

SERVICE UPDATE

Sustainable Contractor Registration: General Contractors, Electricians & Plumbers

Contractors, electricians and plumbers with an expertise in environmentally friendly construction and green technologies may now register with the Department as a Sustainable Contractor.

To register, applicants must demonstrate their knowledge through third-party certification/credentials. They must also agree to promote green technologies and report these activities to Department, when requested.

Confirming a Sustainable Contractor's Registration

Use the [Skilled Trades Licensees / General Contractor / Registrant Search](http://nyc.gov/buildings) tool at nyc.gov/buildings to verify if a contractor is certified in sustainable practices. Enter the license number, last name or business name, and select the license type. Sustainable Contractors will have a green leaf icon on their page. Contractors' credentials are listed on the bottom of the screen.
