**Terms and Conditions:** The above-described water heaters are accepted under the following conditions:

1. For **indoor** installation, minimum clearances to combustible and non-combustible construction are:

   - Left Side: 2 inches
   - Right Side: 2 inches
   - Rear: 0 inches
   - Front: 24 inches
   - Top: 12 inches
   - Floor: 12 inches
   - Vent: 4 inches

2. For **outdoor** installation, minimum clearances to combustible and non-combustible construction are:

   - Left Side: 6 inches
   - Right Side: 6 inches
   - Rear: 0 inches
   - Front: 24 inches
   - Top: 12 inches
   - Floor: 12 inches
3. Units shall be fired by natural gas only.

4. Heaters shall not be installed in any enclosed space with a volume of less than 100 cubic feet.

5. Approval of all electrical equipment, apparatus, materials and devices shall be obtained from the Department's Electrical Advisory Board before installation.

6. Units shall be installed and used in compliance with the Energy Conservation Construction Code of New York State.

7. All shipments and deliveries of such equipment shall be accompanied by a metal tag, suitably placed, certifying that the equipment shipped or delivered are equivalent to that tested and accepted for use, as provided for in Section 27-131 of the New York City Building Code.

Note: In accordance with Section 27-131 (d), all materials tested and accepted for use shall be subject to periodic retesting as determined by the Commissioner; and any material which upon retesting is found not to comply with Code requirements or the requirements set forth in the approval of the Commissioner shall cease to be acceptable for the use intended. During the period for such retesting, the Commissioner may require the use of such material to be restricted or discontinued if necessary to secure safety.
