**ARTICLE IV
MANUFACTURING DISTRICT REGULATIONS**

**Chapter 1
Statement of Legislative Intent**

**41-00
GENERAL PURPOSES OF MANUFACTURING DISTRICTS**

The Manufacturing Districts established in this Resolution are designed to promote and protect public health, safety, and general welfare. These general goals include, among others, the following specific purposes:

- (a) To provide sufficient space, in appropriate locations, to meet the needs of the City's expected future economy for all types of manufacturing and related activities, with due allowance for the need for a choice of sites.
- (b) To provide, as far as possible, that such space will be available for use for manufacturing and related activities, and to protect residences by separating them from manufacturing activities and by generally prohibiting the use of such space for new residential development.
- (c) To encourage manufacturing development which is free from danger of fire, explosions, toxic and noxious matter, radiation, and other hazards, and from offensive noise, vibration, smoke, dust and other particulate matter, odorous matter, heat, humidity, glare, and other objectionable influences, by permitting such development in areas where this Resolution restricts the emission of such nuisances, without regard to the industrial products and processes involved.
- (d) To protect adjacent residential and commercial areas, and to protect the labor force in other establishments engaged in less offensive types of manufacturing and related activities, by restricting those manufacturing activities which involve danger of fire, explosions, toxic and noxious matter, radiation and other hazards, or create offensive noise, vibration, smoke and other particulate matter, odorous matter, heat, humidity, glare, and other objectionable influences, to those limited areas which are appropriate therefor.
- (e) To protect manufacturing and related development against congestion, as far as is possible and appropriate in each area, by limiting the bulk of buildings in relation to the land around them and to one another, and by providing space off public streets for parking and loading facilities associated with such activities.
- (f) To protect the character of certain designated areas of historic and architectural interest, where the scale of building development is important, by limitations on the height of buildings.

- (g) To protect light manufacturing and to encourage stability and growth in appropriate mixed-use areas by permitting light manufacturing and controlled residential uses to co-exist where such uses are deemed compatible.
- (h) To promote the most desirable use of land and direction of building development in accord with a well-considered plan, to promote stability of manufacturing and related development, to strengthen the economic base of the City, to protect the character of the district and its peculiar suitability for particular uses, to conserve the value of land and buildings, and to protect the City's tax revenues.

**41-10
PURPOSES OF SPECIFIC MANUFACTURING DISTRICTS**

**41-11
M1 Light Manufacturing Districts (High Performance)**

These districts are designed for a wide range of manufacturing and related uses which can conform to a high level of performance standards. Manufacturing establishments of this type, within completely enclosed buildings, provide a buffer between Residence (or Commercial) Districts and other industrial uses which involve more objectionable influences. New residences are excluded from these districts, except for:

- (a) joint living-work quarters for artists in M1-5B Districts;
- (b) dwelling units in M1-5M and M1-6M Districts;
- (c) dwelling units in M1-1D, M1-2D, M1-3D, M1-4D and M1-5D Districts, where authorized by the City Planning Commission, both to protect residences from an undesirable environment and to ensure the reservation of adequate areas for industrial development; and
- (d) dwelling units in M1-6D Districts.

**41-12
M2 Medium Manufacturing Districts (Medium Performance)**

[UPDATING TO REFLECT NEW M2A DISTRICTS AND EXISTING ALLOWANCES IN OTHER DISTRICTS]

These districts are designed for manufacturing and related activities which can meet a medium level of performance standards. Enclosure of such activities is not normally required except in areas along the boundary of a Residence District. No new residences or community facilities are permitted.

**41-13
M3 Heavy Manufacturing Districts (Low Performance)**

These districts are designed to accommodate the essential heavy industrial uses which involve more objectionable influences and hazards, and which, therefore, cannot reasonably be expected to conform to those performance standards which are appropriate for most other types of industrial development. No new residences or community facilities are permitted.

Special Provisions for Zoning Lots Directly Adjoining Public Parks Height and Setback Provisions for Districts with an A suffix

M1 M2 M3

[RELOCATING TO SECTION 43-47]

In all districts, as indicated, a public park# with an area of between one and 15 acres shall be considered a wide street# for the purpose of applying the height and setback regulations as set forth in Section 43-43 (Maximum Height of Front Wall and Required Front Setbacks) to any building# or other structure# on a zoning lot# adjoining such public park#. However, the provisions of this Section shall not apply to a public park# more than 75 percent of which is paved.

For M Districts with an A suffix, the height of a building# or other structure# shall not exceed the maximum base heights or maximum building# height set forth in paragraph (a) of this Section. A setback is required for all portions or buildings# or other structures# that exceed the maximum base height specified in paragraph (a) and shall be provided in accordance with paragraph (b). In districts without a maximum height limit, the tower provisions set forth in paragraph (c) shall apply.

