

C17002

## RATIO OF INCOME TO POVERTY LEVEL IN THE PAST 12 MONTHS

Universe: Population for whom poverty status is determined  
2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

**Tell us what you think.** Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

	Bronx		Brooklyn		Manhattan	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Total:	1,392,596	+/-1,302	2,574,154	+/-1,448	1,582,885	+/-1,998
Under .50	185,990	+/-5,571	252,279	+/-6,507	133,002	+/-5,025
.50 to .99	241,584	+/-5,905	345,125	+/-6,532	150,588	+/-5,204
1.00 to 1.24	99,691	+/-4,923	160,070	+/-5,026	65,670	+/-3,429
1.25 to 1.49	94,134	+/-4,257	145,050	+/-4,789	63,066	+/-4,296
1.50 to 1.84	104,884	+/-4,187	167,262	+/-5,127	77,883	+/-3,473
1.85 to 1.99	39,202	+/-2,946	66,668	+/-3,268	25,080	+/-2,526
2.00 and over	627,111	+/-7,015	1,437,700	+/-8,831	1,067,596	+/-7,802

	Queens		Staten Island		New York City	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Total:	2,275,823	+/-1,332	466,740	+/-578	8,292,198	+/-3,114
Under .50	137,059	+/-4,503	30,559	+/-2,177	738,889	+/-11,409
.50 to .99	206,775	+/-5,307	27,911	+/-2,027	971,983	+/-11,655
1.00 to 1.24	113,149	+/-4,273	14,256	+/-1,723	452,836	+/-9,019
1.25 to 1.49	120,264	+/-4,228	16,880	+/-1,920	439,394	+/-9,137
1.50 to 1.84	160,405	+/-4,874	18,718	+/-1,618	529,152	+/-9,221
1.85 to 1.99	62,019	+/-3,123	9,170	+/-1,339	202,139	+/-6,183
2.00 and over	1,476,152	+/-9,024	349,246	+/-3,609	4,957,805	+/-18,107

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
