Kaufman Astoria Studios, which has the largest sound stage on the east coast and is currently expanding its facilities.

Our cultural diversity provides an epicurean delight for the multitude of diners that live in and visit our District.

Our District has experienced the construction of multiple dwellings in areas where low density housing formerly existed. New construction is being built to the maximum capacity of the existing zoning regulations, drastically changing the character of neighborhoods and putting a strain on our infrastructure. Community Board 1 has been working on a rezoning proposal with the Department of City Planning, Council Member Peter Vallone, Jr. and the residents/property owners in the area bounded by Broadway to 20th Avenue/East River to Steinway Street. The spirit and intent of the study is to contain overdevelopment, to update our commercial overlays and to maintain the character of our residential streets.

DISTRICT NEEDS STATEMENT — FY 2011

Department for the Aging

Many seniors depend on subsidized transportation programs as their only affordable means of travel to and from doctor appointments and for shopping. Our District is experiencing a growing population of homebound seniors who depend on the Meals-On-Wheels program, home health care and visiting nurse services. Home care for our frail and elderly is less costly to our City and more desirable to many in need. These services must continue and should be expanded.

Community Board 1, Q recognizes and supports the development of affordable housing for seniors and the physically disabled living within our District.

Buildings

Much of the new development taking place within our District is to the maximum permitted zoning, which is having an impact on existing neighboring properties.

The need for affordable housing in our District has produced a market for illegal apartment conversion. It has long been our Board's opinion that legislation should be considered to legalize apartments that meet all safety regulations. This will provide safe, affordable housing and add to the City's tax base. Conversely, more inspectors are needed and stiffer fines must be levied to those who violate their building permits and Certificates of Occupancy.

Consumer Affairs

Our District has the greatest number of licensed and unlicensed Unenclosed Sidewalk Cafes in Queens. While the Board appreciates the ambiance that these cafes bring to our community, we realize that the quality-of-life of our residents must be maintained. We stress the need for Enforcement Agents, specifically in the evening and on weekends, to monitor the licensing codes and padlocking of habitual violators.

District Attorney

The blight that graffiti puts on a community, along with the cost of graffiti vandalism to City and

property owners is great. Our Board asks that the Queens District Attorney's office continue to prosecute graffiti vandals to the fullest extent of the law. We also ask for increased funding for graffiti cleanups sponsored by the Mayor's Community Affairs Unit.

Economic Development

District 1's commercial/manufacturing/industrial areas play an important role in the stability of our community. Two Industrial Business Zones have been designated within our manufacturing/industrial areas.

Our primary shopping areas are located on Steinway Street, Ditmars Boulevard, Broadway, 30th and 36th Avenues. These commercial strips have, in the past year, experienced an increase in vacancies due primarily to the economic downturn, a rise in property taxes and unaffordable rents. The maintenance of our streetscapes must be maintained, e.g.: curb and sidewalk repairs and tree stump removal. Most importantly, additional parking is required and critical to preserving our commercial areas that are crucial to the well being of our entire community. Tax incentives are required to ensure that jobs are maintained and taxes are not lost to the City.

Environmental Protection

New development has put a strain on our infrastructure, particularly on our combined sewer and storm systems. Multi-family dwellings are now being built where one and two family homes previously existed. Our current infrastructure cannot handle this increased population. The City must plan for the increase in higher density development.

Along with hosting the greatest number of power plants in the City our District abuts LaGuardia Airport. The Grand Central Parkway, the Brooklyn Queens Expressway, the Robert F Kennedy and Queensborough Bridges also run through our District. Exhaust and air fuel fumes have lent to our District's reputation as one of the highest rated respiratory distress related areas in New York City. Therefore, monitoring of our air quality is essential to our health and well-being.

Housing

Our District has five New York City Housing Authority (NYCHA) developments. They are: Astoria, Queensbridge North and South, Ravenswood and the Woodside Houses. Due to diminished funding from Federal/State/City sources, NYCHA is considering the elimination of youth programs available to residents living within these developments. The Astoria Houses, in particular, has a high number of young residents. Support of activities for this population is essential. Every effort must be made to maintain our youth centers.

Parks & Recreation

Our increased population has created a greater need for the development of our open spaces. Our Board is pleased to note that Council Member Peter Vallone, Jr. has provided funding for the much anticipated Skate Board Park to be located in Astoria Park. Reconstruction was recently completed at the St. Michael's ball field which features new soccer and baseball fields for use by teams throughout the borough.

Our Board strongly supports the hiring of additional personnel to maintain the City's investment in our recreational spaces.

Forestry

We applaud the Mayor's Million Tree Initiative which seeks to plant and care for a million trees in the City over the next decade. Currently, Queens County has the greatest number of trees New York City. The removal of dead trees and large tree stumps must be given a priority in the City's

budget. The pruning of our street trees, every 10 years, is insufficient for the benefit of the trees and safety of our streets. More frequent maintenance will save our City from the many lawsuits resulting from falling branches.

Police

The 114th Precinct, located on Astoria Boulevard, which is a main thoroughfare through our District. Astoria Boulevard also serves as the service road between the Robert F. Kennedy Bridge and the Brooklyn Queens Expressway. Parking along the boulevard is limited and our Board has, for years, requested the construction of a parking lot over the Grand Central Parkway to accommodate Police Department vehicles, as well as, the increasing number of commuter vehicles.

In addition, we urge the enforcement of regulations pertaining to cabarets and bars i.e.: excessive noise, drugs and serving alcohol to minors. The MARCH Program (Multi Agency Response to Club Hotspots) has been very effective in monitoring those establishments that violate the law. This program must continue. More Police are needed on our streets and we support a more competitive wage for our “Finest”.

Sanitation

Our Board has supported the relocation or expansion of the existing QW-1 Sanitation garage. The facility was built in the 1930’s and our community’s needs and population have changed drastically since that time. Additional space to meet the increase in the size and number of vehicles is required.

More litter baskets are required on our commercial strips. Also, we need greater enforcement of littering laws. Merchants and property owners bear the burden of being ticketed for litter that is indiscriminately dropped by pedestrians or motorists.

Transportation

Community Board 1 acknowledges the need for safe passage of cyclists through the City, and applauds the plans to provide access in our community along Vernon Boulevard via our shore line to connect riders to our park land along the East River. However, we have serious concerns regarding the elimination of parking on the west side of Vernon Boulevard. This action has created a hardship for businesses along the boulevard; it has created excessive difficulty for the residential community and has also disenfranchised handicapped drivers who can no longer park, in a safer zone, for access to the open spaces along Vernon Boulevard. A plan that will incorporate parking and bicycle paths must be implemented.

We need additional cars on our trains during rush hour and more buses on our routes to accommodate the increase in our population and encourage utilization of public transportation.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

Chairman

Debra Markell-Kleinert
District Manager

STATEMENT OF DISTRICT NEEDS 2011

INTRODUCTION

Community Board 2 represents the areas of Sunnyside, Woodside, Long Island City a portion of West Maspeth. The district is bounded on the north by Queens Plaza North, the northern property line of the Sunnyside Rail Yard and Northern Boulevard; on the east by the Con Rail property; on the south by Calamus, Maurice and Maspeth Avenues and Newtown Creek; the East River to the west.

Community Board 2 is a diverse zoning district consisting of one, two family homes as well as a large number of multiple dwellings including Queens West, a very rapidly expanding residential district; commercial, manufacturing and industrial areas; mass transit systems and is accessible by a number of arterial highways, bridges, and the Queens Midtown Tunnel.

Board 2 is home to Citicorp Tower One and Two, the UN Credit Bank, Silvercup Studios, DeVry Institute, LaGuardia Community College, LaGuardia Performing Arts Center, P.S. 1 Contemporary Art Museum, Thalia Spanish Theatre; and the Borden Avenue Veterans Residence. The Long Island City Business Improvement District and the Sunnyside Business Improvement District are working to improve and enhance the commercial districts in CB 2.

Board meetings are held on the first Thursday of every month September through June.

An example of the diverse residential and commercial districts within CB 2, Sunnyside Gardens was designated as a Landmark District while not far from Sunnyside Gardens there is the industrial portion of Maspeth with some of the largest trucking and distribution firms in New York City.

Hunters Point, in Long Island City, a special mixed-use district with an IBZ, (Industrial Business Zone) and is experiencing rapidly expanding residential developments. The Department of City Planning rezoned portions of Long Island City that will allow for commercial development along Jackson Avenue and created a Hunters Point Sub District.

The Queens West Waterfront Development in Long Island City has seen a rapid growth of residential developments along what is know today as Queens West North. Development

plans are also in review for Queens West South, which is known as Hunters Point South. Hunters Point South is planned for 5,000 new mixed income residential units to include retail stores, a new school and park land along the East River.

DEPARTMENT FOR THE AGING:

Community Board 2 is home to one of the largest populations of senior citizens. This Board conducted a survey and identified that seniors in this district are in need of senior multi-language counseling and application preparation services, affordable housing, around the clock home care, health care and transportation services.

In addition, attention has been directed to a need to expand the Meals-On-Wheels Program to the homebound residing in the area and an increased demand for skilled nursing to conduct home visits to the growing frail elderly population residing in Board 2.

Presently, seniors within the boundaries of Community Board 2 are serviced by only one full service senior center located in Sunnyside. The seniors in the communities of Long Island City and Woodside, with over two-third of CB#2's senior population, need community based full service senior centers. The need for new centers is especially important since the closing of St. Mary's Senior Center in Long Island City and the growing Latino and Asian senior populations in Woodside. With the increasing number of participants seeking services, Community Board 2 supports increased funding levels to senior centers in order to meet the needs of our senior citizen population.

CITY SERVICES

Livery Services

The number of base stations and livery car services operating within Community Board 2 continues to be a major source of concern. Because of the district's proximity to major arterial roadways, and the mass transit system, this area has become a prime location for livery companies. Currently, there are approximately thirty-five (35) base stations housed within this district and growing.

Despite the fact that livery drivers claim to be dispatched from off-street parking locations, they routinely roam local roadways, and they utilize on-street parking spaces at metered areas along Queens Boulevard and Roosevelt Avenue. Moreover, the Board is regularly presented with inadequate, and often questionable, leases or other documentation of licensees' off-street parking facilities.

Complaints related to livery drivers who double park, obstruct hydrants and crosswalks are frequently generated to Board 2. The noted issues create a minimum number of on-street parking spaces for patrons shopping at local businesses, and unsafe conditions for pedestrians and motorists throughout the community.

This Board has benefited from TLC Enforcement programs that have been addressing complaints. Further, Community Board 2 continues to review TLC applications, makes recommendations on base station requests, and notifies the agency of problematic operations in the district.

Community Board 2 welcomes increased enforcement, on a continuous basis, of licensee's utilization of metered spaces, particularly at 61st Street at Roosevelt Avenue and at Queens Boulevard at 46th Street. In addition, the Board would like to see greater TLC

verification and oversight with respect to the leases and other documentation tendered by licensees for off-street parking facilities.

LIQUOR LICENSING

The New York State Liquor Authority issues liquor licenses to establishments throughout the City of New York. However, this agency (with a minimal number of inspectors for New York State) is not empowered with the responsibility to enforce the laws of both the state and city. Local precincts have, and continue to conduct inter-agency inspections of local businesses that serve alcoholic beverages.

The Board has frequently requested information from the NYS Liquor Authority and invited SLA representatives to meet with CB2, without response. More significantly, the Board regularly submits comments, and occasionally objections, with respect to the granting and/or renewal of certain SLA licenses, without response from the SLA as to its action on such applications or renewals. This occurs even under circumstances where the SLA is required by law to make a finding that the granting of such a license “is in the best interest of the community” and delineate its reasons for such a finding. The New York State Liquor Authority needs to pay more attention to community concerns and issues, prior to approving liquor licenses.

SOLID WASTE MANAGEMENT

Residential curbside recycling and source separation of paper, metal, plastic bottles and glass was implemented in this District in 1993. Currently recycling in New York City is only 17% and initiatives should be developed to increased diversion rates for recyclables.

Marine Transfer Stations throughout the City should be re-opened and utilized for the transport of putrescible waste by barge. Transport by rail should also be implemented. Currently, New York City’s garbage is being trucked to landfills in New Jersey, resulting in increased air pollution, damage to highways and bridges by the additional heavy trucks and wasted money.

New York City should implement collection of paint and hazardous waste to safely dispose of toxic materials. Collection of compostable materials, as well as distribution of the compost, should be continued and expanded to include yard waste collected in the spring and summer.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Air Quality

Air pollution continues to be a matter of great concern in Community Board 2. This mixed-use district consists of a vast number of manufacturing, industrial and commercial operations with several waste transfer stations that are expanding their facilities--issues that warrant air monitoring. These concerns as well as Board 2’s proximity to several arterial highways and major thoroughfares (i.e. Brooklyn Queens Expressway, Long Island Expressway, Queens and Northern Boulevards, Roosevelt Avenue, etc.) contribute to this district’s focus on air quality. Plans to place air monitoring equipment at sites throughout the borough, particularly in Community Board 2, requires continued support by our Environmental agencies.

Noise

Loud noise raises blood pressure, disturbs sleep and causes hearing loss. New York City gov-

ernment has recently recognized the negative impact of noise on the health of its citizens by enacting noise regulations. The city should enforce this law for the health of its citizens.

Also, there have been increasing complaints within the Community Board 2 district of noise emanating from within bars and other establishments, as well as outside such establishments from patrons congregating for the purpose of smoking. The Board would like to see greater enforcement of existing regulation of such conduct, rather than the enactment of additional restrictions such as the proposed Cabaret Law and Noise Code changes.

As part of the East Side Access Project, environmental barriers should be erected on the south side of the new track near residences and businesses to ameliorate the existing noise (currently 68 decibels) and that expected to be caused by the additional trains.

Sewers

Community Board 2 is served by storm, sanitary and combined sewer systems. Many of the sewers now in use throughout our district are among the oldest in the City and are unable to handle the increased volume caused by plans for higher density residential development and business expansion and growth. The City must continue to provide improved systems and participate in the planning for new development.

Sludge Management

The beneficial reuse of sludge continues to be a priority concern since the City signed the Ocean Dumping Ban Act. The heavy metal content of city sludge must be abated and environmentally conscious programs and technologies must continue to be studied, and disposal techniques developed.

Water Supply

The construction of Water Tunnel 3, which runs through Community Board 2, is expected to improve the distribution system in western Queens. Board 2 has been approved by Percent for Art to develop open space at 73rd Street, north of 51st Avenue at the water tunnel construction site in our district.

Board 2 supports the establishment of a public display about the water tunnel project, as well as outdoor recreational space, on 37th Avenue, between 46th and 48th Streets. This site is owned by the City of New York and is currently used by the Department of Transportation to store Jersey barriers and light poles. In the future it will be used for access to a valve chamber for Water Tunnel 3. The site has a historically valuable building once used by the New York Water Works. It is in Board 1 just to the north of Board 2 but will serve residents of both boards, as well as visitors to the area.

EDUCATION

Schools

For a number of years Community Board 2 has requested improvements to existing schools located in School Districts 14 and 30 serving this area's youth. Many of our schools have outstanding work orders for repairs to broken windows, inoperable doors and faulty plumbing. School structures should be maintained in top condition to insure the safety of the student enrollment. The Board of Education and the School Construction Authority need to review procedures for repairs to school facilities and streamline the process to allow for repairs within a reasonable timeframe.

Board 2 has identified a need for new schools to alleviate overcrowding and to create additional classroom space. We must continue to advocate for funding to construct new educational facilities and expand existing schools. We would welcome the addition of more new small high schools to our area, as long as they are developed on a new site, and not housed in any of our currently over-utilized school buildings. Community Board 2 looks forward to working closely with the noted agencies to assist in identifying suitable sites for these new high schools, for expanding and creating additions to existing schools, and for the construction of new schools.

FIRE DEPARTMENT/PUBLIC SAFETY

Firehouses and Battalions servicing this district and adjoining communities should be kept open to insure the safety of the public. In addition, with the on-going development of the Long Island City waterfront, the NYC Fire Department must review the current services in south-western Queens to insure manpower levels and equipment are adequate for the safety of the Long Island City community.

We must continue to work with the NYC Fire Department's Emergency Medical Services to identify permanent sites throughout the district for their equipment.

The Board's area also lacks adequate EMS ambulance coverage on a 24-hour basis. The boundaries of the Community Board are spread out and the recent traffic safety changes along Queens Boulevard appear to have added to EMS response times, which exceed city-wide averages. The Board would like the number of 24-hour ambulance tour shifts currently serving our community increased to no less than five such shifts.

HEALTH ISSUES

Southwest Queens lacks a primary care medical facility and outpatient clinics to serve the medical needs of Community Board 2's increasing population. In the past, this Board spoke to the Queens Borough President on the concept of construction of a major medical complex in western Queens. Currently, Queens' residents travel to Manhattan or to Eastern Queens to receive specialized medical services.

The Long Island City area is severely underserved by the City's public health network. In a health care survey, by the Floating Hospital of New York, Long Island City was found to be one of the most critically underserved communities in New York City. The area has one of the highest rates of child and HIV-AIDS caused diseases in Queens County. The nearest city supported full service health care facility for low-income families is either in Manhattan or Eastern Queens. A full service health clinic needs to be established in the Long Island City area.

In addition, there is a dramatic need for a low-income child daycare center within Community Board 2. In the last six years, in the Sunnyside/Woodside area, the birth rate has averaged over 1,500 live births per year; 85% were births to foreign born mothers, and 65% to mothers on Medicaid. This high rate of births (4th highest CB rate in Queens County) and high rate of mothers on Medicaid (3rd highest CB rate in Queens County) calls for affordable child daycare for the more than 95,000 minority residents in Board 2.

POLICE DEPARTMENT

The 108th Police Precinct presently located at 5-47 50th Avenue, Long Island City,

is in the southwestern most portion of our district, just two blocks from the East River.

The existing building was dedicated in 1904 and is surrounded by attached row homes and manufacturing firms to the west and is east of Vernon Boulevard. The stationhouse is too small to accommodate the number of police officers assigned to this precinct. There is a lack of ample facilities for female officers and the building is deficient in adequate space for support services of the 108th Police Precinct.

The 108th Precinct lacks off-street parking areas to accommodate staff vehicles, as well as official vehicles assigned to the precinct. Due to the lack of space, parking around the precinct is a nightmare; resulting in obstructed sidewalks, driveways and long-term use of DOT metered locations.

Community Board 2 requests site selection and acquisition of property to construct a new centrally located stationhouse, to include increased floor area, with ample off-street and on-street parking sites. This Board looks forward to working closely with the involved agencies in identifying suitable sites for this project.

Commitments to increase the 108th Precinct's manpower levels, remains a critical issue. Despite the on-going assignment of new officers to the 108th Precinct, manpower still remains low due to reassignments, transfers, retirement, etc. It is imperative for the City to assign at least 25 new officers each graduating class to enable adequate response to emergencies as well as quality of life complaints.

Quality of Life Issues

Vandalism in the Parks and of cars; substance abuse, noise pollution, and graffiti in our open public space, abandoned cars; double parking; sidewalk and hydrant obstruction; illegal truck traffic and speeding conditions are making ever-increasing demands on the current manpower of the 108th Precinct. We want to improve the present manpower levels at the 108th Precinct.

The District is home to the Van Dam Correctional Facility that draws from our precinct's manpower. There are three major bridges, the Queens Midtown Tunnel, Long Island Expressway and Brooklyn Queens Expressway that connect with other boroughs. Community Board 2 also has a large portion of the City's Rapid Transit system running through our district, as well as the Sunnyside Rail Yards. Manpower is drawn from the 108th Police Precinct whenever an accident or major incident occurs at any of these locations; as well as for large citywide events.

Enforcement

There is a proliferation of auto body shops and car service establishments throughout the board area. Many of these businesses utilize on-street parking spaces to accommodate their day-to-day operation. Consequently, our sidewalks and streets are constantly obstructed by illegally parked cars/trucks. Traffic Enforcement must be increased and continue to be able to monitor the district and execute City laws.

Traffic Control Agents

This district continues to experience a marked increase in traffic congestion and poor air quality due to the number of reconstruction projects currently underway with a projection for additional projects in the near future. We continue to express a need for Agents on a daily basis in our community to insure adequate flow of traffic.

DEPARTMENT OF PARKS AND RECREATION

With less than 20 acres of parkland, Community Board 2 is greatly in need of further development of open spaces into parks. Pocket areas or vacant and unused properties that lay dormant are acquired and developed into open space under the “Greenstreets Program” and other programs, to provide recreational areas for our diverse population.

Open space and waterfront access continues to be a priority of this Board. Development of the Long Island City Waterfront must provide adequate recreational space to accommodate the planned growth of that area while incorporating the needs of the existing residential community, manufacturing firms and businesses surrounding and adjacent to the waterfront project.

Constant use of our parks necessitates daily clean-up and maintenance of the parks sites in Community Board 2. Overflowing trash baskets combined with piles of litter throughout the parks attract vermin and rats, which are detrimental to our residents and discourage use of our precious open spaces.

Forestry

Trees, both in our parks and along our streets minimize the effects of pollutants in the air. This Board continues to request funds for continued tree planting in the district.

Through the years, CB2 has found that requests to address diseased trees, pruning of existing trees, and the removal of dead trees are severely backlogged. Looking ahead to the Mayor’s 2030 plan, CB2 welcomes the additional funding and planting of additional street trees in our district.

DEPARTMENT OF YOUTH SERVICES

Community Planning Board 2 lacks available space and funding for Youth Service programs. A multi-service youth center is needed and has been a priority of Board 2 for many years. It is imperative that our young people be provided with structured programs at no cost, in safe environments. Programming needs to include recreation, counseling, health services, substance abuse prevention, conflict resolution, job training and placement mentoring, college options, internships, peer leadership, academic enhancement, and family services. This type of multi-faceted programming would benefit both the “at-risk” population as well as those young people who function well but need support.

Special needs continue to be increasingly evident in our community. The need to address immigration issues continues to be a priority in our multi-ethnic neighborhoods. Also, with the increase of parents in “welfare to work” programs, as well as the increase in parents working two or more jobs, there is a significant increase in “latch-key” children. Additionally, schools and youth servicing agencies are reporting increases in child abuse and neglect cases. There also appears to be a growing number of teen parents. Parenting skills programs need to be included in any strategic planning.

In light of the fact this district lacks a multi-service youth center, at this time, and until we acquire one, maximum use of available space must be considered. Public school buildings should be utilized for extended day, evening and weekend programs. This includes the establishment of a Beacon program within the Queens Community Board 2 boundaries. Our young people deserve programs that they can walk to. Safety issues

preclude traveling to distant locations. Additionally, the opening fees and custodial fees being charged to community-based organizations need to be lifted in order to allow the greater use of school facilities.

The Department of Youth and Community Development (DYCD) has increased its scope of services to include Out of School Time (OST) Programs for youth. These programs may offer a mix of academic support, sports, recreation activities, the arts, and cultural experiences free of charge to young people after school, during holiday breaks, and in the summer. While six of these programs are located in schools within our community board, most are either limited to providing services only to the students of the host school, or offer only specialized programs to a specific age group of young people. Although we are appreciative of any additional youth programs in our board, there is still a large gap in services for our youth population.

These programs do not provide regular evening or weekend services, nor do they offer multi-generational programs to address the needs of the entire family. Young people are not completely autonomous, and their actions and needs are frequently reflective of their family's actions and needs. A child who is struggling in school and cannot obtain the necessary help at home because of the limited English or literacy skills of the parents, cannot easily overcome the academic obstacles in his path through a program designed to help only the youngster. An adolescent who is exhibiting at-risk behavior cannot be effectively treated unless the parents and family members also are engaged in counseling, parenting skills workshops, and support groups.

Our community desperately needs to embrace a more comprehensive approach to youth services through the establishment of a Community Center or Beacon Program, where multi-faceted programs and services for children of all ages, and for adults, could be offered year-round, during the daytime, in the evenings, on the weekends and holidays, and throughout the summer.

Joseph Conley

Chairman, Community Board 2

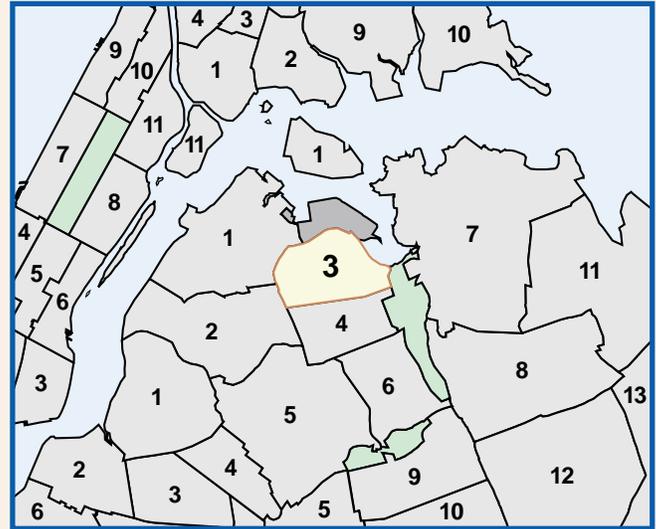

Debra Markell Kleinert

District Manager, Community Board 2

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

Community Board 3, QUEENS

STATEMENT OF DISTRICT NEEDS - FISCAL YEAR 2011

PROFILE

Community Board #3 serves the neighborhoods of North Corona, East Elmhurst and Jackson Heights. The composition of the district is very diverse with residents from every national, religious and ethnic background.

Population

The 2000 census indicates that our population is 169,000, an increase of approximately 32% since 1990. CB#3 has the largest population increase in the entire city. We speculate that our numbers are higher--closer to 200,000. Our community was severely undercounted. Over 40,000 new residents have settled in the Board area, yet, the allocation of uniformed services has relatively remained the same.

The District's land area is 2.8 square miles and is serviced by the 115th Police Precinct; Sanitation Queens West 3; Fire Engine Company 307/Ladder 154 and Engine Company 316; 11 Public schools; 11 private and parochial schools; 2 post secondary degree granting institutions; 4 public libraries; 1 private library; 10 HRA day care/ head start facilities; 11 known mental health facilities; children's group homes operated by Catholic Charities and Human Resources Administration; 9 park/playgrounds; 1 vest pocket park; 7 sitting areas; 8 park strips; Fisher Pool, and the Flushing Bay promenade.

While there are three distinct neighborhoods, we are all working towards a common goal to improve the quality of life for our families and community.

The housing stock is very diversified, encompassing remarkably unified, coherent brick apartment houses and Tudor style row and two-family homes. Some of the finest, architecturally distinctive dwellings in Queens County and the City can be found in Community Board #3, particularly in East Elmhurst and the Jackson Heights neighborhoods. Just

to mention a few notable sites located within the Board is the Jackson Heights Historic District, America's first planned "garden city" and the Louis Armstrong House/Museum, a national landmark in North Corona.

There are a number of lengthy commercial corridors in the District catering to the needs of a full range of resident ethnic groups: Roosevelt Avenue on the southern boundary of the District (shared with Community Board #2 and #4); Astoria Boulevard on the northern boundary; 37th Avenue and Northern Boulevard running through the breadth of the District's residential neighborhoods of Jackson Heights / North Corona and the 74th Street, 82nd Street, 90th Street, Junction Boulevard, 103rd Street retail strips.

The District lies in the shadow of LaGuardia Airport, where some of its residents are employed. Airport related uses along a portion of its northernmost street, Ditmars Boulevard, are obvious with the presence of hotels such as the Garden Hotel, the Marriott Hotel, the Holiday Inn Crowne Plaza, the Quality Hotel, and on the GCP, the Marriott Courtyard Hotel. National Car Rental also maintains a major facility and the Vaughn College--School of Aeronautics is located in the vicinity.

Minor industrial activity is also concentrated in the northern sector of the District, close to the Grand Central Parkway and LaGuardia Airport. The District's showplaces within the M-1 zone is the Bulova Corporate Center, Home Depot and Bed, Bath and Beyond. Nearby is Flushing Meadow Corona Park, CitiField New York Mets, USTA and Willets Point, a stone's throw from our borders.

What follows are Community Board #3's recommendations and requests for action.

BANKING

There is a critical shortage of banking services within the District, particularly north of Northern Boulevard. The majority of the banking outlets are congregated in the southern portion of the district in Jackson Heights from 74th to 89th Streets with only a few facilities located in North Corona and East Elmhurst. While we are pleased to see that new banking services have increased over the years, the areas that are sorely deficient, their needs have not been met. Particularly in the present economy, banks must meet their responsibility as members of this community, through the Community Investment Act, to aggressively reach out and market low interest loans. They must be encouraged to invest and provide banking facilities for merchants and residents in North Corona and East Elmhurst, north of Northern Boulevard our most underserved neighborhoods.

DAY CARE

Affordable and quality day care services should be made available for our children during the most important development years of their lives. In CB #3, there is a severe shortage of facilities. Our children deserve stabilized and nurturing environments that are conducive to learning and foster healthy development. While a new day care center is currently under construction, additional programs and facilities are still desperately needed.

ECONOMIC DEVELOPMENT

One of the defining characteristics of Community Board #3 is its rapidly changing demographic profile. During the past thirty years, our community has experienced significant out-flows of population. This hemorrhaging of population and the negative consequences for the overall economic health of the community has been offset by the influx of new im-

migrant populations. Many of these new ethnic groups have added to the total mix of business establishments by initiating a wide-range of commercial start-ups. As such, these new entrepreneurs, in concert with other small businesspersons, have preserved the economic viability and long-term stability of the larger community. In effect, these small family-based businesses have expanded the local tax base, generated the rapid growth of local labor markets, and revitalized the wide-range of commercial corridors found throughout Community Board #3. Moreover, this largely spontaneous mode of economic development has been carried out by entrepreneurs who seriously lack adequate access to technical business resources, formalized capital markets and knowledge of City regulations.

73rd Street: has rapidly developed over the years and has become a thriving Bangladeshi commercial area. While there is a merchants association in place, the following recommendations will help to make the area more successful:

1. Install muni-meters from 37th Avenue to Broadway
2. Regulate delivery times- schedule for off-peak hours
3. Increase sanitation pick up, hire the services of the Doe Fund
4. Seek assistance from City Agencies to improve sanitary conditions

74th Street: This commercial corridor has developed into a well known shopping and dining area as a result of the dynamic growth of West Asian entrepreneurial activity. In effect, this corridor has a well-defined ethnic and commercial identity that could be further developed. The following strategies are proposed for the 74th Street corridor:

1. Improve sanitary conditions
2. Enforce traffic regulations.
3. Increase police/traffic enforcement in the area of 72nd to 75th Streets; 37th Road to 35th Avenues in order to better move traffic and to reduce noise and air pollution.
4. DOT should modify parking regulations and employ muni-meters.

82nd Street: The 82nd Street Business Improvement District (BID) is the only public/private partnership of its type in CB #3. Therefore, it would be worthwhile to use this BID as a model for other commercial corridors in Board #3. Expand the vending restriction on this block to include Sundays.

90th Street: While this is the smallest of Community Board #3's commercial corridors, this strip requires assistance and planning to make it a viable entity. Its economic viability is essential to the health of the immediate adjacent residential properties. It should be incorporated into the planned upgrade of Roosevelt Avenue.

Junction Boulevard:

1. Establish a strong, active Merchants Association.
2. Improve sanitary conditions and enforcement.
3. Improve traffic enforcement on Junction Boulevard (between Northern Boulevard and Roosevelt Avenue).
4. Address the issue of informal street vending as well as enforcement.

103rd Street:

1. The Corona Business Corporation, a local organization of immigrant entrepre-

-neurs, is proposing that parking for the customers of 37th Avenue to Roosevelt Avenue is developed.

2. Establish a strong, active Merchants Association to meet the specific needs of the rapidly growing immigrant entrepreneurs.
3. Improve street lighting and business facades.
4. Improve sanitary conditions and enforcement

Roosevelt Avenue: Roosevelt Avenue is a dynamic and rapidly growing commercial strip. Most, if not all, of the business people on Roosevelt Avenue are immigrants. Therefore, it is imperative that any economic development initiatives proposed for this strip should be formulated to meet the specific commercial, technical, and language needs of these multi-ethnic immigrant entrepreneurs. There is a need to establish a Business Improvement District and local Merchant's Association. Establish an "Economic Development Task Force" to survey the emerging economic needs of this multi-ethnic commercial corridor; from 69th Street to 114th Streets. Improve commercial facades, street lighting and police security.

37th Avenue: Thirty-Seventh Avenue has professional offices providing medical, real estate and legal services. It is a neighborhood strip with restaurants serving international cuisine that caters to the local community. The portion from Junction Boulevard to 114th Street badly needs revitalization, including the upgrading of roadbeds and curbs. There is a need to establish strong, active Merchants Associations from Jackson Heights to Corona.

Northern Boulevard: The commercial area between 69th and 90th Streets is mostly geared towards automotive needs with car dealerships, auto parts, repair facilities, fast food and sit-down restaurants. This "strip development" is characterized by establishments that cater to traffic-based consumption. Northern Boulevard between 94th to 114th streets contains many uses that are inappropriate. A new study and analysis of Northern Boulevard should include re-evaluation of all uses and development to provide needed services such as supermarkets, drug stores and banks. The commercial uses off the Boulevard into residential areas contain many illegal auto sales lots, illegal auto repair, tire shops and illegal nightclubs in the mid 80(s). Economic development initiatives should be targeted to the area between 94th to 114th streets. Historically this section of the commercial strip has received less economic and technical resources than other portions of Northern Boulevard. Moreover, this would balance the commercial viability of Northern Boulevard as it traverses through CB #3. Facade improvement and increased sanitation pick-up would serve to upgrade the image of this commercial strip. The Northern Boulevard Task Force should be expanded to increase its prospective impact on the economic development of this strip.

The Langston Hughes Library is providing stability for the Corona portion of Northern Boulevard. Both the library and the Elmcot facility could serve as anchors for prospective economic development initiatives in this area. The site of the original Langston Hughes Library, located between 102nd-103rd Streets on Northern Boulevard, is strategically located in the center of the Corona commercial district and should be evaluated for its future commercial potential. Any prospective commercial development, along this portion of the strip, should encourage a more diversified business mix that would meet the everyday needs of the residents in the immediate catchment area. There is a need to establish a strong, active Merchants Association on Northern Boulevard.

Astoria Boulevard

1. Improve business facades and lighting.
2. Increase police presence for security purposes.

3. Traffic enforcement is needed to discourage “U” turns. Left-turn signals should be installed.
4. The entire commercial strip needs revitalization. Every business must comply with the C. of O. and building codes. Enforcement must be the same for every residential and commercial establishment throughout the District.
5. There is a need for a strong, active Merchants Association.

DEPARTMENT OF BUILDINGS

Buildings/Zoning

A study and analysis of residential development in Jackson Heights, East Elmhurst, and North Corona must be conducted towards a view to maintain the low-density status of these neighborhoods. Traditionally, East Elmhurst, North Corona and certain sections of Jackson Heights have always been comprised of one and two-family homes, with the exception of the co-op areas. In recent years, however, developers have systematically converted these homes into multiple dwellings. A serious review of the zoning regulations is in order. There are two separate studies currently under review by City Planning, North Corona 2 and a study commissioned by Councilwoman Helen Sears for the lower part of Jackson Heights. To effectively address the community’s zoning concerns a district wide study that would also take in the neighborhoods located north of Northern Boulevard. City Planning, Department of Buildings, let’s work together to ensure that the residential character of these sections of the district are preserved.

Department of Buildings and New York State DEC - Soil Remediation for Former Gas Stations

In recent years, there has been a proliferation of gas stations converting into residential facilities. It has been our experience that when these conversions occur not all former gas stations file for the necessary permits with the DEC for inspection and soil remediation. Currently there is no mechanism in place at the Department of Buildings to alert New York State DEC that a former gasoline station has filed for permits to change its use to residential occupancy. All parties involved must look at developing a system that will help to easily identify these conversions so that the owner can be directed to the proper authorities; NYSDEC and NYCDEP.

EDUCATION

In Community Board #3, our children are our highest priority. They have high expectations and we have high expectations of them. Their lives will be filled with challenges; many of them brought on by a never-ending cascade of new technologies. Among their tasks will be to know which to use, and which to reject. We must provide them with a rounded education that teaches the basics as well as wisdom in these matters.

We have 11 operating public schools, 3 private and 7 parochial schools. There are currently 9 elementary schools, Public Schools 69, 92, 127, 143, 148, 149, 212, 222 and 228 which feed into intermediate school, I. S. 145 and I. S. 230 all are operating at full capacity. The College of Aeronautics as well as the Lexington School for the Deaf is located in the District.

Our public schools remain overcrowded during the traditional school hours; however, after 3 p.m. they are severely underutilized overall. Although some new classrooms have been added, our children attend huge schools with too many children in each class. Census

projections indicate more overcrowding is on the horizon. At the same time, our schools are barely used after the 8am–3pm period. We would like to see them offer working parents the opportunity to drop off their children at 7 a.m., with a healthy breakfast available. Schools should remain open until 10 p.m. and offer a variety of activities; parenting classes, ESL, GED, cross age tutoring, sports, and cultural programs. These activities should be offered by the Board of Education and/or community based organizations. Where possible, these programs should be planned and staffed locally. Programs should also be available during the summer months.

While two Pre-K facilities were recently constructed in our District, they are already overcrowded. Space must be found immediately for Pre-K, so that they no longer further burden our school infrastructure.

We Need A High School

We have no high school in our District and the ones zoned for our children are severely overcrowded. While there is a proposal to construct an additional intermediate and primary schools at Willets Points, there no plans on the horizon for a high school. Although, CB#3 is primarily fully developed there is one parcel of land that could be developed for a high school, the former Standard Box Company. We request that the Board of Education look at this location for a potential high school site.

Our overcrowded primary and intermediate schools feed into severely overcrowded high schools, none of which is in the District. We need a local high school, as well as elementary and intermediate schools. If these schools were available today, every seat would be filled.

An appropriate level of funding for school repair and maintenance of the District's schools must be provided. Regular maintenance not only maintains a proper school environment but also lessens the need for costly capital expenditures.

In today's complex society, where most children come from homes where parent(s) work full time, mechanisms must be put in place to allow them the opportunity to fully support their children's education. State-of-the-art communications technology should be made available for the benefit of parents, students and the school staff. Our children deserve only the very best. A first class education entails reducing the class room size from 32 to 20 students, introducing a foreign language in first grade, advanced math, science, geography, history, civics and a lap top for every child to take home.

ENVIRONMENTAL PROTECTION

Provide Funding for the Implementation of the Army Corp of Engineers Recommendations for FLUSHING BAY

The environmental studies and recommendations on the ecological decline of Flushing Bay must be acted upon expeditiously to improve the quality of water in Flushing Bay. Implement total breakwater removal; channel modifications; dredge the inner-bay; creek and restore the wetlands. Bring Flushing Bay back to Pre-World's Fair (1964) condition, which would be conducive for the return of wildlife and the wetlands.

Air Pollution

We are concerned about the impact fumes emitted from motor vehicles and airplanes

have on our community. Community Board #3 requests air pollution testing and enforcement of the air and noise codes.

Noise – Horn Honking

We call upon D.E.P. and the Police Department to monitor and mitigate the excessive horn-honking emanating from cars, trucks and buses that invade our environment.

Constituents residing in and near commercial districts are inundated with horn honking at all hours of the day and night. Include C.B. #3 in the “Silent Night” operation.

Sewer/ Catch Basin Cleaning/ Repairs/Replacement

District-wide residents have reported an increase of sewer back-ups during heavy rains. An assessment of the condition of sewer pipes and catch basins must be conducted. Defective equipment should be replaced as soon as possible. A regular repair and cleaning schedule must be set up and maintained in order to avoid costly emergency repairs.

Fund Study for a Separate Sewer System

Our population has increased significantly since the 2000 census. Neighborhoods that were once comprised of one and two family homes have been replaced with multiple units accommodating six to ten families. The aforementioned changes have placed a great demand on our sewer system and are reflected by the increase of flooding and sewer back-up complaints. Prior to 1996, constituents residing in East Elmhurst north of Northern Boulevard reported the majority of flooding and sewer back-up complaints. Sewer back-up conditions are no longer confined to East Elmhurst; we are receiving complaints from all over the District including areas where the problem did not exist before. A study and upgrade of our sewer system is urgently needed.

HEALTH DEPARTMENT

Increase Outreach and Services to the Uninsured, Underinsured, Immigrants and Undocumented

We ask that DOH expand its outreach and services to the uninsured, underinsured, immigrant and undocumented. These populations do not have access to traditional medical services and are reliant upon free medical screenings (dental, TB, pediatric clinics), inoculations and information provided by our local health center. Increase; do not decrease important life saving services to our most vulnerable at-risk populations.

Rodent Infestation

We request urgent attention from the Department of Health to address the out of control infestation of rodents within business districts and neighboring residences bordering commercial areas. Particular attention must be given to 68th, 69th, 70th 71st, 72nd, 73rd, and 74th from Roosevelt Avenue to the BQE. Needed services are not limited to the aforementioned areas but throughout the community. Regular inspection, baiting and working with businesses and property owners is a sure way of reducing the rodent population within the district.

HOUSING

Foreclosures and Intervention

The impact of the sluggish economy on our community is reflected in the increase of

mortgage foreclosures within the district. What's needed are anti-foreclosure programs, our residents need assistance in keeping their homes and to prevent destabilization of our neighborhoods both for single family and multiple units.

Illegal Conversions

Illegal conversions are a reflection of the need for affordable housing. City, State and Federal governments need to develop strategies and programs to alleviate this pressing problem.

Senior Housing

A population of seniors, who might retire to other locales, has opted to stay put in the neighborhood and desperately need neighborhood based affordable residences with amenities suitable to their needs. There is only one senior facility within the district and there is a tremendous waiting list. We are in desperate need of additional facilities.

Serious discussions and policy should be developed that allows a senior to downsize his/her apartment without losing SCRIE benefits (while living in the same building or close location) thus freeing up a larger rent-regulated legal apartment.

We need the assistance of a community-based office located within our district such as HPD and NSP to educate landlord/tenants of their rights and responsibilities and assistance available to them.

HUMAN RESOURCES ADMINISTRATION

Senior Services/ HRA and DFTA

The elderly population continues to increase and need additional care. Home care, escort services, transportation, mental health services and meal funding must be increased, not decreased. Please keep in place the option for the frozen and hot meal service. Our seniors deserve only the best. In this respect, all efforts must be made to ensure related agencies are better coordinated to provide supplemental and required services to seniors.

