

FIGURE 3-M: CONDENSE EXIT 5 TO ONE LANE

- + Traffic levels on the Exit 5 offramp do not justify two lanes. In May 2008, **248** vehicles used the ramp in the AM peak hour
- + The southern two-thirds of the ramp's southern lane would be closed; the remainder would become a shoulder
- + The area between shoulder and retaining wall would be re-graded to the level of Ocean Parkway, creating room for expanded bikeway, bridle path and plantings
