

THE CITY OF NEW YORK
HOUSING AND DEVELOPMENT ADMINISTRATION
DEPARTMENT OF BUILDINGS

DEPARTMENTAL MEMORANDUM

DATE: May 5, 1975

TO: Borough Superintendents
FROM: Director of Operations, Thomas V. Burke, P.E.
SUBJECT: M.E.A. ACCEPTANCES - BOILERS

On January 28, 1975 certain boilers were deleted from the list of M.E.A. Acceptances by publication in the City Record (copy is attached).

A subsequent memorandum (copy attached) on this subject, dated 3/13/75, is hereby modified as follows:-

Applications filed for installation of new boilers in residences, and small commercial boilers (which previously were approved on a conditional basis and later deleted because the manufacturer failed to provide test data) may be accepted as follows:-

The application shall contain the following notes -

- a) this application is filed with the knowledge that only a conditional approval of the application is being requested.
- b) arrangements have been made to conduct field tests or laboratory tests (by an M.E.A. accepted testing laboratory or testing service registered with the M.E.A. Division) of representative models of the boiler series and test reports will be submitted to M.E.A.
- c) the applicant is accepting responsibility for filing an amendment when the test results are accepted by M.E.A.
- d) a final Certificate of Approval will not be issued until acceptable test data is submitted to and accepted by M.E.A.

The plan examiner when processing the application shall indicate on the Form 900 ("Notice of Proposed Steam or Hot Water Boiler Installation") that the application is "conditionally approved".

Plumbing inspectors shall not issue final Certificates of Approval until amendment is approved indicating that M.E.A. acceptance has been obtained.