La Guardia Airport

While one of the positive effects of LaGuardia Airport is the employment factor, it has many negative aspects on the surrounding neighborhoods, such as noise, traffic congestion, air pollution and the pollution of Flushing Bay. Further expansion of the airport to the east should not be permitted as it poses safety, health and environmental hazards. A methodology must be developed whereby the Bay and the surrounding residential neighborhoods are protected.

Less noisy planes, no engine repair and run ups between midnight and 6:30 a.m., limited air cargo expansion, diversion of heavy truck traffic servicing the airport off our residential streets as well as passenger vehicles, must be vigorously pursued by both the Port Authority of New York and New Jersey and elected officials. There have been many studies on each of these concerns. A genuine effort must be made to ensure a healthy environment for our residents.

Port Authority Funds

We are quite disappointed to learn that of the \$ 39. 5 Million just allocated, very little will come to Community Board #3. Despite the fact that LaGuardia Airport literally sits in our backyard; only a tiny fraction of the funds have been earmarked for our District.

In doing a cursory review of the current allocations, much of the funds have gone to JFK, Jamaica Air Train, Willets Point, Streetscape and Traffic Improvements (Rockaway Blvd.), Lighting Improvements (CB#4), Greening Improvements (Rockaway, Springfield Blvds.) just to mention a few. Community Board #3 could definitely benefit from all of the aforementioned improvements and must be included in these projects.

To recap, we request that a health study be commissioned and a plan developed to remediate the ill affects of pollution resulting from the operation of LaGuardia Airport. Power-wash the homes located in Astoria Heights, Jackson Heights and East Elmhurst to eliminate the years of debris that emanate from airplanes. We request sound attenuation; abatement of air pollution / asthma studies, tree planting and the construction of a separate system to address flooding and sewer back- up conditions in East Elmhurst and through-out the district .

LIBRARIES

In order to serve the needs of our community, the expansion of services is urgently needed. Local libraries must be given the authority to determine their hours and days of operations. Library Administrators know, first hand, the needs of the community and the schedules that are best suited for their customers. We request the following:

Keep Libraries Open 7 Days A Week

CB#3 libraries are heavily utilized, the current 6 day a week schedule does not meet our needs. Provide funds to all libraries to restore seven day a week full-time service.

Expand East Elmhurst Library

While the acquisition process started nearly two years ago, the Community is anxious to see the project move to the next level, construction. The East Elmhurst Library is heavily utilized and requires expansion. The library runs programs during the evenings and weekends, as well as a Latch Key Program year round. The After School Program addresses the needs of children of working parents for supervised activities in a safe and nurturing environment. To better serve the needs of the community, the Library requires additional shelving for books, storage for equipment and seating to accommodate its ever-growing number of patrons.

Expand Capacity of the Jackson Heights Library

The Jackson Heights Branch is the most heavily utilized library facility in Northwest Queens. Fully fund the construction of a new facility at the current JHS Library site. A new facility might serve to reduce overcrowding.

Construct Library in Northwest Sector of CD #3

The residents in this portion of the District are sorely lacking library facilities. There is an area in the Jackson Heights Shopping Center located at 75th Street and 31st Avenue where a structure could possibly be built.

PARKS / RECREATION

The number of recreational facilities that are available to all residents of the District is very limited.

Increase Parks and Recreation Personnel in CD #3

The District is sorely in need of additional parks personnel – currently on board is two

maintenance workers and three playground associates. In order to effectively manage C.B. #3's playgrounds and parks, staffing levels must be increased.

Fund The Upgrade of the Base Ball Field Located at 78th Street and 25th Avenue
The baseball field is used by our little leagues but urgently require an upgrade; including the installation of a fence and water fountain. There is a severe shortage on recreational space in CB#3. All of our neighborhood parks are fully utilized and there are very few locations where our young people can play. Parks Department estimates that it will cost approximately \$750,000 to make basic improvements.

Increase Forestry Division Budget to \$500,000. Per annum to address dead trees, stumps, pruning and planting requests.

An annual commitment of \$500,000. for each Community Board is necessary to effectively address the backlog of complaints for tree pruning, removal of fallen limbs, dead trees, stumps and planting.

POLICE

Staffing Levels

Increase civilian and uniformed personnel at the 115th Precinct. Our population has increased by more than 32% but the allocation of police personnel has remained the same. In order to effectively meet the needs of the community, additional officers and civilian personnel are required.

Operation Impact

We request that Operation Impact be continued; the program is making a significant difference in the safety and quality of life of constituents residing on and around Roosevelt Avenue.

Operation Silent Night

Include Community Board #3 in Operation Silent Night. Noise is generated at all hours of the day and night by cars, trucks and buses honking horns. Motorists idling engines, loud music emanating from nightclubs and bars must be addressed. Noise is the number one complaint in our district.

CPOP

The Community Policing Officer Program must be reinstated and expanded. The presence of the beat officer has always proven to be an effective deterrent to criminal activity. Additional traffic enforcement staff is also needed in order to reduce the number of traffic violations.

School Crossing Guards

There is a tremendous need for crossing guards in C.B. #3. Many of our schools are located near major thoroughfares. Provisions must be made to ensure the safety of students attending both public and private schools.

Increase Funding To The Police Department and Consumer Affairs to Address Illegal Street Vending /Peddling

Over the years, illegal street vending has risen to the top most reported condition within the district. Any day of the week and particularly on weekends, our streets are crowded

will illegal street vendors. Residents report that it is nearly impossible to navigate their way through our local streets. While the Police Department and Consumer Affairs do the very best that, they can to address illegal street vending; additional resources and staffing must be made available to them. Funding for weekend and late night inspections is sorely needed.

SANITATION

Personnel

Since 1990 our population has increased by 40, 000, staffing levels for QW3 should, therefore, be re-evaluated. Additional personnel and resources must be made available to effectively address the needs of the community.

Increase personnel at QW3, including enforcement agents and Sanitation Police.

Increase Daily Litter Basket Collections

Increase daily litter basket collections in C.B. #3, in order to improve the level of cleanliness throughout the District. Litter baskets located in commercial areas and where there is heavy pedestrian traffic fill quickly and require frequent attention. While local merchants participate in the Adopt-A- Basket program they cannot keep up with the constant overflowing conditions caused by residents and merchants improperly using the baskets. The current collection schedule is not sufficient and therefore requires additional basket service throughout the business day. Special attention must be given to the 73 , 74th Street shopping district, 37th Avenue; Junction Boulevard; 82nd Street; Roosevelt Avenue; 90th Street, 103rd Street, Northern Boulevard and Section 33 in North Corona.

Education

A movement to educate / re-educate our residents on their responsibility is in order. Sanitation must launch a campaign to reach people in their language to spread the word about sanitation regulations.

Supermarkets

The Community is growing rapidly with new residential construction going up everyday, ancillary services such as supermarkets, bookstores and libraries are sorely missing. Over the years, our neighborhood supermarkets have been systemically replaced with pharmacies. Our seniors must travel a great distance to do the day to day shopping. It is impossible for them to take the car to go to the shopping center due to heavy traffic and limited parking. Public transportation is not option for many of our seniors. We need more neighborhood supermarkets, bakeries, bookstores and coffee shops particularly north of Northern Boulevard.

TRANSPORTATION

District Wide Traffic Study

Thirty-seventh Avenue, Broadway, Junction Boulevard, Roosevelt Avenue, our streets are too narrow to handle the volume of traffic that passes through. A comprehensive study to examine pedestrian, vehicular and parking patterns throughout the entire District is required. The assessment will assist us in developing a plan to effectively manage conditions on our streets.

Air Pollution

Currently approximately 23 million people drive passenger vehicles to the airport through our community each year. We are concerned about the impact of fumes emitted from

motor vehicles into our community. Many children residing in CB#3 suffer from asthma, the third most chronic disease in the nation. This community urgently needs air pollution testing and air monitors installed within our District.

Street Resurfacing/ Reconstruction

Due to several years of neglect, many of our streets present hazardous conditions. The following locations require urgent attention: 104th Street from 34th to Roosevelt Avenues, 103rd Street from 34th to Roosevelt Avenues, 39th Avenue, 37th Avenue from 104th Street to Junction Boulevard, 35th Avenue from 105th to Junction Boulevard.

Install Traffic Lights– 97th and 100th Streets and 23 Avenue

Twenty-Third Avenue has become a virtual raceway with cars and motor scooters speeding down residential streets. There are no traffic control devices currently in place at these locations to ensure the safety of both pedestrians and motorists; serious consideration must be given to installing traffic lights at these intersections.

MTA

Street Lights / Roosevelt Avenue / #7 Subway Line

The installation of additional lighting along Roosevelt Avenue will provide a safe environment for shoppers after dusk. The improved lighting will greatly diminish the crime pattern currently existing.

Express Bus Service -- 94th to 114th Streets from Roosevelt Avenue to Ditmars Boulevard

There is no express bus serving Northern Boulevard between 94th and 114th and Astoria Boulevard between 94th and 108th Streets. Express Bus service must be made available to constituents residing in this area. The MTA must be made aware that this section of the district has been greatly under-served.

#7 Line – Paint The EI

The MTA made a commitment several years ago that the “EI” would be painted from 69th Street to 114th Streets. To date, the MTA has not made good on their promise. The EI is unsightly and urgently needs a paint job.

Escalators

The escalators at the 74th Subway Station break down at least twice daily. We request that the MTA seriously look at replacing or upgrading the equipment, we need escalators that are engineered to handle high volumes of traffic and can operate 24 hours a day / 7 days a week without fail.

YOUTH SERVICES

The Youth Services Planning Committee has identified the needs and priorities of the youth in our District. Prime in this regard, is to provide expanded recreation and leisure time activities seven days a week, year-round. Public buildings must be made available for day and evening programs. Opening fees and space costs for youth programs should be eliminated. The need to open school buildings in Community Board #3 is particularly acute as the District is almost devoid of open spaces/recreational facilities. Funding for

summer and year round youth employment is another critical concern of our community. We urgently need creative, meaningful programs to ensure that our youth will become responsible and productive adults of tomorrow. Employment, training, and recreational programs, play an essential role in the lives of many of our youth. It is imperative that funding for these programs be restored.

We request our fair share of Youth Services dollars. In addition, we are concerned about the way Youth Services screens / evaluates RFP's. The agency recently adopted a policy in which only three members of the Community Board are permitted to evaluate RFP's. Screening members are not permitted to discuss or share information with other Youth Service Committee members or Board members. This practice is foreign from the way that our Board conducts its business. We request that Youth Services re-evaluate the screening process.

Community Boards

Proposed Budget Cuts

The proposed budget cuts will have a devastating affect on the operations of Community Boards. Community Boards are already understaffed, under funded and have always worked with less even during times of prosperity. The projected \$20,000 reduction will certainly result in losing at least one staff person. Because of the downturn in the economy, we are already seeing an increase in social service, landlord /tenant and senior service complaints and inquiries. . We need every staff member; our workload is in fact increasing and a reduction cannot be afforded.

Our meager budgets cannot sustain the proposed cuts. Community Boards run on a shoestring budget of \$199,000 per year, which includes personnel and other operational costs.

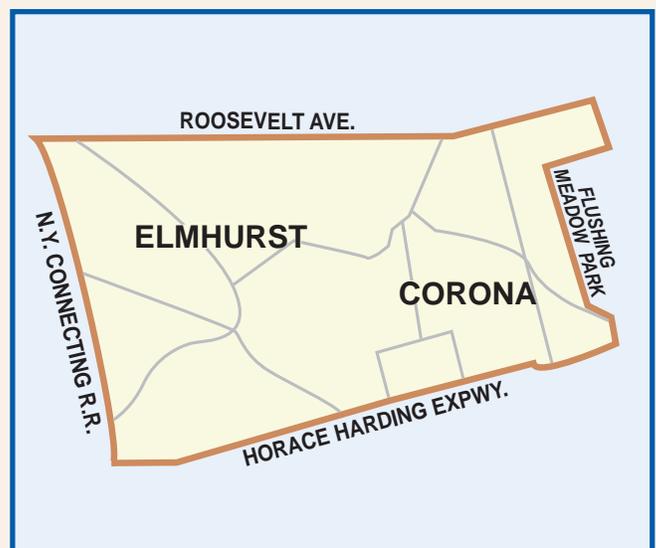

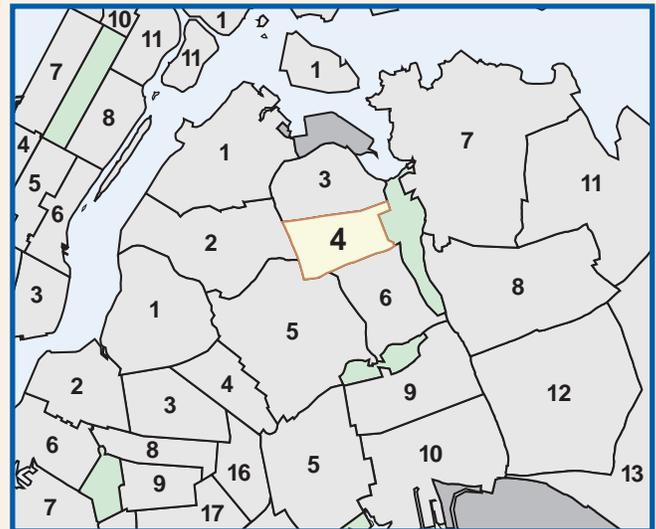

It is widely known that Community Boards were left financially behind in the mid 1990(s), when our budgets were reduced by \$28,000. The full amount of those reductions was never restored. Further, we have never received a cost of living adjustment to our base budget and the cost of postage, supplies, equipment and other operational requirements continues to rise. The impending reductions will severely incapacitate our operations and hamper our ability to provide essential services to our local communities.

We ask the Mayor, elected officials and OMB to work with Community Boards in finding alternative solutions to address the City's budgetary short falls.

Conclusion

In conclusion, the neighborhoods of North Corona, East Elmhurst and Jackson Heights, more than 200,000 residents, require a fully funded Community Board, the services of all the City agencies and elected officials, working together, to ensure the continued success of Community Board 3.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

STATEMENT OF COMMUNITY DISTRICT NEEDS **FISCAL YEAR 2011**

Community Board # 4Q (CB#4Q) is an ethnically diverse area that encompasses the communities of Corona (south of Roosevelt Avenue), Corona Heights, and Elmhurst. The total land area of Community Board # 4Q is 2.4 square miles, bounded by Roosevelt Avenue to the North, Flushing Meadow Corona Park to the East, Horace Harding Expressway to the South, and New York Connecting Railroad (CSX) to the West.

According to the 2000 Census the population of CB #4Q is 167,005 a 21.9% increase from the 1990 Census. With the steady growth in population over the past twenty years and the vast amount of new building permits issued, the actual population count may be approaching or surpassing the 200,000 mark. Service levels are based in part on Census information. In order to provide adequate service to the residents of CB # 4Q, service agency budgets must be increased to keep pace with our growing population.

Older housing stock, which consists mainly of one and two family homes are being demolished and replaced with new buildings that house three, four, and in some instances more residential units on the same site where one or two families once resided. The current levels of service and infrastructure can no longer absorb the additional housing units. In order to secure the future stability of CB #4Q, careful consideration must be given to the rezoning of our community. Our youth population is being short changed, schools are overcrowded, after school programs are limited, and libraries are used beyond capacity. Children are the future of this country we must provide them with all the resources necessary so that they can grow into responsible adults.

We will continue to advocate for a safe, affordable, and well balanced environment for our residents.

The following is a statement of needs and priorities focusing on improving the quality of life for all of the residents in the Community Board #4Q district.

AGING

According to the population counts of the 2000 Census, 19.5% (32,600) of the residents in the CB #4Q area are 45 to 64 years old and 8.3% (13,913) are 65 years and over. These numbers are sure to be greater taking into account the steady growth in population witnessed in the CB #4Q area.

Senior citizens are in need of special services, such as meals on wheels, homecare, and help with shopping and home cleaning. Our senior population is also in need of social activities and programs that are supplied by senior citizen centers. Community Board # 4Q is in need of at least two additional senior centers, one to be located in the Corona Heights area and one to be located in the Lefrak City area to address the needs of the current senior population and be prepared to address the needs of the future senior population. With the vast wealth of life experiences that seniors have to offer they could act as mentors to our youth in intergenerational programs. Let us not forget the caregivers. The caregiver requires some relief from their daily responsibilities. An increase in services is necessary for this segment of the population. The Department for the Aging must monitor all senior programs to insure that the services provided are in the best interest of our senior population.

BUILDINGS

We thank the DOB for their help in resolving some of our building issues. However, while regulations have changed and fines increased, the DOB must follow through on inspections and violations. In order to perform inspections and enforcement in a professional and timely manner, the hiring of additional qualified personnel is a necessity. New building permits should be issued only after it is determined that the existing infrastructure can accommodate an increase in new housing units.

CITY PLANNING

Community Board # 4Q is being overdeveloped at an alarming rate. While we are not against progress, we question why our older housing stock, which consists of primarily one and two family homes are being razed to make way for new buildings that are out of character with the existing buildings in the neighborhood. Where once a one or two family home stood now stands a multiple family dwelling with anywhere from three to fifteen and, in some cases, more units.

The infrastructure of CB #4Q was built mainly for low-density housing. The addition of housing units places an undo strain on our infrastructure. As a result, streets are overcrowded with traffic, leaving very limited parking. The Sanitation Department is overwhelmed with the increase in trash generated by the new units. Police and Fire department response times are up due to the increase in traffic clogging our roads. Schools and hospitals are stretched beyond capacity. Reports of flooding and sewer backups are increasing.

Community Board #4Q is requesting that The Department of City Planning evaluate the current zoning in CB #4Q. Identify residential areas in need of down zoning and areas where affordable housing can be built must be identified. New zoning regulations must include off-street parking provisions for each unit built.

The development along the commercial strip of Queens Boulevard needs close attention. Existing commercial one story buildings are being replaced with high density buildings. A planned balance between residential and commercial buildings along the boulevard is necessary so Queens Boulevard does not end up being a boulevard of haphazardly placed buildings.

We look forward to working with DCP to achieve the above goals.

EDUCATION

Although New York City as a whole will experience a downward trend in school enrollment in the next ten years, the school district encompassing CB # 4Q will see an upward trend in enrollment. Schools can not be built fast enough. We will continue to support the Department of Education and the School Construction Authority in their efforts to identify additional new sites for schools.

ENVIRONMENTAL PROTECTION

An aggressive campaign to upgrade the water delivery and sewer system needs to be undertaken to address the additional demands placed on the system due to the overbuilding of our community. From the time a request for service for a collapsed and/or broken catch basin is logged to the time the actual repair is performed needs to be shortened. Additional inspectors and repair crews are necessary to relieve the back log of service requests.

Queens Boulevard from the Long Island Expressway to the CSX Line has experienced an inordinate amount of development. High rise commercial and residential developments have replaced the typical low rise development along Queens Boulevard and many new high rise developments are in the planning stages. Business owners and residents have reported flooding that is progressively worsening each year. The sewer drainage system currently in place is not able to process the demand placed on it. A complete study, reconstruction, and upgrade of the existing sewer infrastructure should be implemented. Our residents, business owners, and hospital must be relieved of the stress and economic loss caused by the constant flooding.

Junction Boulevard from the Long Island Expressway to Roosevelt Avenue, 57th Avenue from Queens Boulevard to 99th Street, Horace Harding Expressway from 108th Street to Queens Boulevard. The above areas flood on a routine basis, which is progressively worsening each year, especially in the Lefrak City area (Junction Boulevard, W/B Horace Harding Expressway, 99th Street, and 57th Avenue). A complete study, reconstruction, and upgrade of the existing sewer infrastructure should be implemented.

111th Street from Corona Avenue to Roosevelt Avenue: Numerous reports of flooding from residents along 111th Street with flooding conditions worsening every year. A complete study, reconstruction, and upgrade of the existing sewer infrastructure should be implemented.

FIRE DEPARTMENT

A budget increase for the Fire Department is necessary to meet the additional demands placed on our fire companies. The Fire Safety Education Outreach program provides valuable information on fire safety to our residents. This program must be maintained and funding for the purchase of additional Smoke Detectors and Carbon Monoxide Detectors for distribution to the public should be provided. FDNY should be part of a task force with DOB, NYPD, and DOH that investigates illegal occupancies and unsafe building conditions.

HEALTH & MENTAL HYGIENE

The department is doing the best it can with the limited resources allocated to it. Complaints concerning food vendors and rodent infestations are escalating. While we thank the agency for your help, additional personnel are needed to maintain consistent levels of inspections. We support the continuation and enhancement of programs that address the health needs of our growing population.

QUEENS LIBRARY

CB #4Q is one of the most ethnically diverse communities in the country. Library budgets must reflect the growing demand of our diverse population. We will continue to support the expansion of operating hours necessary to accommodate the needs of the public.

We will continue to support the rebuilding and expansion of the Elmhurst Branch. CB #4Q requests

construction of a new reference library in the vicinity of 108th Street and Corona Avenue, which will help service the South East portion of CB #4Q which is currently lacking Library services.

PARKS AND RECREATION

Trees are a vital component of our environment. Maintain the recently approved seven year pruning cycle and restore pruner and climber positions to the DPR. Additional Funds are needed in order to reduce the pruning cycle to five years. A five year pruning cycle will produce stronger, healthier, and better looking trees. CB #4Q receives many complaints of dead and/or diseased trees, branches breaking, and branches that are low to the ground forcing pedestrians to walk around the trees. Tree pruning needs to increase, with an emphasis on emergency service. We support an increase in DPR's budget to allow for a five-year pruning cycle.

We look forward to the final design, construction, and completion of the new Elmhurst Park on the former site of the Keyspan Gas Tanks. A number of the parks in the CB #4Q area are, also, in need of re-design and renovation including, but not limited to, Veterans Grove (ID #Q013), Newtown Playground (ID #Q041), and Louis Simone Park (102nd Street, Lewis Avenue to Radcliff Avenue).

We will continue to support the completion of the renovations to the five remaining Center Islands located on 111th street between 45th Avenue and Corona Avenue, in front of Flushing Meadows Corona Park.

The US OPEN at the USTA National Tennis Center and NY MET'S baseball games at Citifield, need to be coordinated. There should not be any home games scheduled for the NY MET'S when the US OPEN is at the USTA National Tennis Center. The surrounding communities can not absorb the traffic impact of the two events at the same time.

Obtain Property and Build Multi-Purpose Recreational Center. CB #4Q feels this type of facility is needed to serve the ever expanding population. This facility would be able to serve all segments of our ever growing population.

POLICE DEPARTMENT

Currently the 110th Precinct is housed in an antiquated building with no facilities for parking of police vehicles. A new Precinct house along with adequate parking is a necessity. We will continue to support the relocation and building of a new precinct house for the 110th Precinct, which should be located as close as possible to the geographic center of Community Board #4Q. After the opening of the new Precinct, the existing Precinct house could be utilized for NYPD special operations.

With the limited resources allotted to the 110th Precinct, the agency is doing a great job protecting the public. The population of CB #4Q is growing daily, additional funding is necessary in order to increase staffing levels in the 110th Precinct to keep pace with our ever-growing population.

The 110th Precinct is not coterminous with CB # 4Q; the precinct covers Willets Point (CB # 7Q) and Flushing Meadows Corona Park. Flushing Meadows Corona Park is home to the NY METS at Citifield, the USTA National Tennis Center, Queens Theater In The Park, The Hall of Science, The Queens Zoo, The Queens Museum, and the Aquatic Center to name a few. The Park is also host to many large cultural events and it is used by the residents of Queens on a daily basis, with weekends seeing the largest concentration of park visitors. In order to protect New York City's investment in this park permanent Police presence must be established to serve Flushing Meadows-Corona Park and Willets Point exclusively.

SANITATION

DSNY is doing a great job cleaning our streets, removing trash, and snow, however DSNY must have budget increases that reflect the increase in housing units in the CB #4Q area.

Establish and or enhance the education component for recycling. Many residents in CB #4Q do not understand the components of recycling, residents should be educated in recycling regulations before being summoned. Night and weekend Sanitation Police patrols are needed at to curtail illegal dumping and drop offs. An increase in education and enforcement of DOS regulations on commercial streets should be addressed.

TAXI AND LIMOUSINE COMMISSION

While For-Hire Vehicles are necessary to fill the small gap not covered by public transportation, CB #4Q is well served by train and bus lines. Community Board #4Q is saturated with For-Hire Vehicles; they are everywhere competing for street hails. Street hails as they exist must be stopped; they are a danger to the passenger and the public. Many of these driver's constantly violate Vehicle & Traffic Laws, cutting off other motorists, making illegal u-turns, going through Red Lights & Stop Signs, and harassing other motorists, to name a few. We have witnessed drivers sleeping overnight in their vehicles, and throwing trash out of their vehicles onto our streets. These actions must cease, enforcement must be consistent and enhanced.

Yellow Cab service is almost non-existent in Queens. If FHV's cannot or will not abide by TLC and NYS Department of Motor Vehicles regulations, perhaps incentives could be given to Yellow cabs to stay and work in Queens.

TRANSPORTATION

Due to the rapid increase in population CB #4Q is experiencing comes an increase in traffic. Staff increases are necessary to keep pace with the repair requests generated by our heavily used roadways.

Increase and maintain funding for the curb and sidewalk replacement program.
Increase Staff for Roadway Maintenance (reconstruction and pothole crews).

Reconstruction of Streets:

41st Avenue from 72nd Street to Broadway including 78th Street,
79th Street, & 80th Street from 41st Avenue to Roosevelt Avenue are in
need of reconstruction.

Reconstruct streets bounded by 57 Avenue, Long Island Railroad, Grand Ave.
and Queens Blvd. Milling and repaving on Broadway from Queens Blvd.
to Baxter Avenue.

METROPOLITAN TRANSPORTATION AUTHORITY (MTA)

Community Board #4Q will continue to support the refurbishment of the #7 Line Structure. The elevated structure of the #7 line needs a complete overhaul. Many areas of the structure are rusted and the paint is peeling. The 103rd Street and the 111th Street stations need restoration of the entrance stairways, painting, better lighting, and security.

YOUTH AND COMMUNITY DEVELOPMENT

The 2000 Census states that within CB #4Q resides 38,770 (23.2 % of our population) children under the age of 18 years. This reflects a 21.9 % increase in our youth population since the 1990 census. The need for additional youth services, such as, After School Programs, ESL courses, Day Care Centers, Intergenerational Programs, Graffiti Prevention, and Gang Activity Prevention has never been greater. An increase in the budget for youth services is necessary to meet these additional demands. Community Board input into the funding process for these programs must be re-established.

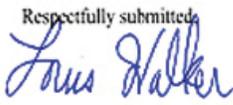

NEW YORK STATE LIQUOR AUTHORITY

While the State Liquor Authority is a New York State agency, an increase in enforcement of SLA Regulations in New York City is a necessity. While additional investigators have been hired in FY 2010, additional investigators must be hired to address the growing demand for SLA licenses in NYC. Currently any establishment that is applying for or renewing an on-premise liquor license must notify Community Boards via Registered Mail Return Receipt. The SLA should also be required to provide written explanations to Community Boards of their decisions that are not consistent with those of the Community Board.

INFORMATION, TECHNOLOGY, & COMMUNICATIONS

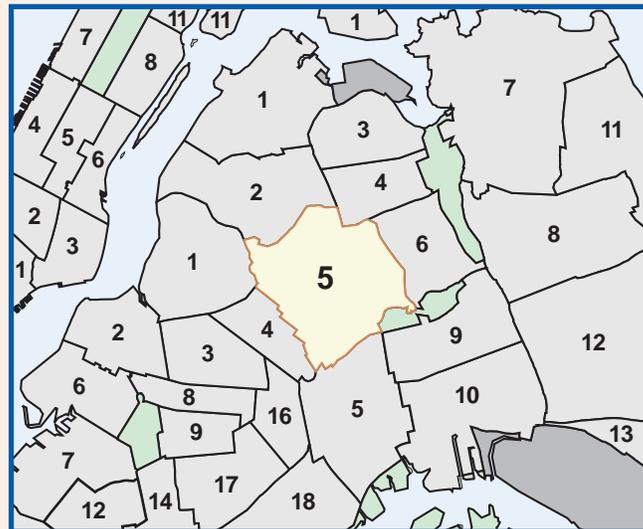

In order to help Community Boards better manage their districts the 311 Call Center should be required to notify individual Community Boards of all service requests and complaints it receives, by type of request and location. Community Boards should be able to access, by location, individual requests and complaints so we can identify trends and areas that our attention.

*As always the Chairperson, District Manager, Members, and Staff
of Community Board #4Q wish to thank all our agency representatives
for their help in resolving many of the issues encountered during the year.*

Respectfully submitted

Chairperson

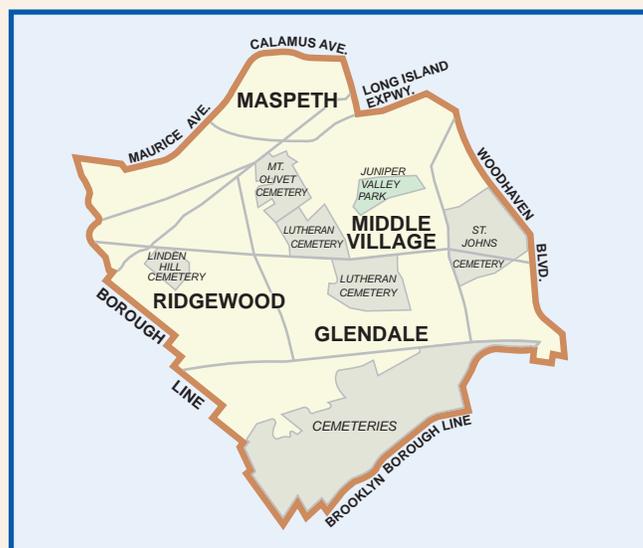

District Manager
cb4qdm@nyc.rr.com

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

Community Board No. 5

Borough of Queens

Ridgewood, Maspeth, Middle Village, and Glendale

61-23 Myrtle Avenue · Glendale, N.Y. 11385

(718) 366-1834

Vincent Arcuri, Jr.
Chairperson

E-mail: qnsqb5@nyc.rr.com

Gary Giordano
District Manager

DISTRICT NEEDS STATEMENT for Fiscal Year 2011

The population in the Community District 5, Queens communities of Ridgewood, Maspeth, Middle Village and Glendale has risen, according to year 2000 Census statistics to 167,000 residents. In the 1990 Census, we were estimated to have 150,000 residents. Many believe that there are considerably more than 167,000 residents in District 5, Queens, considering under-counting and far too many illegal apartments.

Our most pressing problems include illegal apartments, primarily in basements; large increases in vehicular traffic and too many drivers speeding, running traffic signals and stop signs; a significant reduction in the number of police officers assigned to the 104th Police Precinct since 1995; an alarming number of sewer system breaks that are causing dangerous roadway conditions; a shortage of Parks maintenance workers to keep playgrounds and ballfields in good repair; and very crowded schools.

There is an obvious correlation between the increases in illegal apartments and the overcrowded schools conditions.

Fortunately, we and other areas of New York City have generally safer streets, and people are safer in their homes in recent years. The plague of crack in the last half of the 1980s, combined with huge decreases in the number of manufacturing jobs available to City residents were prime reasons why the CB5Q area / 104th Precinct had more than 1,200 robberies in 1990.

The significant, welcome reduction in crime during the past decade is the result of an improved City and National economy, and great work by the Police Department and the Mayor in targeting drug dealers, guns and career criminals.

Some City services, which had deteriorated greatly from 1990 through 1996, have improved somewhat over the past several years. During the early 1990's, deep potholes and street cave-ins had not been repaired adequately and led to dangerous roadway conditions. More resources are now needed to diminish the huge backlog of sewer pipe repairs and catch basin repairs, many of which have been unattended for months or years. Street trees that have been dead for years and dangerous dead tree limbs are finally being removed. Traffic safety studies and installation of traffic safety devices that had been languishing for several

years have finally been performed and installed in an attempt to improve safety for pedestrians and drivers.

We have finally seen the construction of one new elementary school, PS 239Q, as well as overdue renovations and classroom space added at P.S. 68, P.S. 88, P.S. 128, I.S. 77, I.S. 93 and P.S. 91. ***We look forward to construction of a new high school, at long last, on Metropolitan Avenue by Woodhaven Boulevard, since local public high schools are very overcrowded.***

Local parks are an important resource and concern throughout District 5, Queens. While improvements in City budget conditions has resulted in numerous long-awaited Parks projects being completed, far too little is being done to properly maintain some parks property. Dirt ballfields, rebuilt several years ago, have deteriorated quickly due to inadequate design, lack of watering and poor drainage. The maintenance of Parks in District 5, Queens has become the responsibility of about 10 Parks Department Staff, including supervisors, and an overwhelming dependence on POP Workers.

Finally, City agencies are starting to crack down on the excessive number of illegal apartments that have had negative impacts on many communities. Over-occupancy of residential buildings has resulted in fire hazards, severe school overcrowding, dirtier neighborhoods and the elimination of parking on the streets. Much of Queens has been overwhelmed with new residents while vacant land and abandoned properties remained undeveloped in other areas of the city.

The need for many services historically provided by City agencies is growing for numerous reasons. It is due mainly to the age of specific communities, roadways, sewer lines, bridges and parks. These important assets must be maintained or they will fall into serious disrepair, necessitating greater capital expenditures, sooner. In far too many instances, the need for maintenance and enforcement is due to the growing lack of respect, civility and lawlessness in an ever increasing number of residents.

Illegal dumping had become a terrible problem in our communities - one of the primary reasons that businesses, especially manufacturers and distributors, have left the City for so called greener pastures. Thankfully, the Queens District 5 Sanitation force has done a great deal to get dumping locations cleaned as expeditiously as possible, given fairly limited resources. Sanitation Police 'stake-outs' of dumping sites must be a priority. Littering has also become a growing menace, as has the preponderance of residents who feel free to dump their household trash in and around the City litter baskets. The reason that Community Boards are consistently requesting that catch basins be cleaned and sewer lines flushed, in so many locations, is the degree of littering done in the catch basin and on the street.

Vandalism in parks, combined with broken glass, dog excrement and park litter have caused too many parents to avoid taking their children to many parks. These conditions put more pressure on reduced parks maintenance staff, while giving reasonably educated residents another reason to flee "The City".

Graffiti has become a scourge to many communities. Few working class families are going to buy a home in a graffiti covered community. How are graffiti vandals punished? At best, they are sentenced to community service. What is the punishment if they do not perform the community service? The answer is often no punishment, even when they have caused thousands and thousands of dollars in property damage.

These are just some of the indications of how too many people are uncaring, and without respect for themselves and others. Other indications of these growing problems are: vehicles speeding on residential streets; illegal uses of fire hydrants; blasting car radios; and rowdy street corner/park conditions. Each of these abuses must be conquered as effectively as possible, since these are among the main reasons that good, honest, hard working residents move out of the City. ***One primary way to reduce the speeding, dumping, littering and noise problems is by radio and television commercials appealing to residents' common decency.***

In an era when many City services had been cutback due to a declining tax base, volunteers have become the backbone of our community. Thank heavens for volunteers who serve diligently on Community Boards, not-for-profit organizations' boards of directors, civic organizations and block associations. Thanks to volunteers in the communities served by Community Board 5, Queens, graffiti has been removed from many buildings, children and teenagers are engaged in many recreational activities, and local parks are cleaner than they would be otherwise. Since there are deficit projections for future years, every effort must be made by the Mayor, the City Council members and other elected officials to build a working government and to eliminate government waste.

Many of the area needs that we have pushed to meet for years seem much less consequential, after the September 11, 2001 disaster at the World Trade Center. Many families need psychological and financial assistance. Our world, in a devastating half-hour, is forever changed. The Police Department, who have done so much to reduce crime, will now be working increasingly with the FBI to greatly reduce the possibility of future terrorist disasters. After the Trade Center disaster, our wars in Iraq and Afghanistan have caused additional heartache throughout the country. Considering the severe economic recession that has hit our country, every effort must be made to ensure that government expenditures are prudent, that waste be reduced and that Medicaid and Medicare fraud be eliminated.

CAPITAL BUDGET PRIORITIES

TRANSPORTATION

The Reconstruction of Streets in South Middle Village including the Cooper Avenue North Service Road into 71st Avenue and 73rd Place, south of Metropolitan Avenue, is the "Number 7" capital budget priority of CB5Q. This work is long overdue, considering the amount of truck traffic on these roadways (HWQ708). This area-wide project had been scaled down since CB5 Queens successfully pushed for the lower-cost resurfacing of many of these South Middle Village Streets, but now the entire reconstruction project in this important community is now not expected to begin until at least 2012.

The Construction of a Pedestrian Crosswalk across Cooper Avenue in the area of 74th Street is another priority that we want to see accomplished expeditiously. Design and construction must be accomplished promptly so that school children have a safe traffic crossing.

The Reconstruction of the Cooper Avenue Underpass in the same area, which links Middle Village and Glendale, is also needed to correct very deteriorated conditions. This is the "Number 2" Capital Budget priority of CB5Q.

Other Transportation Capital Budget Priorities include:

- ***Reconstruction of the Metropolitan Avenue Bridge, at Fresh Pond Road, over the LIRR*** - It is very unfortunate that this project, which was supposed to begin years ago, has now been delayed until 2012.
- ***Rehabilitate Fresh Pond Road from Metropolitan Avenue to Myrtle Avenue in Ridgewood - Including Traffic Facilitation Upgrades***
Fresh Pond Road is a major north/south artery in the District 5 area. This request includes rehabilitation of the roadway, including a concrete base to support heavy truck and bus traffic daily, and the planning and implementation of traffic facilitation, such as, cutting into the curb areas where possible to enable trucks and buses to navigate this heavily congested artery without double-parking and blocking traffic. In the short term, Bureau of Highways crews have resurfaced Fresh Pond Road.
- ***Reconstruction of 75th Street from Lutheran Avenue to Juniper Boulevard North in Middle Village***. This roadway is characterized by a roadway crown that is much higher than pedestrian sidewalks which results in extensive flooding. The Bureau of Highways supervisors have done a good job of short-term resurfacing of 75th Street.

- ***75th Place, from Eliot Avenue to Juniper Blvd North, in Middle Village also likely needs street reconstruction.***

Street Resurfacing is an important priority in Community District 5, Queens. Many roadways have not been resurfaced in many years. The damage caused by large trucks and other heavy vehicles is the primary reason for deteriorated roadway conditions, which too often pose safety hazards to motorists and pedestrians. The In-House Street Resurfacing Program of the Bureau of Highways has improved significantly in recent years, with the use of milling machines. The In-House Program should not be cut back and should be bolstered by contract resurfacing. Resurfacing is also an important means to improve the look of a community, and is evidence of taxpayers getting something visible for their work efforts.

The Maintenance and Capital Rehabilitation of Bridges throughout the City needs to be a priority for the foreseeable future. The Williamsburg Bridge, Manhattan Bridge and Queensborough Bridge are obvious concerns as these main bridges carry both vehicular and mass transit traffic. **Locally, the Grand Street Bridge is now being delayed until 2016, and the Metropolitan Avenue Bridge at Fresh Pond Road is not scheduled for reconstruction until 2012.**

PARKS

The Reconstruction of Grover Cleveland Park – Phase II in Ridgewood is needed so that the deteriorated asphalt softball field can be upgraded (with safe artificial grass-type turf to accommodate soccer, baseball, volleyball and softball play), along with the rehabilitation with the handball courts. This important Ridgewood park is located along Stanhope Street, between Grandview Avenue and Fairview Avenue. This project is thankfully expected to begin by Spring 2010.

The Reconstruction of the Soft Surface Ball Fields and Jogging Path at Frank Principe Park (formerly known as Maurice Park) in Maspeth is the “Number 10” priority of Community District 5. The existing dirt baseball fields, which were reconstructed in the mid-90’s have deteriorated significantly. The jogging path around the ball fields is very narrow and there isn’t any security lighting in this part of the park. These fields need to be reconstructed, and the best option for multiple sports use (such as, baseball, football and soccer) is likely the installation of a safe artificial turf-type surface.

Reconstruction of Dry Harbor Playground – Phase II located on the South side of Myrtle Avenue, at 80th Street in Glendale. This request is for the rehabilitation of the softball field, the park house/bathrooms, and installation of secure fencing around the children’s play equipment.

Develop Former KeySpan Gas Tanks Site for a Community Park – The former Brooklyn Union/KeySpan Gas Tanks site, located on Grand Avenue, between 74th Street and 80th Street, was recently acquired by the City of New York for parkland development. We are very pleased that the Mayor has allocated capital funding for this important project. We look forward to the completion of this potentially beautiful new “green park” by Summer of 2010.

Increase Funds for Planting New Street Trees and for Forestry Services Increased appropriations to plant an additional 900 trees in District 5, Queens are needed to reduce air pollution and beautify local streets in our area. This will help to curb the rise in incidence of asthma and other respiratory diseases among our population. With the LIE, the Jackie Robinson Parkway, industrial areas and five commercial strips located in Community District 5, Queens, street tree plantings are more important than ever in improving the quality of life for local residents. We thank the Mayor for his vision to plant 1 million new street trees.

Rehabilitation of the Ridgewood Reservoir and Highland Park – Our vision is for the Ridgewood Reservoir to become a nature preserve, and an environmental education center. A Phase I Project is funded, and will thankfully begin in 2010. We look forward to a Phase II Project, as \$50 Million was originally allocated for Ridgewood Reservoir revitalization. **Yet, it is critical that existing ballfields be reconstructed in adjacent Highland Park so that children and teenagers can engage in healthy sports activities there.**

Reconstruction of Evergreen Park - The reconstruction of the remaining playground area and softball fields at Evergreen Park is needed to serve the community where Ridgewood and Glendale meet.

Community District 5, Queens has over 220 acres of parkland within the communities we serve. Therefore, parks capital projects have consistently been critical (often "Top 10") priorities of our members. It may seem that many park projects in District 5 Queens are being funded. This is true, but we have requested many park rehabilitation projects for between 5 and 12 years.

Other Parks Needs include:

Park Lighting - Adequate park lighting, especially vandal proof lighting, should be a priority at all parks. Vandalism and rowdy behavior usually increase in dark areas.

