Terms and Conditions: The above-described commercial ovens are accepted, when fired by natural gas only, under the following conditions:

1. Units shall be installed in accordance with manufacturer’s instructions, National Fuel Code and New York City Building Code requirements.

2. Cooking equipment shall be installed under hoods that vent to the outside and comply with Reference Standard RW 13 requirements of the New York City Building Code and have a fire suppression system complying with Reference Standards RS 13-2 and RS 13-3 with open heads and capable of simultaneous discharge and manual release. The fire suppression system, exclusively used for cooking equipment, shall be filed with the Buildings Department and examined and approved by the Fire Department.

3. Adequate supply of fresh air shall be provided into room or space enclosing equipment for unit ventilation and combustion requirements.

4. Special precautions regarding exhaust fans in the vicinity of the equipment may be required to prevent interference with operation of the equipment.

5. For grease removal, suitable baffle-type grease filters, MEA accepted, shall be installed.

6. Gas line tubing connections shall be made and equipment gas input settings shall be set by the plumber installing the unit.

7. All work provided by the installer from the point of gas utility company main line service termination to the equipment shall be subject to approval by the plumbing inspector.

8. Approval of all electrical equipment, apparatus, materials and devices shall be obtained from the Department’s Electrical Advisory Board.

9. Units shall be used in compliance with the Energy Conservation Construction Code of New York State.

10. All shipments and deliveries of such equipment shall be provided with a metal tag, suitably placed, certifying that the equipment shipped or delivered is equivalent to that tested and accepted for use, as provided in Section 27-131 of New York City Building Code.

NOTE: In accordance with Section 27-131(d), all materials tested and accepted for use shall be subject to periodic retesting as determined by the Commissioner; and any material which upon retesting is found not to comply with Code requirements or the requirements set forth in the approval of the Commissioner shall cease to be acceptable for the use intended. During the period for such retesting, the Commissioner may require the use of such material to be restricted or discontinued if necessary to secure safety.
