

UPCOMING CHANGE

LAA Applications for Boiler Work: Deadline to Convert from Number 6 Heating Oil

To convert a boiler from number 6 heating oil to a cleaner burning fuel oil, applicants must submit a Limited Alteration Application to the Department of Buildings. In addition, any boiler conversion to change to or to add natural gas requires the applicant to submit an amendment with NYC Department of Environmental Protection (DEP).

All boiler-related Limited Alteration Applications must indicate that the equipment will be converted no later than the June 30, 2015 deadline. This must be included in the Description section of the LAA.

For more information, see the NYC Department of Environmental Protection's Clean Heating Rule [15 RCNY §2-15](#) and [DEP's website](#).

Conversion Deadline Approaching

Boilers must be converted by the expiration date of their Certificate to Operate issued by DEP. All Limited Alteration Applications submitted to the Department of Buildings must reflect this upgrade.

DEP will enforce the Clean Heating Rule's June 30, 2015 deadline – regardless of the LAA's expiration date.

Submitting an LAA Application

Submit LAA applications electronically or to the Department of Buildings' LAA/Permit Renewal Unit at 280 Broadway, Fifth Floor, New York, NY, 10007.

For assistance, email LAA-PR@buildings.nyc.gov.