Lower Cost Comfort Stations/Bathrooms – Typically, construction of new bathrooms in parks costs more than \$500,000.

POLICE PRECINCT AND PRECINCT PARKING

Some capital improvements have been performed at the 104th Police Precinct, including: a new roof, boiler replacement, plumbing system upgrades, renovation of locker rooms, bathrooms and a new assembly room.

Additional improvements needed are: new windows, additional electrical upgrades to support central air conditioning, new flooring, new computers, and overdue upgrades to the telephone/communications system.

There is a need for a ***Parking Facility for the 104th Police Precinct***. The Precinct is located in the middle of a residential community, which has many multiple dwellings, and where there is not enough room for residents' vehicles. The congestion is compounded by Police Officers competing with residents, Fresh Pond Road shoppers and commuters for on-street parking spaces. The situation is made worse with inadequate space for Police radio cars and scooters, and evidence and accident vehicles. For years, CB 5 Queens has made this budget request to the Police Department without result, even though we have cited the property along the Long Island Railroad on Shaler Avenue, which is just east of Cypress Hills Street.

SENIOR CENTERS / COMMUNITY CENTERS

The Glenridge Senior Center, on Summerfield Street at Forest Avenue, has requested funding for an elevator so that the Center will be handicap accessible. In addition, they have requested funding to renovate the upper floor of the Center building to provide living quarters for 16 senior citizens.

WATER AND SEWER SYSTEMS

Water quality in New York City is known to be among the best in the world. Every effort must be made to continue this excellent record. Completion of the Third Water Tunnel Project, and the construction of necessary shafts and tunnels associated with this critical project, must be a priority.

Redesign and Reconstruct Sewer System in Portions of the CB5Q Area Having the Worst Conditions. Based on complaints from our residents, Community Board 5, Queens has asked the Dept. of Environmental Protection to study the following areas, in an effort to reduce street flooding, sewer backup and basement flooding problems:

- Sewers in Penelope Avenue and intersecting streets, especially from 70th Street to 75th Street;
- Sewer lines along Fresh Pond Road in Ridgewood and Maspeth, from Flushing Avenue to Myrtle Avenue;

- The Sewer System in and adjacent to Cooper Avenue, from 73 Place to 80 Street;
- The Sewer System in the eastern Glendale area bordered by Cooper Avenue, 77th Avenue, 88th Street and 80th Street;
- The Sewer System in the areas of Flushing Avenue and Grand Avenue, in Maspeth, from approximately 61st Street to 65th Place. .

The area of Middle Village around and near Juniper Valley Park has had problems of residential basement, community drive and street flooding conditions which have become much more prominent in recent years. The NYC Dept. of Environmental Protection, in conjunction with the Dept. of Design and Construction, planned a sewer project (SEQ-002372/EP-7) to alleviate flooding problems. This important project was completed in mid-1999. The project included a new sewer chamber in the area of Lutheran Avenue between Juniper Boulevard North and Juniper Boulevard South, and two other new sewer chambers which alleviated some area wide flooding conditions.

Flooding conditions in the West Maspeth Industrial Area have hurt the efforts of the West Maspeth LDC to retain and attract business. This important distribution and manufacturing center is bounded by Rust Street, Grand Avenue, and the Newtown Creek. A study of the sewer lines in the West Maspeth Industrial Area should be seriously considered by NYC/DEP, as this area is vital to the tax base of New York City. A major sticking point is that much of the sewer system in this area is privately owned. We ask that staff of NYC/DEP work with businesses and the West Maspeth LDC to define problems and work toward solutions.

Replacement of deteriorated catch basins and installation of new basins throughout District 5 Queens is needed on an ongoing basis. As CB5Q's "Number 3" Capital Budget priority, areas of primary concern are the sections of Middle Village north of Metropolitan Avenue, from 69th Street to 80th Street, with the northern boundary at Eliot Avenue. The residential community, north of Eliot Avenue from 81st Street to 86th Street, also has a considerable downhill slope, causing rain water to rush into residential driveways. This area needs to be studied by NYC/DEP for installation of additional catch basins and other sewer improvements.

Considering the age of many sewer lines, and deteriorated catch basin structures, new catch basins and sewer line replacements will be needed on a continuing basis. Examples of areas that have had reduced flooding as a result of catch basin installations include: Eliot Avenue, from 76th Street to 77th Street; and 74th Street in the area of 58th Avenue. Community Board 5 pushed for these improvements based on known, visible roadway flooding and ponding conditions.

There is an ongoing need to clean up Newtown Creek and possibly work to develop public access to the waterfront along the Creek.

SCHOOL CONSTRUCTION AND REHABILITATION

Overcrowding in our local schools has become a great concern throughout Community School District 24, of which the communities of CB5 Queens are a major part. Historically, Community School District 24 has been among the most overcrowded in the City. While this is not true in all neighborhoods, it has certainly been a problem in the Ridgewood community. **P.S. 81-Q needs a school addition to replace the deteriorated temporary classrooms in the schoolyard.**

The Department of Education plans to construct new schools, mini-schools and school additions are much needed, considering current and projected classroom overcrowding. The education of children, pre-teens and teenagers is suffering as attempts are made to teach in gyms and auditoriums. It is especially sad when teachers are even forced to educate children in school stairways. Plans for new schools should consider adjacent residential and business communities. This is our "Number 8" Capital Budget priority.

In general, the Mayor, elected officials and the NYC Department of Education must strategically prioritize the provision of adequate learning space and the ongoing, regular repair and maintenance of educational facilities.

PUBLIC TRANSIT

Ongoing Rehabilitation of our public transit system is critical to the health and vitality of the City of New York. If not for our extensive subway and elevated train line service, air pollution would be much worse and street traffic even more hazardous and gridlocked. Track beds, rails, signal systems, elevated line supports, platforms and stations must be upgraded, rehabilitated and maintained on an ongoing basis.

The BMT-M elevated train line, the BMT-L and IND lines are the trains that primarily serve residents of the CB5 area. Specific capital improvement needs include:

- **Ongoing rehabilitation of the BMT-M train stations.** Significant deterioration of the stairways at both Seneca Avenue and Forest Avenue stations needs to be addressed. In addition, rehabilitation of the mezzanine levels of stations at Seneca Avenue, Forest Avenue and Fresh Pond Road, needs to be performed.
- **Reconstruct DeKalb Avenue, Halsey Street and Jefferson Street Train Stations (BMT-L Line).** Only the Halsey Street Train Station is in Queens, but many of our Ridgewood residents either use these stations, or would use them, if they were not so deteriorated and if they were more inviting. An elevator is needed at the busy DeKalb Avenue station.

- **Improve Myrtle/Wyckoff Transit Hub (to include overdue painting of the M Train Structure to prevent deterioration).** There had been a great need for extensive *Reconstruction of the BMT-L and BMT-M Train Transit Hub at Myrtle and Wyckoff Avenues*, which had not been improved in decades. This long-awaited project finally began in 2005, and was completed in 2008. Unfortunately, nothing has been done to paint the elevated M Train structure, which is needed to prevent further deterioration and to enhance the station aesthetics. We also look forward to increased street lighting, a canopy for waiting bus riders and other improvements along Palmetto Street between Myrtle Avenue and St. Nicholas Avenue. This Intermodal Project is almost complete. *This section of Palmetto Street is an integral part of the Myrtle/Wyckoff Transit Hub*, where many City buses pick up and drop off commuters, as their first and last stop on the bus route.

Other important needs regarding public transportation include:

- Replace air-polluting diesel engine buses with new cleaner fuel and/or hybrid buses.
- Ongoing upgrades to train tracks, signal systems and switching systems.

LIBRARIES

Capital improvements at area libraries are needed, as local libraries have the ability, when open, to serve almost all community residents. Our Capital Budget Priorities include:

Rehabilitate Glendale Branch Library

There is a need for an elevator or access ramp to ensure handicapped accessibility at the Glendale Branch Library. A new boiler, air conditioning system, new windows, doors, security lighting and other upgrades are needed, as well. This request is the “Number 4” Capital Budget Priority of CB5Q.

Rehabilitate Ridgewood Branch Library – Phase II

New flooring, a new air conditioning system and pointing the exterior brick façade are needed under the Phase II portion of this capital project. Phase I, which was recently completed, brought an elevator, a new roof, and ground floor renovations to establish a children’s library and auditorium. This Branch Library serves 50,000 residents in the area, a large portion of whom are new immigrants.

FIRE DEPARTMENT

The condition of buildings that serve Fire Department Engine Companies and Ladder Companies is critical. An example of problems that can arise from lack of capital improvement to fire houses has been seen most recently when the

fire companies located at the house on Grand Avenue, just west of Queens Boulevard in Elmhurst, had to be relocated. It is imperative that capital improvements to the structures and apparatus floors of all fire houses be performed expeditiously, based on problems reported by engine and ladder companies and inspections done by qualified engineers.

Regular ongoing replacement of Engine Company and Ladder Company fire fighting vehicles must be a City priority.

To our knowledge, funding was available to provide Fire Department apparatus with exhaust connections that are state of the art, to provide minimal danger to firefighters' health in the fire houses. It is critical that these new exhaust connections be installed, and maintained, in all fire houses.

SERVICE NEEDS

AGING

The neighborhoods of Community District 5, Queens have a very large senior citizen population and many of these seniors are living into their late seventies and eighties. ***As a result, there is more of a need than ever for "Meals on Wheels", transportation and other services for the frail elderly.*** Congregate meals programs continue to be important, so that seniors get to socialize, exercise and receive good hot meals. Caregiver Programs that give comfort and free time to family members who care for frail seniors are also very important, especially considering how these family members have saved government so much cost of nursing homes and other types of formal care. Alzheimer's Programs are a critical need, as seniors are living well into their eighties. Housing for Seniors is another important need. ***Well-supervised nursing homes, where background checks are done to prevent abuse of senior citizen residents, is essential.***

BUILDINGS DEPARTMENT

A minimum of 30 inspectors and 25 plan examiners are likely needed for Queens, in the hope that questionable construction and illegal uses can be better controlled. There is a need for two Buildings Department inspectors for District 5, Queens alone, considering the number of unanswered complaints, and where in all too many instances, violations previously issued are not corrected. ***The importance of the Night and Weekend Inspection Unit is critical,*** since without this unit, construction without a permit and unsafe work will proliferate, as will the plague of illegal apartments.

A tragic fire in Maspeth in early 1997, in which four immigrants died, is a clear

indication of how illegal uses must be eliminated. Greater penalties and education are part of the answer, as is good coordination between the Buildings Dept., HPD, the Fire Department, other City agencies and the IRS.

We are very concerned about questionable construction that is taking place throughout our District and in other areas of Queens. ***Self-certification of building plans may be efficient, but has likely increased instances where construction does not comply with zoning regulations.***

BUSINESS SERVICES

Probably the major reason that New York City has had such grave problems balancing a budget revolves around the fact that manufacturing and non-service employment has declined astronomically during the past several decades. With this decline in manufacturing and non-service employment related jobs, the number of residents receiving public assistance had risen to alarming heights. The current administration should focus on job development and bring manufacturing back to our City. All too often, we hear about how the City has virtually given-up on the manufacturing sector to boost employment and the tax-base. This effort will no doubt require a great deal of cooperation with Federal and State government, but must be done.

In District 5, Queens, we have had one of the largest concentrations of knitting mills in the United States. The knitting industry has historically been associated with the Ridgewood community. Locally, this very important industry has declined, but with the proper support the garment manufacturing business in Ridgewood and other communities can flourish once again. The West Maspeth Industrial Area is also very important to the community and our City. Retention of industry in this section of our community has always been a priority of Community Board 5. We have shown our commitment by consistently pushing for improved roadway and sewer conditions in this section of the community.

There are four major commercial streets in the Community Board 5, Queens area. Myrtle Avenue in Ridgewood and Glendale stretches from the Brooklyn border all the way to Cooper Avenue. Myrtle has seen a resurgence in recent years, thanks in large part to the efforts of the Ridgewood Local Development Corporation and the establishment of the Myrtle Avenue Business Improvement District, from Wyckoff Avenue to Fresh Pond Road, in Ridgewood. Grand Avenue in Maspeth, Fresh Pond Road in Ridgewood and Metropolitan Avenue in Middle Village are important commercial strips as well. Stores along these commercial streets serve the local communities and workers, who come from other neighborhoods to their jobs in our communities. Off-street parking and increased police security are two of the most important needs of the Myrtle Avenue, Grand Avenue, Fresh Pond Road and Metropolitan Avenue commercial areas.

Atlas Terminals in Glendale and Rentar Plaza (Metro Mall), on Metropolitan Avenue in Middle Village, are important centers of employment and distribution. There is now a lovely shopping mall, named ATLAS PARK, developed along Cooper Avenue east of 80 Street.

ENVIRONMENTAL PROTECTION

Every effort must be made to continue the high quality of the drinking water available to NY City residents. Travelling to other localities, City residents can take pride in the fact that they can still "turn on the tap" and pour an excellent glass of drinking water.

Completion of the third water tunnel and the system that will bring water from this tunnel to residents and businesses is very important. Water Tunnel Shaft 19B at 53-01 Grand Avenue is complete and now tunneling from this shaft has begun. It is very important that tunneling be accomplished with minimal impact to the surrounding community, and protecting workers performing this dangerous work.

While the water system in our City is quite good, the sewer system is another matter entirely. Cave-in conditions on local streets and main arteries are very often caused by sewer line breaks or problems with manhole structures. Sunken and broken corner catch basins can go unrepaired for months at a time. The Community Board consistently reports clogged catch basins and sewer lines that need to be flushed-out.

The City must make the repair of broken sewer lines and catch basins a significant priority, and catch basin cleaning needs to be performed expeditiously. Personnel to perform this work must be hired. Efforts to get the public and businesses to stop littering and dumping into catch basins are important.

Air pollution and noise pollution are important concerns as well. Part of the solution is enforcement. ***Street tree plantings are a great means to reduce air pollution.*** An excellent public transit system is another important means of reducing air pollution (train service). ***Poorly maintained buses (especially NYC/TA buses) cause a great amount of air pollution.*** Every effort must be made to solve this bus pollution problem.

FIRE DEPARTMENT

Professional fire protection is absolutely essential in urban areas. Yet the 59th Fire Battalion was closed in 1990, and several engine companies were closed over the past several years. One saving grace is that Mayor Giuliani saw to the

reopening of Engine Company 294 in Richmond Hill. ***The risk of reduced services in the Fire Department can be disastrous.*** Those living in Ridgewood and adjacent communities remember well when the nearby Bushwick, Brooklyn community was devastated by fire in the 1970's.

Fire Prevention is an important concern. ***With the growing number of illegal occupancies in residential buildings, it is more important that the Fire Department play a greater role in curbing this problem.*** Often times a Building Department or Housing inspector can not gain access to a building that has one or more illegal apartments, but access will less likely be refused to firefighters.

There are also serious concerns about reductions in the number of firefighters that go out on each run to a fire scene, both planned and reductions that have already occurred (roster manning). This can endanger the public as well as the firefighters.

Emergency Medical Services (Ambulances) have consistently been a top priority of the members of Community Board 5, Queens. The time that it takes for an ambulance to get a person to the emergency room of a hospital can be the difference in life and death. Well trained EMS workers and properly maintained ambulances are of the utmost importance. We are most fortunate to have the Ridgewood, Middle Village and Glendale Volunteer Ambulance Corps working in close cooperation with EMS.

HEALTH DEPARTMENT AND HHC

Ridgewood Communicare Center, located on Onderdonk Avenue in Ridgewood, is a NYC Health and Hospitals Corporation facility that now serves residents of all ages. This Center is needed for poor and low-income residents of Ridgewood and neighboring communities. Once known as the Maspeth Child Health Station, thousands of children, ages newborn to six, received health services here for decades. The fact that residents of all ages can now receive health care at this neighborhood site is very important, especially for school-age children who might not see a doctor otherwise. ***Additional hours of operation should be added, especially on evenings and Saturdays, to meet increased demand and parent working hours.***

Elmhurst Hospital, an HHC facility located outside of the CB5Q area, has a very good reputation for a City Hospital. This standing is even more impressive when one considers the diverse ethnic make-up of the people served at this hospital. Quality care and renovations at Elmhurst Hospital are very important to all of Queens. While Wyckoff Heights Medical Center and St. John's Hospital have been the primary health sites for CB5Q area residents, we are in their catchment area and are dependent upon this hospital's emergency room in critical times.

The closures in 2009 of both St. John's Queens Hospital and Mary Immaculate Hospital could severely hurt health care in Queens. Every effort should be made to re-establish these hospitals as medical facilities, if doing so as hospitals is cost-prohibitive.

Bureau of Pest Control inspection and extermination services are an important priority. With as many or more rats in the City as people, it is very short-sighted and potentially dangerous to fund this arm of the Health Department at such low levels.

HOMELESS SERVICES

The homeless population in New York City and the lack of affordable housing for many New Yorkers is a serious concern. Yet, any plans to build large facilities to house the homeless in residential communities is unwise. There are still a large number of vacant buildings and lots, where residents without homes can have a place to live. This requires renovation and new construction. Why not hire professionals to teach people who are without a stable place to live to renovate and/or build housing for themselves? This would provide more housing at lower cost while teaching people a skill at the same time.

HOUSING PRESERVATION AND DEVELOPMENT

Code enforcement inspectors are needed to get uncaring landlords to correct unsafe conditions in multiple dwellings, and to ensure compliance with existing Building and Housing Codes. The growing number of residential properties that have illegal apartments is a fire hazard and puts more strain on communities, including the City agencies that provide services.

Community Consultant Programs, such as that administered locally by the Greater Ridgewood Restoration Corporation, are very important. This community-based organization has rescued abandoned buildings and succeeded in facilitating the conversion of deteriorated buildings into low and middle income cooperatives. GRRC has worked diligently to bring numerous loan programs into Ridgewood, particularly the "Neighborhood Strategy Area". Ridgewood is also one of the largest "Federal Historic Districts" in the United States.

Continued funding is needed for HPD programs which offer opportunities to improve building-wide systems, rehabilitate facades/structural elements and reduce the risk of fire. These programs are preventive and wisely cost effective. ***For far too long, HPD didn't have a mechanism to get City-owned residential properties auctioned off as owner-occupied housing.*** Meanwhile, these same buildings remained off the tax roles, fell into disrepair, and promoted neighborhood deterioration.

Effective HPD "emergency repair programs", sealing and demolition services are also vital to the stability of communities.

HUMAN RESOURCES ADMINISTRATION

Most taxpayers realize the need to provide for the less fortunate in our society, but the number of New York City residents receiving some form of public assistance rose alarmingly for decades. Efforts to stop public assistance and Medicaid fraud must be a top priority. The incentives for people to stay on public assistance for years must be reduced. The great majority of public assistance recipients would rather be working, if possible, than receiving something for nothing. While manufacturing employment declined so drastically in NYC over the past several decades, we saw a great increase in the number of residents receiving public assistance. Providing clients with access to better job opportunities and child care will not only serve to reduce welfare rolls and the incidence of crimes, but will help to develop their self-esteem and significantly increase their earnings potential.

AIDS prevention is very important, especially in New York City. This is a touchy subject, especially in the schools. Yet, if we don't prevent this terrible disease, more people and families will suffer, and the drain on City resources will climb to even more alarming heights.

Domestic Violence is another critical concern. The lives of women and children are being destroyed due to the scourge of violence in the family. There is little doubt that children and teenagers who live in a violent family atmosphere may become violent adults. Every effort must be made to get the Police to take these matters seriously and to provide counseling and intervention for those who are the victims and the perpetrators of domestic violence. Radio, television and newspaper advertising campaigns should not be limited to the middle of the night or stuck in some small corner of the newspaper. Doing more to reduce alcohol and drug abuse, and to increase employment, is a prime way to greatly reduce domestic violence.

LIBRARIES

Having libraries open more days and more hours is very important, as is the need for more books and other learning materials in libraries, especially for children and teenagers. Branch libraries are often the only place that any resident can go to expand their thoughts. Close communication between libraries and local schools is vital.

PARKS AND RECREATION

Neighborhood parks are the cornerstone of many communities. Park conditions can either uplift or bring down a community. There should be no tolerance for those who turn parks into drug dealing locations, or for those who misuse parks in any other way. In far too many instances parents avoid taking their children to the park for fear of safety or because the abusers have vandalized or littered the park with broken bottles, dog excrement and/or debris.

Despite drastic reductions in park maintenance personnel, the Queens Division of the NYC Parks Department has done an admirable job of maintaining the great majority of parks in the neighborhoods comprising District 5, Queens. Volunteer efforts have also helped, but we are overly dependent upon POP Workers for basic cleaning or maintenance.

There are 229 acres of parkland in the CB5Q area, yet we have less than 10 full-time parks maintenance staff workers to care for all this parkland. Additional cuts to maintenance staff would be ridiculous. Equipment to enable parks workers to more effectively maintain parks is a priority. Dirt ballfields need to be watered, seeded and much more consistently maintained! Graffiti in parks is an eyesore. We applaud the efforts of Q5 parks supervisors who have removed graffiti from our parks over and over again.

Repair and Replacement of Parks Equipment (i.e. swings) is a critical need. Fortunately, the Q5 Parks Department supervisors have done a good job of keeping hazardous conditions at a bare minimum.

Forestry Services, such as, tree pruning, dead tree removal and stump removals, are sorely needed. Forestry Division personnel had been severely reduced in recent years. We had a situation in Queens where each forestry worker was literally responsible for the care of at least 10,000 trees. In the past few years, we are finally seeing dangerous conditions corrected, but efforts to remove dead trees and dangerous limbs remain critical, and are always a priority.

POLICE

Crime may be down on paper, but robbery and violent crime remain the first concern of most New Yorkers. The last two decades have been very violent times. Dangerous undertakings by teenagers and even children are alarming. Violence within the family occurs at a time when meaner streets require more loving domestic situations. Burglary and auto theft are a way of life for too many. Young people in city schools can look to a graduation from a high school with a metal detector. We must work to foster weapons of good health,

education, respect, and positive ambition instead of being forced to conquer the use of 22s, 45s, and other weapons. To win the termed "war against crime", one must look at the causes, the whys of why people rob and even beat or kill at such an alarming rate in America, where crime is more of a problem than almost anywhere else in this so called civilized world.

Our communities of Ridgewood, Maspeth, Glendale, and Middle Village had witnessed much more lawless behavior until recent years. Efforts to win the crime war have included, acquiring the **Robbery Identification Unit** at the 104th Precinct, advocacy for more police officers and communities working with those police officers, removal of a great deal of graffiti from buildings, and providing after school and weekend education, sports and recreation programs. Once known as the "country club", the 104th Precinct, by 1991, awoke to the facts of 1,000 robberies and more than 4,000 auto thefts per annum. And we live in some of the better city neighborhoods.

The residents of the Community Board 5, Queens Area need the following resources and the police cooperation to effectively fight crime in the areas served by the 104th Precinct:

- 180 Police Officers; 24 Sergeants; 7 Lieutenants; 2 Captains
- Robbery ID Unit, considering Bushwick border and commercial areas
- A well run Precinct Detective Unit
- Sufficient, well conditioned cars, scooters, bicycles, and 4-wheel drive vehicles for police to effectively patrol.
- Better attentiveness to juvenile crime
- Stiff prison sentences for the most violent criminals and more structured detention for auto thieves, pickpockets and substance abusers
- Long-term prison sentences for those convicted of dealing in quantities of crack and other hard drugs
- Attention to poor physical condition of the 104th Police Precinct and the morale of the officers, who do not work in the most enviable conditions

Illegal truck traffic continues to create havoc throughout our city. This problem needs more attention from the NYPD, DOT and other responsible agencies.

Graffiti, speeding vehicles, and dumping are symptoms of a much more compelling set of problems. These and other less positive acts on the parts of citizens and visitors are often performed by young people, who were barely children just a few years ago. Schools must be made a safe haven. The same is true for parks, streets, and yes, the same must be true for homes. The spirit of the City's people can only be restored if the youth of the city are nurtured, well educated, healthy of mind and body, and positively industrious.

SANITATION

For the most part, refuse and recycling collection is consistent and respectful in QW5. Snow removal was quite efficient during the storms of recent years. Mechanical sanitation broom sweeping of Ridgewood, parts of Maspeth, and half of Glendale, along with the help of caring residents, keeps the area reasonably clean except where illegal dumping and litter occurs. ***Collection of sanitation litter baskets, on our busy Commercial strips, needs to be performed 7 days a week.***

Recycling at schools is where many problems are caused in the community. Bagged food cans and other recyclables can't be stored in schools, so custodial staff put the bags on the sidewalks adjacent to the schools, causing an eyesore and encouraging illegal dumping. ***The Sanitation Department needs to schedule pick-ups for recyclables at many schools daily. Five-Day-A-Week School Garbage Collection is a top priority for District 5.***

The QW5 area is still plagued with illegal dumping, primarily in out of the way areas (adjacent to the LIRR/CSX, and where industry must flourish). The Sanitation Department has successfully worked to diminish this once overwhelming scourge, but too often QW5 staff must return time after time to clean-out dump sites. Too many of the people living in New York are abusing our city and this must not be tolerated. ***Sanitation Police must give more priority to 'staking-out' dumping sites, seizing vehicles, incarcerating dumpers, and publicizing the names of those convicted in major media.***

TRANSIT AUTHORITY

In recent years, our communities have had graffiti-free, air-conditioned train cars making some travel more tolerable. The train system, thought by many to be crime ridden, is often safer than life above ground. A ride on the "M" train from Metropolitan Avenue to the Wall Street area and back to Brooklyn can be a varied experience: from a small town type outdoor station thru good old Ridgewood, into some of Brooklyn's once-toughest turf, and over the Williamsburg Bridge into Manhattan.

There have been recent "on-line" improvements like track and signal upgrades and a project to rehabilitate the "M train station" platforms, with new canopies and vandal proof "fluorescent" lighting. Ongoing improvements to tracks and signal systems must be a City priority.

The Transit Authority must efficiently and safely carry millions of passengers into and around "the city" every day. Safety of passengers is of paramount importance.

TRANSPORTATION

The following are or should be priorities of the NYC/DOT:

- Allocate adequate resources for Traffic Safety Studies, installation of All Way Stops, One-Ways, Warning Signage and Traffic Signals. These critical needs had been scrubbed by the City until 1997.
- Doubling from one to two daily, the number of crews Queens Highways sends out to repair serious roadway defects and pot holes.
- Having Arterial Highways free of dangerous conditions and cleaned.
- Giving more attention to the Jackie Robinson Parkway with its S-curves, the LIE, the BQE, and other non-JFK roadways.
- Make Roadway Resurfacing an on-going priority so as to greatly reduce the roads "rated 5 or worse".
- Improve Bridge Maintenance so that costly replacement does not become imminent.
- Provide adequate numbers of Traffic Control agents assigned to bridge entry points and other congested areas (especially major construction detour routes).
- Be more concerned with safety, rather than with "just revenue."
- Reducing truck traffic problems throughout our City.

YOUTH PROGRAMS (SERVICES)

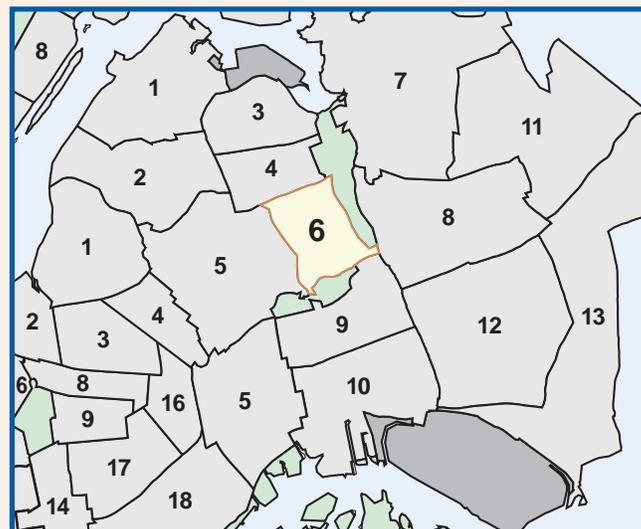

Those of us who have provided for the educational and recreational needs of children and teenagers, after school and on weekends, know that a dangerous number of young people, unhappy at home and without parental supervision and nurture, need positive outlets so that they have a chance to succeed.

Programs offered by caring, not-for-profit, community-based organizations include after school tutoring/homework assistance, after school / evening recreation, truancy prevention / work experience and summer camp. The great majority of these programs are critically needed, well run and cost effective. Far too many children and teens are reading below grade level. More and more of these young people, who are our future leaders, get little attention at home. Single parents and families having two working parents have difficulty supervising their children. Too often, the consequences are criminal.

Considering the troubling times presented to children and teens, ***it is irresponsible for the City and State to reduce funding for local youth programs.***

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

Whitepot Settled 1653

FY 2011 NEEDS STATEMENT

The 1969 Plan for New York Cities Community Boards describes Community Board 6 as “fine private homes on tree lined streets, attractive garden apartments, and towering modern apartment houses, including condos and co-op’s, as well as older rent-controlled apartment houses that make this district a most desirable place to live”. Years after this plan was released this description remains much the same. However, the quality of life issues of the district have changed. The swift increase in population has taxed the capacity of some public facilities. The schools are overcrowded, the subway is jammed during rush hours, and land use matters are becoming a major concern in Community Board 6. In spite of some problems the district provides a superior living environment which promises to continue to attract moderate income and well-to-do families, as well as prosperous commercial enterprises. However, both population and commercial growth have strained many components of the district’s physical and social infrastructure.

Helen M. Marshall
Queens Borough President

Joseph C. Hennessy
Chairman

Frank P. Gulluscio
District Manager

Gail M. Gordon
1st Vice Chairwoman

Steven Goldberg
2nd Vice Chairman

Elizabeth Anderson
Vice Chairwoman - Secretary

Todd Reisman
Vice Chairman - Finance

Norman Tepper, P.E.
Vice Chairman - Land Use

Lynn C. Schulman
Vice Chairwoman - Scoping

Community Board 6 would like to:

1. Continue to protect our established low density residential areas from over building.
2. Discourage intensive and or inappropriate commercial development.
3. Maintain and improve municipal services and infrastructure with regard to sewers and flooding issues in the district.
4. Encourage the integration of new citizens into the society and institutional fabric of our community.
5. Promote stable, long term residential tenure.
6. Preserve and enhance community amenities.
7. Finalize the Woodhaven Blvd. Study and its impact on the surrounding areas.
8. See continued enhancement of health care in the district, especially with respect to emergency room and hospital bed availability.

Our District Needs Statement is centered around quality of life issues and it is in the form of committee recommendations.

Joseph C. Hennessy
Chair, CB 6

Frank P. Gulluscio
District Manager, CB 6

FY2011

PLANNING & ZONING

Community Board 6 recognizes the following needs:

1. Hire inspectors to respond to complaints.
2. Before permits are issued, review zoning code to see if planned development is allowed by zoning regulations
3. Stronger enforcement of violations.
4. Follow up with Dept. of Finance to see if payments of violations cleared bank.

The Dept. of City Planning needs to do a comprehensive study before any large scale development. The study should include the following:

1. Determine if the electrical grid system is sufficient.
2. Study the water and sewer systems to make sure the needs of the development can be met.
3. Determine if capacity exists in local schools for additional students.
Determine if the subways can handle the additional capacity during peak hours.
5. Determine if the road system can handle additional traffic.

PUBLIC SAFETY

POLICE

More than 95 percent of CB 6, traditionally a safe, low crime area, is served by the 112th Precinct which has one of the smallest patrol forces in the City. The principal public safety need in this Community District is, not surprisingly, for real increases in the size of our patrol force, for these reasons:

- 1 - A significant rise in population, the influx of new immigrants (many from totalitarian countries), and a substantial increase in ethnic/racial diversity have made policing in CB 6 more complex and time-consuming;
- 2 - Other demographic changes, particularly a great increase in teen/youth population, add burdens to the precinct's workload;
- 3 - The district's relative affluence continues to attract burglars, pickpockets, bank robbers and shoplifters.
- 4 - The 112 Pct. must also provide police services for many tens of thousands of non-residents who enter our District daily - either to transfer (and often shop) at our three intermodal transit hubs along Queens Blvd. (at Union Turnpike, 71 Avenue, and 63 Road) - or to visit the upscale retail/entertainment area along Forest Hills' Austin Street - or to access the Rego Park regional shopping center anchored by Sears;
- 5 - Traffic safety remains an urgent focus of community concern, in view of the long history of pedestrian fatalities on Queens Blvd. An increasing number of motorists ignore the prohibition against use of hand-held cell phones while driving. Enforcement of this law, while difficult, is essential;

6 - Quality of Life complaints (some not within NYPD's purview) continue to be numerous in CB 6. Although precinct response appears to have improved since our last report, we fear that new and more urgent priorities for our limited patrol force will adversely impact on QOL response; and, finally -

7 - The urgent new counter-terrorism mission for NYPD, which requires extensive training time, assignment of officers to additional posts/duties within the precinct, and their detail for special situations elsewhere in the City, logically will affect performance in a small precinct more seriously than a larger one.

8 - Increase police enforcement on hate crimes in CB 6.

9 - Support for CB 6's Community Emergency Response Team.(CERT)

In addition, a continued focus on the 112th Precinct Explorer's Program.

ADEQUATE STAFFING OF THE 112 PCT. IS OF OVERARCHING IMPORTANCE TO US.

Relations between most residents of CB 6 and the 112 Precinct have been, and continue to be, extremely good and this community has traditionally been very supportive of its precinct officers. Therefore, we request additional police staffing because of an increase in violent crimes, and we further ask that there not be a reduction in staffing because of Met games and other events at Citi Field.

Fire Department

As is well known, CB 6 is densely developed with high-rise and mid-rise multi-family structures, including several of the tallest residential buildings in Queens. CB6 has one engine and one ladder company in a single firehouse within its boundaries, and another on its border. FDNY deployments to structural fires within the district have customarily been satisfactorily prompt.

Increased routine or complaint follow-up inspections by FDNY are viewed as essential fire protection actions by this community. All demolition and construction projects, particularly those undertaken by small contractors, in our densely developed district evoke neighborhood concerns and merit FDNY oversight.

Housing market demand has led to numerous illegal conversions of one- and two-family homes to multi-family or SRO's. We believe that participation by FDNY and its Fire Prevention Bureau, to the fullest extent possible under existing law, in the campaign to halt and reverse/remediate illegal conversions, would serve this community well.

PUBLIC TRANSPORTATION COMMITTEE

For many years the MTA has been reducing service on both subway and bus lines. This has resulted in buses and trains that are overcrowded and also in increased waiting time for buses and trains.

Recently, with the introduction of the Metro Card, ridership has increased, but service levels have not. The result has been even more overcrowding on buses and subways. During the morning rush hour overcrowded E and F trains arrive at 71st Avenue, and passengers cannot enter these trains. CB 6 needs to have some E and F trains originate at 71st Avenue during the morning rush hour.

Service levels must be increased to reduce crowding, and reduce waiting time.

Increases in service levels are needed not only during rush hours but also during non-rush hours as well, as waiting times exceed the times claimed in MTA statements.

Adequate lighting is needed in all subway stations in Community Board 6: on platforms and on mezzanine levels, along with video surveillance and increased maintenance and sanitation in all stations.

A working public address system is also needed. Many stations in Manhattan have PA systems; these are needed in CB 6 to announce changes in schedules, service disruptions, etc.

At major subway stops, such as 71st Avenue, 63rd Drive, and Woodhaven Blvd., unlicensed “taxi” are operating, taking away fares from buses and medallion taxis. Enforcement is needed at these locations. We need an increase in the amount of police on our subway platforms and mezzanine levels.

There still remains a major need for an elevator on 71st Avenue/Continental Avenue for better access for the elderly and disabled.

SOCIAL SERVICES COMMITTEE

While CB 6 is considered a very stable and affluent area, there are numerous needs in the community not visible to the naked eye. We have one of the highest, if not the highest, concentration of senior population in New York City and probably in New York State. There also has been a large influx of immigrants of all ages. The confluence of these two with the usual problems of the general population create needs.

Seniors: The following needs for seniors have been identified:

1. Affordable health care, including dental and eye care
2. Affordable housing
3. Public safety and security
4. Accessible transportation - both physically and affordable
5. Daycare services for homebound and elderly.
6. Affordable mental health services-also to be available to homebound
7. Affordable legal services
8. Recreation including library services for homebound

There are particularly 2 areas which require special attention in regard to senior services, social adult day care and the immigrant elderly population. The community consists of a significant number of older adults, the largest in Queens. Most are increasingly living lives largely independent of family members who live far away. They turn to their neighborhood based senior service for various assistance. Many are homebound, isolated and frail.

The social adult day program aims to keep at risk elderly in the community and avoid premature institutionalization. These people are unable to leave the house unescorted because of various serious disabilities. The program provides them with an opportunity to socialize with peers and creates a network of support to rely upon. The educational, recreational programs aim to stimulate their minds and bodies and enhance their self esteem.

For the families of the dementia population, social adult day care provides a respite for the family members, and more are needed. These programs have long waiting lists and are very under funded. There is increased demand for services for persons with early dementia as there are waiting lists for the programs for persons who suffer from middle and late stage dementia.

A population at risk is the large diverse (Asian, Russian, Pakistani, etc.) immigrant elderly popula-

tion, many of whom have not yet been able to acquire the language skills needed to obtain citizenship and have, consequently, lost their benefits that are needed for everyday subsistence, including the ability to pay for shelter and food. As such, there is a tremendous increase in the need for classes teaching English as a second language, conversation groups, tutorials, civics instruction and case assistance. The task is phenomenal as for many learning a new language presents a very difficult undertaking in their senior years. Furthermore, the cultural and language barriers have created increased tensions in the community that are being addressed by the Queens Community House through dialogue groups. These programs are funded minimally through government dollars. Many rely on volunteers. The demand for services is huge and the waitlist, long and discouraging.

ADDITIONAL SOCIAL SERVICES:

Health Concerns, Aids, Diabetes & TB: CB 6 supports funding for enhanced education, service and treatment efforts as identified by the Department of Health and the Health and Hospital Corporation. We also support funding for the Aids Center of Queens County, a community service program serving the residents of Queens. Many of the non-senior population of CB 6 have long term illnesses that can also be life threatening such as cancer, multiple sclerosis, etc. These individuals need many of the same services required by the senior population. They include but are not limited to:

1. Improved and timely transportation pertaining to the Access-A-Ride system.
2. Delivery of meals
3. Counseling services - including for the homebound
4. Appropriate housing
5. Hospice services
6. Increased home care through Medicaid or Medicare
7. Recreation activities - including library services for homebound
8. Translation services
9. Appropriate medications. (Many cannot afford their medications now)
10. Respite care for caregivers
11. Bereavement services for family

CB 6 encourages funding for research leading to an end all life threatening diseases, particularly AIDS, Cancer, and Diabetes.

Affordable Day Care for Children - There has been a substantial increase in the number of two parent families in which both parents are working and the number of single parent families. As a result, there is a serious need for affordable daycare for children. This might be combined with senior day care. Intergenerational day care will benefit both young and old.

Services to persons with disabilities. There are a number of people in CB 6 who have some type of disability but could contribute in a more positive way with the appropriate services.

We have identified the following needs:

1. Transportation
2. Accommodation in commercial areas, streets and sidewalks

Domestic Violence - CB 6 supports any program to educate with the aim of eliminating domestic violence. We also support any services which provide assistance to victims of domestic violence.

CULTURAL AFFAIRS

Many cultural organizations which serve the entire city are located in Community Board 6. There is an urgent need for these and other recognized cultural organizations. Permanent facilities for shows and performances, and tutorial and work shop spaces are very much needed also. Community Board 6 requests adequate funding for the Department of Cultural Affairs Expense Budget to help ensure the survival of local arts programs as well as of the many programs and institutions serving the borough as a whole, such as the Queens Museum of Art, the Noguchi Garden Museum, Flushing Town Hall, the Museum of Modern Art, PS 1, and many others. The residents of CB 6, as do all of Queens residents, deserve to continue to receive the level of cultural enrichment which these programs and institutions provide.

Local arts programs in CB 6 are also funded through DCA. The presence of such programs enriches the lives of all CB 6 residents. In addition, the Cultural Committee would like to support the local Chamber of Commerce (Jazz Thursdays) and local organizations that want to enhance our community and promote tourist dollars.

ECONOMIC DEVELOPMENT

There is a need for programs to assist the commercial strips in Forest Hills Rego Park to improve business and cope with the growing problem of vacancies.

Long term businesses are being forced out as a result of the poor economy and substantial rent increases. There should be tax incentives offered to help the small businesses in our community and in the outer boroughs.

LAW COMMITTEE

The Law Committee supports the Social Services Committee's request for affordable legal services for senior citizens.

TRANSPORTATION COMMITTEE

In terms of infrastructure adequacy, pedestrian and vehicular safety and resource allocation, transportation concerns impact Community District 6 in a variety of significant ways that require priority attention. The following items delineate the principal concerns in this area.

Queens Boulevard - This major artery provides vital transportation access for the entire borough while, at the same time, generating significant and chronic safety problems for both pedestrians and vehicles. During the past decade, CB 6 has worked closely and cooperatively with the NYC Department of Transportation (DOT) in crafting imaginative and effective strategies for promoting safety along those portions of Queens Boulevard that are situated within our district. While we have obviously not seen eye-to-eye with DOT on all items, we recognize that, as indicated by documented studies, these actions have had a measurably positive impact upon safety conditions. Looking ahead, the challenge remains to continue to enhance and refine these efforts to further serve the needs of CB 6 and anticipate the impact of new traffic demands. Chief among the latter is the additional traffic that will be generated by the immanent expansion of the Rego Park Mall, near 63rd Drive. We urge DOT to adopt the traffic mitigation recommendations that CB 6 recently proposed as part of our recent review of this item, in all events, DOT must continue to assign Queens Boulevard traffic safety its highest possible priority for the foreseeable future.

