Notes:

1) Rate definitions: rates are calculated by dividing the program counts by the by the total population of children in a specific community district, multiplied by 1,000. The population of children under 18 years old is used for for children in indicated investigations, prevention and foster care and for for detention youth 11-18 is used. The program counts are defined as follows: children in indicated investigations are unique children in investigations with confirmed abuse and/or neglect; children receiving prevention are unique children in child welfare prevention cases during the year; foster care placements are unique children placed in foster care during the year excluding those placed in Close to Home; and detention admissions are unique youth admitted to detention during the year.

2) The following CDs are combined in the available census data for youth 11-18 used for the detention rates, therefore admission counts are also combined to calculate rates: Bronx CDs 1 and 2 and 3 and 6 and Manhattan CDs 1 and 2 and 4 and 5. The combined rates for these CDs are shown in each of the listed CDs.
