Notice: New CEQR Type II Checklist form

Please note that effective June 1, 2022 the previously used CEQR Type II Checklist form has been updated. This form provides consolidated guidance on determining if an action may qualify for a Type II classification under CEQR and SEQRA regulations and outline what supplemental items are required for initial submission to BSA based on project type and specifications. During the course of the BSA application process the form and supplemental items will be evaluated by staff and the Board to determine if further information and environmental review is required.

CEQR Type II Checklist Form Instructions:

1. Part I – Fill out to determine which designation under CEQR and SEQRA regulations may apply to the proposed action. Use the embedded hyperlinks to access reference materials shown in blue.

2. Part II – Fill out for items classified as Type IIs under 62 RCNY §5-05(c). Provide the required supplemental technical assessments as described at the end of each question. The list of BSA actions associated with 62 RCNY §5-05(c) can be found on the second page of the form.

3. Part III – Print and sign applicant/representative name and add date on the document was signed. Affix seal, if Registered Architect or Professional Engineer.

If it is determined by the CEQR Type II Checklist form that a Type II designation is appropriate, please fill out the form and submit with the requisite Type II fee.

If it is determined by the CEQR Type II Checklist form that an Unlisted or Type I designation is appropriate, please fill out the required Short or Long EAS form and submit with the requisite CEQR fee. For amendment applications, please note that if a previous environmental review has already been completed, a Technical Memorandum and fee may also be appropriate for submission in lieu of an EAS.