Woodhaven Boulevard - Due to the efforts of our Borough President and local elected officials, Capital funds have been allocated to develop and implement a traffic safety improvement plan for this major thoroughfare. CB 6 looks forward to working cooperatively with DOT in planning the development and implementation of this significant project. In approaching this item, it will be especially important to balance the legitimate needs of streamlining traffic flow with the vital safety concerns of the pedestrians and bicycle riders who access Woodhaven Boulevard. Particular attention must be given to the enhancement of “green-light time” for those seeking to cross the boulevard; the development of cohesive and logical traffic markings that coincide with actual vehicular and pedestrian traffic flow; the implementation of clearly delineated and properly “lined up” crosswalks that are sensitive to the needs of the disabled; and the creation of safe and appropriate bicycle lanes. In addition, the impact of Woodhaven’s traffic flow upon adjacent local streets and the adoption of possible mitigating measures should also be included within the scope of this project. We hope to initiate this planning process with DOT and the other affected community boards in the very near future.

Metropolitan Avenue – Over the years, increasing development upon “The Avenue” has significantly increased the degree and intensity of traffic flow and created problems for pedestrians as well as motorists. These trends will almost certainly further escalate once the new educational complex situated just east of the LIRR right-of-way – and a continuously expanding number of big-box commercial entities – becomes operational. To address this problem and proactively plan for future demands, DOT should initiate a Traffic Study encompassing, at the least, that portion of Metropolitan Ave. situated within the boundaries of CB 6. The study should also be coordinated with pertinent components of the Woodhaven Blvd. traffic study.

Union Turnpike - Both in terms of traffic congestion and velocity, this heavily utilized thoroughfare situated at the southern end of CB 6, which serves as a de facto alternate route to the Jackie Robinson Expressway, generates significant traffic safety concerns that require DOT’s ongoing priority attention. Specifically, aggressive enforcement plus the installation of traffic barriers are needed to deter the speeding and reckless driving problems that chronically affect this area. In addition, pedestrian crosswalks need to be prominently highlighted and traffic signal “green-light time” increased at the local intersections to promote pedestrian safety. This particularly applies to the 71st Avenue intersection, which provides primary pedestrian access to a heavily utilized playground as well as the recently opened Stop and Shop Supermarket and serves as the point from which horses reach the Forest Park bridal path, via the horse lane that was previously created by DOT upon CB 6’s recommendation. Finally, DOT, the Parks Department and the LIRR must ensure the proper lighting and maintenance of all pedestrian sidewalk and railroad bridge approaches leading to the Stop and Shop.

Yellowstone Boulevard - As it cuts against the grain of the CB 6 street grid, Yellowstone Boulevard generates significant traffic volumes that traverse a frequently winding road and several complex street crossings involving multiple major thoroughfares. In particular, the intersections at Queens Boulevard, Austin Street (which is immediately adjacent to the 112th Precinct and Russell Sage JHS), Selfridge Street and Woodhaven Boulevard present significant traffic circulation and pedestrian access issues that need to be addressed systematically. Beyond this, improved signage and highlighted crosswalks are needed in those areas where the street turns diminish pedestrian visibility. In short, these factors make Yellowstone Boulevard a most appropriate candidate for traffic safety study that warrants the special attention of DOT in the coming year.

Ongoing Infrastructure Needs - It is essential that CB 6 receives its fair share of the street resurfacing and pothole repair budgets that provide essential preventive maintenance. In addition, DOT

must ensure the proper maintenance and repair of the pedestrian bridges that, hi spanning the Long Island Expressway and Grand Central Parkway, provide safe and essential access to neighboring communities and Flushing Meadows-Corona Park. The same attention must also be provided to the tunnel that links Austin Street to neighboring Kew Gardens. The New York State Dept. of Transportation must also play its part in properly maintaining the Woodhaven Boulevard Bridge that spans the LIRR's Montauk Branch; the provision of proper lighting, security and sanitation to this bridge's pedestrian path is a particularly important ongoing need. Finally, adequate provision must be made for the prompt and appropriate replacement of all transportation related street signage when needed.

Maintaining Adequate Staffing - It goes without saying that, in order to properly perform its mission and, in particular, the responsibilities described above, the affected agencies of DOT must possess a level of staffing that, in terms of both numbers and ability, is equal to the task. CB 6 thus strongly supports the department's efforts to fully staff its positions.

PARKS COMMITTEE

Forestry: More maintenance is needed as well as additional landscaping employees.

Parks, Playgrounds & Recreation: CB 6 requests continued maintenance of all playground equipment in our parks, as well as continued enhancement of all local parks, playgrounds, and vest pockets. Requests for park volunteers should become part of the parks planning, not twice a year but "adopt a park" outreach and funds should be budgeted to provide tools, plants, etc. We continue to support the upgrading of Lost Battalion Hall. We further ask that the Forest Hills side, (Jewel Ave.) of Flushing Meadows Corona Park have installed benches and picnic tables, and that there be benches along the entrance to the park at Jewel Ave. and GCP.

SANITATION

Sanitation services continue to be a priority in both the residential and commercial areas of Community Board 6. In order to properly maintain the cleanliness level of CB6, we require:

1. Increased funding for litter basket pickups on commercial strips and a litter basket truck.
2. Fund regularly scheduled cleanup of medians.
3. Maintain weekly recycling.
4. Hire more Sanitation Enforcement agents.
5. Mechanical broom for the fall leaf season, a 10 yard alley truck, additional salt spreading equipment for the winter, and a graffiti power washer.

PUBLIC LIBRARIES

The libraries in Community Board 6 are heavily utilized by growing numbers of immigrants. It is essential that the libraries remain accessible to all people as an educational tool. Expansion of the Rego Park Library and weekend service to be permanently put in the budget.

EDUCATION

This committee is in the process of establishing a liaison with the Community Educational Council, Forest Hills High School, and the private and parochial schools in CB 6 to determine the needs of the student population they serve, and how best the Community Board can assist them.

YOUTH SERVICES/EDUCATION COMMITTEE

CB 6 is characterized by large tracts of high density housing. All of its parks are less than one acre in size and are heavily utilized by local young people, parents with young children, and senior citizens. CB 6 has only one non-sectarian multi-service Settlement House providing comprehensive programming to local youth at little or no cost for services.

The community has undergone dramatic changes in its population over the past decade. With the breakup of the Soviet Union, a large and continuously growing influx of Russians and Georgians began arriving in the Forest Hills/Rego Park community five years ago. Even though the community has attracted Russian emigres for the past ten years, this is a new group with different experiences and in some instances, different cultural and family mores. In addition, over the last five years, an even newer group from the former Soviet block has arrived in our community - the Bukharian Jews. These families hail from the Central Asian republics of Tadjiskistan and Uzbekistan and trace their ancestry to Persia. These demographic changes are in concert with an influx of families from China and Korea as well as from the Caribbean and Central and South America starting in the mid 1980's. In addition, during this same period, the number of families from India, Pakistan, Thailand, Egypt, Iran, China, and Israel has also been on the rise.

The children of these newcomers struggle daily for acceptance by their peers in their new neighborhood. The teenage years tend to be difficult for all young people, but our immigrant youth carry the added burden of language and cultural barriers and are keenly aware of the disparities between their present lives and the lives their parents knew "at home". Constant work is needed to welcome these new young people to our community and to build harmony between them and the long-time residents.

Further recent developments in the community include the growth of single parent families, a rise in the number of working parents, an increase in the numbers of families receiving public assistance, and a rise in the numbers of youth "hanging out" in the streets, in schoolyards and in local parks. The latch key problem for elementary age children has grown as the adults in most families must work to make ends meet financially. Long waiting lists exist in local after school programs as existing resources do not begin to meet the growing need for these services. These children are increasingly vulnerable and must have the opportunity for supervised after school activities. Additionally, young people 14 and older need the opportunity for summer employment. Without jobs, our youth have no alternative to the streets.

The need for comprehensive youth service programs has risen appreciably as the Youth population has grown and become more diverse in its composition. For this community to maintain its stability and integrate newcomers into an already diverse environment, it is essential to maintain and expand the existing comprehensive youth services program that consists of street outreach, counseling, employment, recreation, and education, including English As A Second Language services, tutorial, and college and career options as well as after school youth development/literacy programs and summer day camp and inter-generational opportunities. Services need to be available afternoons, evenings, weekdays, weekends, and during the summer year round. There is a pressing need for leadership development activities which foster resilience, build skills and bring together youth of varied cultures.

The 112th Police Precinct credits the local youth serving agencies for the decrease in youth crime over the past seven years especially street outreach services offered by The Forest Hills Community House.

Sage Junior High School 190 in Forest Hills has served as a site for a Beacon program funded by the NYC Department for Youth and Community Development since FY99. Beacons are community centers contracted to community-based organizations sited at local schools that offer an array of services for children and families afternoons, evenings, weekends, and summers. Through beacons, youth are offered positive youth development, educational, cultural and literacy programming, residents are involved (through an advisory council) around provision of service, and the community is strengthened through increased access to this community facility. Currently the Beacon, operated by Queens Community House, is serving only 2,000 community residents annually (DYCD requires that 1,200 be served each year). Because of the efforts to expand the programming at the beacon to serve not only the junior high population, but high school and elementary aged students, Community Board #6 supports an enhancement of \$50,000.

The libraries in Community Board 6 are heavily utilized by growing numbers of immigrants. It is essential that the libraries remain accessible to all people as an educational tool.

The parks in Community Board 6 are heavily utilized by local young people, parents with young children, and senior citizens. Free access to parks by all residents as well as by local community-based organizations operating programs for children and teens must be maintained.

With the growing number of two working parent households, single parent families, and parents on public assistance facing welfare reform, child care continues to be a growing need of this community. Universal Pre-K, which mandates that by the year 2001 all 4 year old residents of New York State have access to a pre-k program, presents both a blessing and a challenge to New York City Schools already overcrowded and communities where parents struggle to find child care services. In order for Universal Pre-K to be effective, greater *resources such as increased funding and availability of space must be allocated. Universal Pre-K presents opportunity for greater collaboration between the early childhood community and the Board of Education and this must be encouraged, in addition the proposed IS and high schools need to be finished. A new Anti-Harassment law needs to be funded.

BEAUTIFICATION COMMITTEE

Community Board 6 has 4 major shopping strips and a combination of private houses, co ops, condos, and rental apartments. The citizens are concerned with improving sanitation, graffiti removal, beautifying the landscape, tending to the myriads of trees in the area, and keeping the parks in good condition. They are a source of recreation and a social meeting place for many groups of people in the summer and fall.

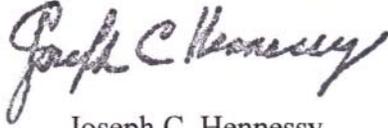

The Needs Statement for the Beautification Committee of Community Board 6 is as follows:

1. Pave berm areas under trestles to eliminate maintenance of weed growth, and to allow for cleaner, healthier, streets.
2. Have a unit within the MTA assigned to the regular removal of graffiti under the walls of railroad trestles.
3. Maintain on regular schedule the cleaning of the traffic medians on Queens Blvd. and Woodhaven Blvd., and beautifying them with colorful perennial plants, bushes or flowers.

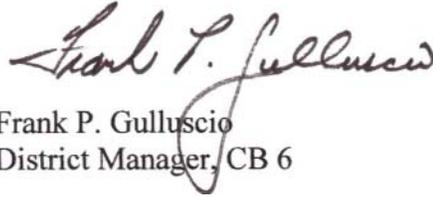

CONSUMER AFFAIRS

Community Board 6 supports increasing the numbers of inspectors and the frequency of inspections for all licensees along with more community outreach by the Consumer Affairs Agency. There is also a major need for street vendor enforcement.

Need more community outreach by Consumer Affairs Agency.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

COMMUNITY DISTRICT NEEDS STATEMENT – FY 2011

INTRODUCTION

Community Board #7 is the largest in population and 5th largest citywide in acreage of all 59 Community Boards. It is composed of seven towns, Bay Terrace, Beechhurst, College Point, Flushing, Malba, Queensborough Hill and Whitestone, making up 12.7 square miles, and 285 miles of city streets. We are an extremely diverse community consisting of one and two family homes, suburban high rise apartments, 64 park locations, 30 Greenstreets, an intermodal transportation hub with 24 bus lines, the #7 train, and the L.I.R.R. In addition, we are the 4th largest retail area in the city, and the second largest industrial area in the borough because of the College Point Corporate Park. Our Board has the largest waterfront area running from Flushing Bay to Fort Totten.

Our diversity presents us with many challenges and problems, which we must address and resolve, if we are to maintain the level of our past accomplishments and improve our quality of life in the 21st century. These can be summarized along the following issues: zoning, parking, the environment, transportation, traffic, service delivery, waterfront development, in addition to maintaining the economic growth in downtown Flushing, College Point, Bay Terrace and Whitestone.

We are concerned about meeting the needs of our senior citizens, the proliferation of houses of worship, maintaining the viability of our parks, as well as our historical heritage. Our most immediate emphasis is concentrating on managing new developments within our board area, and the potential of its' impact on traffic, service delivery, and schools for our youngsters.

Evidence shows that Community Board #7 has experienced enormous building growth in both commercial and residential areas. For example, within only a four-mile radius of Downtown Flushing, the housing stock in the past 21 years has grown, and projects presently on the drawing board will bring in additional units of housing within the next several years (i.e., RKO Keiths, Muss Development, Flushing Commons and Willets Point).

With completion of the 2006 Census, our population was estimated to be approximately 259,000 people, and we are the largest population wise of all 59 Community Boards. Many census tracts in and around Downtown Flushing have experienced substantial population increases while some tracts in Bay Terrace, Clearview, College Point, and Whitestone have experienced moderate to high increase in population. The data confirms that the trend of sustained growth in our area has continued adding to the demand for new market rate and affordable housing, senior housing, classroom space, and city services.

BOARD OF EDUCATION

Due to the building and population growth in our district, we are concerned that this will create a shortage of classroom space for K-8. In addition, there is a serious shortage of space on the high school level. With the recent rezoning of Downtown Flushing, we are recommending that new housing developments be built with schools within their project. It is necessary to improve space management of existing schools and in addition, new buildings should be considered to deal with their additional needs. There has been a tremendous demand for community space; i.e., expansion of after school programs, community meetings, seminars, service programs, etc., and it is recommended that school buildings be utilized for this purpose. School buildings need to expand their role and serve a broader obligation to the residents of our communities.

In order to enhance the education of our youth, funding must be appropriated for construction of additional computer labs, and state of the art computer equipment.

BUILDINGS

City Planning should review the need to examine appropriate zoning for Downtown Flushing – either a C4-4 or special district. The Community Board has been receiving many B.S.A. applications requiring a C4-4 zone due to the fact that because of the high water table, developers cannot meet the parking requirements.

We are happy to see that all zoning change requests for our board have been accelerated in order to address the requests of the neighborhoods within our district. At present there is only one zoning change (Auburndale) that will be certified this fall. New York City Department of City Planning and Mayor Bloomberg have expeditiously advanced his campaign promise made in 2005 to contextually rezone our residential neighborhoods

Presently, on any new large-scale development plans that come before the Board for a review, we are asking that the R-6 parking requirement be replaced with 100% parking on site. This helps alleviate much of the demand for on street parking from the surrounding community. In addition, developers must seriously look at an affordable housing component in conjunction with their large-scale developments. In addition, in order not to add to the congestion in our local schools, a K through 8 school must be seriously looked at during the development stage.

Presently, R-6 zoning has a 50% parking requirement. We have found that, developers are subdividing the lots which automatically eliminates the parking requirements. **This loophole must be eliminated.** Developers should not be allowed to circumvent this because it impacts tremendously on the affected communities. If single family homes are requested to provide one parking spot per house, we should not allow developers to receive waivers for multi-unit developments.

On new construction electrical and gas meters should be encased or protected from the outside elements. At present, they are left open with easy access, and in case of any emergency; i.e., explosion or fire, the Fire Department would not be able to evacuate people inside the premises.

Since all Building Department permits have to be posted, they should have the owners names and contact phone number, should an emergency arise during the construction process.

ECONOMIC DEVELOPMENT

For almost four decades, Downtown Flushing has expanded and thrived economically through private entrepreneurial activity and investment and thus did not require large infusions of city expenditures or incentives. A number of large-scale projects are underway or are planned such as a major retail-residential center on College Point Boulevard and Roosevelt Avenue, and for the Municipal Lot #1. The latter project has been delayed by the pre-ULURP process, but draws attention to the fact that because of past and current projects, the economic health of the area remains fragile. We face continued problems relating to parking, infrastructure limits, traffic congestion, and services which effect sanitation and safety, all of which undermine the economic health of the location. It is imperative that the Municipal Lot 1 development proceeds as it was intended – that is to expand our downtown commercial and residential base while expanding our parking capabilities. The project was designed and supported on the basis that it would yield far more parking spots than currently exist in the lot (1,100) and this, needs to be guaranteed.

With the opening of Citifield and the approved plans for the redevelopment of Willets Point, we expect further strains on Downtown Flushing's current problems. We have supported these plans provided that there are opportunities for sustained employment in the area, improved environmental conditions in and around the Flushing River and improvements to the #7 Subway among other issues.

With regard to the College Point Corporate Park, with the expiration of the Urban Renewal Plan and the transition to a Special District, we need to insure that this final development phase of the Park includes maintaining the safeguards in place. We also need to have insured the balance of development with our community's quality of life. The former Flushing Airport site is to be protected for passive use.

Procedures have begun for the Police Department to develop their Academy on the auto pound site in the Corporate Park. This project will have a substantial impact on the Park infrastructure and the community. Since Community Board #7 has had more than its fair share of citywide facilities, every effort needs to be made to move capital projects effecting the Park and the immediate community concurrent with this project. Otherwise, the economic health of College Point and Flushing will deteriorate.

DEPARTMENT OF ENVIRONMENTAL PROTECTION

Flooding and ponding is a continuing problem in Community District #7. Additional funding is required for manpower and for the design and construction of storm sewers, sanitary sewers, combined sewers, catch basins and sewer regulators. Manpower is also needed to inspect the flood prone areas of the board to determine the appropriate solutions to the flooding and sanitary backups. Capital funding is needed to speed up the construction of sewer improvements once they are designed.

Education on the proper control of storm water is needed. Multi-language educational efforts are needed to explain the proper procedures for handling of grease and fish water, and the protections required of the street catch basins throughout our District.

Additional inspectors are required in our District to ensure compliance with the Sewer Use Regulations, the Noise Code, the Air Pollution Code, the Community Right-to-Know Law, and the Solid and Hazardous Waste Rules. A thorough survey of the facilities in the District needs to be performed in order to ensure all of them have the proper permits and are complying with the appropriate codes. This goes beyond just inspecting those facilities known to the DEP by their existing permits. The DEP must identify every facility that needs a permit and ensure compliance.

FIRE DEPARTMENT

It is essential that all engine companies be staffed with five-man crews throughout Community Board #7 and especially in the downtown Flushing area. The need for this is due to several factors; increased urbanization, new high rise construction causing a heavier workload, the congestion of the commercial shopping area, and the various roadway reconstruction projects within the area, as well as the threat of terrorism due to LaGuardia Airport, U.S Tennis Center and Citifield Stadium.

The Department appears to be relaxing its enforcement powers in “Quality of Life” issues, and we feel this could lead to a serious safety issue. We would like to see more multi-agency Task Forces to address some of the Board’s serious and often ongoing endless problems (**ILLEGAL CONVERSIONS-STORES IN THE DOWNTOWN FLUSHING AREA BEING CONVERTED TO SMALL SCALE SUPERMARKETS, AND ILLEGAL SOCIAL CLUBS, SROS IN 1 AND 2 FAMILY HOMES, ETC., PRIVATE DWELLINGS ILLEGALLY RENTING OUT BASEMENTS, MULTIPLE DWELLINGS ILLEGALLY RENTING CELLAR AREAS RENTING ONE FAMILY APARTMENTS TO MULTIPLE FAMILIES, ILLEGAL VENDING WHERE PROPANE GAS IS USED FOR COOKING**).

The reestablishment of our fire alarm boxes is still a concern in our district. Year after year, the Board has requested for the alarm boxes to be upgraded to the newer E.R.S. design. Due to the lack of public telephones, the reorganization of telephone companies, and the extensive use of customer owned coin operated telephones (COCOT), **THESE ALARM BOXES ASSIST AND ARE MORE RELIABLE** in assisting our communities with any emergency (fire, medical, police), that may occur on the city streets. A major concern developed this year with the City reorganizing. The Fire Dispatcher’s Offices – the call taker from the Fire Department is being replaced by a 911 unified call taker, which we feel will effect the response time for the Department, as well as not provide sufficient information on the response ticket which was previously provided by the Fire Department Dispatchers.

It is essential that our fire units be maintained at current manning levels or greater for the following reasons:

- 1) Increased population in Downtown Flushing, Malba, Beechhurst and eventually, the Willets Point area.
- 2) Increased business and residential construction in College Point, College Point Corporate Park, Malba, Beechhurst and the Willets Point area.
- 3) Engine Company 274 has been designated by FDNY as a Haz Tech engine company who will be dispatched to hazardous materials incidents in the borough of Queens and possibly city-wide. Responses of this type will leave a void in the response district for fire, emergency and CFRD operations.

We are extremely pleased with the re-opening of the Queens Fire Marshal Base at Fort Totten. This base at Fort Totten when reopened provides the following:

- 1) Better response time to investigate suspected arson fires in CB #7 and surrounding areas,
- 2) Investigate terrorism threats especially at LaGuardia Airport, Shea Stadium, the tennis center and other important landmarks in the district.

Continued funding must be maintained in future years as not to let the base close again, as well as, maintaining sufficient manning strength. Currently, the Fire Marshals are down by 2 supervisory Firemen and 12 Fire Marshals. This number needs to be replenished.

There is a need for:

1) The creation of a new fire battalion to alleviate the work load and response district of Battalion 52 and to provide the necessary chief supervision desperately needed in the northern quadrant of CB#7 district; namely, College Point, Whitestone, Malba, Beechurst, Robinswood, Bayside and Willets Point.

2) The creation of an FDNY summons enforcement unit who will assure that people are issued parking violations for parking on fire hydrants throughout the CB#7 district.

3) Additional ladder and engine companies need to be established since they are the essence to fire fighting.

HOUSING PRESERVATION AND DEVELOPMENT – H.P.D.

Due to the shortage of inspectors, illegal rooming houses and illegal apartments have been on the increase in our area. One-bedroom apartments are being subdivided to accommodate additional families. A law should be implemented disallowing this to happen, and should be part of the lease that is signed by the occupant. To preserve the housing stock, it is absolutely essential that Code Enforcement services operate 24 hours a day, seven days a week. The adjudication process needs to be streamlined to cut down on the time it takes to mitigate a complaint and determine a **FINAL** solution. With the passage of the Pheffer Bill, serious consideration will be given for attaching unpaid fines onto the real estate taxes. Countless fines are going uncollected and recapturing these fines can only improve the fiscal outlook for the City. Additionally, Internal Revenue Service should also be notified of the potential of unreported income.

With the growing number of seniors in Queens, as well as our district, programs for Senior Citizen homeowners are in demand to address the varied needs of this growing population to ensure that they remain in their homes for the duration of their lives.

HUMAN RESOURCES ADMINISTRATION – H.R.A./DEPARTMENT OF HOMELESS SERVICES

The policy of discharging the mentally ill on the basis of they not being a danger to themselves or others is not working. Additional funds should be allocated to correct the problems of the homeless. They require speedy psychiatric evaluation, separating them from the general homeless population and into supervisory facilities that can properly care for them.

Outreach clinics to prevent homelessness should be funded in order to provide services to people prior to their wandering the streets and living in the parks. We suggest crisis intervention at its earliest stage and preventive counseling by the agency.

Seniors make up more than one-third of the population in our district; however, services must be increased in order to meet the growing demands of this population. New facilities are needed especially in College Point and the Downtown Flushing area, which is reachable by public transportation. Affordable housing with senior citizen services and recreation programs are necessary to accommodate them. Also, nursing care and transportation services must be improved. The present level of services offered is inadequate to address the needs of our large senior population.

Much of what is now available in terms of program centers is fragmented. The city should

insure its related agencies are better coordinated to provide supplemental and required services to seniors. Supplemental transportation modes in the form of minibuses on local levels should be explored so seniors can travel for shopping and medical purposes. More financial resources should be spent on expanding and introducing specialized geriatric services at our two local hospitals, Flushing and New York Hospital. Land use applications for senior housing should be supported, provided the surrounding residential communities are not adversely impacted.

PARKS

Capital Projects for our parks must be accelerated in order to eliminate many hazardous conditions. MacNeil Park in College Point has been on the drawing board for reconstruction too long. The park is experiencing a deteriorated seawall, and crumbling paths, creating a liability to the agency and the city. Frank Golden Park has poor drainage, creating a terrible flooding problem, and at times an unusable field for the permit holders. The Margaret Carmen Green in Weeping Beech Park is in total disrepair, and certainly does not depict a fitting memorial for the person for whom it was named. This section of the park at times has become a haven for the homeless, as well as anti-social behavior.

Our 64 parks are extensively utilized and in need of additional maintenance, rehabilitation, spruce up and, in some cases, design and redesign. There is a need for additional maintenance, supervisory, recreational and seasonal personnel, as well as **Parks Enforcement Patrol workers who would be available in the evenings and weekends.** Overgrown grass and weeds, and refuse in the parks create an unsafe and unsightly environment, thereby, we require additional machinery; tractors, crew cab pickups, dump trucks, gravelies to cut grass, yazoos for sidewalk areas, leaf vacuums and Toro's are needed. In addition, the backlog of tree pruning is still critical. The Parks Department needs newer and better quality equipment, as the existing machinery is constantly breaking down. In addition, a pressure hose watering truck is needed to do deep root watering of street trees.

Full time gardeners are needed, as this district is the largest, greenest area in Queens. We have a number of center malls with shrubbery and flowers that need special attention, as they are constantly overgrown with weeds. Lack of maintenance creates a hazardous condition to motorists as well as an eyesore for the community. The district considers this ongoing beautification to be a quality of life related item. The City should enthusiastically encourage "Adopt-A-Park" or "Adopt-A-Garden" Program similar to the "Adopt-A-Highway" Program, but not as a replacement for needed personnel. The backlog of tree pruning and removal is still critical especially in view of the recent fatalities, and we support funding **EARMARKED FOR QUEENS ONLY** in the City budget in order to deal with this problem expeditiously.

POLICE

A majority of complaints in the areas are attributed to the 64 park locations, bars and clubs, and the attendant youth problems. Other sources of complaints are quality of life issues such as an increase in abandoned cars, street peddlers, graffiti, loud radios, drinking on the street, rowdiness and drag racing. With 285 miles of streets to cover, the precinct needs additional manpower to deal with the increase in quality of life issues. As our Asian population increases, our precinct desperately needs Korean and Chinese speaking officers.

There has been an increase in reported crime, especially in prostitution, drug activity, car thefts and burglaries. This may be attributed to the willingness and cooperation of victims who in the past were unwilling to notify the police of crimes. An expanded Morals Squad and Narcotic Task Force Program to address the related concerns as expressed by the community, is desperately

needed. In addition, our district is heavily impacted with establishments that have liquor licenses and illegal vending. These restaurants/bars are impacting on the quality of life in our commercial hubs abutting residential communities. Illegal vending is on the rise, especially vending from motor vehicles. Numerous locations throughout our district have people selling anything from furniture to watermelons out of the back of a truck. Enforcement is necessary and must be on a continued basis. Compounding the problem of police presence is caused by the constant detailing of personnel to various special functions; i.e., USTA, Presidents' visits, parades, special details, etc. This precinct many times has been depleted of its personnel imposing a heavy burden on the remaining skeleton crew. This in turn has a major impact on the effective handling of quality of life issues.

The present geographic boundary of our district is too large, burdened with increases in crime and population. Particular communities, such as College Point, Malba, Beechhurst, Robinswood, Whitestone and Bay Terrace, are receiving inadequate police protection in the form of radio motorized and foot patrols, which equates to less than adequate response times from the 109th Precinct.

With the development of many new large-scale developments in our district, a new police precinct needs to be built and established (i.e., 116th Precinct) in northeast Queens in order to satisfy the need for proper police protection and response times. The location of the new precinct could be built on M-1 zoned property in College Point or converting the armory in Beechhurst into a precinct.

SANITATION

Litter, especially in the downtown shopping areas, is a never-ending problem. Multi-language educational efforts are required to explain the various sanitation laws to the District's citizens and businesses. Enforcement is needed, but it must be fair and reasonable. We request that emphasis be placed on ticketing the litterbugs instead of where their litter falls. This will reduce litter now and in the future as this will also be an educational effort for those so ticketed.

Community Board #7 supports the recycling programs and the outreach and education efforts must continue and be increased to encourage vigorous participation by all citizens and businesses. Weekly recycling must continue, and additional new materials should be targeted for recycling, such as textiles, cooking oils from restaurants, office paper, etc. Multi-language educational efforts must target those areas with lower capture and diversion rates.

The towing of cars from Snow Emergency Streets during snowstorms must be improved to allow for better snow removal. Snow removal efforts must be improved by adding the trucking of snow out of the congested areas and, where possible, the melting of snow to reduce the mounds of plowed snow.

With the anticipated reopening of the North Shore Marine Transfer Station, efforts must be started now to ensure that sanitation drivers from other community districts use only the approved truck routes coming and going from the MTS. Local streets are not through streets, and should not be so used.

DEPARTMENT OF TRANSPORTATION

1 – HIGHWAYS

Our neighborhoods are facing many new challenges – we must learn how to protect them by seeking new approaches to achieve our goals. Federal, State and City funding is insufficient to meet the needs of our capital projects, which are necessary to provide desperately needed infrastructure improvements. The majority of our capital priorities has been, and will remain, transportation requests.

The commercial areas of Flushing, College Point, and Whitestone generate large numbers of trailer trucks. This puts an incredible strain on the streets and highways of these communities.

Capital construction should be accelerated to accommodate the increased volume of traffic and the deteriorated condition of the streets. Linden Place, our #1 Capital Project, is finally moving forward. This roadway, which has been closed for over 20 years, will have an ancillary road to relieve traffic backups on the Whitestone Expressway and along 20th Avenue. With the development of the Corporate Park and the new retail component, this roadway is a necessity.

Design funding for Phase IV of the Main Street Redesign, one of our top capital priorities, must be allocated. Phase IV will complete the street infrastructure repair in this highly utilized commercial area of our district. This reconstruction will enhance the Downtown Flushing rezoning project that was passed by our Board.

Within the towns of Whitestone, Beechhurst, and College Point, the seawalls have been allowed to deteriorate, causing a severe and expensive restoration problem. This area has further been decimated by storms that occurred over 10 years ago. The various communities have requested Federal funding for immediate repairs. Capital projects from our Board have been initiated, but the financial crisis, has caused the restoration to be delayed by several years. The same applies to the Bridges, Ramps, and Flyovers. Preventive maintenance programs, by the agencies responsible, must be initiated before a major disaster occurs. Of course, maintenance also pertains to the periodic cleaning of our Roadways, Highways, Bridges, and Tunnels, which has shown considerable improvement over the last few years.

2 – TRAFFIC

The results of recent traffic studies of Downtown Flushing conducted by various governmental agencies, while well intended, present findings and recommendations that often clash. We were informed that computerized controls are scheduled to be installed by the end of this year.

The College Point Corporate Park has reached a stage of development that requires the Economic Development Corporation to act more responsibly particularly in the maintenance of its huge traffic generating facility.

The city DOT should be asked to review its traffic control devices currently posted in Community Board 7. Many of the signs posted in Community Board 7 qualify as antiques. The “STOP” signs on corners are at least a quarter century old and has already lost its ability for nighttime reflectivity. This as you know, could be costly because it makes the city liable in the event of an accident. As part of an outreach program, maybe local civic and scout groups could be asked to report the location of faded signs, faded street markings, as well as inoperative traffic signals.

There is a need for more parking facilities around the Downtown Flushing area to help alleviate congestion due to drivers trying to find parking. Commuters who want to use the mass transit options at Main Street, shop at the numerous stores, or do business in the area, but use their cars to get into the Downtown Flushing area need to have ample parking available.

3 – TRANSIT

We are concerned about expanding and improving our transit system. The Main Street subway station is the 12th largest subway in the city and the biggest transfer point between the busses and the subway. Relatedly, committed funding is required in order to meet continued

improvement of our infrastructure. The rapid growth of vehicular volumes in Community Board #7 during the past decade has only been matched by the frenzied growth of the local demand for public transportation.

With the takeover of bus transportation by the MTA there is finally an opportunity for a unified and coordinated effort to transport shoppers and commuters to their local destinations. There is, therefore, a very strong need for an orderly analysis of bus transportation needs, not only to make bus lines more efficient, but also to maintain services for the aged, the handicapped and school youngsters. Where the use of the tandem/articulated buses is unwelcome in our area, Jitney buses are recommended to make up the areas where we have lost service due to the loss of ridership.

On a daily average, 85,000 people use the IRT #7 subway and 75,000 use the 24 bus lines in the Downtown Flushing community. Modern and innovated ideas should be pursued by New York City Transit Authority (minibuses vs. illegal vans), which would improve the reliability of bus schedules and loss of passengers in underserved and highly congested areas. In addition, three major L.I.R.R. stations are located in our district. Of equal importance, (as we have in our #7 line) is the upgrading of our LIRR stations to ADA guidelines. In addition, the L.I.R.R. station that services Citifield and the Tennis Center should operate every day, and especially during the AM and PM rush hours. Presently it only operates when there are games at both stadiums. This would alleviate some of the traffic and parking congestion problems in Downtown Flushing. Also, MTA in order to accommodate this ridership should start some express trains at the Citifield Stadium station.

A sizeable percentage of the ridership comes from eastern Queens and now that the MTA is expanding the #7 route further west in Manhattan, it is time to give some consideration to expanding the line eastward in Queens. That would be another way toward eliminating congestion in Downtown Flushing. The current line was not built for 21st century travel within this part of the borough. It's time for the residents and businesses of East Flushing, Bayside, and maybe some parts of Douglaston to share in freeing Downtown Flushing from this growing problem.

All stations are in violation due to not having ramps or elevators to service the physically challenged. We are looking forward to the construction of the light rail with the vision of a Downtown Flushing station. Tens of millions of dollars were spent on the upgrading and rehabilitation of the #7 subway station less than a decade ago. To date the escalators are still not 100% operable, and experience frequent breakdowns, forcing passengers to use the long descending staircases onto the platform level. In addition, the maintenance needs major improvement – escalators walls are filthy, debris on top of the information booth and newspapers strewn on the floor. The high volume and echo of the public address system makes the announcements inaudible.

YOUTH

Since 1995, Community Board #7's youth population has suffered due to the funding cuts that resulted in the elimination of the position of youth Coordinator. In the past, Youth Coordinators have played a vital part in enabling Community Board #7 to effectively monitor youth programs, provide technical assistance to youth service providers and to guide youth program users. In addition to monitoring local programs, Youth Coordinators made sure that various programs funded by the Department of Education, Department of Youth and Community Development, Borough President and the Council Members are meeting the needs of our growing community. It has been over 14 years that Community Board #7 has been without a Youth Coordinator and as the years go by, it is more evident that this has had a negative impact on our youth population.

Since the elimination of the Youth Coordinator position, Community Board #7 has gone through tremendous changes and the need for this position has only been reinforced. The population growth currently experienced by Community Board #7 calls for comprehensive youth service programs to maintain community stability as well as to provide safe and nourishing environment for youth. Additional and expanded youth services programs in the following areas would enhance the lives of youth in our community.

1. Beacon programs are effective programs that offer positive youth development through educational, cultural and literacy programs. Currently, Community Board #7 only has 2 Beacon sites to serve the needs of 47,000 youths. Additional Beacon sites and increased funding is necessary to effectively meet the growing needs of Community Board #7.

2. Preventive programs are necessary to keep youngsters active and engaged in constructive programs after school. These programs should include educational and career choice counseling, high school drop out prevention and family support programs to create a safe environment.

3. Youth employment programs should be expanded to address youth unemployment and to develop jobs for youth. Employment and job training programs are essential.

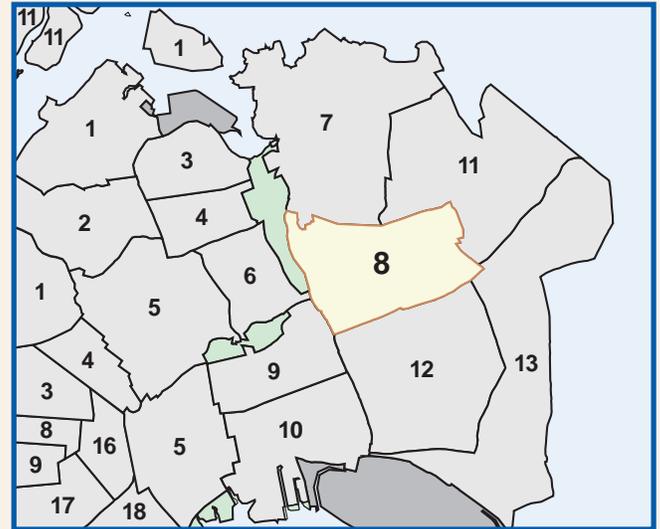

4. Increasing the use of existing school facilities is necessary to meet the needs of youth for educational and recreational programs. Elimination of usage fees would ensure increased funding dedicated to programs and the increase in number of youths served.

In order to make certain that we are doing the best for our youth, the Department of Youth and Community Development and Community Boards must engage in cooperative planning efforts to ensure the most effective use of current youth programs as well as development of additional programs.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

District Manager, Marie Adam Ovide

Statement of Community District Needs and Priorities FY 2011

Community Board 8, Queens is bounded by the Long Island Expressway to the north, Hillside Avenue to the south, Van Wyck Expressway to the west, and the Clearview Expressway to the east. It includes the communities of Briarwood, Flushing Suburban, Flushing Heights, Fresh Meadows, Hillcrest, Hillcrest Estates, Holliswood, Jamaica Estates, Jamaica Hills, Kew Gardens Hills, Utopia and West Cunningham Park. These communities are overwhelmingly residential with several commercial strips.

The 146,594 residents of Community Board 8 are middle income, multi-ethnic, multi-racial who own their own homes and co-ops or are renting. The residences consist of one and two-family homes, garden apartments, large apartment buildings such as the Fresh Meadows Development and Cunningham Heights, co-ops such as Electchester, Hilltop Village and the New York City Housing Authority complex - Pomonok. The Community Board 8 residents are concerned with quality of life issues, personal safety and security, education and maintaining their fair share of city services.

Community Board 8 houses major facilities such as Queens College, CUNY Law School, St. John's University, Queens Hospital Center, Cunningham Park, and many public and private schools.

Police

Community Board 8 has consistently designated the funding of additional police personnel as one of its top Expense Budget Priorities. The 107th Precinct's officer count has been dwindling in the last few years. Our precinct has 8 officers less this year than last year.

It should be taken into account when police personnel are allocated to the precincts that Community Board 8 has over 40 private/public schools. Furthermore, Community Board 8 has many institutions within its boundaries, including Queens College, CUNY Law School, Queens Hospital Center, Holliswood Hospital (Mental Health Facility) and St. John's University. The latter will house 500 students and staff in its new dormitory, which opens this August. Queens College's dormitory will also open this August adding hundred students as well. In addition, there is drug rehabilitation program that opened its doors a few years ago at the former site of the St. Joseph's Hospital on Union Turnpike. We have a great number of houses of worship serving many denominations. People are entitled to worship in peace whenever they chose and know that they are protected from terrorists.

The 107th Precinct has been doing its best with the limited resources and more officers are needed. The Board commends the men and women who work so diligently and put their lives on the line every day on our behalf.

There are approximately 95 auxiliary police officers in the Auxiliary Police Program. A van is needed to transport these officers to many community events that occur in the Community Board District including National Night Out, Big Apple Circus, the New York Philharmonic and Metropolitan Opera. Bullet proof vests are vital.

To keep our subways safe, we require an additional 20 officers and supervisors for Transit Bureau District 20. New computers are needed for the administration area located at the Briarwood station.

Environmental Protection – Flooding continues to be an issue for Community Board 8. Very little has been done to alleviate this problem. As previously stated last year, the following are necessary:

- Enlarge sewer lines to accommodate increased development throughout Community District 8.
- Hire sufficient personnel for regular catch basin cleaning and repair work to prevent flooding.
- Increase funding for trench restoration and sewer reconstruction to repair the impaired lines and streets.
- Construct storm sewers on Hillside Avenue from Van Wyck Expressway to Clearview Expressway. There are special concerns for the subway lines that have been interrupted due to the recent flooding.

Sanitation

Although Community Board 8 has relatively clean streets, there are still several Sanitation issues that require more attention:

1. Streets that are not covered by Street Cleaning Regulations need to be cleaned regularly.
2. The paved center malls require year-round cleaning and seasonal weed-control.
3. Retain the five day-a-week pick-ups at public schools and extra pick-up at Pomonok Houses.
4. Sanitation Police are needed for night patrol to discourage illegal dumping.
5. A CB8 dedicated seven-day-a-week pick-up truck for litter baskets in commercial areas.
6. Increased enforcement of Sanitation regulations along the commercial strips.
7. Dedicated bulk pick up trucks for large apartment/co-operative developments.

Parks

One characteristic that has attracted residents to Community Board 8 is its suburban nature, which is derived from the open space of its parks and street trees.

1. Hire personnel or contractors to maintain, prune, and remove dead trees and tree stumps, both in the parks and streets.
2. Park maintenance workers are needed to provide security and to protect the City's capital investment in renovated playgrounds.
3. Cunningham Park is Community Board 8's major park and as such is heavily utilized. Work-

ing in conjunction with the Friends of Cunningham Park, we have prioritized our requests for the rehabilitation of Cunningham Park.

- Erosion control throughout the core area
- Landscaping throughout the core area, shrubs, trees, hardy perennials and bushes
- Reconstruction of paths throughout the park's core interior especially around the oval and restoration and/or construction of bicycle path from Francis Lewis Boulevard overpass of Vanderbilt Motor Parkway to the underpass at the Clearview Expressway
- Reconstruction and restoration of ball fields 1-5 including backstops
- Redesign picnic area (including signage) location maps and directional signs at major entrances and additional flora identification signs for trees
- Seeding, sodding and an underground irrigation system for the core area
- Installation of catch basin in the entrance roadway from Francis Lewis Boulevard to correct serious flooding
- Fencing around the transfer station.

Fire

Community Board 8 is concerned about the adequacy of fire protection, not only within its boundaries but also throughout the entire Borough of Queens. We support restoration of Fire Marshals dedicated to Queens and five-person staffing for all engine companies. There is an urgent need to educate the public on fire prevention and to expand the Fatal Fire Reduction Program and Mobile Fire Safety House. Furthermore, we continue to request a generator for each of the fire house within and those that service Community Board 8.

