

Purpose of form:

The OP133 allows an applicant to request a review for the removal of the NYS Department of Environmental Conservation (DEC) Wetlands flag(s) on the BISWeb Property Profile Overview. The form must be completed by a registered design professional or a licensed land surveyor and must contain a copy of the applicable NYS DEC Wetlands map(s) annotated to clearly identify the subject premises and demonstrate that the entire tax lot is outside any mapped zone or associated adjacent area.

1 Location Information

- Location refers to the place where the proposed work is. To populate this section, it is important that you note the property that is listed exactly as it appears in the Building Information System Online Database, BISWeb.

2 Applicant Information

- This section should include the name, contact and license number of the appropriate certified or licensed New York State Licensed Professional Engineer (PE), Registered Architect (RA), or Land Surveyor.

3 Request for Review

- Choose all applicable wetlands map categories for review and possible removal from: Tidal Wetlands, Freshwater Wetlands, and/or Coastal Erosion Hazards Areas. The contested lot must be clearly identified and annotated on the applicable map to demonstrate that the entire tax lot is outside of the zone(s) and/or adjacent area(s).

4 Comments

- Summary of information that will assist in the process.

5 Statement and Signature

- Registered design professional or a licensed land surveyor required to sign, seal, and date the affidavit statement.
