

UPCOMING CHANGE

2014 New York State Energy Conservation Construction Code: Public Comment Period on Proposed Modifications

The 2014 [New York State Energy Conservation Construction Code](#) will be modified by a proposed rule published in the [State Register](#) on November 25, 2015 (begins on page 20). The public comment period is open until February 5, 2016.

The State proposes to adopt the 2015 IECC with limited modifications. The New York State Energy Code establishes the base for the New York City Energy Code, which must be more stringent. As proposed in the rule, the State expects to make the effective date for the new Code approximately 90 days after adoption. Adoption of the proposed rule is anticipated to occur at the State's scheduled Code Council meeting in March, 2016.

The expected effective date of this new Code is late June, 2016. Interested parties are encouraged to submit comments to the State during the public comment period and are encouraged to attend the public hearing. The hearing will be held in New York City at **10:00 am on January 29, at 123 William Street**. Comments should be submitted to the State as per the instructions in the State Register.

If you have questions, please email the Department at EnergyCode@buildings.nyc.gov

Post Until: February 5, 2016