Transportation

We continue to request increased asphalt allocation for street resurfacing. Some areas would benefit from contract and engineered resurfacing projects. The service roads of the Van Wyck Expressway, Grand Central Parkway, Long Island Expressway and Clearview Expressway must be maintained and cleaned on a regular schedule. We continually receive complaints regarding the lack of cleaning especially overgrown weeds.

We request stand alone funding for curb installation and replacement. This would prevent claims against the City for trips and falls. Currently, there is a backlog for curb repair and curb installation.

Housing/Buildings

Much of Community Board 8's housing stock is residential, with many one-family homes. Additional Buildings Department inspectors and plan examiners are necessary to enforce existing regulations and quality of life violations. Elimination of self-certification by architects and engineers or stricter oversight by the City would address the major problem of illegal construction in Community Board 8. With the subprime lending crisis, many construction sites have been abandoned is it is blight to our neighborhoods.

There are very few rent stabilized and/or rent controlled apartments within Community Board 8. This is a housing crisis. The lack of affordable regulated housing has caused a larger numbers of homelessness, overcrowding in neighborhoods and illegal apartments. Government must start to

build additional affordable housing and encourage the private community to do so as well. Everyone should have the right to a home, be it private, co-op, condo or an affordable apartment.

Pomonok Houses, although one of the better public housing developments in the city, has several issues that have to be addressed. The infrastructure has to be continually upgraded. Residents need the ability to transfer to a larger apartment if they have children of different sexes. A family resource center that will offer educational programs, job training and placement services as well as support programs to help residents achieve self-sufficiency would be welcome. There is a definitive need to increase the number of officers at PSA9 to prevent criminal activity.

Human Services

Community Board 8 has many human service needs, particularly among the elderly, single parent families, youth, the unemployed, new Americans and recent immigrants. Several issues that need to be addressed are education, outreach and preventive programs dealing with domestic violence, AIDS, parenting skills, family preservation, child abuse and affordable quality day care.

Youth

Youth programs and services have always been one of the top priorities of Community Board 8. The Beacon Schools are a welcome oasis providing many after-school and evening recreational programs and activities. Additional funding is required for summer youth employment positions.

Services to address youth unemployment and develop job programs to serve youngsters from middle-income families are also needed. The problem of gangs, graffiti, youth substance abuse and truancy affect youngsters in the district. The District needs increased mentoring program for boys and girls to help them resolve issues that arise during pre-teen and teenage years.

Dollars invested in youth today will save more funds that may go to the justice system tomorrow.

Seniors

Community Board 8 is in need of an additional Senior Center to provide nutritious meals and socialization to accommodate the Board's growing senior population. The 2000 Census shows an increase of 14.2% in the senior population versus an 11% increase in the general population. In addition, both seniors and youth would benefit from an intergenerational program.

It is vital that we maintain the delivery of a daily hot meal for our seniors. A program of transportation, home care, and Meals-On-Wheels for homebound "frail elderly" is administered by the Northeast Senior Assistance Center.

Hospitals

We will continue to monitor development on the Queens Hospital Center campus. We continue to urge upgrading the cardiac capabilities at Queens Hospital Center with the addition of a catheterization lab. A heart attack or stroke requires an intervention in the shortest possible time. Elmhurst Hospital is too far away, not only in miles, but more importantly in time. With the closure of Mary Immaculate Hospital, a designated trauma center, Queens Hospital Center must be able to provide life-saving procedures to the number one cause of death. The demographics of the Queens Hospital Center catchment area support a catheterization lab. Furthermore, the Health and Hospitals Corporation should take all the necessary steps to reclaim the "T" Building from the existing defunct Skyline Commons lease. This building presently has behavioral health patients utilizing beds, and Queens Hospital Center back-office staff are housed there. Its utilization can be increased over time to meet the health care needs of patients in Queens.

We are concerned with the treat of the West Nile Virus, as mosquitoes infected with WNR were detected this summer within Community Board 8 in zip code 11365. We need a concerted effort to continue the control of the mosquito population.

Libraries

It is imperative that all of our libraries are open seven days a week to service the needs of our community. Furthermore, we seek increased morning and evening hours. We seek additional computers and services (youth, immigrants and seniors) at the six branches of the Queens Borough Public Library located within Community District 8. Many individuals do not possess a computer and the libraries are the only venues where they have access to the web. The Briarwood building needs expansion or a new building to cope with the increase demand for service. In addition, the Hollis Branch requires rehabilitation.

Education

Community District 8 is within Region 3. Good schools with small classes are vital to CB8. We will continue to advocate for new schools and quality education to accommodate the Board's growing school aged population. Households with children under eighteen years of age have increased by 20.1% according to the latest census. There are not enough seats or classrooms for our children in all levels of education.

Community Board

Mayor Michael Bloomberg has shown his support for community boards and we continue to thank him for all that he does for community boards. We are often the first line of communication for community residents to New York City agencies. We cut through red tape and bureaucracy, functioning as a little City Hall located in the community - a one-stop shopping center where residents can access numerous City services. We receive many referrals from 311. We continue to solve issues that 311 cannot, especially issues involving more than one agency. We monitor the delivery of City services, resolve thousands of complaints each year, and hold public hearings on zoning, ULURP and budget matters. We publish a monthly Newsletter that is widely distributed throughout our community and fulfill all of our charter-mandated responsibilities.

Our budget covers payroll, office supplies, telephone, postage, office equipment, etc. We have 48 civic minded Board Members who offer their services to the City of New York for the betterment of our community. We are requesting that our already small budget not be cut.

Conclusion

Community Board 8 continually strives to deliver services to its residents, which is mandated by the City Charter. We continue to fight for our fair share of City services owed to the diverse population of our Community District

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

DISTRICT NEEDS STATEMENT FY/2011 COMMUNITY BOARD NO. 9

Community Board No. 9 consists of four communities, Kew Gardens, Richmond Hill, Woodhaven and Ozone Park. Each has distinct characteristics.

KEW GARDENS is an enclave of tree-lined streets and large homes. The colonial and Tudor style homes are pre-World War II with plots generally 50' by 100' or larger. Mingling with the approximate 1000 private homes are Tudor style apartment buildings of the same vintage, with massive facades, enormous lobbies and inner court yards. There are six story apartment buildings built later. The community is a stable one but needs major street improvements as many streets are still privately owned.

RICHMOND HILL is a community with many multi-generational families. Grandparents, parents and children reside under one roof or within proximately to one another. This is a working class community with strong family and community ties. In the early 1900's, the area was mostly German, Italian and Irish. They are joined by new neighbors from Latin America, Asia and India. The area is rich in tradition and history.

Jahn's Ice Cream Parlor and many historic Victorian type homes give one the sensation of slipping back into time. The Richmond Hill community east of Lefferts Boulevard is in transition. A large Asian population, including Guyanese, Hindu and Indian groups have settled in Richmond Hill East. This area is in need of particular attention and assistance to aid in their assimilation into our culture.

The **WOODHAVEN** community can attribute its growth to Jamaica Avenue that in the early 1800's was a toll road. Many wealthy individuals had summer estates in Woodhaven. It was home to the Union Course Raceway. The area contains a well - maintained housing stock of one and two-family homes. Today, the Jamaica Avenue shopping strip is well known through out Queens.

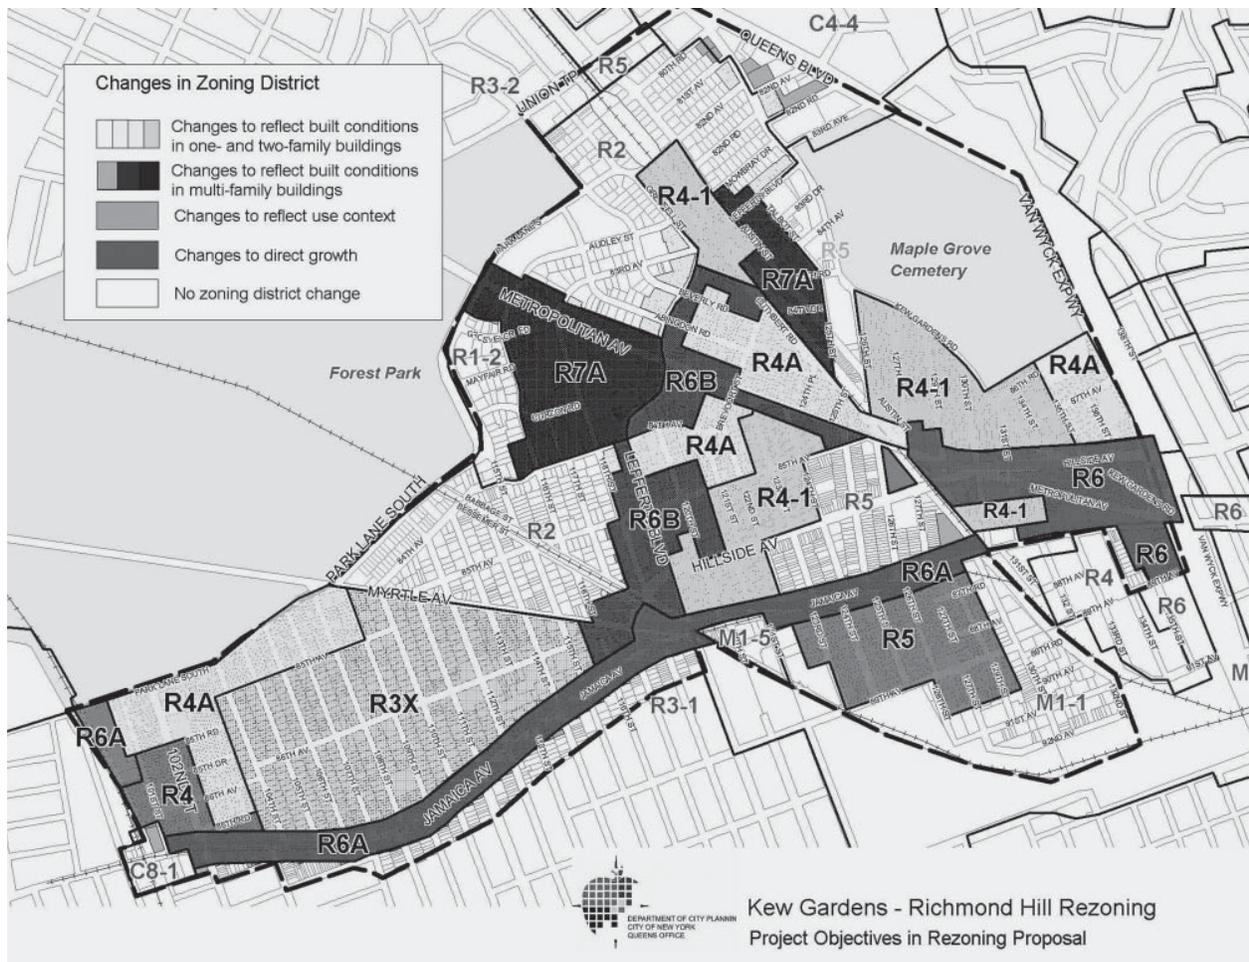

THE OZONE PARK community is one of private homes that experienced major growth decades ago and settled into a longstanding period of stability. Those who settled were of Irish, Polish and Italian extraction. The 101st Avenue commercial strip has the several remaining Italian - American specialty shops, and the area surrounding St. Stanislaus Church still has many residents of Polish extraction.

The Ozone Park commercial strip is in need of assistance. The Woodhaven community has the Greater Woodhaven Development Corporation and a Business Improvement District that are invaluable in upgrading and stabilizing the commercial strip. Both communities have ex-

perienced an influx of traffic and competition due to the Pathmark Mall. The former Service Merchandise Mall located on Atlantic between 102nd and 104th is struggling.. The owner has been put in touch with the Borough President’s Economic Development Office to seek assistance. It is therefore imperative that additional assistance be forthcoming.

LAND USE

The Kew Gardens and Richmond Hill Community prepared and published a history, with landmark designation for both areas as their goal. We met with the Department of City Planning to facilitate the landmark request and a portion of the Richmond Hill Community was in whatever way possible. The Department of City Planning has combined these proposals. In Richmond Hill particularly, many of their Queen Anne homes are in danger as developers buy and demolish them to create attached row housing. In an effort to facilitate this process the Board in conjunction with the Richmond Hill Historical Society proposed a portion of Richmond Hill for a down-zoning. The Department of City Planning incorporated the Kew Gardens and Richmond Hill requests and the rezoning was approved in March 2005. (see map below)

The Woodhaven/Ozone Park community’s agreed to work with City Planning to accomplish a rezoning of both areas. They have solicited volunteered to perform several surveys.

DEPARTMENT OF PARKS & RECREATION

Forest Park The rehabilitation of Forest Park continues to be a priority of Community Board No 9. It is time for proposals put forth for Forest Park to come to fruition, e.g., security for Oak Ridge, correcting erosion along the Bridle Path. All can be completed with

an insignificant outlay of funding. Consideration must be given to concessioning the Bridle Paths. Private for-profit riding stables use Park trails and complain that the trails are not maintained. Without the park to profit from, these stables would not exist. I am again recommending that the trails be operated through a concession agreement.

Continuation of the Forest Park renaissance is a priority. We cannot slide back to the devastation that occurred after the 1975 fiscal crisis. The renovation of Victory Field track is a necessity and we need a multi-use field as soon as possible. The facility is a sports complex and its services are for the ball players, runners, etc.

Oakridge, the former Golf House in Forest Park, built in 1905 and reconstructed at a cost of 2.5 million in 1993, is the headquarters of the Forest Park Administrator's Office and the Queens Council on the Arts. The Forest Park Trust is currently waiting for Mayor Bloomberg to approve the Trust becoming the Permittee of Oakridge. We urge Mayor Bloomberg to approve this as soon as possible.

The Forest Park Band Shell's 3.4 million dollar reconstruction is complete. We have a new state-of-the-art facility with capricious storage, bath and dressing room. The Band Shell is used throughout the summer for concerts and special events and the benches are in deteriorated condition. Attendees are constantly complaining that they are scratched and scraped on the broken benches. We need new benches desperately. The cost estimate last year was \$1,000,000.

Programs at the Bandshell include the Seuffert Concerts and programs sponsored by The Forest Park Trust, Inc. The appeal to all of these programs, introduces many newcomers to the amenities offered at Forest Park. Drastic cuts in programs for the Arts make it difficult to recruit entertainment. We urge increased funding to Cultural and Art programs particularly to those whose cuts exceed fifty percent. A community without art and culture is a dead community.

During the past year the once vibrant, lively Tennis Court area has seen a drastic decline in use. This is due to the deterioration of all the facilities. The Tennis Courts need resurfacing, new netting and plantings. We are witnessing a decline in our parks facilities that we have not seen since the early 1980's. These issues must be addressed immediately if we are to recover at all.

One of our Parks priorities is Funding to restore the one hundred-year old greenhouse for use as a science curriculum education center. The Forest Park Greenhouse is a unique facility within the 543-acre park. The nursery propagates 450,000 plants annually for use throughout the city. Built in the early 1900's, the antiquated houses need to be refurbished. A modernized facility would allow us to offer school and senior groups "hands-on" educational programs. The Greenhouse provides a safe environment for learning to take place. The Program includes growing and planting in Forest Park. Last year 1.1 million dollars was allocated through Borough President Marshall and Councilmen Joseph Addabbo and John Liu. Rebuilding of the existing facility insures a secure and structurally safe learning environment and restores the historic value of the greenhouse.

Forest Park needs a sustainable landscape management program to rehabilitate park entrances, maintain landscaped areas, restore woodlands, and nature trails and supervise a volunteer program. Funds are sporadically available for this program. To secure this investment and continue to restore Forest Park's 543 acres, the Administrator's office recommends continued support for the Landscape Management Program. The program will address the major natural resource problems, maintain and create formal landscaped areas. It will consist of a crew chief, foreperson, and candidates from the Parks Job Training Program. The

Forest Park Trust is committed to this project and will continue to raise private monies to help support it. WE REQUEST FUNDING FOR THIS PROJECT.

The Sobelson Playground, Jackson Pond Basketball courts and Playground, and Buddy Monument rehabilitations are all complete. The Rehabilitation of Jackson Pond/Buddy Monument was completed. Phase II of this rehabilitation should move ahead quickly. The path and stairs around Sgt. Schaeffer Bullet needs funding for restoration.

Rehabilitation of The Marco Giovanelli Playground located on Park Lane South and 102nd Street is an absolute necessity. The park has only received routine maintenance and requires a full rehabilitation all play equipment is in dilapidated, dangerous condition. Both Mary Whalan and Marco Giovanelli playgrounds are listed in the top ten priorities of our Capital and Expense Budget for five years. The importance of playgrounds to a community cannot be overestimated. A deteriorated playground suggests and contributes to the deterioration of the surrounding neighborhoods. Conversely, a new, clean, modern playground that provides activities for children and adults, or simply an esthetic place to sit and rest, enhances the entire community. These two playgrounds reflect horribly on our community. They are safety and health hazards safety because they are in need of paving to correct trip hazards; health, because they both lack basic toilet facilities. Children are forced to relieve themselves by using the park area. Monies must be made available at once to correct this disgusting situation. Consideration should be given to the use of the Street Furniture Franchise that includes 20 Automatic Public Toilets. The APT's could be utilized in Mary Whalan and Marco Giovanelli Playgrounds and would be more feasible financially.

Hopefully we can expect completely rebuilt playgrounds and a lovely new Forest Park. The question than arises how will we maintain them. Maintenance and recreation personnel are minimal. Unless new personnel are hired soon, all the rebuilding will have been for nothing. We no longer have RD's and Parks M&O personnel are in short supply. Additional personnel must be hired.

Forest Park sponsors a Free Sports Clinic twice a week. It also provides instruction in, Karate, Basketball, Skating and a recently added, New Bike-Driver Education Program. To participate kindly bring your skateboard, and Helmut. For further information on dates and times call 718-235-4100.

Policing of parks to preserve and protect citizens and equipment requires the hiring of Park Enforcement Officers. When they are on the job our parks are safe and secure. We request additional officers and consideration of peace officer status for their title.

PEP Officers patrol Forest Park on a limited basis. Vandalism, graffiti and illegal dumping occur regularly. We need 2 PEP Officers year round to prevent these problems. We must have at least two additional officers to work along with the 102 Pct. in patrolling the park.

This Board boasts some of the oldest and largest trees in New York City. Tree lined streets are an attractive amenity to any community but not properly cared for and maintained they become deteriorating relics. Funds must be allocated for tree pruning and removal of dead trees.

Forestry Division cannot perform the monumental task of tending to our district's trees without the manpower and equipment needed. The reduction of the climbers and pruners is devastating. We urge funding, equipment and manpower to enable them to tackle the growing backlog.

A recent priority is a request for the restoration and preservation of “Civic Virtue” a monument next to Queens Borough Hall by Frederick MacMonnies. This monument is now in an advanced state of decay and has been for years. The Community Board voted to include the project in its top 10 Capital and Expense priorities at its meeting of June 13, 2006. The Fine Arts Federations sent a letter of strong endorsement for this action on April 7, 2007. It continues to be a top priority of this Board in 2009/10. To date it stands deteriorating at the corner of Queens Boulevard and Union Turnpike a Public testament to the lack of interest on the part of the legislators who pass it every day.

BUILDINGS DEPARTMENT

The computerization of the Department of Buildings has eliminated an enormous amount of paperwork. The Community Boards’ access to information is as close as the BIS system. The policy established to inspect sites with a District Manager or staff member, once a month is working. Hot spots for each Community Board are personally addressed by an individual who is aware of the circumstance. The program needs expansion.

The follow-up on The Department of Building Safety violations is non-existent.. We need a system of follow-up that does not only issue fines and violations, but a one that corrects and cures them.

Illegal conversions severely and adversely impact all city services. Single family homes on a residential block of fifty homes converted illegally to three family houses result in three times the amount of garbage, a serious lack of on street parking facilities, and overcrowded schools that cannot provide the proper services to their students. Public transportation problems escalate and most importantly, close living conditions create animosity , adversity and additional problems for the police. This all occurs without the city’s knowledge.

From 2000-2003 the Queens Department of Buildings issued 4,860 permits for new two family Privately owned residential buildings, and 3,424 permits for three and four family buildings. Our Borough continues to grow at an alarming rate. These numbers are for legal construction. The Board continues to seek out and report illegal construction. Stop work orders on illegal construction must be diligently enforced and acted upon.

COMMERCIAL REVITALIZATION

In 1990 this Board tried desperately to fight the renewal of the twenty-year lease for the Boundary Fence Company. They lease 50,000 square feet of prime space on Jamaica Avenue between 131st and 132nd Street in Richmond Hill. They have spread like a cancer throughout the community polluting and disrupting as they go.

The Reconstruction of Jamaica Avenue provided new streets, curbs, sidewalks and trees. Until we can remove this blight known as Boundary Fence, development of the Commercial strip is stymied. Their pollutants continues to permeate the community endangering health and fouling the air.

I was informed that they are currently seeking to purchase the property. This cannot occur. The Jamaica Hospital Medical Center has worked hand and hand with this Board to build up Jamaica Avenue. They constructed a Women’s Center in the abandoned post office and rehabilitated several abandoned buildings for use as office space. All this was accomplished cooperatively with the Community Board. The Jamaica Chamber of Commerce under contract with Department of Business Services undertook an audit of the area to from 143rd Street to 126th Street on Jamaica Avenue to determine the feasibility of attracting pharmaceutical, medical and support related business to the area. Certainly a medical related busi-

ness or a High School for students interested in either is a more productive and appropriate use for the site currently occupied by Boundary Fence.

Boundary Fence sits in the middle of the Avenue, never participating or contacting the Community Board, only trying to circumvent the process as often as they can. They contacted several legislators and the Borough President's economic development personnel in an attempt to purchase the property secretly. They pay an unprecedented \$0.72 a square foot for the privilege of destroying the surrounding area.

The Company works twenty-four hours a day, uses noxious chemicals, constructed an oven that operates at night adding to the air contamination and pollution. The fumes permeate the air causing a health hazard to the surrounding community. Residents state the company hires illegal aliens who work under horrendous conditions. Complaints have come in regarding their trucks blocking the street, noise and a general disruption of community life. There are many uses for this site that can uplift the economy of the surrounding

Commercial strip and benefit the community. For instance, retail development, additional hospital use or more importantly as a site for an elementary school. District 28 is overcrowded with 100% capacity and is under a mandate to take students currently housed in District 27 which further demonstrates the desperate need for additional seats. A school is a positive and necessary addition to our community. With 50,000 square feet of space we could build a school and possible retail stores. The limited number of jobs provided by Boundary Fence can be replaced by those in retail or in the school.

On 60,000 square feet The Division of High Schools is constructing a School For Architecture and Urban Planning with 931 seats. We can certainly create a model school and a retail strip-mall on 50,000 square feet.

The Boundary Fence operation has outgrown its location. A site in an Industrial Park would benefit both the community and the fence company. It is outrageous to continue this noxious use in a residential/retail community.

The District Manager has been working with The Greater Jamaica Development Corporation for over ten years in an attempt to expand the Empire Zone into Community Board 9. The expansion was completed and the Businesses/Manufacturers are now eligible for reduced taxes, breaks on NY State Corporate Tax and Sales Tax as well as low cost financing.

The 2000 Census revealed a startling population growth of 50,000 in this area of Richmond Hill East. Much of that population is from India and Guyana with large families with extensive educational needs. We must address these needs.

HUMAN RESOURCES ADMINISTRATION

Since welfare reform initiatives began, the City has had great success in moving people from welfare to work. Since Fiscal 1995, the number of public assistance recipients has decreased from nearly 1.2 million to 429,900 in June 2003. As more people find jobs, those remaining on public assistance have more barriers to employment. The percent of public assistance cases that are partially or fully unable to work rose from 54.7 percent in June 2002 to 56.4 percent in 2003. These hard core welfare recipients must be re-evaluated, re-categorized and placed in a work environment to become productive workers.

DEPARTMENT FOR THE AGING

Community Boards Nos. 9 & 10 have a large senior population and four Senior Centers located in Woodhaven, Richmond Hill, South Ozone Park and Ozone Park serving 500 meals daily.

Our homebound elderly population relies heavily on the “Meals on Wheels” Nutrition Program. This program delivers well-balanced meals to the frail elderly who are unable to prepare nutritional meals for themselves. The program must be increased to meet the demand of our ever growing senior population. We are in desperate need of additional vans and drivers to deliver these meals.

There is a need to support the many churches, synagogues and private organizations that fund senior programs. The programs also provide recreation, social and educational programs to the senior population. Without these groups many seniors will spend lonely days shut-in at home with nothing to do. Funding must be made available for our seniors.

CHILD CARE

For years we searched in an effort to bring affordable Day Care to Board 9. We are still searching. There are several small programs and some Home Day Care slots but they are insufficient and cannot fill the need. At a time when two parents must work to care for the family, affordable day care is a necessity.

FIRE DEPARTMENT

Queens continues to be short changed on several Fire Department programs, i.e. a dedicated Juvenile Fire setter Program and an Arson Task Force for Auto Crimes. Last year we noted that the Borough lagged far behind Manhattan, Brooklyn and the Bronx in the installation of Emergency Reporting System Boxes.

Many of our 221 firehouses are turn of the century buildings that need upgrades such as new roofs; apparatus floor replacements, waterproofing, pointing, etc. We request specific consideration be given to these requests.

This Board has a large immigrant population, many living in illegal conversions ripe for fire. We need a Fire Prevention Task Force to deal with this. The task force should include Department of Buildings, Consumer Affairs, Police, etc.

Funding is requested to purchase smoke detectors and carbon monoxide detectors for distribution to the public throughout the year. Also, the Fire Department has developed a CPR Training course for the public. This is a life-saving program offered free of charge. We support the FDNY requests for funding to purchase 10,000 “CPR Kits” to be given to each individual taking the course. Use of the kits will enable the fire Department to “train the trainer” as the kits can be used by the public to teach CPR as well.

POLICE DEPARTMENT

The Board seeks a change in the allocation formula for the assignment of Police Officers. The current allocation is based upon an analysis of statistics that excludes many Quality of Life complaints.

Pocket problem areas in the 102 Pct. require special attention. Jamaica Avenue, 85th Street to the City Line 101 Avenue, 75th Street to City line and are areas that have drug activity and Quality of Life issues. The 2002 Annual Report on Social Indicators shows the 102nd Pct. Ranking 18th out of 123 Precincts, Citywide in crimes against properties and persons. We

have a total of 3876 major crime index for the year ending 2003. We finished the year with a 3.2% reduction in crime vs. 8% in 1998. We require the assignment of a sufficient number of officers to the 102 Precinct Detective squad to investigate Robberies. Despite the decrease in crime, the 102 Pct. recorded 136 Robberies just six months into 2006. If the trend continues by December of this year we will have a record of 672 robberies. Due to this large case load additional Detectives are required to investigate and further reduce crime.

Allocation of radio cars for supervisors and police officers is a necessity. The supervisors do not have supervisory capabilities without autos. An increase of eight vehicles is required in order to maintain a running fleet for patrol. Currently the 102 Pct. has 13 RMPS assigned. The 102 Pct. receives one of the lowest allocations of RMP'S (radio motor patrol vehicles). The precinct requires unmarked vehicles for special operations i.e. prostitution, surveillance, etc. One additional van is needed to transport Youth truants and an unmarked nondescript vehicle for undercover officers. In order to curb Grand larceny auto a vehicle equipped with Lo-jack is needed to track and arrest the perpetrators.

The two youth officers and the 3 Domestic Violence Officers, and one Domestic violence Sgt. share one vehicle. We need two additional vehicle to better serve the community. The Community Policing Unit needs two additional Officers and one for the Domestic Violence Unit. We again request additional scooters for the 102nd Precinct. Currently we have only 2 Two-wheel, (one out of service) and 8 three-wheel scooters assigned. Our regular patrol had four but one is out of service.

The Precinct is responsible for patrolling 543 acres of Forest Park. Three wheel-scooters are required for this patrol. Scooters are effective during the school year at Franklin K Lane High School and JHS 210. These vehicles add to the effectiveness of crime prevention on our commercial strips; Jamaica Avenue, 101st Avenue, Queens Boulevard and Lefferts Boulevard. We request A minimum of nine scooters . Three for summonses, three for traffic and three for Forest Park.

Bicycle patrols of Forest Park help the Police fight crime in areas inaccessible to scooters, horses and cars. The Bike Patrol increased to everyday from 8 am to 4 pm and 4 pm to 12am. Increase in patrol brings a need for additional equipment. We require twenty-three Marked Bikes for patrol access and visibility.

Our Civilian Patrols throughout the precinct brought about a 30.10% reduction in Grand Larceny and Grand Larceny Auto last month. We request four (4) radios to assist the volunteers in providing information during surveillance. This saves precious time by not calling 911 but calling the Precinct direct.

With the Narcotics Initiative in the 103rd on our eastern border and the 75th on our western border the 102nd Precinct shows a demonstrable increase in drug trafficking. Our borders are under siege and we need to fight back. We must have the Narcotics initiative now.

Quality of Life Enforcement

The number of Quality-of-life enforcement complaints increased over the years. Complaints given to the local Police Precinct are assigned a "Low Priority" and the complaint is not responded to. The result is that many illegal actions remain uncorrected and unchallenged which encourages the proliferation of these violations. To resolve the problem, I recommend expanded traffic control and enforcement.

BOARD OF EDUCATION

C.B.#9 students deserve the same amenities and services extended to other students in the City of New York. They deserve education in a building that is at least up to minimum standards. We continue to advocate for monies to be allocated for construction & maintenance of Schools. In District #27 we have more than 37,000 students who are attending schools in overcrowded & run down school facilities. Over crowded conditions have forced families to have one child in a neighborhood school and another to be traveling long distances(not to mention that the children could be as young as 5 years old). The Youth & Education Committee is concerned with the impact continued budget cuts have on the districts ability to provide basic services to our students.

We continue to advocate for affordable Day Care (which is non- existent in CB#9) and Pre-K programs in our public schools. We protest the existence of opening fees for the use of Public School buildings. Funded programs spend a substantial percentage of their budgets on opening fees which decreases the amount available for direct service. We request that the Department of Education provide enough money to open all schools in School District Nos. 27 and 28, that are located in CB#9 (after school and evening)as well as citywide.

These schools are P.S. 56, 60, 63, 64, 66, 90, 97 and JHS 210, all in District #27, Region 5, P.S. 54, 99 and 90 in District #28, Region 3. In addition, Richmond Hill High School and Franklin K. Lane High School should be available for community use on a full time basis.

THE DEPARTMENT OF YOUTH AND COMMUNITY DEVELOPMENT/YOUTH SERVICES

Recent Changes to the Department's funding streams and how funds are allocated are of major concern to Community Board #9. Particularly the Out of School Time Initiative (OST) which convened government officials, providers, and funders of youth services, in order to design a more coordinated and cost effective system of after school service delivery. DYCD claims its OST system will focus more attention on full service programming with accountability and quality, in lieu of spreading resources thinly to serve large numbers of children in one shot programs. The notion that resources are spread to thin is a farce.

It is not clear as to what system DYCD looked at before, but in *CB#9 and many Communities in NYC; Community Based Organizations that were funded through the department were always accountable to DYCD. It is DYCD who has neglected their responsibility to monitor programs that they funded.* Instead, Communities throughout the City are now suffering because DYCD feels that those programs funded in the past, are not in communities of need. How absurd!!!

We are concerned that the Community Board has be cut out of the Planning process and that we lost our Community Share/ YDDP allocations. In its recent OST RFP DYCD funded 95 YDDP programs as opposed to 256 YDDP programs in the previous RFP (released in FY 2003). Community Boards have been involved in comprehensive planning for youth services in their districts for over 20 years, and have worked closely with Community Based Organizations and DYCD.

One thing we must not loose sight of is that YDDP Funding was set up for all youth in NYS/ NYC no matter what their income level may be, and is based on Community Based programming to meet the ever changing needs of that community, and to provide positive places for recreation, tutoring, cultural education, delinquency prevention, special needs populations, i.e. Immigrant youth, disabled youth, etc.

It is imperative that Community Boards and The Community Citywide retain a voice and role

in this process. **Community Boards know the needs of their communities and have a charter mandate to plan for youth services.** Community Board's possess unique knowledge of its neighborhoods and have connections to community groups, civic organizations, schools, local government, hospitals, libraries, community based organizations, etc. There must be a place for the Community Boards and the Community in the planning of youth services that will after all, be serving the youth of our neighborhoods.

It is the Charter Mandate of the Community Board to assess the impact of local services in their districts, and it is The Department of Youth and Community Developments Charter Mandate (Section 733c- Powers and Duties) to plan and coordinate neighborhood services in conjunction with Community Boards and Youth Services Planning Committees.

Community Based Organizations have informed CB#9 that filling out the RFP was very difficult and technical. The youth funded groups in CB#9 are frustrated because they cannot afford professional grant writers. This has also caused many CBO'S to forgo the process altogether. We understand that technical assistance is available at the Department of Youth and Community Development, but many groups haven't the manpower nor the means to go to DYCD headquarters (as many of these groups are small volunteer organizations).

The Education & Youth Services Committee is encouraged by Commissioner Jeanne B. Mullgrav's reference to working to improve it's partnership with the City's Community Boards and mention of Comprehensive planning efforts. Although recent changes to DYCD staff has been positive and communication between the Community Board and the department has improved, there have been many problems with DYCD'S administrative operations. **Specifically as it relates to the release of RFP'S, implementation of special programs, namely the Summer Bus Program, or lack thereof. This year's summer bus program was changed as groups could only qualify for one bus trip per group. In previous years this was not the case.**

The Community Board and the Education & Youth Services Committee believes in the concept of Comprehensive Planning for Youth Services at the local level as mandated by the City Charter. We support the Comprehensive Planning Initiative, the Letter of Agreement and the prerogative to hire a Youth Coordinator specific to each individual Community Board. This independence is necessary to preserve and ensure that each Community Board has the capability to plan for and coordinate youth services across agency lines. In turn it enables the youth and families in each community board to access their fair share of available services.

The Ozone Park Community is under served in the area of youth services. We need Head Start Programs. To date, there is one Program in the Northern portion of our community with limited numbers served. The District is overlooked again and again in children services; Head Start and Day Care. The situation needs to be rectified.

C.B.#9 requests an increase in both City and State funds to address the presence of drugs and violence among our youth. We need school programs to deliver preventive and educational services to address alcohol and substance abuse and violence prevention to our residents.

In July 1995, the Youth Coordinator line was cut from the city budget. We are a community with an ever growing and diverse population. This has impacted on the services in our communities. Our needs changed with our population. Although we were able to re-hire our Youth Coordinator she has additional responsibilities and we maintain that the Youth Coordinator position is a full time unique position.

DEPARTMENT OF CULTURAL AFFAIRS

The Needs Assessment conducted by the Youth Coordinator among existing Youth Programs and services for youth in this district found that C.B.#9 receives no cultural workshops, exhibits or performances throughout the schools. Although there is an abundance of agencies throughout the City which perform at various schools, C.B.#9 is excluded year after year. The limited amount of Community Share allocation through the NYC Department of Youth Services does not allow the Community Board to fund all needed programs. We request the Department of Cultural Affairs arrange for C.B.#9 to be served within its City contracts with cultural service providers.

The Kew Gardens community is the only community in Board 9 that does not have a library. We request an inspection of the community with a view toward site selection.

DEPARTMENT OF SANITATION

For several years we requested The Home Base Communication System for Sanitation District 9. I am happy to report that in November of last year it was provided to them.

In an effort to help our Sanitation District into the age of technology we donated our old used equipment to them. Our antiquated copy machine somehow lasted a few more years at Sanitation thanks to several talented workers. Since its demise, the District's Route sheets are again regularly produced at our office. A worker takes time to travel, park and copy the sheets. A copier on premises permits this chore to be done in several minutes. Purchasing a copier is cost-effective, time-saving, and the efficient thing to do. The same applies to a fax machine. What office today exists without the ability to communicate quickly by fax? District 9 in Queens, that's who. A supervisor can be more effective, can spend more time supervising if given the proper communication tools. I can not understand why all city agencies, including The Department of Highway, Fire Department and the Police Department have this equipment but not The Department of Sanitation Kindly provide those tools for our garage.

We request continuation of manpower and the basket truck seven days a week. Many commercial strips are open Saturday and Sunday. With the basket collection our scorecard rating remains about 93%.

The Department has a need for a mechanical broom three times a week, in addition to the one we have, to maintain the industrial areas.

Department of Sanitation Enforcement is important to any community. The Department of Sanitation Police are effective in ensuring the cleanliness of the area. An increase in their numbers is requested.

This Board has malls that require year-round cleaning. Atlantic Avenue from the Brooklyn Queens Border to Van Wyck and Woodhaven Boulevard are cleaned an average of once a year. Mall Cleaners must be provided to QW9 on a regular basis for safety as well as beautification. During the spring and summer we need regular spraying of the Weeds that still spring up on the center mall on Atlantic Avenue, particularly between Lefferts Blvd. and the VanWyck Expressway.

District 9's Garage is home to all their personnel and equipment. The current garage, is in a state of disrepair and does not meet their needs. It is antiquated, falling apart, the garage door jams and the building is an eyesore to the surrounding community. After a five year search we located a suitable location for our garage. It is a large unutilized parcel of

property on 121 Street between 89 Avenue and Atlantic` Avenue, (entrance next to the Fire Department at 91-45 121 Street). We request an immediate survey of the site with a view toward purchase or condemnation.

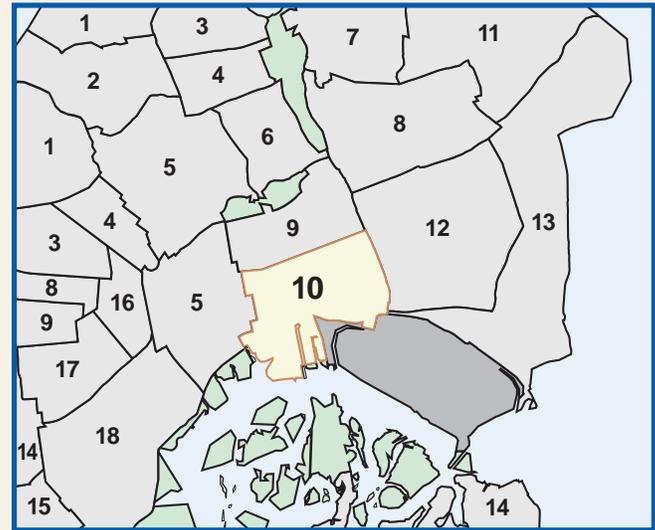

C.B.#9 looks forward to today's needs becoming tomorrow's reality.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

Karyn Petersen
District Manager

STATEMENT OF COMMUNITY DISTRICT NEEDS FISCAL YEAR 2011

Community Board 10 is located in Southwest Queens. The district is bounded by Liberty Avenue/103rd Avenue on the North, Van Wyck Expressway on the East, 165th Avenue and JFK International Airport on the South and the Brooklyn/Queens Line on the West. Within the Board's boundaries are all of the Howard Beach communities located within Zip Code 11414; all of those communities located within Ozone Park Zip Code 11417; all of the South Ozone Park Zip Code 11420 communities; and approximately half of the Richmond Hill South Zip Code 11419. Community Board 10 encompasses 6.25 square miles and has 6.9% of the 2441 miles of Queens streets.

According to the 2000 Census, Community Board 10 is home to 127,274 persons. That population reflects an approximately 15% increase which took place during the years between 1990-2000. That increase in population was among the largest in Queens during that decade and the actual increase may well be greater due to undercounting which may have occurred during the 2000 Census. The map below indicates a less than 50% response rate to the Census in some areas of Community Board 10. There is a need to heighten census awareness and participation in 2010 to insure a more accurate enumeration.

Source: U.S. Census Bureau
Population Division - New York City Department of City Planning

No single group comprises a majority population in Community Board 10 as a whole. The 2000 Census reported that the population was 34% White; 17% Black; 21% Hispanic; 13% Asian; 10% of two or more races; and 6% of other races. Data found in NYU's Furman Center publication, *State of New York City's Housing and Neighborhoods 2008* estimates our population to be 138,052, and the Census Bureau's 2005-2007 ACS demographic estimates indicate Community Board 10's population to be about 129,000 (with a 5.5% margin of error). Estimates are that our population is now approximately 29% White; 18% Black; 20% Hispanic; and 19% Asian. It should be noted that about 11% of our population reports to be "of some other race." The population in Community Board 10 is diverse, but is more balanced, in terms of race/ethnicity, than are some other areas in Queens. According to the Furman Center publication, *State of New York City's Housing and Neighborhoods 2007*, we are "the most racially diverse community district in the city," and our area "witnessed the second greatest increase in percentage of immigrants of any district in the city" between 1990 and 2006. In its *State of New York City's Housing and Neighborhoods 2008* publication, the Furman Center data again reports that Community Board 10 is the city's most racially diverse district.

We will likely see another significant population increase reported after the 2010 Census. The Asian population in Community Board 10 consists primarily of persons of Indian ancestry who migrated here from countries in South America and the Caribbean region. It is very likely that many of those who responded to the 2000 Census as being of “other races” would add to the district’s Asian population. We believe a more accurate estimation of that part of our population would be approximately 28-30%.

In 2000, about 40% of our population was reported by the Census as being foreign-born with approximately the same percentage of the population indicating a limited proficiency in the English language. The 2005-2007 ACS data reported that approximately 46% were foreign-born with 32% speaking a language other than English. Estimates are that Spanish is spoken by 17% of our residents. According to ACS data for 2005-2007, approximately 54% of those speaking a language other than English, speak Spanish. Estimates are that 76% of those foreign-born migrated from Latin America. That would include most of our foreign-born Hispanics and many of our non-Hispanic foreign-born whose native country is Guyana which is located on the continent of South America. ACS data for 2005-2007 estimates 80% of our foreign-born residents entered prior to 1990 and 57% have sought and become U.S. citizens. The map below indicates the census tracts within Community Board 10 where a majority of the population in each tract is foreign-born, as reflected by the 2000 Census data.

Given the continuing growth in the Queens’ foreign-born population, it is reasonable to assume Community Board 10’s foreign-born population has also grown since 2000 and that both our Asian and Hispanic populations will show increases.

