<sup>1</sup> Data reported by CHS reflects data from the prior day.

<sup>2</sup> This metric includes hospitalized as well as recovered patients.

<sup>3</sup> This metric is sourced from the "CHS COVID-19 Data Snapshot." As of August 21st, this snapshot has been posted on the [CHS homepage](#) Monday through Friday.

<sup>4</sup> The number of CHS patient deaths does not include patients who may have been diagnosed and treated while in custody and died post-release.

<sup>5</sup> This metric reflects staff newly placed in quarantine/isolation and not the total number of CHS staff currently in quarantine/isolation. Board reports published before November 30<sup>th</sup>, 2020 incorrectly labeled this metric as the number of CHS staff currently in isolation.

SOURCES: (1) CHS and DOC updates to BOC; (2) CHS COVID-19 Data Snapshots.

## II. CHS and DOC Updates to BOC: People in Custody by COVID-19 Status<sup>1</sup>

Number and Percent of Patients with Confirmed COVID-19  
December 12 - December 18, 2020

<sup>1</sup> The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

## II. CHS and DOC Updates to BOC: Currently Incarcerated Patients with Confirmed COVID-19<sup>1</sup>

**Number of Currently Incarcerated Patients with Confirmed COVID-19  
March 17 - December 18, 2020**

<sup>1</sup> The figure above reflects the number of confirmed COVID-19 patients who were currently incarcerated as of each date. These numbers include confirmed patients who have recovered from COVID-19. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).

## II. CHS and DOC Updates to BOC: Staff with Confirmed COVID-19 (cumulative)<sup>1</sup>

<sup>1</sup> CHS and DOC report the cumulative total staff members who have tested positive for COVID-19 in their daily updates to the Board. CHS does not report the cumulative total number of incarcerated people who have tested positive for COVID-19 in its daily updates to the Board but does report this metric in weekly Local Law 59 reports published on the [CHS website](#). It would be inappropriate to compare cumulative staff totals to the number of currently incarcerated patients with COVID-19- reported in slide 15.

### III. COVID-19 Designated Housing

March 16 – December 18, 2020

### III. Housing: Housing Areas by COVID-19 Housing Designation, December 12 – December 18, 2020

	12/12/2020	12/13/2020	12/14/2020	12/15/2020	12/16/2020	12/17/2020	12/18/2020

<b>Total Housing Areas for Likely Exposed but Asymptomatic Individuals<sup>3</sup></b>	14	36	36	35	31	32	37

<sup>1</sup> BOC analysis is based on the housing areas for likely exposed but asymptomatic individuals, confirmed COVID-19 patients, and symptomatic patients reported by DOC on the previous day (time of DOC reports ranging from 9:08 am to 8:43 pm).

<sup>2</sup> Confirmed and symptomatic units on these dates were in Communicable Disease Units (CDUs) at West Facility, OBCC, RMSC, as of Saturday December 12th two celled units at MDC (one unit was removed from the confirmed and symptomatic designation on December 15th and the other was removed on December 17th), and as of Wednesday December 16th one dormitory unit at EMTC. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

<sup>3</sup> Likely exposed but asymptomatic units on these dates were in AMKC, VCBC, GRVC, OBCC, RNDC, MDC, and EMTC.

### III. Housing: Housing Areas with a COVID-19 Housing Designation<sup>1</sup>

**Number and Percent of Open Housing Areas with a COVID-19 Designation  
December 12 - December 18, 2020**

■ Likely Exposed but Asymptomatic Housing    ■ Confirmed COVID-19 or Symptomatic Housing

<sup>1</sup> DOC uses three COVID-19-related housing designations: (1) one for likely exposed but asymptomatic individuals, (2) one for exposed and symptomatic individuals, and (3) one for confirmed COVID-19 patients. **Individuals housed in confirmed and symptomatic housing may include people who have refused testing, and those who are housed in the Communicable Disease Units (CDUs) for non-COVID reasons. People housed in CDUs share no communal space. The total number of people in custody with confirmed active infections can be found in CHS's COVID-19 Data Snapshots, which are posted on the [CHS homepage](#).**

## IV. Housing Area Capacity

December 12 – December 18, 2020

## IV. Housing Area Capacity

Number and Percent of Open Cell and Dorm Units Above and Below 50% Capacity  
December 17, 2020

NOTES:

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity. This represents a change from prior BOC analyses which calculated capacity using the census and “beds at standard” values reported in DOC’s 5am census. DOC reports the “beds at standard” metric reflects each unit’s operational capacity after accounting for legal (e.g., Nunez Consent Decree housing limits, etc.), programmatic (e.g., PACE, CAPS, MO, etc.), and maintenance (e.g., inoperable or down cells, etc.) factors, which may be unrelated to the size of each unit and may change over time.
- 2) Dorm count includes modular dorm units in AMKC, RMSC, and RNDC.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

## IV. Housing Area Capacity

**Number and Percent of Open Units Above and Below 50% Capacity by Housing Category  
December 17, 2020**

**NOTES:**

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. - 2) General Population units have fewer staffing needs than more specialized housing units such as PACE or MO units and present an opportunity to lower housing density to facilitate social distancing.
- 3) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity. This represents a change from prior BOC analyses which calculated capacity using the census and “beds at standard” values reported in DOC’s 5am census. DOC reports the “beds at standard” metric reflects each unit’s operational capacity after accounting for legal (e.g., Nunez Consent Decree housing limits, etc.), programmatic (e.g., PACE, CAPS, MO, etc.), and maintenance (e.g., inoperable or down cells, etc.) factors, which may be unrelated to the size of each unit and may change over time.
- 2) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).

**NOTES:**

- 1) On Thursday December 17th, DOC provided the Board with data on the designed capacity of jail housing areas. Designed capacity reflects the maximum number of beds each housing area was designed to accommodate. DOC believes this metric serves as the best available proxy for housing area size. Accordingly, the capacity figures presented above are calculated by dividing housing area census by housing area designed capacity. This represents a change from prior BOC analyses which calculated capacity using the census and “beds at standard” values reported in DOC’s 5am census. DOC reports the “beds at standard” metric reflects each unit’s operational capacity after accounting for legal (e.g., Nunez Consent Decree housing limits, etc.), programmatic (e.g., PACE, CAPS, MO, etc.), and maintenance (e.g., inoperable or down cells, etc.) factors, which may be unrelated to the size of each unit and may change over time.
- 2) This analysis excludes Contagious Disease Units (CDUs) (where people in custody share no communal space), intake areas (where the census changes throughout the day), and the Bellevue Hospital Prison Ward (BHPW).
