BOROUGH, TAX BLOCK & LOT (BBL)

Numeric - 10 digits (9999999999)

A concatenation of the borough code, tax block and tax lot of the facility, program, or parkland property. This field is used for mapping selection.

This field consists of the borough code followed by the tax block followed by the tax lot. The borough code is one numeric digit. The tax block is one to five numeric digits, preceded with leading zeros when the block is less than five digits. The tax lot is one to four digits and is preceded with leading zeros when the lot is less than four digits. If a parkland property is comprised of more than one BBL, multiple occurrences will be stored for the property.

Examples:

Manhattan Borough Code 1, Tax Block 16, Tax Lot 100 would be stored as 1000160100.

Brooklyn Borough Code 3, Tax Block 15828, Tax Lot 7501 would be stored as 3158287501.

NOTE: Parkland properties defined as "Joint NYCDOT/DPR Landscaped Area", generally named "GREENSTREET", have not been assigned a tax block or a tax lot by the Parks Department. Certain parkland properties such as transportation-related open spaces, former street

properties, waterfront, or land under water have also not been assigned a tax block or a tax lot by the Park's Department.

X COORDINATE (XCoord)

Numeric - 7 digits (9999999)

The X coordinate of the XY coordinate pair which depicts the approximate location of the facility, program, or parkland property. (Also see Y COORDINATE). Facilities' X and Y coordinates must be used together for mapping selection. The XY coordinates are expressed in the New York-Long Island State Plane coordinate system.

NOTE: If the facility is on more than one tax block/tax lot, multiple occurrences of the XY coordinate pairs are stored for the facility. For example, Big Bush Park in Queens is located on Block 2323/Lot 23, Block 2324/Lot 1, and Block 2317/Lot 51. Three records for this property with the same ID are listed in the database with three different pairs of XY coordinate. Certain parkland properties are located on multiple parcels which are not assigned tax block and tax lot. For example, Park Avenue Malls in Manhattan is listed in the database as multiple records without tax block and tax lot but with individual XY coordinate pair. Certain parkland properties are located on non-contiguous parts within the same tax lot. For example, P.S. 139 Playground in Brooklyn which includes a northern portion and a southern portion of Block 5144/Lot 64 is listed in the database twice, each with its own XY coordinate pair.