In 2000, Census data indicated that approximately 15,000 residents in about 11,000 of our homes were over the age of 65. ACS data for 2005-2007 reports that approximately 11% of the population is over age 65 and approximately 16% is over age 60. The largest concentration of persons over age 65 is in the Howard Beach neighborhood. About a quarter of our population is under age 18 with 4 of our census tract areas showing more than 30% of their populations as under age 18 in 2000. Three of those are located in South Ozone Park and one is in Ozone Park. Data indicates that a higher percentage of our households include children under age 18 than many other Community Board areas do.

Dividing the overall geographic area of Community Board 10 into segments gives a clearer understanding of the community’s demographics. For the purposes of this Needs Statement, we have divided the Board into three geographic zones.

The area in the map that follows is the northeastern segment of the board. It is bounded by 103rd Avenue on the north; Van Wyck Expressway on the east; Rockaway Blvd. on the south; and Crossbay Blvd. on the west. (A small part of the area extends just west of Crossbay Blvd.) This segment is comprised of 19 census tracts. The northern portions of tracts 112 and 106, which jut out on the map, are part of Community Board 9. The area depicted on this map includes the Richmond Hill South community as well as parts of Ozone Park and parts of South Ozone Park.

Approximately 44% of the Board’s (Census 2000) population resides in this area. The majority (approximately 55%) of the residents throughout this area are foreign-born. Eleven of these 19 tracts each have a majority foreign-born population. There is no single group, though, that comprises a majority population within this geographic area according to 2000 Census data. Approximately 21% of the population is Hispanic, approximately 24% is Black, and probably 45% is Asian, predominantly of Indo-Caribbean backgrounds. Both the Asian and Hispanic populations in this area will likely show increases after the 2010 Census. This area of

Community Board 10 saw the largest growth in population between 1990-2000. Between 1990 and 2000, the population of two census tracts in this area increased by more than 40% and five others each showed a population increase of more than 30%. Half of the tracts in this area have more than 20% overcrowded housing units. The population, overall, in this area reflects the least number of elderly (approximately 8%) within Community Board 10. About 27% of the population is under age 18, higher than the Board area as a whole. There is very limited parkland and/or open space in this area. There is a need for additional support for youth services in this area.

The next map depicts the western segment of Community Board 10. It depicts the area that is South of Rockaway Blvd. between the Brooklyn/Queens borough boundary and Aqueduct Racetrack's eastern boundary (114 St.). There are 11 census tracts in this area. (Most of census tract 864 is the landmass of Aqueduct Racetrack. A part that tract in its northwest section is outside the racetrack and is populated.) The area includes all of Howard Beach and most of that part of Ozone Park that is located in CB10.

Approximately 39% of the Board's (Census 2000) population resides in the area shown above. The majority population in this area is White (68%). About 18% of the population is Hispanic and about 12% is Asian. The population within this area increased less dramatically than the northern segment of the Board did between 1990-2000, but appears to be increasing more at present. Two census tracts increased by approximately 30% and two other tracts increased by 27-29%. Only one tract (50) shows a rate of overcrowded housing units over 20%, but complaints of illegal conversions are increasing, particularly in the northern sections of this segment. Future data will probably reflect more overcrowding. This area has the Board's highest concentration of

residents over age 65 and the smallest concentration of those under age 18. There is a need for additional support for services to the aging. In the spring of 2009 New York State selected Catholic Charities to redevelop a building in this area, heretofore utilized for the developmentally disabled, into affordable senior housing. Community Board 10 hopes the Department for the Aging will work with Catholic Charities to incorporate a Senior Center in it to serve the facility's residents and the senior population in the surrounding neighborhood.

The next map depicts the southeastern segment of Community Board 10, which is located south of Rockaway Blvd to the east of Aqueduct Racetrack. There are six census tracts within this area, all of which are in South Ozone Park.

About 17% of the Board's (Census 2000) population resides in this area. About 40% of the residents in this area are foreign-born. One census tract (840) showed an increase in population from 1990-2000 of 41%. One other tract saw an increase of 37%. The population is approximately 17% White, 30% Black, 25% Hispanic, and 28% Asian. Only one census tract shows that more than 20% of the housing units are overcrowded. Approximately 10% of the population is over age 65 and about 27% is under age 18. There is a need for additional support for youth services in this area.

Overview

Ozone Park, Richmond Hill, South Ozone Park and a portion of Howard Beach started to attract small home construction during the latter half of the 19th Century and developed gradually. About a third of the area's homes were constructed prior to 1939. Another spurt of development took place in the newer sections of Howard Beach during the 1950s and 1960s and to a lesser degree in South Ozone Park. Homes and streets in many parts of area were constructed below grade. When sewer construction and street reconstruction projects move forward, there are many grade problems to carefully resolve in order to mitigate, as much as possible, adverse conditions for both residential and commercial communities.

New construction took place throughout the Community Board and many existing homes were completely renovated in recent years. The current economic climate seems to have slowed the rate of new construction and renovations. There are approximately 41,500 housing units with about 64% of them owner-occupied. Over the last decade housing units within the Community Board area have increased by approximately 15%. We believe the number of housing units (many statistically not evident as they are the result of illegal conversions not authorized by building permits) may be higher. It is imperative that delivery of city services keeps pace to meet the needs of these new residents, many of whom are immigrants.

Residential structures are mainly (55%) one and two family homes with some cooperative low and hi-rise apartments (limited to six stories), and low and hi-rise condominium apartments (also limited to six stories).

Affordable rental apartments are minimal. Generally, housing stock has been well maintained over the years because of the high percentage of owner occupancy, but that seems to be changing. More of what were once owner-occupied housing units are now rental units. In 1970, about 69% of our housing units were owner-occupied as opposed to about 64% now. There is concern that property maintenance may deteriorate especially on properties where there are absentee landlords. The high rate of residential foreclosures is of concern. Some data indicates that the notices of foreclosure rate per 1,000 1-4 family properties is over 25% and there has been a high rate of high-cost home purchase/refinance loans in our Board area. The actual number of foreclosures has increased. There are indications of abandoned as well as vacant bank-owned properties in disrepair in our area.

Stores on the commercial strips provide the amenities homeowners look for within convenient proximity of their homes. People who live in the Community Board area own many of these stores. Crossbay Blvd., Rockaway Blvd., Liberty Avenue, and Lefferts Blvd. are the major commercial strips.

The area is serviced by four public libraries and a wide assortment of houses of worship. There is concern that when new houses of worship are built in established residential areas sufficient parking is not provided to minimize negative impacts. There is also concern when existing residential properties are converted to become houses of worship also not making provision for parking of vehicles.

Many of our schools are severely overcrowded. There are neighborhood parks and jointly operated playgrounds adjacent to some of the schools. New schoolyard play spaces are planned. There is concern that appropriate inclusion of community residents beyond the school community is lacking in the planning stage as these new schoolyard play spaces move forward. There are also some ballfields, which service many of the South Queens baseball, soccer, and football teams. There is a need to develop fields for additional sports activities, such as cricket, played by many new residents.

AGING

Services to seniors need to be increased as the “baby boom” generation ages. We anticipate an increase in our elderly population in coming years. The number of meals served should not be the determining factor regarding a Senior Center’s performance. Many of our seniors attend and enjoy our centers without the need for a meal being the driving force behind their desire to attend and participate in each center’s activities. Centers for seniors must continue to serve small geographic areas and be located within the neighborhoods familiar to our elderly populations. The practice of locally provided home delivery of hot meals to the frail elderly must continue to be available. An additional senior center needs to be developed at the soon to be constructed senior housing facility in our Board area to better serve our senior population.

BUILDINGS DEPARTMENT/CODE ENFORCEMENT

Illegal residential conversions continue to escalate to an alarming degree throughout the Community Board area. Service delivery deteriorates as a result because the people living in illegal apartments often do not statistically exist. The significant population increase during the 1990s (107,768 to 127,274) is clearly one indicator of this problem. School overcrowding is another indicator of the same problem. The levels of overcrowded housing units reported are also indicators of the problem. It is essential that this very serious problem continue to be recognized as such and, more importantly, that it be better addressed. Illegal uses, whether commercial or residential, must not just be cited; they must not be allowed to continue.

In all parts of the district, building code and zoning violations are a main concern for residents. There is extreme dissatisfaction expressed among residents and a general perception exists that building code violations are not being adequately addressed. There must be personnel provided sufficient to insure adequate building inspections of all buildings on an ongoing basis. There is also a need for additional inspection and enforcement personnel to insure that all building alterations, both residential and commercial, are properly permitted, constructed to code, and are actually being constructed in accordance with the approved plans.

Another issue of significant concern is the construction of new homes on lots where existing homes have been

totally or partially demolished. Residents continue to report that oftentimes what is newly constructed purportedly as a two-family home is in reality a three or four family dwelling. Sufficient personnel is needed to insure adequate inspections during construction. Residents also continue to report that renovations said to be alterations are, in fact, demolitions followed by new construction. There is a need to review and further alter the current practice of self-certification. It is imperative that the Buildings Department ensure that what is actually constructed is that which is indicated on the plans and permits and that the actual construction is safe. When what is constructed is found not to be that which was permitted, the Buildings Department must order and make sure that the illegal construction is removed in a timely manner. Residents continue to report that even when violations are issued, the illegal conditions remain uncorrected.

During FY2001-FY2008 a total of almost 17,000 Priority B complaints were made to the Buildings Department via contacts by residents to the agency directly, through 311, through elected officials, or through the Community Board. The majority of those complaints dealt with illegal conversions or issues such as work without permits.

There is a need to better communicate the safety issues that the city's Building Code seeks to address. Given the high rate of immigration into Queens from other countries, many of the dangerous occupancies and some of the "do-it-yourself" dangerous construction by owners may not be intended to skirt the rules, but may well just reflect the acceptable practices common in their home countries. A better effort is needed to educate those newly arrived as to the necessity in New York City for the rules and codes that exist and the obligation of a property owner to comply with those codes.

To some extent, it is our view that much of the push to downzone residential areas in Queens is driven by the failure to appropriately enforce and gain compliance with existing building code and zoning requirements. New housing is needed. However, that need should not be met by destroying the character of existing communities, which lack the necessary infrastructure to accommodate all of their one family housing units becoming two, and in many cases, three and four family units.

COMMUNITY BOARDS

The City Charter mandates input from the Community Boards on many items as regards land use, community planning and related professional skills. This requires a degree of knowledge on an ongoing basis that most Boards do not have. Department of City Planning and Borough Hall staffs are not always available for ongoing dialogue. While the Charter states that Community Boards may have the services of a planner, there is no provision to pay for these services. The ability to afford such professional staff without our reducing other staff or OTPS spending would enhance land use decisions.

Each Community Board must of necessity acquire the language and operation of each Mayoral Agency. Community Boards very often deal with more than one agency at the same time regarding community issues and capital projects. Ongoing dialogue could move each capital project through faster thereby decreasing residential inconvenience. Ongoing dialogue could also save money by preventing delays due to lack of proper knowledge about a construction site.

Community Boards have been "treading water" in regard to operating expenses and service contracts. Now we are in danger of "drowning." Telephone use costs, postage, equipment service contracts, and other costs are ever increasing which leaves little room, among other things, for essential upgrading and expansion of our computer system to today's standard. It is essential that Community Boards have the necessary technology and training to maximize use of that technology in order to communicate more effectively with other city agencies.

Individual Community Board offices are mainly in locations isolated from other government offices. When equipment is out of order it is not possible for Community Boards to utilize a fellow governmental office located upstairs, downstairs or the building next door. Our ability to operate effectively ceases when equipment is not functioning properly. Removal of service contracts, telephone and postage costs from the Community Board budget would assist us in fulfilling our charter mandated functions. Community Board budgets have not kept pace with increasing costs. Across the board budget cuts, while perhaps fair in concept, in actuality impact on our ability to

provide service more than they impact on larger agencies. Our budgets are small in relationship to other agencies and our work is carried out not only with city dollars in our budget but by the pro-bono service to the city of our members as well. There is a need to not diminish our ability to serve our communities by cutting our small budgets.

With the initiation of the 311 complaint system a need has developed for a system to better coordinate its function with that of Community Boards. Information needs to be shared with Community Boards on a timely and regular basis as to the type and number of complaints received by the 311 system along with what action was taken by the agency to which complaints were referred. That need has been partially addressed by the response of DoITT to the requirements of Local Law 47. However, while useful, those reports are not sufficient. More detailed information would be helpful. It is difficult for Community Boards to adequately assess community needs, identify trends exhibited by complaints, or prevent duplication of effort if complete information is not available to us in a timely fashion. At present, information provided can only be evaluated from a geographical perspective to the Zip Code level. In order for us to utilize much of the information to better assist residents, addresses of complaint locations, not information regarding the complainant, would be helpful. Historically, Community Boards have tracked long-standing problems and provided agencies with local knowledge related to such problems, many of which involve more than one agency. With the institution of the 311 system it is difficult for Community Boards to do that type of follow-up on such complaints. The 311 system should also have operators dedicated to and specifically trained to deal with calls initiated by Community Boards. Community Board staff time is often unnecessarily consumed by having to repeat information during contacts with 311. Our staffs know which agency a complaint must be directed to and should be able to be connected with appropriate agency personnel without delay or difficulty.

ECONOMIC DEVELOPMENT

Our local development corporations and business groups are making strides in moving their local projects forward on our commercial strips. Security, regular street cleaning, daily household and basket collection, the need for additional parking, improved lighting, and infrastructure improvements are on their agendas. They seek ways to attract additional businesses compatible to the abutting residential communities. Additional support from government would assist them in making more progress.

EDUCATION

A quarter of our population is under age 18. The influx of families with school age children continues, particularly in the northern and eastern parts of the area. Our youth population continues to increase. The school buildings are overcrowded and parents see a diminished range of what is being offered to the students at the elementary school level. Parents are concerned with the quality of education and the safety factor as students move to the Middle Schools and the High School. It remains to be seen if the recent addition of more K-8 schools and smaller high schools lessens those concerns. Parents continue to express dissatisfaction with the high school application process. Many are seeking to relocate for better educational opportunities and safety inside and outside the school buildings. The physical plants of many of our school buildings still need attention. Additional Headstart and/or Pre-Kindergarten services are needed. Most of the schools in our area have had their play areas diminished in recent years by the placement of transportable classrooms and/or modular additions. School enrollment projections indicate that many more school seats will be required. It is not uncommon in our district for families with young school children to have two or three children in two or three different schools as a result of no seat being available in their neighborhood school. Sites for new school construction must be located and construction must be expedited to ensure adequate educational facilities for our children. Every child in our Community Board area must have a seat in his or her neighborhood school and each school must provide a full range of educational services. Residents in our community do not desire to see any school zoning changes that cross county lines. Queens students must be provided with school seats in Queens schools.

EMERGENCY MANAGEMENT

The destruction wreaked in the southern part of our country by Hurricane Katrina and the questions raised by the response to that disaster heightened concern among our residents about hurricane preparedness. There continues to be significant concern among our residents as to the adequacy of plans for such an occurrence, however unlikely, in

our area. A category 2 coastal storm in this region of the country could result in an evacuation of people living in what OEM has designated as Zone B areas of the city. A category 3 storm could result in an evacuation of those who live within designated Zone C areas.

Approximately 30,000 of our residents live within Zone B. Almost 40% of those residents are either senior citizens or children. Roughly 40% of all of Community Board 10 residents over age 65 live in areas designated as Zone B. Approximately 40,000 more of our population lives in Zone C designated areas. In the event that any major coastal storm occurs here necessitating an evacuation of both those in Zone B and C, we could see more than half of our residents from roughly 60% of our households having to evacuate. Such an evacuation would involve roughly half of our area's children and more than two thirds of our elderly population.

Although OEM has engaged in efforts to educate people, we believe there is a need for a far greater effort. Such an evacuation has never been necessary in Community Board 10. Should such an eventuality occur, people must know what to do and what to expect. Much more detailed information is needed at the Community Board level regarding processes which will be utilized to effect such an evacuation. Much more detailed information is needed in regard to the plans for sheltering. There is a need for far better consultation between OEM and the Community Boards as we oftentimes have detailed local knowledge that other agencies may not possess which could be helpful in mitigating potential problems. The mass movement of people, many of whom will utilize private vehicles, in the event of an evacuation presents many potential problems. While routes to evacuation reception centers are marked, there is little information available beyond that to our citizens to incorporate into their personal planning.

The designated evacuation reception center for our area is Aqueduct Racetrack. This is of concern to us and there may be a need to reevaluate that location. The planned development of a video lottery terminal gambling facility at Aqueduct Racetrack and the proposed construction of a hotel and retail uses on the racetrack land may render it not suitable for use as an evacuation center. There is a need to review this.

Also of concern to our residents is the city's response to their needs during coastal storms that are not catastrophic. There is a need for improved attention at such times. Virtually any significant "nor'easter" causes tidal flooding to occur in some areas within Community Board 10 exacerbating stormwater flooding conditions at times of high tide. In particular, homes in the Hamilton Beach and Ramblersville areas of Howard Beach are impacted by such storms, as well as some homes in some other parts of "Old" Howard Beach. In recent years there has been new construction of homes in the Lindenwood section of Howard Beach bordering the Spring Creek Park addition area. Some of those homes are also vulnerable to tidal flooding from less than catastrophic storms. Many of the streets in the Howard Beach area east of Crossbay Blvd. become impassable during times of high tide when such storms occur. Such storms often entirely cut off vehicular access to Ramblersville and Hamilton Beach.

ENVIRONMENTAL PROTECTION

We are in need of ongoing routine maintenance of catch basins, all connections to the sewers, and the sewers themselves. Since we are a poor drainage district, we hope that a process has been established to insure that sufficient new basins are being installed as street reconstruction projects move forward to assure proper run-off and that construction waste is being properly disposed of to prevent clogging of existing catch basins. There are still areas of the Community Board area not served by storm sewers.

The rising water table is of major concern to the Howard Beach and Ozone Park areas of our district. That situation started after the Woodhaven Utilities and Industries Water Company take over by the City of New York. The City has also taken over the Jamaica Water Company. There are the same concerns now in South Ozone Park and Richmond Hill. Without proper planning, we could one day be flooded out by ground water. Prior to any additional building on the large tract of Aqueduct Racetrack land, there is a need to evaluate the impact in regard to potential exacerbation of ground water issues and regional drainage problems.

HEALTH

We are experiencing an escalation of rat infestation in lots and in the streets of all areas of the district. It is almost

impossible to keep ticks, mosquitoes and rats under control if there is no way to mandate that owners maintain their unimproved lots or land with an unoccupied structure upon it. We would hope that some way could be devised to penalize owners of such properties who cannot show that they have contracted for the necessary service on a semi-annual basis. City-owned property should be handled the same way by Pest Control. Nurse services should be increased in all schools, both public and private, because of the escalation of contagious diseases and their expertise in the recognition and prevention of problems. There is no hospital facility located within Community Board 10.

HIGHWAYS

Streets in sections of the Board area not designated for capital improvement are deteriorated to the point where filling of potholes will no longer suffice. We are rapidly reaching the point where it is dangerous for vehicles to navigate our district. Where streets have had wear and tear or strip paving for years, high crowns are a major problem. Milling machine services are necessary. Where a grid of streets is identified for milling and in-house/contract resurfacing, all streets should be checked to ascertain that each street has been dedicated in order to assure that no street is eliminated because that process has not been done prior to approval. Further, the time span between milling and resurfacing is much too long, thereby creating hazardous driving conditions. One week between milling and resurfacing should be the maximum allowable. Ongoing consultation between Department of Environmental Protection and Department of Transportation, Street and Arterial Maintenance Division, as well as the Department of Design & Construction is necessary during street reconstruction projects to assure that existing drainage is not disrupted.

Weed growth on grassy areas that obstruct vision when entering or exiting a major artery continues to be problematic. Such areas along the Belt Parkway, the Nassau Expressway, and North and South Conduit Avenues should be charted and be cut on a regular basis throughout the growing season. Beautification efforts to improve the appearance of these grassy areas are needed, as well as desired. These areas along our highways are among the first views many visitors to our city see when they arrive at neighboring JFK Airport. A beautification effort would serve our residents and would enhance the aesthetic presentation of our city to its visitors.

HUMAN RESOURCES ADMINISTRATION

There continues to be a need for a staffed HRA office to serve as a single point of entry for our district. There is also a need for a multi-service center to provide senior activities and affordable day care. There are more than 9,000 children in the area under the age of 5. Many live in single-parent households. In homes where there are two parents both are, in most instances, working. About 15,000 residents are older than 65. A single point of entry unit could be established in such a building. Barring that, there is no way for Community Board 10 residents to enter the system without hardships of transportation. Absent such a facility in the district, knowledgeable staff must be out-stationed at a reasonably accessible site.

LIBRARIES

Full library services, year round, with expanded programs geared for pre-school and early childhood youth are needed. We find that our communities are having an influx of families with young children who have need of such services. Our severe school overcrowding has placed limitations on library services in our schools, which makes it more imperative for public library service to increase in order to serve the needs of our children. A lack of after-school programs or affordable day-care appropriate for school age children have made our libraries de facto after-school day care centers.

PARKS

Many capital dollars have been expended in our district for reconstruction of parks. However, if there is not to be a maintenance person assigned to each completed facility on a daily basis, then it seems to us that these dollars are being wasted. While we do not have a regional park in our district, our ballfields are fully utilized by teams from many parts of Queens. Our smaller parks provide the only recreational sites for the residents of our district because public transportation is not readily available to regional parks. Therefore, if these park sites cannot be properly

maintained by our mobile crews with appropriate equipment, our residents are disadvantaged.

An ever increasing number of families are moving into our communities with young children. We find that during the summer, there is nothing readily accessible for the 4 to 6 years old age group and we would like to see a summer day camp installed. Some schools have programs in their buildings for youngsters from 6 years of age on up. Our pre-school children are under served.

We have had a large enthusiastic audience for those cultural events that have taken place in our parks in prior years. We look forward to more in the coming years as well as recreational year round and summer programs.

Forestry services are still lagging. Data provided by DoITT in response to Local Law 47 for FY2009 continues to indicate that 94% of the calls to 311 from our area for the Parks Department were forestry related. In FY2009, approximately 46% of those requests for service involved damaged or dead trees which is an improvement over that of FY2007 and FY2008. However, tree removal, stump removal, and pruning continue to be problems. Sidewalk hazards continue to exist in many areas as a result of uncontrolled tree root growth which must be better addressed.

For several years our budget requests have included site identification for a Department of Parks recreation center. Our population cannot avail themselves of many programs and activities in existing centers because of the distance between program sites and our community. It is necessary to recognize that families with more than one child must be able to transport each of the children back and forth to their various destinations (school, after school and religious programs, pre-kindergarten programs, etc.) in a timely fashion. Therefore, travel time must of necessity be short in order to accommodate them.

At the FY 1995 budget consultations, when this subject arose, the then Commissioner Oliver Spellman suggested a collaborative effort spearheaded by Borough President Claire Shulman, the Parks Department, Department of Real Property, and other agencies regarding property in Broad Channel, which could accommodate both Board 14 and Board 10. To date there is no forward movement for a recreation center to serve our Board's youth and the need for a place for recreation and cultural programs continues to grow. The Furman Center *State of New York City's Housing and Neighborhoods 2008* reports almost 53% (lowest percentage of the city's 59 Community Boards) of Community Board 10's housing units are not located within a quarter mile of a park larger than a quarter acre. That same report indicates Community Board 10 is among the five Community Boards with the highest percentages of households with children under age 18 in the city. There is a significant need for increased services to youth. In that portion of our Board north of Rockaway Blvd. and east of the subway tracks there are only two parks (DeMuttiis and Judge). One is located at the western end of that segment of the Board and the other is located near the eastern end. In between is that area of our Board with the largest concentration of children and the least amount of play space. A parcel of land or a building within that area of Community Board 10 should be developed as a recreational center to meet the needs of our youth.

The complete restoration of the ballfield at Judge Park has been requested by community youth. The Community Board fully supports that much-needed request and urges that it move forward in a timely manner now that it is funded. The soccer field at Southern Fields and the Lefferts Playground project have been completed. The restoration of the ballfield which sits between those two areas is eagerly awaited now that it is funded. There is a need for the creation of additional Green Streets areas. There is a need to create more playground areas to serve our youth especially since many of their schoolyard play space has been lost to transportable classroom space or modular additions to schools.

POLICE

While citywide statistics indicate that we receive our fair share of manpower and equipment based on the percentage of crime in our district, ongoing complaints from residents continue to indicate that they disagree. Statistics seem to indicate that our area is served by less officers in relationship to our population than other areas. Our police precinct continues to show an overall drop in crime, but there have been increases in some categories since FY2003 that give rise to concern. Although serious crime continues to drop overall, the perception of many of our residents is that their quality of life is again deteriorating. Ongoing requests are made for more police visibility in the form of foot

patrols as well as quality of life/conditions cars. There is a particular need for additional manpower, especially on weekend nights, during the warm weather months.

Community policing has the interest of our residents and their support. The community has stated there have been too few "beat" officers in the past and that their assignment areas were too large for them to be readily accessible to the residents of their posts. Those officers that did provide community policing have been reassigned to other duties in the precinct and the Community Policing Unit seems to be no longer functioning. Our community complains that quality of life complaints often receive no response in the form of an officer appearing at the scene in a timely manner.

Each year during the warm weather months noise complaints resulting from large and disorderly parties being held at residences in parts of our area require that enforcement of noise restrictions increase. In FY2006 there were more than 3,200 noise complaints made through the 311 system that were referred to our police precinct. In FY2007 there were over 3,500 noise complaints received by the 311 system. The overwhelming majority (70%) of those complaints were about residential noise. In FY2008 there were over 3,800 noise complaints and of those, 76% were about residential noise. As of May 31st in FY2009, there were 2861 noise complaints of which 77% were of residential noise. Every Monday throughout the warm weather months our office receives numerous calls from residents complaining about the weekend's noise. From May 1, 2005 – Sept. 30, 2005 there were more than 2,100 noise complaints made to 311. From May 1, 2006 – Sept. 30, 2006 there were more than 2,400 such complaints. From May 1, 2007 – Sept. 30, 2007 there were more than 2800. From May 1, 2008- Sept. 30, 2008 there were 2330 noise complaints made. The decrease in the number of noise complaints for FY2009 was due to the major enforcement effort of our precinct personnel, especially during the summer of 2008. However, despite the continuing enforcement effort indications are that the number of complaints is again increasing. This leads us to conclude there will again be well more than 2,000 such complaints during the warm weather months of 2009. Despite this strong, much appreciated, effort by our precinct to address the problem we believe additional resources must be provided in order that needed noise enforcement continues without negatively impacting on the precinct's ability to address all the other crime and quality of life concerns it must respond to. Manpower levels at the police precinct **must be increased, especially on weekend nights**, to address this continually growing problem as well as other crime and quality of life concerns. Our residents have the right to be able to enjoy their homes without disturbance from inordinate noise and their complaints must receive a timely response. They also have the right to a precinct with sufficient manpower to provide all other necessary services as well.

The current economic climate has given rise to another growing quality of life problem. over-the-road tractor trailer trucks and other commercial vehicles parked on our local streets. Enforcement efforts must increase in order to prevent this practice on the part of truckers to save on parking costs from taking hold and impacting negatively on our residential communities. Resources must be provided to bolster precinct level efforts.

As of the end of the third quarter of FY2009, Community Board 10 had the highest number of complaints reporting derelict vehicles to 311 in relationship to population in the city. In terms of the actual number of such complaints we ranked seventh in the city. It should be noted that of the seven boards with the highest numbers of complaints of derelict vehicles, four about our airports. This gives rise to concern among our residents that this is a potentially serious security issue as well as a quality of life issue.

The people who reside in Community Board 10 deserve to be served with the same number of officers from Operation Impact that have been assigned to precincts adjacent to it in recent years. When precincts surrounding Community Board 10's 106 Precinct are flooded with additional officers (e.g. 103 Pct., 102 Pct., 75 Pct.) our residents and neighborhoods are negatively impacted.

While we agree that beaches, regional parks, etc. need additional manpower during the summer, the number of officers each precinct had years ago to help meet those needs no longer exists. Therefore, in the summer months when we need more officers we have fewer. Indications are that there are fewer cars on patrol, higher response times, and more backlogs in responding to calls for service. Available Compstat data should reflect backlog numbers so that Community Boards can adequately assess the effects they are having on service delivery.

Graffiti continues to be a problem on both public and private property throughout the area and incidents seem to be increasing. Improper use of motorcycles and ATV's is a major problem in this Board area. People have expressed total frustration regarding this matter.

There is an ongoing problem with unruly bars and clubs. Sufficient resources are needed to provide regular enforcement to avoid further negative impacts on nearby residential areas. Increased Operation MARCH activity is desirable to help eliminate problem conditions.

We find that three wheel scooters have proved to be very effective and look forward to more of them being allocated to our precinct (106th). Bicycle Patrols have been effective in the past. Community residents are concerned that reduced manpower levels will affect their continuance. This is particularly upsetting since it was the community, which raised the necessary funds to purchase more than 20 bicycles for the precinct's use and the community would like to see them fully utilized.

Given our proximity to JFK Airport, the presence of the Buckeye Pipeline in our community, the presence of AirTrain, the many acres in our community of essentially unpatrolled shoreline beneath existing flight paths along with the heightened sensitivity of our residents to security issues, it is imperative that police manpower levels in our precinct be increased to insure enough visibility so that people perceive that they are safe. Our precinct should be staffed to a level that allows for every "beat" to be covered daily along with full radio car coverage in each patrol sector. Our residents are well aware that our airport neighbor is critical to our nation's international and interstate commerce. They are well aware that it is a prime terror target. Their expressed perception is that the areas surrounding it get less policing than those near other such targets in other parts of our city. We believe a permanent Sky Tower observation post should be created to provide for monitoring of the essentially unpatrolled shoreline land areas. We believe the shoreline area in our Board, which is all directly below JFK flight paths, should be visually or electronically monitored at all times. The presence of large tracts of undeveloped federally-owned land along our shore essentially minimally patrolled by National Park Police where terrorist activity could easily occur at any time also requires our police officers be able to respond rapidly to those areas. For that reason the 106th Precinct should have at least two four wheel drive vehicles assigned and actually present in the confines of the precinct at all times.

Our proximity to JFK Airport and its critical infrastructure, as well as the fact that most passengers and much of the trucking moving cargo in and out of the airport pass through our area, presents some overall security concerns we believe must be better addressed. We believe the security of our city could be enhanced if a camera observation system, perhaps similar to that which exists in London, was installed along all the roadways, both highways and local streets, in our community leading to and from the airport. Installing such a system in this area could serve as a model to determine how effective such systems could be in other areas of the city. In addition to assisting in the counter terrorism effort of our city, such a camera network could prove to aid in reducing crime in our community and could serve to offset the lack of available manpower.

PUBLIC TRANSPORTATION

The perception among residents that they lack safe, reliable subway and surface transportation within this Board area has resulted in residents utilizing their automobiles. Census data indicates that more than 50% of our residents commute by automobile. Almost 40% of our residents live more than a half mile from a subway entrance. When subway service is utilized, many residents drive to north Queens to take the "E" or "F" to Manhattan. Journey to work data indicates that about 40% of our residents work in Queens also resulting in residents using their cars. The majority of our residents do not work in Manhattan. This results in more vehicles per family, parking problems, street cleaning problems, etc. Express bus service to Manhattan, although improved since the takeover of the private bus companies, is still inadequate as is express service to locations within Queens or Brooklyn. The community would like to see more reliable surface transit, especially to other areas within the borough, and safe, reliable subway service. If that were to become available the residents, in preference to using their own autos, would utilize it. Institution of express subway service, a "Super A" train providing service similar to the former "Train to the Plane," is desired by many and is seen as feasible by them since the AirTrain connection to the A line is operational.

The takeover of the private bus lines serving the area by the MTA has generally been positive, but there is still concern about insuring existing routes are not truncated or eliminated. Express bus service has been expanded, but the need for further improvements continues. Further improvements are needed for the Liberty Avenue "el" infrastructure.

SANITATION

When people are researching an area to live in, not only do they look at the condition of the streets but also as to how clean they are and how the empty lots are maintained. Lot cleaning has totally deteriorated because of cutbacks and we are back to square one with a great increase of complaints about overgrown dirty lots which harbor ticks, mosquitoes and rats.

Street cleaning on commercial strips at specific times on a regular basis is an essential service. This service must be provided often enough to make a difference. Rockaway Blvd., Coleman Square, Liberty Avenue, Lefferts Blvd., and Crossbay Blvd. are in dire need of regular sweeping. There is a need for expanded basket pickup on Liberty Avenue.

Alternate side of the street parking would create many problems and cannot be utilized in our area. Street cleaning services on a regular basis for metered arteries, no parking streets and access routes, etc. is necessary on an ongoing basis.

On commercial strips, wherever there are apartments above the stores, there is a need for daily household collection and daily basket collection since it is impossible to legally provide storage for tenant garbage, which is often placed at the curb other than on collection days. Bags are ripped open and attract vermin, mice and rats. Daily household and basket collection is especially needed on Liberty Avenue and Rockaway Blvd.

SCHOOLS MUST CONTINUE TO HAVE YEAR-ROUND 4-12 PICK UP BECAUSE THEY ARE OPEN AND IN USE WITH FOOD PROGRAMS.

The Sanitation garage at 130th Street and 150th Avenue in South Ozone Park continues to house the manpower and vehicles for more than our one district. It also stores many vehicles other than collection trucks on the outside. Complaints continue to come in from local residents regarding the storage of numerous rusted, inoperable vehicles. There is a need for our Sanitation garage to house only our district's sanitation vehicles.

Dumping has increased on any open space, large or small, since the closing of the Fountain Avenue Landfill. When not removed promptly, more garbage, furniture, etc. is quickly added and another dumpsite is born.

TRAFFIC

Street sign replacement takes a very long time. Missing name signs are of particular frustration when mail persons or emergency vehicles encounter difficulty. Missing one-way signs constitute a danger. Restrictive signage is often illegible.

The signal system on Cross Bay Boulevard from 103rd Avenue to 165th Avenue is often out of sync causing heavy traffic backup for both Northbound and Southbound vehicles. There is a need to improve the signal system north of Community Board 10 on Woodhaven Blvd. Residents complain that congestion, both southbound and northbound, is increasing. At this point, no recommendations for improvements have been put forth from the Woodhaven Blvd. Congested Corridors Study.

The intersection of Cross Bay Boulevard, Rockaway Boulevard and Liberty Avenue is included in that study to determine how to change the traffic patterns there for the better. This intersection has many accidents and nothing tried to date has been successful. That Woodhaven Blvd. study needs to be followed up with an additional study to incorporate the roadway as far south as the Belt Parkways interchange area, so that the Woodhaven/Crossbay Blvds. corridor is evaluated in totality.

Residents continue to make requests for additional stop signs, traffic signals, and one way street conversions. Many of the requests are predicated by the residents' view that they will effectively control speed on local streets. There is a need to develop effective strategies to deal with excessive speed on local streets beyond just the installation of speed bumps or humps. Enforcement for speed and stop sign violations must increase.

Traffic enforcement agents should be hired by the NYPD and assigned to specific intersections as needed for moving violation enforcement. To date, Police Department personnel do not consider this to be a top priority and there is little enforcement on residential side streets. However, we find that because of lack of enforcement people are no longer driving safely, resulting in accidents.

Infrastructure contracts should have stricter inspection and enforcement of safety controls during daytime operation and night visibility of barricades and signs to assure vehicular and pedestrian safety. The practice of having a contractor provide for Traffic Enforcement Agents at construction projects, which impact major streets, must continue. The city must continue to require all contractors doing work on roadways and bridges to incorporate traffic mitigation strategies into their projects.

An escalating problem is the number of SUVs, vans and trucks being parked at corners, which means that anyone seeking to cross must move well into the street to see whether there are oncoming vehicles. Where there are no traffic signals, a distance from the corner at all intersections should be marked with signage as restricted, at least for anything large enough in height to prevent safe visibility, to provide better safety for pedestrians trying to cross a street and drivers approaching an intersection.

Surveys and studies are regularly requested because of dangerous conditions that exist. Since "Stop" signs are not considered to be speed control devices, requests by residents for their installation are often denied. An effective means to address these issues must be developed. Federal traffic warrants are cited when requests for traffic control signs and devices are requested and denied. Warrants appropriate to residents' concerns may be necessary. Increased speed limit signage is necessary throughout the community.

Although it is not the general practice to post "No Truck" signage, we feel that this is necessary to prevent trucks from trying to bypass construction delays and traffic congestion by using local streets that are not truck routes. Such signage should become standard practice.

Parking regulations require clear posting and evenhanded constant enforcement in all parts of the area. No intervention from a single business person or community special interest entity should result in changes to parking regulations. All stakeholders' views must be considered before any adjusting of regulations. All proposed changes to parking regulations should be reviewed by the Community Board before implementation.

TRANSIT AUTHORITY/M.T.A.

South Queens needs express service like the JFK Express to get people into and out of the Manhattan area within a reasonable time frame. With the completion of the AirTrain connection to the Howard Beach MTA station, restoration of such a service would be advantageous. South Queens continues to be without sufficient safe, reliable express bus service. There is a need for new bus routes, at least some to be express routes, **within** Queens as it is often far easier for our residents to get to other boroughs using public transportation than it is for them to get to other parts of our borough. Recent data provided by the Department of City Planning's Population Division indicates that 43% of Queens residents who work are employed in Queens. Only about 35% of Queens resident workers work in Manhattan. There is a need to provide more and better public transportation options within Queens.

TRANSPORTATION/CONSTRUCTION

Infrastructure improvement is needed. As projects are planned and move through the process, we find that there is still a lack of ongoing communication and consultation among agencies, utilities, outside consultants, etc. before and during the construction process. This impedes planned improvements moving forward as expeditiously as possible. For example, when the project boundaries are determined, and dollars approved for scope and schematics, each

street should be checked for map/title/dedication status and the necessary process initiated so that when construction does take place streets are not eliminated because that process has not taken place.

Experience has shown that where sections of an area designated for capital improvement have problems in drainage or grade, which create design difficulties, those streets are left for last and delayed year after year. Agency policy should be established to address the problematic section first and then proceed with the remainder of the project. Contracts in residential areas do not include enough nighttime precautions to permit drivers to see barricades, depressions, etc. often resulting in accidents or damage to vehicles.

Over time we find that each completed highway reconstruction project generates more owner complaints than prior projects produced. We therefore request that a quality of work clause be integrated into each contract and that quality control on the site be such that infractions would initiate work stoppage and immediate correction.

YOUTH

The youth population of Community Board 10 Queens represents approximately 25% of the total district population. Funding and site resources for youth programming needs are limited. Currently, the New York City Department of Education and the Department of Youth and Community Development provide limited after school and evening programs to the Board area. Some programming exists in local religious institutions. However, much of the Board area is not eligible for Community Development funds and has few community based organizations eligible to apply for the funds that do exist.

The "Beacon" school for Community School District 27 in our Board area is located in the South Ozone Park community at M.S. 226. This needed youth service and community resource provides an opportunity to offer a menu of diversified services to meet the many needs of this community. There is a need to insure the community is fully aware of activities offered and is involved in planning for those activities.

The South Ozone Park Youth Community Center serves approximately 600 teens in Community Board 10. Additional space is needed for youth programs particularly in those areas of South Ozone Park and Richmonds Hill with large youth populations. There is a need for expansion of existing teen programs and new programs for teens are needed. Funding is desperately needed to continue to offer teen programming at John Adams High School. The South Queens Boys and Girls Club, physically located in Community Board 9, provides services to both Community Board 9 and Community Board 10 youth. It continues to see its funding diminished which results in less service for an already highly underserved youth population. Funding to it must increase.

A local review process must be utilized for determining where available youth dollars are spent. Local groups such as the Community Board and can often pinpoint better the program needs of the community. Programs in local communities are providing the front-line youth service programs available to all children in all communities throughout the city. They must be supported and the community's recommendations respected by city officials and the agencies that serve youth.

Among the needs in our area are expanded year round recreation and leisure time activities. There is a growing need for latchkey type programs; educational and career choice counseling; youth employment; programs addressing the high school dropout rate; substance abuse prevention counseling; support programs to help resolve personal and family problems and the need for expansion of appropriate education and prevention programs addressing health needs and the growing threat of AIDS to the youth population.

In years past Community Boards had the services of full time Youth Coordinators who assisted in planning for youth services specific to a board area. Restoration of that position is desired.

All school building day and evening programs should be able to operate without opening fees and space costs. Public buildings should be available for public use.

Increased attention should be paid to program evaluation, and structured training and technical assistance programs

for youth services agencies stressing program improvement and enhancing administrative capabilities.

There should be an increase in special programming offered at the four libraries serving Community Board 10 to provide cultural arts, remedial assistance and counseling programs on a regular basis. Our libraries are currently serving as community resource alternative youth program sites. Staffing hours and programming must be increased to utilize this resource in new and nontraditional ways.

There is a need for continued emphasis on comprehensive education initiatives addressing the issue of AIDS and increased programming addressing teen pregnancy and other health related issues. There is a need for the expansion of both State and City funds for drug prevention programs in schools and in communities in order to combat drug and alcohol abuse citywide.

JFK AIRPORT AND AQUEDUCT RACETRACK

Although neither of these facilities are city operated, they are located in our area. The airport is on city owned land and the racetrack is state owned. Actions involving both are of concern to our residents. A large tract of land, more than 20 acres, owned by the PANYNJ within the existing fenceline of Aqueduct Racetrack is part of the airport leasehold. The Community Board should be consulted regarding any change from its current use as an airport-related parking area to any other use.

The PANYNJ agreed to provide the city with 20 million dollars over a five year period to be devoted to capital projects in Queens when the airports' lease was renegotiated. There is a need to insure that the people living near the airports who suffer many of the negative effects of the airports' presence see a benefit from what this money is expended on. Unfortunately, although the funds spent to date have been expended on worthy projects, most local residents in the neighborhoods near the airport do not perceive that they derived any benefit. There is a need for a far more open discussion of what this money was spent on and how the projects were selected. There is a need for the development of a funding source and the establishment of a residential soundproofing program for our areas impacted by flights to and from JFK Airport.