(a) Maximum base heights and maximum building# heights

The table below sets forth the maximum base heights and maximum building# or other structure# heights.

MAXIMUM BASE HEIGHT AND MAXIMUM BUILDING HEIGHT

District	Maximum Base Height (in feet)	Maximum Height of Buildings or other Structures (in feet)
M1-1A M2-1A M3-1A	45	65
M1-2A M2-2A M3-2A	65	95
M1-3A M2-3A	95	125
M1-4A M2-4A	125	155
M1-5A	155	205
M1-6A	155	245
M1-7A	155	325
M1-8A M1-9A	155	N/A

In addition, for #zoning lots# with a #lot area# greater than or equal to 20,000 square feet, a #building# may exceed the maximum building heights established in such table by 25 percent.

- (b) Any portion of a #building# above the maximum base height shall provide a setback with a depth of at least 10 feet from any #street wall# fronting on a #wide street# and a depth of at least 15 feet from any #street wall# fronting on a #narrow street#. However, such setback requirement may be modified as follows:
 - (1) the depth of such required setback may be reduced by one foot for every foot that the #street wall# is located beyond the #street line#, but in no event shall a setback of less than seven feet in depth be provided, except as otherwise set forth in this Section. To allow #street wall# articulation, where a #street wall# is divided into different segments and located at varying depths from the #street line#, such permitted setback reduction may be applied to each #street wall# portion separately;
 - (2) the depth of such required setbacks may include the depth of recesses in the #street wall# of the #building# base, provided that the aggregate width of any such recessed portion of a #street wall# with a setback less than seven feet, does not exceed 30 percent of the #aggregate width of #street wall# at any level; and
 - (3) these setback provisions are optional for any #building that either is located beyond 50 feet of a #street line# or oriented so that lines drawn perpendicular to it, in plan, would intersect a #street line# at an angle of 65 degrees or less. In the case of an irregular #street line#, the line connecting the most extreme points of intersection shall be deemed to be the #street line#;
 - (4) dormers may penetrate a required setback area, provided that the aggregate width of all dormers at the maximum base height does not exceed 40 percent of the width of the #street wall# of the highest #story# entirely below the maximum base height#. Such dormers need not decrease in width as the height above the maximum base height increases.
- (c) Towers

For #buildings# in M1-8A and M1-9A Districts, no maximum height limit shall apply. However, any portion of a #building# above a height of 350 feet shall have a maximum #lot coverage# of 50 percent of the #lot area# of the #zoning lot#.

- (a) For #zoning lots# adjoining #public parks#
M1 M2 M3

In all districts, as indicated, a #public park# with an area of between one and 15 acres shall be considered a #wide street# for the purpose of applying the height and setback regulations as set forth in Section 43-43 (Maximum Height of Front Wall and Required Front Setbacks) to any #building or other structure# on a #zoning lot# adjoining such #public park#. However, the provisions of this Section shall not apply to a #public park# more than 75 percent of which is paved.

- (b) For #zoning lots# containing certain #community facility uses#
M1

In the district indicated, for certain #community facility# #uses# in specified situations, the Board of Standards and Appeals may modify the regulations set forth in Sections 43- 41 to 43-45, inclusive, relating to Height and Setback Regulations, in accordance with the provisions of Section 73-64 (Modifications for Community Facility Uses).

M1 M2 M3

In all districts, as indicated, #accessory# off-street parking spaces, open or enclosed, shall be provided in conformity with the requirements set forth in the table in this Section for all #development# after December 15, 1961, for the #manufacturing#, #commercial# or #community facility# #uses# listed in the table. In addition, all other applicable requirements of this Chapter shall apply as a condition precedent to the #use# of such #development#.

After December 15, 1961, if an #enlargement# results in a net increase in the #floor area# or other applicable unit of measurement specified in the table in this Section, the same requirements set forth in the table shall apply to such net increase in the #floor area# or other specified unit of measurement.

A parking space is required for a portion of a unit of measurement one-half or more of the amount set forth in the table.

For the purposes of this Section, a tract of land on which a group of such #uses# is #developed# under single ownership or control shall be considered a single #zoning lot#.

For those #uses# for which rated capacity is specified as the unit of measurement, the Commissioner of Buildings shall determine the rated capacity as the number of persons which may be accommodated by such #uses#.

The requirements of this Section shall be waived in the following situations:

- (a) when, as the result of the application of such requirements, a smaller number of spaces would be required than is specified by the provisions of Section 44-23 (Waiver of Requirements for Spaces Below Minimum Number);
- (b) when the Commissioner of Buildings has certified, in accordance with the provisions of Section 44-24 (Waiver of Requirements for All Zoning Lots Where Access Would Be Forbidden), that there is no way to arrange the spaces with access to the #street# to conform to the provisions of Section 44-43 (Location of Access to the Street);
- (c) for houses of worship, in accordance with the provisions of Section 44-25 (Waiver for Locally Oriented Houses of Worship).

