NOTE: BOC analysis is based on the housing areas for confirmed COVID-19 patients, symptomatic patients, and likely exposed but asymptomatic units reported by DOC on 04/14/2021 at 4:30 pm, the DOC Inmates in Custody File on 04/15/2021, which is automated pull from the DOC Inmate Information System (IIS) at 11:00 am, and the Cross-Section file on 04/15/2021. Individuals housed in confirmed and symptomatic units may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage.

1 Data reported by CHS reflects data from the prior day.
2 This metric includes hospitalized as well as recovered patients.
3 This metric is sourced from the “CHS COVID-19 Data Snapshot.” As of August 21st, 2020 this snapshot has been posted on the CHS homepage Monday through Friday.
4 Vaccination metrics were added to the “CHS COVID-19 Data Snapshot” on April 5th, 2021. This snapshot is posted on the CHS homepage Monday through Friday.
5 The number of CHS patient deaths does not include patients who may have been diagnosed and treated while in custody and died post-release.
6 This metric reflects staff newly placed in quarantine/isolation and not the total number of CHS staff currently in quarantine/isolation.

The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage. SOURCES: BOC analysis of daily CHS updates to BOC & DOC Inmates in Custody File, automated daily pull from the DOC Inmate Information System (IIS) at 11:00 am.
The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage.

CHS reports the first patient with confirmed COVID-19 on March 18th.

1 The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage.
II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)

CHS and DOC report the cumulative total staff members who have tested positive for COVID-19 in their daily updates to the Board. CHS does not report the cumulative total number of incarcerated people who have tested positive for COVID-19 in its daily updates to the Board but does report this metric in weekly Local Law 59 reports published on the CHS website. It would be inappropriate to compare cumulative staff totals to the number of currently incarcerated patients with COVID-19 reported in slide 15.

---

BOC analysis is based on the housing areas for likely exposed but asymptomatic individuals, confirmed COVID-19 patients, and symptomatic patients reported by DOC for the previous day as of 4:30 pm. Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage.
III. Housing: People in Likely Exposed but Asymptomatic Housing

Number of People In Likely Exposed but Asymptomatic Housing, 
March 16 - April 16, 2021

1DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients.

SOURCES: BOC analysis of daily DOC updates to BOC & DOC Inmates in Custody File, automated daily pull from the DOC Inmate Information System (IIS) at 11:00am and the housing areas for exposed but asymptomatic patients reported by DOC for the previous day as of 4:30pm.
III. Housing: People in Confirmed/Symptomatic Housing

Number of People In Confirmed/Symptomatic Housing, March 16 - April 16, 2021

1 DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage.

SOURCES: BOC analysis of daily DOC updates to BOC & DOC Inmates in Custody File, automated daily pull from the DOC Inmate Information System (IIS) at 11:00am and the housing areas for confirmed and symptomatic patients reported by DOC for the previous day as of 4:30pm.
III. Housing: Percentage of People in Custody in Housing Areas with a COVID-19 Housing Designation

Percentage of People in Custody in Housing Areas with a COVID-19 Designation
March 16, 2020 – April 16, 2021

1 DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the CHS homepage.

SOURCES: BOC analysis of daily DOC updates to BOC & DOC Inmates in Custody File, automated daily pull from the DOC Inmate Information System (IIS) at 11:00am and housing areas for exposed but asymptomatic individuals, confirmed COVID-19 patients, and symptomatic patients reported by DOC for the previous day as of 4:30pm.
IV. Housing Area Capacity

April 10 – April 16, 2021
IV. Housing Area Capacity

Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity
April 15, 2021

NOTES:
1) Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

SOURCE: BOC analysis of DOC 5am census reports and DOC designed capacity data.
IV. Housing Area Capacity

NOTEs:
1) Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

SOURCE: BOC analysis of DOC 5am census reports and DOC designed capacity data.
IV. Housing Area Capacity

NOTES:
1) Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.

2) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

</table>

1 The values above exclude counts of Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

2 Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.

3 DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDU) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS’s COVID-19 Data Snapshots, which are posted on the CHS homepage.

4 The weekly total represents the total number of unique housing areas that surpassed 50% capacity at any point in the report week. A housing area’s COVID-designation may change throughout the week.

SOURCE: BOC analysis DOC 5am Census Files and DOC Daily Updates; housing areas for exposed but asymptomatic individuals, confirmed COVID-19 patients, and symptomatic patients reported by DOC for the previous day as of 4:30pm.
IV. Housing Area Capacity

SOURCE: BOC analysis of DOC 5am census reports and DOC designed capacity data.

NOTES:
1) Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity.
2) The census data presented in the table above comes from DOC’s 5am census, which reflects a head count conducted by DOC staff each morning. The census data presented on all other slides is sourced from DOC’s Inmates in Custody files.
3) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
4) The values above exclude counts of people in Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).