Since the completion of AirTrain an unintended consequence has become prevalent in the neighborhoods closest to its Lefferts Blvd. station and its Howard Beach station. In the 50 years that the airport was our neighbor prior to the completion of AirTrain, airport and/or airline employees did not park their personal vehicles on local streets. They utilized on-airport parking facilities. Now, many airport employees, especially those of TSA, are essentially commuting by car to the airport perimeter, parking their vehicles on local streets, and boarding AirTrain. AirTrain was intended to encourage people to take public transportation to the airport not as a means to avoid on-airport parking fees. A workable residential parking program needs to be developed by the city in the two areas impacted.

The franchise agreement between NYRA and New York State expired on 12/31/07. In 2006, the State sought a new operator for the racetrack. A "new" NYRA entity is now the racing franchisee. Legislation was enacted at the State level to allow for the construction of a video lottery terminal gambling facility at the racetrack to function in conjunction with horseracing there. It is anticipated that the Governor will soon select an operator for the VLT facility. **Community Board 10 is very concerned about the future of Aqueduct and desires that the city, wherever possible, work with State officials to insure that there continues to be appropriate consultation with the surrounding community regarding any future development on Aqueduct Racetrack land.** Its size, inappropriate zoning, and its location virtually in the middle of our community are cause for great concern among our residents. Community Board 10 concurs with residents' views that they desire to see the facility remain with horse racing as its primary use and VLT gambling as an ancillary use. Should other uses be considered for this land, community consultation and review must be an integral part of the processes used to determine development in order to insure there are no deleterious effects on the surrounding residential communities.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

STATEMENT OF COMMUNITY DISTRICT NEEDS

FY 2011

Community Board 11, located in Northeast Queens is bounded by Nassau County on the east; Little Neck Bay and 26 Avenue on the north; Utopia Parkway and Fresh Meadows Lane and 210 Street on the west and the Grand Central Parkway and Horace Harding Expressway on the south. The District is comprised of the neighborhoods of Auburndale, Bayside, Douglaston, Hollis Hills, Little Neck and Oakland Gardens. These neighborhoods are residential in zoning and character with the major portion of the District comprised of 1, 2 and 3 family houses and several cooperative and condominium apartment complexes, developed 50-60 years ago and a scattering of rental apartment buildings. Douglas Manor and Douglaston Hill are landmarked communities within Board 11. The shopping needs of the residents are met by the commercial strips, all of which are C1 and C2 zoning overlays in residential districts. Community Board 11 is an upper middle income community of approximately 118,000 residents. The District remains a culturally and ethnically diverse community. Approximately 39% of the population is now foreign born, the majority (32%) of which is Asian.

The District is known for its approximately 775 acres of parkland. Alley Park, which is a large regional park, has areas under Federal and State tidal and fresh water wetland protection, as does Udall's Cove in Little Neck. The shoreline in Bayside is part of the Greenway system and supports a marina for recreational boating and fishing and a bicycle and jogging path. Adjacent to this shoreline is Crocheron Park and John Golden Park which have large open spaces with ball fields, playgrounds and tennis courts. Part of Cunningham Park is in CB11 including the historic Vanderbilt Motor Parkway. Additionally, there are smaller parks and playgrounds, a golf course and numerous Greenstreets throughout the district. Oakland Lake is a natural spring fed lake and hosts a large population of turtles, geese and ducks. The Alley Pond Environmental Center, located at the base of Little Neck Bay, is an education center focusing on the preservation of the wetlands areas.

All public transportation is provided by bus lines, from the district, terminating at the Flushing and Jamaica subway lines and the Port Washington branch of the Long Island Railroad, both of which are used primarily as commuter transportation to Manhattan. Residents look forward to the planned addition of a LIRR station on the east side of Manhattan at Grand Central Terminal.

BUILDING AND ZONING

The Department of City Planning (DCP) rezoned 350 blocks of Bayside in 2004, 135 blocks of Douglaston and Little Neck in 2006, 50 blocks of North Flushing/Auburndale in 2009 and plans have been drafted for the remaining areas of Auburndale and Hollis Hills and Oakland Gardens. The goal of rezoning is to curtail overdevelopment and maintain the low density nature of the district. New zoning designations were also introduced for single family homes, R2A and R1-2A, to limit the size of the homes.

The Buildings Department has added more inspectors and plan examiners resulting in an increase of prompt responses to complaints. Owners must be held responsible when they circumvent the law and work without obtaining a permit or build beyond the scope of the zoning regulations. DOB has increased the cost of many types of fines; higher fines should help to be a deterrent. The Commissioner must have the authority to refuse new permits to those owners with outstanding violations and fines. The frustration of “no access” reports in illegal conversion and occupancy complaints continue to upset residents. Access warrants are difficult to obtain and the complainants feel that nothing is being done to stop illegal conditions. Unfortunately, in many cases this may be true but balancing private property rights with government enforcement continues to be a dilemma.

Economic Development:

Bell Boulevard, between Northern Boulevard and 35 Avenue, is a Business Improvement District (BID). The BID will help fund improvements along the Bell Boulevard commercial strip. Bell Boulevard increasingly has more restaurants and bars and less and less small retail stores due to high rents and competition with large discount stores. This is a concern here as well as in parts of Douglaston.

Leviton, a large manufacturer and distributor of electrical supplies has vacated their offices on Little Neck Parkway, CB 11's only M1-1 zone, and we are waiting for information on its future use.

More commercial buildings have been developed along Northern Boulevard unfortunately; due to the economic downturn many of the spaces remain empty.

EDUCATION AND YOUTH:

This school year approximately 16,500 students are enrolled in School District 26 in its 19 public elementary and secondary schools located in CB11. There are three high schools in the district; Bayside, Benjamin Cardozo and Francis Lewis High School with a total population of approximately 12,000 students. The population in all three high schools has increased greatly with utilization rates at 151%, 138% and 170% respectively. With students housed in buildings meant for half the number, the already overutilized schools have become dangerously overcrowded. Both Cardozo HS and Bayside HS have transportable classrooms, but permanent building space should be added to the school or space leased to relieve overcrowding. We have brought this concern to the attention of the Chancellor.

Queensborough Community College, located in Bayside, continues to grow and be a premier community college with recently upgraded computer and science classrooms, an art museum and the construction of the Kupferberg Holocaust Center.

The Beacon Programs at Middle School 158 and Middle School 172 operated by the Samuel Field “Y” continue to be successful serving the youth and community groups of our district. Additionally, Out of School Time Programs operate at four schools and City Council funds have helped

provide programming at four other locations. There are several sports groups run by volunteers that are funded privately and, in some cases, with support from our local officials.

ENVIRONMENTAL PROTECTION

The Alley Creek Drainage project, which has been a Board priority since 1972, is in the final stages. The project is now concentrated on the south side of Northern Boulevard with the reconstruction of the pumping station that will bring combined sewer overflows to the Tallman Island water treatment plant. A wetland mitigation, known as Phase III, for the Oakland Ravine Area and Oakland Lake by the Department of Environmental Protection with the Department of Parks and Recreation has been contracted and we are awaiting a start date for the project.

Street cave-ins and depressions account for one of the most frequent service complaints to DEP. We are pleased that several trench restoration projects have been completed. The time frame from identification of necessary projects and design and funding takes an excessive number of years.

Throughout the remainder of the District, there are areas of intersection flooding. Catch basin problems always account for the one of the highest number of service complaints to DEP from our district. Repairs are backlogged often over a year from the time of complaint to repair. Broken and sinking catch basins pose a hazardous condition at corners. More funds and personnel are needed for regular catch basin cleaning and for repair. It is important that catch basin and sewer installation projects be ongoing in cases of flooding conditions. The district has many seepage basins which fail over time. The only solution is the funding of combined sewer projects. There are five projects in design for combined sewers and sanitary sewer installation. Funding for these projects cannot be delayed.

A major concern is the poor storm water drainage on 223rd Street between 37th Avenue and 42nd Avenue. Presently, storm water runs along a ditch along the eastern edge of 223rd Street. This project will require joint planning with Department of Transportation since capital reconstruction of the street is necessary. It is now in the planning stages.

FIRE DEPARTMENT

CB 11 has requested in our budget priorities that all fire houses have their own generator for emergency situations and CPR kits. As emergency responders these two items are a necessity.

HEALTH

This past winter for the third time, Board 11 sponsored a flu vaccine clinic with St. Mary's Hospital and the NYC Department of Health. It was very successful and we were able to vaccinate 125 people. We look forward to providing this service in the fall of 2009. With the swine flu epidemic this past spring we are most anxious to do our part to help keep residents vaccinated against flu.

Last summer mosquitoes were a big problem in the District. The DOH sprayed the Alley Pond Marsh areas, again this year, with pesticides to prevent West Nile virus. Catch basins through out the city were treated with larvacides.

LIBRARIES

A new library building or expansion is a necessity for the Little Neck/Douglaston Library. Its space is inadequate to meet the needs of the residents. We are working with the Little Neck Pines

Civic Association, Friends of the Library and the Douglaston Women's Club to garner support and funding from the Queens Public Library System, the Mayor and our local legislators. When asked this past year by our Congressional representatives for possible projects for the Federal Stimulus funds we included the request for the library. The circulation in this library with only 5,700 sq. ft. of space is far greater than other libraries half the size.

PARKS & RECREATION

It is imperative that the Queens Forestry Division be funded at a greater level for street and park tree pruning and maintenance. Forestry complaints account for the greatest number of 3-1-1 calls from our district residents. The new pruning cycle was reduced to seven years but now due to budget reductions the cycle will increase again. However, the City is planting more trees under the Million Trees NYC project and, therefore, a concern about the ability to prune the existing and additional trees exist. Public safety is being compromised by ignoring hazards caused by trees when not pruned regularly. The Parks Department still has an enormous backlog of stumps to be removed; approximately 1000 in CB11 alone.

Tree roots account for the lifting and destruction of many sidewalks. The Tree and Sidewalk program is the answer for many homeowners; however, it needs to be funded at a higher level to meet the need. The Mayor has dedicated some of the Federal Stimulus money to this program.

The Parks Department needs funding in order to improve the walkways around Oakland Lake that are always wet due to the natural spring source that feeds the lake. The Borough President has provided some funds for the repair of a section of the walkway and reconstruction of stairways leading to the lake from Springfield Boulevard.

Several playgrounds adjacent to schools need various improvements: fences, safety surfaces and handball court rehabilitation including Francis Lewis Playground and Seven Gables Playground. The Challenge Playground at PS 177 needs more extensive work, including the removal of an old wading pool and plumbing work. Ball fields in Alley Pond Park, John Golden Park and Underhill Park need new turf. The Douglaston Golf Course is a beautiful public course. Unfortunately, the residents across the street are not happy with the errant golf balls that hit their property. Funding is needed to install tall fence netting. We also continue to support funding for a new Alley Pond Environmental Center building which was damaged during the Alley Creek project. This wonderful center educates numerous school children and adults throughout the year. The building needs to expand to accommodate the programs they sponsor.

This park district has insufficient personnel and vehicles to clean and maintain our parks. With over 775 acres of park and Greenstreets, more park workers are needed to just maintain Alley Pond Park and additional staff is needed for playground and Greenstreet maintenance.

The acquisition of designated lots in Alley Park and Udalls Cove Ravine continue to take place. There are still eight more lots that need to be acquired because of the potential for development. Therefore, the City must continue to dedicate funds for further acquisition

POLICE AND PUBLIC SAFETY

The 111th Precinct, which is located on Northern Boulevard in Bayside, patrols the 9.4 miles of Community Board 11. This precinct has seen a decrease in crime and is a safe, low crime area. However, burglaries of private residential homes and auto thefts remain the predominant and troubling crime statistic in the precinct. Youth on youth crime has had a slight increase, especially the steal-

ing of expensive electronic devices and cell phones. There is a concern with the alarming increase in graffiti, since the Police Department states that this often leads to future criminal activity. The precinct is actively working on enforcement, eradication and education to combat this quality of life crime.

We are pleased that there was a slight increase in the number of officers this year. The interior of the precinct house is showing its age and is in desperate need of renovation and remodeling. Money has been in the budget for renovations of the front desk but the work has not started. We also support funding for the replacement of aged out vehicles.

SANITATION

CB11 continues to be among the top rated Community Boards in the borough for cleanliness. However, in order to maintain the good record, we must have a dedicated litter basket crew six days a week. This year due to budget cuts that number is in jeopardy. CB11 receives three day a week broom crews in our commercial areas. There are no regular broom services in residential areas and we need sweeping in these areas also, particularly in the autumn, with the falling of leaves from street trees. The Board urges DOS to maintain broom service at least three times a week and provide brooms for residential areas also.

Our District contains several miles of street malls and triangles which need to be cleared of weeds and litter during the summer and autumn months. Weeds interfere with visibility and they must be cleared regularly.

SENIORS AND AGING

The 2006 American Community Survey indicated that there are almost 18,000 seniors aged 65 or over representing about 16% of the population living in Community Board 11. The district has the second highest median age in the City, 41.6. Although there has been a decrease in population of 60-75 year range since the 2000 census, there is an increase in seniors over 75 years of age. Senior programs and services must be available to a senior population with possibly greater needs. As the baby boom era population continues to age, the City must be prepared to meet the needs. The Bay-side Senior Center is the only major senior center in our district, funded by the Dept. of the Aging. The Samuel Field YM-YWHA operates the C.A.P.E. program for homebound seniors and Alzheimer patients and their families. The "Y" also has a small senior leisure center and runs the Deepdale NORC (Naturally Occurring Retirement Community) senior program. This year S.N.A.P., Services Now for Adult Persons has the contract with DFTA for case management in CB 11.

TRANSPORTATION

Curb repair and replacement must be funded. Curbs are deteriorating and causing trip hazards. Curbs provide a course for rain water runoff. Without curbs, areas adjacent to the street wash away. The only curbs that have been installed are in conjunction with sidewalk projects. Center island malls on Union Turnpike and on 42 Avenue desperately need curbs. Metal rebar sticks out of the curbs on Union Turnpike causing a serious safety hazard. This is an item we forwarded to our Federal and State representatives for inclusion in Federal Stimulus package money for transportation.

In Douglas Manor, a capital project, in conjunction with the Department of Environmental Protection, is urgently needed to reconstruct a section of Shore Road that is collapsing. It is currently in the ten year plan.

In the southern area of Douglaston, sidewalks are needed on Commonwealth Boulevard just north of the Grand Central Parkway especially for students walking to and from the Glen Oaks Campus schools.

CB11 has asked repeatedly for the reconstruction of the streets between Francis Lewis Boulevard and the Clearview Expressway and between Northern Boulevard and 48th Avenue. While DOT has acknowledged the need, they consistently do not fund the project. We urge DOT to make this a priority in FY 2011.

State Senator Frank Padavan secured funds to create a “Quiet Zone” at the Little Neck LIRR station, a request made by this Board on behalf of the residents who live near the station. MTA/LIRR and NYCDOT are working together on this project. We have asked DOT to commit some of these funds along with other funds from Congressman Gary Ackerman, to reconstruct the parking lot at the station to make it safer for pedestrians and drivers. The project is in design and scheduled to be constructed next year.

Traffic has become a serious problem. There are more cars and trucks on our roads. With increased building development and with an ever increasing population, neighborhoods are starting to experience more local traffic congestion. We receive many requests for various traffic safety measures, stop signs, speed humps, traffic signals etc. NYC DOT should look at creative traffic calming methods. We are pleased to see that the “Strategic Plan for DOT -2008 and Beyond” looks at more of these initiatives. We look forward to the improvements that the Truck Traffic Study has recommended to improve signage, develop new routes and educate truckers on the City regulations.

Our commercial areas are underserved with available parking. The most severe condition exists in the area of Bell Boulevard and the LIRR station. Commuters and shoppers compete for very limited muni-meter parking and greatly impose on the adjacent residential streets for parking. The new Business Improvement District (BID) will be working on this matter with DOT to find solutions. The City must provide assistance to northeast Queens to develop parking areas. The areas of Auburndale, Bayside, Douglaston and Little Neck adjacent to the Long Island Railroad stations are also congested during commuting hours and parking is at a premium.

CB11 has advocated for more express bus service, limited stop service, additional buses to the LIRR stations and Park and Ride lots at Shea Stadium and Aqueduct Race Track.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

Community Board 12 Queens

District Needs Statement

FY2011

Introduction

Community Board 12 is bounded by Hillside Avenue (South), the Van Wyck Expressway (West), North Conduit Avenue (South), and Francis Lewis Boulevard/Springfield Boulevard (East) encompassing the communities of Jamaica, South Jamaica, South Ozone Park, Hollis, St. Albans, and North Springfield Gardens, all of which constitutes Community Board 12, Queens. It is one of the fastest growing boards in population of all of the 59 Community Boards. It is the second largest Board in the borough of Queens and takes up a large portion of the southeastern corner of the Borough. Officially, according to the 2000 census, we have a total population of 223,602 people. The number does not reflect an acknowledged undercount, especially among the undocumented residents of Community Board 12. Actually, when the acknowledged undercount is factored in Community Board 12 has well over 270,000 people with all the additional houses built in the district within the last ten years. The District has become a more culturally and ethnically diverse community. It is situated in the well-known flood basin of the world's largest dam, John F. Kennedy Airport. The Airport, built on wetlands, which was our natural drainage area, has greatly contributed to a lack of adequate rainwater run off in our community. Compounding our problem is the fact that our major trunk line sewer system has been completed. The Thurston Basins system is crucial for the community. We continue to state that Community Board 12, suffers from serious infrastructure problems, our roads and sewers are inadequate to serve our community needs. A great deal of street repair has been done in Board 12, much more remains undone. Yet until these projects are completed, the residents of our community will continue to live with flooded basements, flooded streets, and a potential health emergency waiting to occur.

Economically, the residents of Community Board 12 range from poor to the upper middle class. However, a segment of Board 12's population continues to have incomes below the poverty level, or receive public assistance. Even though there has been a large decrease in public assistance our district continues to be a "target area" eligible for many different social service programs and grants. While, to a large extent these programs are needed and welcomed, there

have been more than a few instances of duplication of services, and a lack of coordination among various agencies has led to areas of over saturation. This causes the residents to feel put upon and dumped on. We desire and would welcome a dialogue involving the city, state, federal and private agencies that run residential facilities to develop a coordinated effort that both serves the needs of these populations and is fair to the communities involved.

Education

Overcrowding and the Transportable Classroom Units continue to be a problem; permanent space should be added to the schools considering all the additional housing and proposed housings. The School Construction Authority (SCA) has moved forward with plans for two new primary/intermediate schools planned for District 28.

The construction of the new PS/IS 48 building is moving ahead; the complete school cost is to be \$52 million and it is expected to be completed by November 2010, it is located at 108-29 155th Street. The new school will be south of the existing P.S. 48 creating 611 new seats. The old P.S. 48 will remain. The new facility will serve the existing P.S. 48 school organization.

The second proposed school is PS/IS 277 to be located at 153-26 Hillside Avenue, it will provide 665 new seats. The cost is to be \$53.5 million.

Our Community district has 53,054 children enrolled in preschool to high school, and increasing. This is an overwhelming number, and we need more schools to be built so that we can properly place and educate these children; the portable classrooms that are now being used for classes in our schools are not properly assessed to educate our children in our community. This is a major concern in our community.

Our students deserve the same Amenities and services extended to other students in the City of New York. Our schools need funding from the government to expand the buildings and make larger classrooms for our children. We have 4,075 children coming out of nursery and preschool and 3,370 children coming out of kindergarten. These numbers are increasing every year. We need good schools with small classes. We will continue to advocate for quality education.

Youth Services

Our youth needs must be addressed. Resources and funding sites are limited; efforts must be made to provide more. We have two Beacon schools in the district providing after school and evening recreational programs and activities.

There is a growing need for an additional latch key program. We have only one in the district. One of the most important needs of our youth is more supervised after school programs for our children to attend. The two Beacon Programs are full to capacity. Efforts must be made to improve and increase the availability of health care for the Youth of Community Board 12 Adolescent Health Services. Also Aids Outreach for youth and more domestic violence and

child abuse prevention programs. We need space for youth programs. Youth employment programs addressing the high school dropout rate. There is a need for more jobs for youth, not just during the summer, and in some cases after school. Locally and City Wide businesses should make a special effort to provide jobs for our youth. Each year the summer youth programs suffer. Some of our youth needs are being addressed, but they are by no means enough.

Department of Buildings/Codes Enforcement

We need additional buildings inspectors to address illegal conversion, working without a permit and on working on the weekends; these problems are escalating. Illegal uses, must not just be cited, they must not be allowed to continue. There continues to be a lack of enforcement in Community Board 12. A proposed Task Force was set up to enforce and monitor the area of the Jamaica Plan Rezoning; this is not the entire district. We must have at least two full time Building and Consumer Affairs inspectors, plus a processor server. To seriously combat the problems of illegal conversions, illegal buildings, driveways, and land use must be evidenced by those agencies charged with enforcement. Local Law 6, the Padlock Law, must be used vigorously in Board 12, where illegal businesses proliferate.

Health Services

Our communities continue to remain medically underserved and that issue must be addressed. We, in Jamaica, Queens have our own ongoing battle with the AIDS epidemic. Nearly twenty-five years after the start of the AIDS epidemic, the rate of HIV/AIDS infections continues to rise throughout the borough of Queens even as it continues a downward trend in “epicenter” boroughs like the Bronx and Manhattan. Jamaica, Queens continues to have a high number of HIV/AIDS cases, the second highest in the borough. Death rate due to HIV in Jamaica has dropped by 75% in the past decade. One thousand thirty eight (1,038) people per 100,000 are living with HIV/AIDS in Jamaica.

Alarming, the CDC estimates that for every person with AIDS there can be up to five persons with HIV, the virus that causes AIDS.

Human Resources Administration – General Social Services

The use of various services under HRA/DSS continues to be very high, and demand outpaces resources by large margins. There is a clear need for more coherent policy regarding the Homeless in the city in general and Community Board 12 in particular. We have the most shelters in Queens County. There are 17 shelters in the Borough of Queens, 9 of them are in Community Board 12. More community input is needed in regard to conditions of housing, and new techniques other than “warehousing”. The board continues to be concerned about the closing of the Emergency Assistance Unit (EAU) in Jamaica, thus forcing clients to travel out of the borough for services. This adds an intolerable burden to persons who are already traumatized by their emergency. There is no comprehensive plan to review and consider residential facilities

from all agencies (state, city, and private) when sites for homes are selected. These factors create intolerable burdens on certain communities of the city, such as ours, and causes community residents to oppose services that are legitimately needed out of sense of frustration. Our area has for years been unfairly targeted and as a result we house far more than our fair share of homeless and individuals in need of mental health residential programs. We must control the continuing expansion of group homes and shelters in our area.

Department of Housing Preservation and Development

We no longer have our Neighborhood Planning Office in its district; the office has been closed, and is now staffed at 100 Gold Street in Manhattan.

The final phase of the South Jamaica fourth Amendment is almost complete, in progress is the project on 150th Street and South Road, will consist of twelve (12) 2-family homes and two (2) 3-family; a total of 30 units. Guy R. Brewer North A and B corner of 108th Avenue, and Union Hall Street twenty one (21) 2-family homes with a total of 42 units, these units are complete.

New construction – the Dermot Project (Moda) located at 88-14 parsons Boulevard 340 units.

In Community Board 12 district we are experiencing a foreclosure crisis. Housing Preservation and Development is rolling out two programs to address the foreclosure crisis by way of acquisition of foreclosed properties that are made available by lottery to eligible New Yorkers and the Mortgage Assistance Program, another way which will attempt to stem the crisis by preventing foreclosure before it happens. HPD is attempting to address the crisis head on by launching new initiatives to meet our three critical goals of strengthening neighborhoods, expanding the supply of affordable and sustainable housing, and stabilizing families by keeping them in their homes.

In South Jamaica and the rest of southeast Queens, HPD is implementing new programs aimed at countering the impact of the foreclosure crisis.

Department of Transportation (DOT)

We have areas in the district where the streets are too narrow to handle the large volume of traffic that goes through. We are requesting a study to examine vehicular and parking patterns in the areas.

Street maintenance at this time needs to improve. We continue to feel that a work crew is specially needed in Community Board 12. There continues to be miles of streets in the district in the residential area in a state of disrepair, they are tied up in capital projects, some more than forty (40) years on the books and still not completed.

Community Board 12 infrastructure has been neglected for years. Many of our capital projects were delayed due to budget cuts, only a few are completed, some are in progress, and some

continue to remain in limbo ineligible for resurfacing or other maintenance while awaiting construction.

Department of Design and Construction (DDC)

Experience has shown that the lowest bidder on a capital project does not guarantee the best job.

Department of Environmental Protection (DEP)

Flooding, poor drainage, and a high level of ground water are a major problem in Community Board 12. A large portion of the district has Seepage Basins instead of Catch Basins. Seepage Basins normally function five to six years. We need an ongoing routine maintenance of catch basins. We continue to receive complaints from homeowners about street flooding so severe that basements and properties are damaged. Existing overflow facilities and outlets are insufficient to handle all the storm water that flows to us above and below ground. Some parts of the district have no storm drainage system at all, and where some storm sewers exist, they are inadequate or ineffective.

Station 6, located at 110th Avenue and 164th Place; the project is on hold. DEP was designing a new facility there to pump, treat and discharge into the drinking water distribution system approximately 10 MGD, which will assist in lowering ground water throughout the area:

- Design was scheduled to begin again in late 2007 - Cancelled
- Construction contract bid in 2009 - Cancelled
- Completion of Construction we were being told would be in 2013, now we are being told this project is now on hold. It's important that this project move forward. The Department of Environmental Protection has numerous projects submitted to DDC, they are not moving forward. We were informed that with the Jamaica Plan it would significantly upgrade sewer and water infrastructure in the district.

DEP needs to increase its efforts in addressing the serious flooding condition in the district, because poor drainage and flooding has been a long standing problem in Community Board 12 District too long.

Zoning

Zoning continues to be an issue in certain parts of the district that needs to be addressed, developers have come in and demolished one family homes and built five (5) and eight (8) family homes, changing the makeup of a community.

The Jamaica Plan Rezoning was the largest rezoning in New York City's history, covering 368 blocks. It is the first rezoning for the area since 1961. 341 of those blocks are in community board 12, twenty-seven (27) in Community Board 8, we were informed that the rezoning will spur the creation of 9,500 jobs, 5,200 housing units and three million square feet of Commercial

Space around the Air Train Station while protecting adjacent lowered scale neighborhoods; we hope this will happen.

The St. Albans and Hollis rezoning consists of 317 blocks, and we still have a large portion of board 12 that has not been rezoned.

The South Jamaica rezoning consisting of 530 blocks is in progress, we are waiting for the Environmental Impact Study to begin.

The Springfield Gardens rezoning consisting of 68 blocks was the beginning of rezoning in the district by United Neighbors Civic Association. A number of people have worked long and hard to develop a plan that will protect the character of our communities.

Economic Development

Presently we are getting prepared for a development spurt with a number of proposed large projects, one is in progress, the old former Queens Family Courthouse located at 88-14 Parsons Boulevard, being developed-mixed-use project consisting of 340 units of market-rate and affordable rental, 18,500 of retail space, 25,000 of community facilities, and public parking. The 168th Street Garage proposed project is on hold due to the economics.

With growth it presents considerable infrastructure and service challenges, also which require more immediate mitigation by the city especially for parking and traffic flows.

We are concerned, and hope that with all of the proposed projects and new development proposed for the district it will offer an opportunity to address the unemployment in the district; in which it has not.

Fire Department

In recent years, the incidence of fire and other related problems has decreased. The Fire Department, a number of years ago, instituted a strong and permanent community-based fire prevention program, the Fire Safety Education Fatal Fire Reduction Program, and the Smoke Detector Program. We once had the highest rate of fatal fires in the City of New York, an additional Fire Engine was added, Ladder 133, Engine 275. Interagency cooperation in the area of fire prevention worked.

With all that has been done, the result has been exceptional. Hopefully, the Fire Department will continue to institute the strong and permanent community-based fire prevention programs like the Fire Safety Education, Fatal Fire Educational Program and the Smoke Detector Program. These Programs certainly have been effective.

Sanitation

Community Board 12 sees no justification for our street cleaning crews being eliminated, hundreds of additional homes have been built in the district, but we have not received any additional service. We are disturbed that Sanitation is unable to service the malls dividing some of our major thoroughfares on a regular basis. Dumping is an increasing problem, and we ask that the Department of Sanitation increase its stakeout presence in our area. We need additional manpower for street cleaning, dump-outs, and litter basket operations. Archer Ave and Parsons Boulevard is one of our busiest transportation hubs, it's not part of the Business Improvement District (BID), and the litter baskets are always overflowing. Some of our streets are cleaned everyday, but they continue to be dirty in some of the areas.

This is devastating to our community. Our sanitation garage is in Community Board 10; it should be in the district in which it provides service. We have seven waste transfer stations. The Transfer stations in Community Board 12 are not used for the garbage coming from our community; they are used for the garbage coming from other districts. The community is not aware of what type of garbage is being transported through their community. The community is advancing for a more stringent set of guidelines for the Transfer Station to abide by. Other issues revolving around the Transfer Stations are constant noise of 18-wheelers, odors from the stations, moving of particular waste through residential areas along with a host of other issues. The community; New York City Department of Sanitation needs to take a more proactive role enforcing the codes and rules set by New York City.

Police

We have two Police Precincts in the district, the 103rd Police Precinct and the 113th Police Precinct. Tremendous revitalization has occurred in Jamaica and its surroundings. Our police precincts continue to show a drop in crime. The 103rd Precinct has gotten an increase in manpower and the Impact Zone, because of the 7,000 to 8,000 high school students that flow through Jamaica Avenue five days per week and the Air Train.

The 113 Police Precinct continues to receive a disproportionate number of Police Officers out of classes graduating from the police academy.

We are justly proud of our community. The Police Department has thrown a vast array of manpower and other resources into Southeast Queens to fight crime.

Subway Service

There are four subway lines (E, J, Z and F). The "F" train terminates at 179th Street on Hillside Avenue. Passengers wishing to travel further east have to transfer to a bus. Jamaica Center Transportation Study found the "E" train serves approximately 95,000 daily passengers (source: NYCT turnstile data) at the Jamaica Center and Sutphin Boulevard, Archer Avenue subway

stations. Riders of the New York City Transit system primarily use the system to commute to and from work in Manhattan.

Long Island Railroad

The Long Island Railroad (LIRR) station is located at the corner of Sutphin Boulevard and Archer Avenue. This station serves as a transfer point for several LIRR trains, buses, and subways, and services mainly commuters traveling to and from Nassau and Suffolk counties.

Air Train

The Air Train is a light rail service that connects downtown Jamaica with JFK International Airport and Howard Beach. The Air Train loops through the Central Terminal Area at JFK, it runs above the Van Wyck Expressway connecting to the Long Island Railroad and the subway at Jamaica Station.

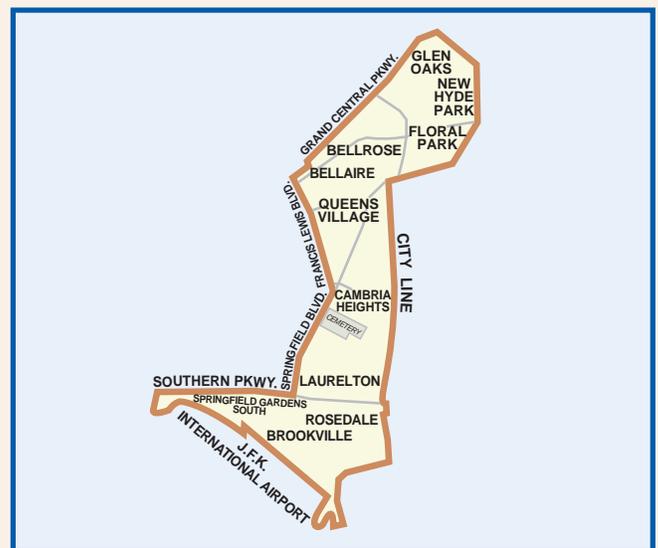

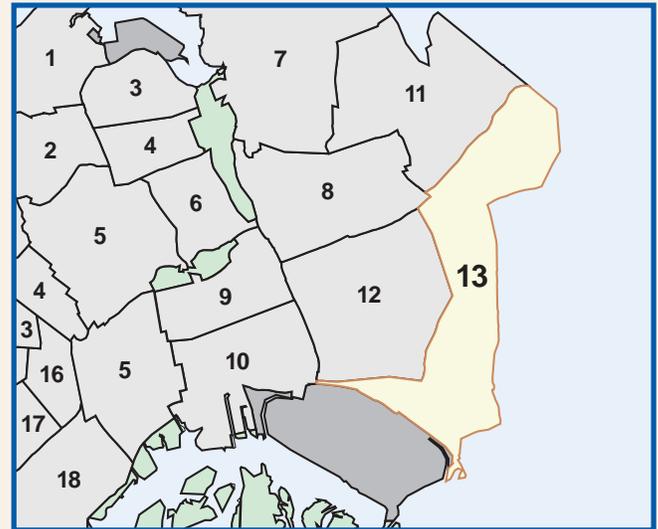

Parks & Recreation

Community Board 12 has a large amount of Parkland. We have been successful in getting the majority of our parks reconstructed at this time. Adequate maintenance and clean-up should be a seven day-a-week operation during the summer because our parks are heavily used. Seasonal employees should be hired on a five day work week basis. Trees beautify an area, we are getting more and more request for trees from homeowners, capital projects; but, we have not gotten an increase in service regarding pruning of the trees and stump removals. The Queens Forestry Division must be expanded to provide service to address these problems. There must be a pruning contract for every five years, not every seven years. The City is planting more trees under the Million Trees NYC project; the community residents are concerned about the pruning of the existing trees. We are requesting additional funding for personnel and equipment.

Finally

We will continue at Community Board 12 fighting for our fair share of City services that we are **not** receiving, that must be provided to maintain the quality of life for all the residents within the district.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

COMMUNITY BOARD 13
STATEMENT OF COMMUNITY DISTRICT NEEDS
FY 2011

Community Board 13Q is located in Southeast Queens along the Nassau border. It is made up primarily of one and two family homes, with a scattering of garden apartments and apartment buildings. The district encompasses nine distinct communities, which includes, Bellerose, Cambria Heights, Floral Park, Glen Oaks, Laurelton, Meadowmere, New Hyde Park, Queens Village, Rosedale, and Springfield Gardens. There is a strong sense of neighborhood commitment in each of these communities. This June Community Board 13Q conducted three meetings specifically to ascertain the needs and desires of residents and civics. The meetings were attended by up to one hundred residents who were not shy in expressing their desires.

The needs in each community differ greatly. One community may fight for a long awaited library, while another struggles with overcrowding and overtaxed utilities due to illegal conversions. Too many of our neighborhoods have a desperate need for street resurfacing, or more accurately street reconstruction, and other communities suffer from regular flooding or chronic illegal dumping. Many issues affect the entire board such as a proliferation of group homes and day programs significantly beyond the fair share due our communities. Other quality of life issues prevail as well. One of the constant complaints in fair weather is backyard parties with loudspeakers the size of garages, which run until early morning. Also, illegal social clubs start around midnight letting boisterous, unruly patrons file out around dawn. While our youth population is greatly increasing, they have no place to go for good, honest, supervised fun, City agencies are taking away areas near the bay with great recreational and environmental potential, to establish projects that will create more congestion and pollution in areas already severely polluted and congested with airport-related truck and car traffic.

This district has a large senior population, growing larger as people tend more to stay in the area as opposed to migrating down south. We believe that our overall population is increasing. The transition in many communities involves young families with children moving into the community and requiring services. In addition, many new houses are being built anywhere there is vacant land – one recent complaint was a house ten feet wide being added to a lot. Developers have demolished viable one and two family homes to build larger multi-family buildings. While these buildings attract young families and add to

the diversity and vibrancy of our district, the younger couples coming in will create need for more classrooms and additional out-of-school activities. The stay-put seniors and new youth population trends indicate a critical need for programs to provide activities for youth and services for seniors.

This area is clearly not getting its fair share of city services from any of the agencies. We were devastated recently when it was announced at July 2008's Borough Board meeting that the City's new SCOUT program reported the most "conditions" in CB13 than in any for the other thirteen districts. This is very disturbing for a district routinely receiving 97.5% to 99% ratings from DASNY and DEP. Storm damaged tree branches seem to lay in the gutter for weeks, curbs are non-existent or barely a memory in some areas. We are fortunate that most of our constituents clean up their sidewalks and gutters and often pick up rubbish from streets, malls and nearby parks. But they don't have the skills or equipment to repair curbs, prune trees or prevent crime. We deserve and demand our fair share and improvement to our quality of life from City agencies as follows:

POLICE DEPARTMENT:

Community Board 13 has not received our fair share of manpower and equipment since "Safe Streets-Safe Cities" became a non-priority. Most recent academy class graduates, for example, were assigned to our bordering precinct. Our 105th precinct got none of the rookies. Meanwhile, there has been a pattern of rapes and sexual abuse cases developing and the response has been inadequate to nonexistent. The residents of Southeast Queens, deserve and demand significantly more police attention, yet the 2008 staffing is twenty percent lower than in 2004.

More than twenty-five years ago the southeast CB13 neighborhoods were promised a dedicated precinct – the 116th. This was not only because of the enormity of the precinct but also its shape and location at the Nassau County border. Furthermore it must be noted that this precinct borders on JFK International Airport, one of the City's potential terror targets. Last year's thwarted attempt to attack the oil pipelines clearly demonstrates the potential. Should an incident occur, police manpower would be drained to the south leaving the north residents unprotected. In a catastrophe the 105 should be able to backstop the 116th force in the residential area while maintaining sufficient presence in the north.

In spite of promises and community demands, in July 2007 we were informed of the opening of a satellite office in Rosedale, covering only five sectors and operating only two shifts a day with limited supervision and resources. The community has made several requests but has not received a formal report on the "pilot" satellite, now in operation over a year without a public accounting except oral assurances that response time is up and crime down in the covered five sectors. However, the recent spasm of sexual crimes has occurred primarily within the new satellite area.

At one time violent crimes were not the issue in our district, but recently that has changed with an increase in gun and knife crimes and burglaries in commercial and retail buildings in various communities. The Cambria Heights neighborhood, which is usually quite placid, has experienced a significant increase during the past year in violent crime, illegal clubs and potential gang activities. Gangs were never a serious problem in our district, but according to our community meetings, at least one murder and it is likely that several burglaries have been the result of increased gang activity.

The community was extremely receptive to the community-policing program years ago. However, that program has diminished from 36 beats to only 3 beats covering the whole 12.3 square miles. Therefore, many residents complain that they never see an officer in their neighborhood. Our community is concerned that quality of life and misdemeanor complaints receive no response in the form of an officer appearing at the scene in a timely manner. Each year during the summer months there is a dramatic increase in noise complaints due to large and disorderly backyard parties in our area require an immediate increase in enforcement of noise restrictions. For fiscal 2008, the City's 311 records show noise, with 1,998 complaints, by far the highest complaint reports. These parties also prompt illegal parking, DWI, possible drug sales and criminal activity.

Quality of Life concerns continue. Graffiti continues to be a major problem on public and private property. Motorcycles, ATV's, and noisy mopeds on local streets break the summer quiet and drag racing on some streets has become a safety problem; people cannot sleep and have expressed total frustration in this matter. The district office and 311 have also received a dramatically increased number of calls for other non-criminal activities such as illegal parking particularly truck on-street storage throughout the district. In 2008 there were 2,079 complaints for illegal parking and derelict vehicles many of which, we believe were truck storage violations intended to ensure a peaceful, safe and tranquil "bedroom community" lifestyle. Without adequate police response or a minimal effort to enforce clear and long-standing regulations, we will not continue to enjoy this quality of life.

Community Board 13Q, is 13.2 square miles or 354 block miles which makes it the second largest board by land mass in the City of New York. This also means that police vehicles are over used and abused. Patrol cars are used at the rate of 1,000 miles per week or 100 miles per tour. Everyone in the community can immediately spot the precinct's unmarked van.

The 105th precinct lost 6 police administrative aides and they have not been replaced. Full time, highly trained and skilled police officers are doing the job that administrative aides could do at lower cost while leaving an officer on the streets.

Therefore, Community Board 13Q requests the following:

- The establishment of a second precinct, the 116, with a combined staffing with the 105 of no less than 30% above 2004 staffing.
- The immediate response and strict enforcement of noise restrictions, parking violations, graffiti and on-street truck storage, including no less than five permanently assigned boots for trucks.
- Additional attention must be paid to the possible formation and growth of gangs and to the education of youth and parents of the signs of gang recruitment and problems associated with gang activity.
- Additional civilian personnel must be assigned to free up uniformed police officers to address crime and quality of life conditions.
- A shorter service life for vehicles and at least one large capacity non-descript van for responding to certain crimes and for surveillance.

- A mobile command post permanently assigned to the 105/116 so it can be promptly dispatched to problem areas to permit rapid response of command and control into communities and an enhanced “show of force”.
- Increase enforcement at elementary schools to discourage double parking, stop dangerous j-walking and improve traffic flow near these schools.

FIRE DEPARTMENT:

Our board has determined that in order to have quality fire prevention we must continue to support quality fire investigation. More education for community and particularly to school aged children is necessary regarding fire prevention, safe evacuation and currently emergency response due to terrorism potential in our area.

The most serious problem with illegal residential or commercial conversions is the fire safety issue due to overcrowding and substandard electrical and building systems, as well as the danger to firefighters due to moved or additional partitions or doorways. FDNY has access authority not available to the Department of Buildings.

Fire fighters face danger as they exit and re-enter their firehouses in an emergency. As has been the case in Nassau County, it would be helpful on busy New York City streets, and at intersections to have a dedicated traffic light, controlled from the fire house, to prompt vehicles to stop for emergency vehicles, and eliminate any delay in getting out of the firehouse. This is particularly important in a primarily residential area, like ours, where there are typically less traffic controls and more relaxed driving standards. These controlled devices could mean slightly faster response and possibly saving someone’s life and property.

Therefore, Community Board 13Q requests the following:

- Provide additional fire marshals and enhance the Queens fire marshal headquarters in Fort Totten with all needed staffing and equipment.
- Reinforce fire education in schools and increase outreach to community groups, especially immigrant groups.
- Increase use of firefighters for the inspection of illegal conversions, both residential and commercial, where the district manager has validated the conditions of the complaint.
- Install a signal light in front of every firehouse within Community Board 13.