For the purposes of applying the loading requirements of this Chapter, #uses# are grouped into the following Parking Requirement Categories (PRC) based on how requirements are measured. The specific designations for #uses# are set forth in the Use Group tables.

R3-2, R4, R4B, R5, R6, R7, R8, R9 and R10 — General Residence Districts**

These districts are designed to provide for all types of residential buildings, in order to permit a broad range of housing types, with appropriate standards for each district on density, open space, and spacing of buildings. However, R4B Districts are limited to single- or two-family dwellings, and zero lot line buildings are not permitted in R3-2, R4 (except R4-1 and R4B), and R5 (except R5B) Districts. The various districts are mapped in relation to a desirable future

residential density pattern, with emphasis on accessibility to transportation facilities and to various community facilities, and upon the character of existing development. These districts also include community facilities and open uses which serve the residents of these districts or benefit from a residential environment.

R7-3 and R9-1 Districts may be mapped only as specified in this paragraph. Such districts may be mapped within the waterfront area and in the Special Mixed Use Districts and Mandatory Inclusionary Housing areas. In addition, R7-3 Districts may be mapped in the Special Long Island City Mixed Use District and Special St. George District, and R9-1 Districts may be mapped in Mandatory Inclusionary Housing areas.

HHS ACCELERATOR PREQUALIFICATION

To respond to human services Requests for Proposals (RFPs), in accordance with Section 3-16 of the Procurement Policy Board Rules of the City of New York (“PPB Rules”), vendors must first complete and submit an electronic HHS Accelerator Prequalification Application using the City’s PASSPort system. The PASSPort system is a web-based system maintained by the City of New York for use by its Mayoral Agencies to manage procurement. Important business information collected in the Prequalification Application is required every three years. Documents related to annual corporate filings must be submitted on an annual basis to remain eligible to compete. Prequalification applications will be reviewed to validate compliance with corporate filings and organizational capacity. Approved organizations will be eligible to compete and would submit electronic proposals through the PASSPort system. The PASSPort Public Portal, which lists all RFPs, including HHS RFPs that require HHS Accelerator Prequalification, may be viewed, at https://passport.cityofnewyork.us/page.aspx/en/rfp/request_browse_public

All current and prospective vendors should frequently review information listed on roadmap to take full advantage of upcoming opportunities for funding. The uninterrupted continuation of this contract is needed to keep providing general construction Job Order contract region 4, Brooklyn. The work under this contract is for General Construction Work under a series of small to medium size construction projects at various Bureau of Water & Sewer Operations (BWSO) facilities in Region 4 (Brooklyn Pollution Control Plant areas). In addition to large capital construction

projects, BWSO has an ongoing need to accomplish smaller, straight forward construction projects at its facilities. Without Job Order Contracts, for each such project, the BWSO must prepare complete contract documents and execute the required steps through the competitive bid process. Procuring the construction through this traditional design-bid-build process takes considerable time. Many of the projects are essential to maintain the operation of BWSO facilities. The considerable time it takes to get contracts in place can jeopardize the continuation of service and, in some cases, permit the problem to worsen and result in additional costs. This Job Order Contract allows BWSO to accomplish the much-needed projects in a fraction of the time while paying competitive prices for the work.

PRE-QUALIFIED LIST (PQL) PROGRAM FOR VARIOUS TRADES

NYCHA is currently accepting applications for Pre-Qualified List (PQL) program for various trades.

A PQL is a tool that NYCHA will use to qualify vendors and contract goods or services for its developments, streamlining the process for both vendors and NYCHA. NYCHA will publish contracting opportunities, and the PQL will predominantly be used to procure goods or services for those contracts. Vendors who apply to those bids

must pre-qualify according to specific criteria, and vendors who are admitted to the PQL can bid on contracts.

Currently NYCHA has established six (6) PQL lists for the Closed-Circuit Television (CCTV), Carpentry, Painting, Lead Based Paint (Assessment and Abatement, Inspection and Assessment & Lab Analysis), Plumbing and Electrical.

All vendors interested in NYCHA's PQLs must follow two (2) important steps:

First, vendors must prepare and submit applications to the PQL: To pre-qualify, vendors must meet the minimum requirements listed on the Request for Qualification of the select PQL. Applications will be evaluated by NYCHA on a rolling basis.

Second, vendors who are admitted to the PQL can then bid on solicitations for services on the PQL: Vendors must bid on each contract award, as these are not guaranteed.

For more information regarding PQLs and to obtain applications, please visit NYCHA's website at: <https://www.nyc.gov/site/nycha/business/nycha-pql.page>
