

WHY HAS VIOLENCE INCREASED IN RNDC

- These tables demonstrate that assaults on staff have tripled and all uses of force have doubled in RNDC since the closure of GMDC. The current number of violent episodes in RNDC exceed the combined numbers for RNDC and GMDC before GMDC closed in June.
- The increase in violence results from the closure of the GMDC Justice Center, the programs it supported, and the failure of DOC to establish these programs in RNDC before transferring the Young Adults. This was compounded, unnecessarily, by separating Young Adults from the trained correctional officer staff at GMDC, and staffing RNDC with CO's from other DOC facilities who received no training regarding the Young Adult Program.

Assaults on Staff