PUBLIC SAFETY:

Our communities rely heavily on the emergency medical service for assistance and transportation in crises. Our area is served by the Cross Island Parkway, Grand Central Parkway, Laurelton Parkway and Belt Parkway, all very heavily travelled roadways, not to mention the hundreds of street miles in the district, often very confusing and difficult to maneuver.

With so many miles of highways, older wood-frame buildings and a major airport in our area we strongly support the CityWeb initiative currently placing antennas for data and

video communications to transportation and first responder agencies. However, numerous calls came in during the installations and we had no knowledge of the program.

In our community meetings the topic of traffic signal interrupters came up. We strongly encourage the appropriate use of traffic signal interrupters during the response to a fire or medical emergency, even at the inconvenience of some drivers and minor, temporary traffic congestion.

Therefore, Community Board 13Q requests the following:

- At least four additional ambulances to be staged at appropriate locations in the north and south and two in the central district area.
- An increase in EMS service and availability in Community Board 13Q.
- Advance notification to community boards of the exact plans for locating CityWeb towers in the districts.
- To be consulted on appropriate locations and advised of installations of traffic signal interrupters.

DEPARTMENT OF BUILDINGS/CODE ENFORCEMENT:

Illegal residential conversions and illegal commercial uses are escalating at an alarming rate. We continue to be very concerned with illegal residential conversions due to the over taxing of city services that invariably results, but also because of the safety implications of substandard electrical and other building systems when inspections will not be conducted. Too often only one wall remains under a partial demolition permit, but frequently even that is removed, replaced and enclosed before inspection and often these buildings incorporate illegal dwellings and deprive the City of tax revenue of new buildings. It is also noted that most of the time illegal or unpermitted construction is performed by non-union firms. Seventy-five percent of construction-related deaths and accidents involving damage to surrounding structures in 2006 were non-union jobs.

Illegal commercial uses has become a serious and increasing problem in our area, primarily because of immigrant populations taking over buildings and using them in ways noncompliant with zoning. For example, a new merchant takes over a storefront in a commercial area intended for small very local uses with limited parking and other requirements. With success brought by attracting other new residents he buys and expands to adjacent stores, makes unapproved doorways between buildings and subdivides areas with stalls. This is very dangerous and creates serious potential fire hazards, but the Department of Buildings is not responsive for inspections. Furthermore, as the stores get bigger, patrons are drawn from a wider area bringing more cars, out of compliance with zoning regulations. DOB does not consider this a Buildings issue, but it affects the residential neighbors who lose their parking places and have to deal with unregulated congestion.

These commercial and residential illegal installations must not just be cited; they must not be allowed to continue. There must be personnel sufficient to insure adequate inspections on an on going basis.

A resident of our area recently died of lung cancer caused by asbestos. While fighting cancer he noticed that numerous houses in his area were being demolished with asbes-

tos pipes insulation, siding, roofing and other materials exposing neighbors and workers to friable asbestos without the proper abatement procedures. The gentleman was able to get the construction halted and the project was closed down for several months.

Finally, we believe that professional certification (self-certification) of residential permits dealing with major building alterations is the primary source of illegal conversions and use of Directive 14 on professionally certified major alterations or new building projects eliminates any Buildings Department oversight on such projects. Likewise, professionals' authority to self-certify the objections will be corrected is a "fox in the hen house" issue, possibly depriving the community of safe and compliant construction.

Therefore, Community Board 13Q requests the following:

- The prompt inspection of all demolition complaints and the establishment a strict, clear and consistent standard for requiring a full demolition permit.
- Increase training requirements in safety and construction procedures and more inspection, particularly for non-union firms.
- Closer enforcement of zoning code with regard to local vs. regional commercial properties.
- Ensure adequate DOB inspection/examiner staff to review all permit applications and respond more quickly to all complaints.
- Enforce the building/zoning code, including mandating the removal of new construction, modifications and expansions that are in violation of code.
- Fully enforce all inspection of asbestos-containing materials during demolition of older residential structures in our area.
- Discontinue in the Queens Community Board 13 area professional certification all major alteration and new building permits and establish a special unit to monitor construction continuously.
- Disallow Directive 14 for any professionally certified application and eliminate authorization for professionals to certify any permit application change required due to examiners' objections or site inspections.

DOITT – 311 AND COMMUNITY BOARDS:

Community Boards have lost some ground over the past year with a budget reduction which will be very difficult. We are relieved that the second reduction was rescinded by the Council, but is still planned for the 2010 budget. This will be very difficult to implement while trying to meet our Charter obligations.

311 has become a vital resource and a staple service to the residents and businesses of the city, however, it must be noted that there appears to be a lack of training of 311 operators about the meaning of some complaints that come in, resulting in the routing of some calls erroneously and dispatching the wrong forces. For example, in a recent complaint a 311 call about a disco operation being set up in a residential garage was routed to the

Buildings Department, rather than to the 105th Precinct. This resulted in a delay of several weeks before any response and deep frustration and loss of sleep for the neighbors.

However, there is a vast array of data gathered every month that could be of great assistance to community boards in their Charter-mandated overview and coordination of delivery of city services. While certain static detail is available to the general public as well as city employees of community boards, enhanced access is necessary for our district offices to take greatest advantage of the data and to tie it in to service delivery. Particularly, the exact location of problems, such as potholes, sinkholes, cave-ins, water main breaks, etc. would provide an opportunity of the local district offices to investigate and identify potential cross-agency issues and effectively address them in district cabinet meetings and capital budget requests.

In addition, district managers and other CB staff have no priority access to filing complaints or making service requests. As highly trained city employees with thorough knowledge of local neighborhood issues, these staff should be provided special filing access and priority.

Therefore, Community Board 13Q requests the following:

- Renew and increase Community Boards budgets.
- Ensure continued, enhanced training of 311 operators and a feedback mechanism for district managers to identify topics to be addressed.
- Establish enhanced community board access to 311 data, particularly exact location of infrastructure related conditions.
- Give priority access for district managers to a dedicated 311 operator or assigned PIN code for staff to establish appropriate legitimacy and credibility with operators.

EDUCATION:

With the significant additional building that has occurred, there has been a rapid influx of families with school age children and the Mayor's prediction of 900,000 city-wide increase in population by 2030 means that this growth will do nothing but continue to increase. But school buildings are very overcrowded. Parents see a diminished range in classes offered to the students at the elementary school level, and particularly in extra curricular activities. Parents are concerned with the quality of education and fear for the safety of their children as they move to Middle and High Schools. Many families are seeking to relocate for better educational opportunities and safety inside and outside the school buildings. We are obliged to make sure that every child in our Community Board has a seat in his or her neighborhood school and each school must provide a full range of educational services.

The physical plant of many of our school buildings needs attention.

Headstart and/or Pre-Kindergarten facilities are rapidly becoming too costly. School enrollment projections indicate that many more school seats will be required over the next decade.

Therefore, Community Board 13Q requests the following:

- We need a rational plan to increase classroom seats to meet the growing demand.
- We must be prepared for additional ESL programs with an increase of immigrants from Asia and the Indian sub-continent.
- After-School programs must be increased at every neighborhood school and high school.
- Gyms, school equipment and supervisory staff must be available to provide safe after school activities for youth.
- Cultural programs and extra-curricula activities, such as music and art must be expanded to provide a more well-rounded education and create interests that might not otherwise be tapped.
- Building maintenance, always a source of pride to custodial staff, must be supported and enhanced with sufficient budgets and oversight.
- School safety staff must be adequate in number and appropriately trained to provide a safe learning environment.

YOUTH:

Youth programs are limited within our district. Currently, the Department of Education and the Department of Youth and Community Development provide limited after school and evening programs to the Board area. Some programming exists in local religious institutions. However, the board area is not eligible for Community Development funds and has few community based organizations eligible to apply for the funds that for the most part do exist.

Schools buildings offer the primary source of space for youth programs in Community Board 13Q. The opening and space fees for evening programs in a school building still exist in prohibitive amounts. This factor inhibits program initiatives that are needed in the primary site resource available during the day and evening hours. Public buildings should be available for public use and there is no use we can think of more important than providing a safe haven for our youth after school hours.

It is imperative the DYCD and Education establish a program to keep all public schools open after school until the evening. It appears obvious that youth cannot, and probably will not travel a long distance to get to after school programs. If they have to travel far they will just stay local and hang out. While Beacon programs are exceptional for their supervised programs and learning opportunities, there are only two Beacons in our district and they are far from many of the neighborhood youths. However, there is a school in walking distance of each neighborhood and each school has facilities for recreation. They should be opened and available every school day after school.

The Department of Youth and Community Development Community Share Allocations to the Community Board and the local School District have been the best means of meeting local youth programming needs in a competitive funding stream with a local review process. Only the Community Board and Community School District can pinpoint the programmatic needs of the community and under a locally controlled recommendation

process, direct any funds available to fill those needs. Programs in local communities are providing the front-line youth service programs available to all children in all communities throughout the city. These program decisions must be supported and the community's recommendations respected by city officials and the agencies that serve youth.

Community Board 13Q has identified some of the priorities in youth programs within the board. They include expanded recreation and leisure time activities to provide year-round youth programming and to serve the growing need for latch-key type programs; educational and career choice counseling; youth employment; programs addressing the high school dropout rate; substance abuse prevention counseling; support programs to help resolve personal and family problems and the need for expansion of appropriate education and prevention programs addressing health needs and the growing threat of AIDS to the youth population.

Therefore, Community Board 13Q requests the following:

- The maintenance and enhancement of the Department of Youth and Community Development/Community Board cooperative planning efforts and coordination for all youth programming located in/or serving the youth population of the community board.
- Provide a youth coordinator position and protections for the prerogative of each Community Board to plan for youth services with a full time staff position specific to that individual board.
- Increase Community Share Allocation funding to Community Boards/Youth Services Planning Committees and After School Program funding to Community School Districts to permit new program development, program expansion and needed salary increases.
- Eliminate opening fees and space costs for all school building day and evening youth programs to encourage expanded use of these site resources for our youth population.
- Focus on reaching out to youth, empowering them, and increasing their self-esteem, their understanding and their sensitivity to others in a multicultural society. Youth must be encouraged to be involved in identifying, planning, implementing and evaluating various projects to achieve various goals.
- Establish multi-generational programs to take advantage of the experiences of the elderly and have youth provide help and support

HEALTH:

Our district has only one hospital, Long Island Jewish Medical Center (LIJ). Situated at the extreme north eastern edge of the district, this hospital is extremely inconvenient for most of our population and many southern residents travel to Franklin General Hospital in Nassau County for treatment, particularly for outpatient services that could be offered locally at clinical facilities. We need more health clinics in Community Board 13Q. One such neighborhood clinic is in the planning stages by LIJ and others by Queens Hospital Center.

Animal borne diseases such as west Nile Virus and Lyme Disease are serious and potentially deadly ailments. It is almost impossible to keep ticks, mosquitoes and rats under control if there is no way to mandate that owners remove stagnant water and maintain their unimproved lots or land with a structure upon it. The current method appears not to be sufficient, and it should be reviewed by joint groups i.e. Sanitation, Health, Environmental Protection (sewers), and the Department of Transportation. Presently, the pest control program appears to be fragmented and should be revamped.

We must have a new program for pest control. The rat population seems to be increasing. This is due at least in part to accelerated construction in our area, which disrupts rat nests. We request baiting of properties; however, there is no follow-up to many of our requests. Our Community Board is experiencing an escalation of rat and raccoon infestation of private residences, lots, and in the streets in all areas of the district.

Animal Control should be responsible for raccoon removal especially from the homes of our residents. In the past ASPCA took raccoons' out of people's houses that program worked out great. Our Senior Citizen population can not afford to get a company to go into there homes to trap raccoons', and get them out. It should be the obligation of the City to remove these dangerous animals.

Community Board 13 has been receiving numerous complaints about ferel cats roaming in packs. This is very disconcerting because of health related issues of fleas, feces and the possibility of biting and rabies. We urge Department of Health to address the problem of roaming cats as well as raccoons, rats, etc.

Nurses should be returned to schools because of the escalation of contagious diseases and their expertise in the recognition, and prevention of problems.

Therefore, Community Board 13Q requests the following:

- Support and encourage development of community medical clinical facilities in our communities.
- Penalize property owners who do not maintain their property personally or through contracted services at least on a semi-annual basis
- City-owned and government property must be properly maintained or Pest Control must similarly enforcement mechanisms for the public landlord.
- Establish an interagency task force to review and revamp pest control programs, particularly with regard to construction activities, but by government and private builders.
- Improve department of Health response to raccoon and ferel cat complaints since these animals, even on private property can be dangerous and carry infectious diseases.

ECONOMIC DEVELOPMENT:

Several very active and effective local development corporations and business groups have been established in our area and are making strides in moving their local projects

forward on our commercial strips. Security, regular street cleaning, daily household and basket collection, creating additional parking, improved lighting, and infrastructure improvements are on their agendas. These business groups seek ways to attract additional businesses compatible to the abutting residential communities. Many of these groups survive only on State grants or federal funding, but they provide a vital service to city government, increasing sales and business taxes and reducing City staffing necessary to provide direct support to businesses. Additional support from government would assist them in making more progress. Our local merchants need help to remain stable and avoid illegal use of business property.

What Community Board 13 does not want is for the Economic Development Department to sell every piece of vacant land to commercial developers. There is space that is just not appropriate for development. In particular the section of Rockaway Boulevard adjacent to Kennedy Airport has been a buffer to the airport and should appropriately remain forever wild or provide some recreational access. Yet, the department has attempted to sell large portions of this space. While one project went down in flames thanks to objections of the community and the board, two projects (Logan Bus and Quick Courier) are going forward and one (NYPD Impound Lot) is in the review process, likely to be supported by the administration.

Therefore, Community Board 13Q requests the following:

- Increase funding and grants available to community-based business
- Increase incentives to businesses to upgrade their operations
- Encourage minority and women business development and growth, since they are more likely to hire locally and grow quickly.
- All undeveloped property under the control of the Economic Development Corporation be turned over to the Parks Department to prevent any future commercial development and maintain a buffer to the airport.

SOCIAL SERVICES AND SENIOR CITIZENS:

Seniors comprise a large segment of our population. It is imperative that programs be developed and maintained to meet their needs.

Senior programs provide important services that our older residents lack entirely. Transportation and regular, fresh not frozen, Meals-On-Wheels service available to all seniors is needed. The Access-a-Ride service has just been expanded to permit direct travel to Long Island Jewish and North Shore Hospital Centers. This is a significant improvement that will eliminate the need to meet another van at city line to get to vital medical services.

There is a need for a series of multi-purpose centers throughout the community so that residents do not have to travel long distance for services, with incubators from different City agencies housed within. Until these are in place there should be outreach with a transportation component, if necessary. We have two excellent programs providing senior services – Services Now for Adult Persons (SNAP) and NORC (see below). SNAP has two facilities – in Creedmoor and Rosedale. SNAP's Creedmoor facility is in need of replacement and plans are underway for a replacement facility on campus. Funding must

be continued for these vital senior programs.

In addition, there should be multi-generational centers where youth and seniors can interact and support one-another. Seniors can use assistance in so many ways and in turn can provide life learning experience to youths, including advice and suggestions.

There is a clear need for seniors, who may be living alone or are unable to do normal household maintenance functions, to have some help. Things like changing light bulbs, shoveling snow and mowing lawns, and other help like balancing checkbooks or figuring out medication schedules or applications for Medicare part D, often need some outside help. Naturally Occurring Retirement Communities, known as NORCs, can provide that help. Usually NORCS are in apartment complexes. Community Board 13 has the first NORC in a single home residential community. There is a serious need for additional NORCs in other areas of Community Board 13 as our residents get older. Rosedale would be a very good place to establish another NORC.

Therefore, Community Board 13Q requests the following:

- Maintain delivery of fresh, not frozen meals for seniors through the Meals-on-Wheels program, with a personal visit from the deliverer and assurance that the senior is home and well.
- Continue the expansion of Access-a-ride to nearby Nassau County especially for health and shopping needs.
- Continue to provide funding for SNAP and provide a replacement facility
- As mentioned in the Youth section, provide multi-generational centers that can create opportunities for seniors and youths to share experiences and provide help
- Create one or more new NORCs in the southern communities of Community Board 13.

DEPARTMENT OF ENVIRONMENTAL PROTECTION:

Poor drainage and flooding has been a long-standing problem in our community board. Existing outlets are not sufficient to handle all the water that flows to us above and below ground. Severe problems exist in southeast Queens, and throughout the remainder of the district there are areas of intersection and corner flooding, as well as areas where sanitary sewers do not function, and water flows into the basements of the buildings. These problems can usually be solved through major storm and sanitary sewer projects. In fact, the Mayor's Storm Water Mitigation Study (April 2008) identified Cambria Heights as one of the ten most affected areas on Queens. Community Board 13Q believes that this report's immediate 10 point plan as well as the long term resolution should be applied to Rosedale, Laurelton, Queens Village and Southern Bellerose as well, thus following DEP's plan for correcting storm sewer in Southeast Queens.

As the Meadowmere and Warnerville Sanitary Sewer projects come to completion, it is

imperative that this area be promptly considered for a permanent storm sewer system and complete roadway restoration. The sanitary sewer project has addressed the court order to provide sanitary sewers for the area, but the roadway remains susceptible to mood tides and storm surges and the roadway is presently uneven, creating pools of water that may remain for days after a storm, possibly attracting mosquitoes and making walking very inconvenient.

Unfortunately, for the last 8 years or so, the Department of Environmental Protection has had a consultant study of the drainage throughout southeast Queens. Every major new project that Community Board 13 has requested during this time has been listed by Management and Budget as delayed pending the completion of the drainage study. Commissioner Lloyd stated in January 2007 that the study for CB13 would be complete by March 2007, yet there is no sign of any movement on any of the projects as of summer 2008.

The response time for catch basin cleaning and repair is excessively long. Funding should be made available for the preventive maintenance of basins and for emergency repair of defective basins, which are hazardous, and a threat to public safety. We understand that catch basins have a useful life of only fifteen years.

Since we are in a poor drainage district, and so many of our Bureau of Highway Operations Capital Improvement Projects are moving along the pipeline, a process must be established to ensure that sufficient new catch basins are being installed to assure proper run-off and, construction waste is being properly disposed of to prevent clogging of existing catch basins.

Therefore, Community Board 13Q requests the following:

- Continue and complete on-going storm and sanitary sewers in southeast Queens.
- Implement findings of the Mayor's Water Mitigation Study, particularly with regard to District 13.
- Conduct a major study and design program for storm sewer and street reconstruction in the Meadowmere and Warnerville sections of Rosedale.
- Implement all sewer construction projects that have been included in C13's capital priorities, but delayed pending completion of the SEQ Drainage Study.
- We are in need of ongoing routine maintenance of catch basins, all connections to the sewers, and the sewers themselves.
- Establish a major district-wide catch basin replacement program to replace catch basins that are out of date.

DEPARTMENT OF SANITATION:

The residents of the district take great pride in their homes and neighborhoods. However, there are problems they need help with. At least 3 dozen locations in our community board frequently fall victim to illegal dumpers.

Our community board is subject to hundreds of illegal posters placed on street poles, and medians. These signs are usually not offensive but do cause a blight on the community and are annoying to the residents of the community. Civic leaders have gone out and made lists of the locations of signs and when forwarded to the Department of Sanitation Enforcement Unit, the signs are usually removed. However, it seems that less than one percent of the violators receive a summons for placing these signs on City property. This removes a strong disincentive to putting up signs in the first place.

Community Board 13Q contains many concrete malls that need to be cleared of weeds and litter and maintained in presentable order. Driver and pedestrian safety depends on good visibility at all intersections. Weeds interfere with visibility and they must be cleared on a regular basis. The clean team must be restored. Downed tree limbs after storms overwhelm the Parks Department. Downed limbs cause safety problems, attract Asian Long Horn Beetles, look terrible and take parking spaces. Sanitation has offered to collect tree limbs in our district and bring them to a designated location if a dedicated truck is provided.

Therefore, Community Board 13Q requests the following:

- Provide one additional basket truck.
- Provide two additional mechanical sweepers.
- Provide one truck for dedicated tree limb collection.
- Increase vacant lot cleaning capabilities, and institute fencing programs
- Increase the number of W.E.P. workers available.
- Purchase for district use one new van for carrying W.E.P. workers and other personnel as necessary.
- Additional enforcement personnel to have more stringent enforcement, particularly against dumping and poster violations.
- Increased fines for those convicted of dumping and some form of incentives for reporting illegal dumpers.
- Increase funding to provide personnel to clean malls.
- Increased snow removal efforts and enhanced coordination with other agencies in advance of anticipated major snow events.

DEPARTMENT OF TRANSPORTATION & MTA:

Our district is completely dependent on surface transportation for mobility; as a result, quick repair of potholes and other roadway problems is essential. We are vigorously pursuing capital improvements (see DEP) for most of our streets, but clearly, improved maintenance is necessary while plans are developed for capital projects.

We require additional personnel in the traffic department, including field engineers, installers and maintainers to improve service delivery. The backlog for this work is tremendous

and there are dangerous areas waiting too long for completion of surveys and installation of traffic safety devices.

Commercial vehicle incursion into residential areas is a serious problem in our area, particularly because there is a large amount of construction; significant areas of low density residential construction with light-duty, narrow streets; and many trucks originating in Nassau County, unfamiliar with City truck regulations. With major construction in residential communities it is necessary to move large trucks such as earth movers, cement trucks, large equipment carriers, etc., to and from the construction site. These can devastate the infrastructure on small residential streets and homeowners fear water pipe damage, which is their responsibility and costs upwards of \$3,500, sometimes lots more.

When the bureau of electrical control approves a site for a new streetlight, there is a lengthy wait for installation. Similarly, when a capital project i.e. park construction, street construction, is completed we must sometimes wait for years for the new streetlights to be put in place.

Street signs in our area and some stop signs are frequently failing due to apparently defective paint. We are very concerned that these faded signs could cause serious accidents if a motorist is looking for a particular street. Many of these have been called in months ago, but not yet replaced.

District schools are in need of speed humps or all way stop signs, traffic signals or other controls are necessary to increase the safety of children in the area. In addition, parents dropping off children during the morning at all public elementary schools violate double parking rules and often allow children, unaccompanied, j-walk to get into school. School administrators and community folks are concerned about the safety of these young children.

Many intersections in our area are dangerous due to blocked vision as drivers attempt to enter. Most requests for daylighting parking restrictions are rejected out of hand.

In addition, we request authorization to access accident data at particular intersections if they have been recommended for traffic intersections. We seriously review all requests for all way stop signs and traffic signals, but we are currently unaware of traffic accidents at the location, which is a major condition for ultimate approval. It would be much more efficient if the committee could request and obtain traffic accident data.

With regard to mass transportation, our area is completely reliant on surface transportation and we are very poorly served in that respect. Thousands of daily commuters travel from northern and southern areas of our district. However, commuters particularly from the southern areas of Rosedale, Brookville and Springfield Gardens have an especially long and circuitous route to the Jamaica Hub and eventually to Manhattan. MTA/LIRR has recently opened an upgraded Rosedale station and Laurelton recently underwent an improvement program. Unfortunately, the City Department of Transportation has expropriated much of the property where railroad commuters parked and it has or is being sold off. LIRR's monthly cost to Manhattan far exceeds the cost of bus and subway and many commuters do not work in the Penn Station area. These disincentives mean many commuters rely on buses.

Over the past several years, however, bus service in southeast Queens has deteriorated and created a significant market for commuter vans, often called "dollar vans," although the price has escalated some. These vans are filling an unfortunate void that government

could and should fill. While there are many advantages to van commuters, the overall environment is not well served. Buses are much more fuel efficient. Dozens of vans contribute to congestion and pollution. Vans are now attracting a larger market share, which, of course, create the vicious cycle of removing bus passengers and reducing bus schedules. Over the years the Board has received numerous community complaints of loitering by vans and drivers, littering and public urination since there are no appropriate facilities for drivers between rush hour periods. We need to make bus transportation cleaner, faster, more convenient and more competitive in our area.

Therefore, Community Board 13Q requests the following:

- Authorize additional staffing resources to upgrade the performance of pothole crews and to establish more resurfacing programs
- Develop traffic channelization that would direct commercial traffic away from residential streets.
- Increase in asphalt for street maintenance
- Additional resurfacing programs.
- Increase in manpower to upgrade the performance of pothole crews.
- Improve procedures governing traffic light installations relative to major capital projects to remove reported excessive installation delays.
- Replace faded street signs and stop signs throughout the district.
- A study of all schools that are not currently protected with speed humps to determine if one is appropriate.
- Increase enforcement of rules around schools (see also Police).
- Permit Community Board Transportation Committees to investigate and submit priority recommendations for daylighting parking signage in their jurisdiction.
- Create incentives for residents to use the LIRR in Laurelton and Rosedale, such as increasing parking capacity and reduce cost, price incentives for regular commuters, increased express service to Manhattan, including eventually to Grand Central Terminal.
- Increase bus routes, reduce bus headways and improve bus comfort and speed to attract van passengers and reduce negative effects on air quality and congestion.

DEPARTMENT OF DESIGN AND CONSTRUCTION:

For many years we have experienced ongoing infrastructure improvement. We find that there is still a lack of adequate communication and consultation among agencies, utilities, outside consultants, etc. before and during the construction process to permit the

improvement to go forward as expeditiously as possible. For example, when the project boundaries are determined, and dollars approved for scope and schematics, each street should be checked for map/title/dedication status and the necessary process initiated so that when construction does take place streets are not unnecessarily eliminated.

Currently, as part of a capital project most contractors may work on more than one job. However, very often the gap in work can be many weeks and the resulting traffic backing up becomes frustrating and may lead to accidents. Incentive/disincentive clauses must become standard to all projects to ensure timely completion.

We find that the smaller business operations on commercial streets are not getting the customer and delivery access they should be getting during construction.

Experience has shown that where sections of an area designated for capital improvement have problems in drainage or grade, which create design difficulties, those streets are left for last and delayed year after year.

The independent engineer hired to monitor the contractor in the field often seems to be more responsive to the contractor than to the community and too much time elapses before the engineer, agency and contractor discuss and resolve the problem. This often results in hardship for homeowners or merchants.

Contracts in older residential areas, which are not well lit, do not include enough nighttime precautions to permit drivers to see barricades, depressions, etc. resulting in accidents.

Over time we find that each completed highway reconstruction project generates more owner complaints than prior projects produced.

Therefore, Community Board 13Q requests the following:

- Standardize incentives/disincentives must be agreed to, to discourage contractors from leaving on project to conduct work elsewhere.
- Project scheduling and design must consider access for businesses.
- Establish Agency policy to address the problem sections first and then proceed with the remainder of the project.
- Mandate all DDC or DEP contracts in excess of \$10 million to hire a community consultant to help coordinate and communicate with the community.
- Require temporary lighting during construction in low light areas to help motorists identify construction road hazards.
- Integrate a quality of work clause in each contract so that quality control on the site requires that infractions would prompt immediate work stoppage and correction.

DEPARTMENT OF PARKS AND RECREATION:

Many capital dollars have been expended in our district in recent years for reconstruction of parks. However, if there is not a person assigned to each completed facility, then it seems to us that these dollars are being wasted.

As parks capital projects are completed the need increases for maintenance personnel and equipment. Parks has jurisdiction over vast areas of public land in our district and need more permanently assigned parks workers - at least 12 full time and a minimum of eight seasonal workers. Many parks have been spruced up but not enough maintenance staff are assigned

The Parks and Recreation Department Forestry Division has responsibility for the tens of thousands of trees in our district. Trees are the source of the most conditions called into 311 for this board. Damaged or dead trees alone account for 2,675 calls, or about 17% of all 311 calls for the district. Pruning requests account for another 1,089 calls.

Our many parks and playgrounds require attention from both the community and the recreational division of the parks department. We must have additional recreational persons who help to oversee and plan programs in the parks. We do have some local Friends of The Parks, who have been recruited over the years but, it is very discouraging to them to see vandalism from time to time because, we do not have the staff to prevent it. We need park houses and the professional staff to assist the local Friends.

Winter use of local parks is something that should be encouraged. One cooperative development, Glen Oaks Village, has suggested that their oval, which is heavily used in the summer, would make a great venue for a temporary ice skating rink in the winter. They estimate a temporary rink with a six inch, non-refrigerated pool would be minimal in cost. The oval is completely fenced and can be locked off when the rink is not adequately frozen. Public areas in other parts of the district may be conducive also to removable ice rinks. They would be good, family fun and an opportunity for exercise during the winter.

Idlewild Park is one of the most active major development projects in our district's parks. Funding for the park includes horticulture and restoration of shoreline and paths in this wetland area. A major initiative is a children's science learning center that will operate year-'round and in particular in the summer and city resources are needed to help staff and provide materials and facilities for the science center. Also in the area is a very sensitive strip of land on Rockaway Boulevard adjacent to Kennedy Airport. The city's Economic Development Corporation is actively marketing the entire strip for commercial development, and several plots are already committed to sale. It is critical that remaining portions of this area be turned over to Parks for protection and some recreation.

The Parks and Recreation Committee of Community Board 13Q tours every park in the district every year, working closely with DPR District Parks Manager to identify and prioritize needed repairs. An example of this process is the reconstruction during 2008 of the park house at Bellerose Playground. It was closed and deteriorating for many years and was scheduled for demolition. The community objected and now with minimal investment the park house is open with restrooms and a now a recreation agent is on duty daily to work with kids. Similar reconstruction has been requested for other parks, such as repairs to wading pools, sprinklers and other recreational equipment at Delfin Green Park in Cambria Heights

We have a large percentage of the borough's trees, many of which are quite old. Large trees need of maintenance for both aesthetic and safety reasons. Trees leaning on private property or blocking stop signs are serious conditions, as are dead shafts and stumps. It is imperative that Queens Forestry be expanded to provide services to address these problems. We must have a tree pruning contract that deals with these very old and large trees but, the contract should be on a yearly basis in each community board not every 10 years. The mayor's PlaNYC2030, in fact, calls for pruning of every tree every seven years. This would substantially reduce storm damage, fallen trees and property damage in lesser storms.

Additionally, services need to be coordinated between D.O.T. and Parks when a traffic signal is installed many signals are being installed in areas where existing trees block visibility. Ignoring the hazards that line our streets is compromising public safety.

Last year the Cambria Heights Community Garden became our first and only community garden and a decorative and secure fence was installed by the Brooklyn Queens Land Trust, under whose jurisdiction the garden operates along with Cambria Heights Civic Association Beautification Committee.

Therefore, Community Board 13Q requests the following:

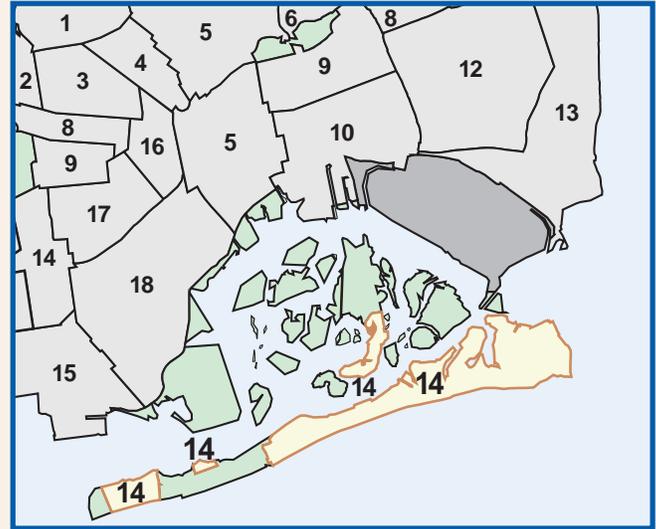

- Additional funding for personnel, equipment and contracts that include maintenance and operation of parks.
- Increase funding for dead tree and stump removal contracts on a one-call basis.
- Increase funding for tree pruning and maintenance contracts.
- Additional funding for Parks Enforcement for the reduction of crimes in CB13Q parks in conjunction with NYPD.
- Continue Parks tours with Community Board 13 Parks Committee and repair facilities identified, such as Delfin Greene Park in Cambria Heights.
- Financial and continued operational support for the Idlewild Park Master Plan to develop walkways, shoreline restoration, recreational access to Jamaica Bay and creation of a permanent science learning center.
- Acceptance of remaining unused space along Rockaway Boulevard adjacent to Kennedy Airport.
- Funding to irrigate the Cambria Heights Community Garden with a permanent sprinkler system and install walkways and benches in the garden.

Note: An '(X)' means the estimate is not applicable or not available.

The American Community Survey (ACS) is a Census Bureau survey that provides estimates for all geographic areas of the nation, including New York City, the five boroughs, and the 55 Public use Microdata Areas (PUMAs) that approximate New York City's 59 Community Districts. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. To learn more about the American Community Survey in NYC see [ACS](#).

COMMUNITY
BOARD #14

STATEMENT OF COMMUNITY DISTRICT NEEDS FISCAL YEAR 2011

COMMUNITY
BOARD #14
City of New York
Borough of Queens

DOLORES ORR
Chairperson

JONATHAN GASKA
District Manager

Community Board No. 14 encompasses the Rockaway Peninsula and Broad Channel. At least thirteen distinct communities, each with its own name, neighborhoods, interests and problems bound together through a common geography and history, which is both written and hidden. From a westerly to easterly direction, we point to Breezy Point, Rockaway Point, Neponsit, Belle Harbor, Rockaway Park, Seaside, Hammels, Rockaway Beach, Arverne, Edgemere, Wavecrest, Far Rockaway and Bayswater. Broad Channel sits in Jamaica Bay between Silver Hole Marsh and Big Egg Marsh snuggling close to the Jamaica Bay Wildlife Refuge part of Gateway National Recreation Area. The Rockaways is some eleven miles in length and averages less than three quarters of a mile in width. With its multi-ethnic, multi-religious groupings, the concerns of the poor, the aged, the young and the needy is often termed a microcosm of New York City. Patterns of housing are equally diverse with evidence of affluence in the western portion of the district, oases of attractive residences in garden-like settings in the far eastern portion, and large concentrations of public housing and publicly assisted housing in between.

THE ARVERNE URBAN RENEWAL AREA

In 2005, the first phase of the Arverne-By-The-Sea project started. The developers have done a wonderful job in constantly working with the community as the project progresses. We await the ground breaking this fall of the much-anticipated community center/ YMCA as well as the Super Stop & Shop. Despite a “down” real estate market, the development team of Benjamin & Beechwood has been able to sell well-designed quality two family homes. We look forward to the start of the next phase as well as the construction of the new school. Well over a year ago, City Hall selected a development team for the Arverne East portion of the AURA. We still have concerns as to how this part of the project will be developed. We continue to question the very dense design of the project, lack of 100% parking throughout, lack of school seats, and that the retail section of this project will not be developed to maximize the potential for much needed

jobs. Our real concern is that we lack confidence in the selected development teams’ ability to successfully finance and develop this project. We have not had any contact with the development team in over a year and question its commitment to work with our community to make this project a success. We hope to meet with HPD this summer to discuss the possibility of returning to the “drawing” board on this

project. We will not be satisfied with the City just building units. We need a successful, low-density community with job generating retail that will be an asset to our community.

We are hopeful that City Hall shares our vision.

EDGEMERE URBAN RENEWAL AREA

The Edgemere Urban Renewal Area (EURA), with its affordable two family house format was approved by the Board and the community. The Board believes that this project will enhance an area that has been in decline for over two decades. A total of 400 two-family homes will be built; a retail area and two new parks are also planned. Construction of the Third Phase is expected to be completed in 2010.

ECONOMIC DEVELOPMENT

The Rockaways and Broad Channel still have a need for active government assistance in spurring Economic Development. Most of our residents do the bulk of their shopping in Brooklyn or Nassau County. It makes no sense to have millions of tax dollars go to another borough or county. Our few shopping areas are struggling to survive, and are in need of assistance. We look jealously to all the money and government assistance that was put into the revitalization of the Jamaica shopping area. The Far Rockaway shopping area has been dying a slow death for years despite the efforts of the board and many local leaders. Recently we have met with representatives of the owners, and we are hopeful that renovation will start before the New Year.

EDUCATION / SOCIAL SERVICES

The Peninsula's unemployment rate is high compared to the rest of the borough and remains a serious problem. Our most precious resource, our youth, experience a 30% unemployment rate. Our adult unemployment rate is at 16%. The state continues to open group residences for those with mental and substance abuse problems despite our objections. The city also is continuing a misguided policy of placing Section 8 clients and other Housing voucher programs in our neighborhoods. Both state and city governments must stop this destabilization of the fabric of our neighborhoods. The board's Youth Services Planning Committee, a hard-working dedicated group has made headway in providing vocational, educational and recreational opportunities for our youth, but they cannot do this significantly alone.

TRANSPORTATION

Commuting to Manhattan or other parts of our borough remains difficult on a good day. The commute to Manhattan is still well over an hour by subway or bus. It is the community board's position that in order to attract working class families to live in our district, the commute to the city or the borough's business centers must be 35 to 45 minutes. Three transportation improvements would allow for this: 1) the revitalization of the Old Rockaway Railroad Line would allow for an approximate 30-minute commute to midtown. 2) Commuter Ferry Service: The Rockaways still need an affordable commuter

high-speed ferry service with multiple boats in the AM and PM rush hours. It should be located at a location that is convenient to all Rockaway residents. 3) Establish am/pm rush hour express subway service on the "A" train. It would be simple to have 3 to 4 rush hour trains that would only stop in Rockaway, Broad Channel, Howard Beach and Aqueduct and then go express until Jay Street in Brooklyn. The Board also believes that if transportation to and from Rockaway was made timely and convenient; it would spur Economic Development as well as attracting young families.

MUNICIPAL SERVICES / QUALITY OF LIFE / PUBLIC SAFETY SANITATION

The most visible signs of any community district at its best are police on the streets, and the cleanliness of the neighborhoods and shopping areas. Rockaway hosts millions of visitors each year. Along with this influx come the added burdens of crime and litter. The garbage deposited on our streets on a regular summer day can be classified as "imported" garbage. The need for daily basket pick up and mechanical broom cleaning of our struggling commercial areas is a priority. Fifteen percent of the land in Community Board #14 is vacant and therefore provides an open invitation for dumping. Our most serious sanitation issue is the continuous illegal dumping activity that occurs on a daily basis. We have requested additional Sanitation police at night to prevent and apprehend the thousands of illegal dumpers that plague our community. We also are awaiting the opening of the new district sanitation garage.

PARKS

Our 7.5 miles of beaches and boardwalks, together with our 22 playgrounds and parks show that we have much to offer not only to our residents but also too many visitors who come to our beach and boardwalk, which on a sunny summer day can attract an additional 200,000 people. Each summer we have well over 2 million visitors come to enjoy our community yet until recently our boardwalk was allowed to rot, and our hardworking parks department maintenance crews have at times had to due without adequate equipment and personnel. We have requested that the Parks Department along with the community develop a plan for more beach recreation and food orientated retail along the boardwalk. It would be nice to have a surf shop, bike rental and perhaps a Nathan's or some other well-known restaurant adjacent to the boardwalk. We continue to request extended beach hours during the week. Keeping the beach open to 7pm a few days a week would allow local and Queens' residents alike to enjoy a refreshing swim after work. We have also proposed to the Mayor this past April that the closed Edgemere landfill be turned into an Ecological themed waterfront park and a solar energy field. We still await a response from City Hall on what would be a national model for generations of renewable energy and waterfront recreation at the same location.

FLOOD CONTROL

In the past few years, we have suffered through a number of storms. Sections of our beaches and portions of the bayside communities of Arverne, Bayswater and Edgemere areas have been devastated. Over a decade ago, the Army Corp. of Engineers had proposed to replenish our beaches over a ten-year period and then install new rock T

GROINS to help stop the erosion of the beach. This project must be completed. On the bayside, the Nor'easter of 12/11/92 was the "straw that broke the camel's back" and the bulkhead abutting Jamaica Bay is in serious disrepair. The communities of Arverne, Bayswater, Broad Channel and Edgemere have streets and homes that are in jeopardy of falling into the Bay. This issue must be resolved as soon as possible.

CAPITAL EXPENSE IMPROVEMENTS

As always, it is not our intent to list and comment on individual capital budget requests by location and tracking number. We are gratified when sanitary/storm sewer projects move from study to construction; however, number of projects has languished in the bowels of city agencies for too long. The Board requests continuing funding for HW631. The area in Arverne called "the valley" has suffered for years. The need for a new elementary school in the 11691 zip code must be met. The replacement of missing and bleached out traffic signs continues to be a serious problem. The board also requests that The Dept. of Health be funded each year for the purpose of a programic application of adulticide to mitigate the serious mosquito problem each summer that our bayside communities suffer from.

UNSAFE BUILDINGS / ILLEGAL CONVERSION

Within the boundaries of Community Board #14, there remain over 190 buildings with an SRO designation. While we continue to be concerned about the illegal conversion of these buildings, be the owners by adding or sub dividing illegal rooms. Our biggest concern is that three City agencies HPD, DHS and the NYCHA continue to dump section 8 and other vouchered housing program clients in these dangerous buildings as well as the dozens of un-sold two and three family homes on the Peninsula. This has a destabilizing effect on our working class neighborhoods and must stop now. The department of Buildings continues to improve its response to our concerns and its methods to deal with illegal construction, but more needs to be done. DOB must be spared from the budget axe. As always, we continue to be disappointed with HPD when it comes to demolition of unsafe buildings. Our district has dozens of locations that should be demolished and have languished on the unsafe building list for over a decade.

WATERFRONT ACCESS

The Rockaways and Broad Channel are known as "beach" communities; however, we do not have the benefit of a legal public boat ramp or a public fishing pier. We hope the city can find the funds to support these two important priorities. Funding should be put in place for the design of a regional waterfront park to be located at Rockaway Community Park, which is adjacent to the old Edgemere landfill.

Finally, we ask that community board budgets not be cut and in fact be increased to fund the collective bargaining increases as well as increased costs of supplies, postage and equipment. Community Boards are the only city agency that has not seen a real increase in budget for over a decade.

In conclusion, the membership of Community Board #14 has remained tenacious in its efforts to improve all of the districts neighborhood's quality of life. This has become

increasingly difficult with the reduction of resources and capital dollars. A number of promising proposals are being considered which would drastically improve the quality of life of our residents, provide jobs and improve access to the peninsula. It is up to our local elected officials, the Governor and the Mayor to see that this promise is realized.
