List of Acronyms

Acronym	Definition
CSO	Combined Sewer Overflow
CCL	Community Construction Liaison
NYCDDC	New York City Department of Design and Construction
NYCDEP	New York City Department of Environmental Protection
NYSDEC	New York State Department of Environmental Conservation
POD	Points of Discharge
PPP	Public Participation Plan
SPDES	State Pollutant Discharge Elimination System

1. Introduction and Objective

This Public Participation Plan (PPP) has been developed to implement the Construction of Storm and Sanitary Sewers and Appurtenances in Willow Avenue in the Borough of Staten Island, New York (Project ID SER20079). The PPP has been prepared in accordance with the New York State Department of Environmental Conservation (NYSDEC) Commissioner Policy-29, Environmental Justice and Permitting (CP-29).

The objective of this PPP is to address environmental justice concerns and ensure public participation in the NYSDEC environmental permit review process by the impacted community. The PPP will inform the affected community of the State Pollutant Discharge Elimination System (SPDES) permit application process for the water treatment and discharge facilities operated in support of the New York City Department of Design and Construction's (NYCDDC) Project ID SER20079 and will promote public communication and understanding of the SPDES permit application process.

2. Project Description and Proposed Actions

The purpose of the project is to construct storm and sanitary sewers, water mains and appurtenances to mitigate existing flooding conditions, upgrade and improve sanitary sewer system and water quality in the project area. The current site condition consists of existing roadway and sidewalk. The construction area (see Figure 1) is comprised of Willow Avenue between Tompkins Avenue and Bay Street in the Rosebank section of Staten Island, NY.

The project site is approximately 1,500 feet in length. Land use in the vicinity of the corridor is primarily characterized by commercial properties. The properties beyond the immediate vicinity of the corridor are mostly used for residential or commercial purposes. The topography of the project area consists of flat surfaces associated with small hills flattened during urbanization or regrading of the area. The site elevations range approximately from four (4) feet to 25 feet above mean sea level. Under natural conditions, surface runoff would be expected to follow the overall topography of the area and ultimately discharge into Upper New York Bay, the closest water body.

The site is now mostly paved with asphalt and concrete. The general excavation depth for the sewers and water mains is ranging approximately from three (3) feet to 14 feet below grade surface (ftbg). Excavation will expose fill deposits or pass through silty sands and clay with some gravel. According to the NYCDDC's Phase II Subsurface Investigation Report dated July 24th 2019, groundwater was encountered at approximately 1.5 to 3 ftbg. Groundwater is anticipated to flow north towards Upper New York Bay located approximately 600 feet northeast of the site.

As shown on Figure 2, temporary dewatering to facilitate the installation of the sewers and water mains will be required during construction. Approximately 35 wells will be installed in the silty and sandy overburden to collect groundwater from the construction site and discharge it into existing storm sewers after passing through a treatment system consisting of a settling tank and activated carbon filtration system to remove both particulates and volatile organic compounds (VOCs). Given the size and the location of the project site, one (1) point of discharge (POD) is designated for the project. POD1 will discharge into an existing 48” storm sewer on Willow Avenue at the intersection with Bay Street. Header pipes will convey groundwater from individual wells to the settling tank. The discharge from the filtration system will enter the existing storm sewer using a temporary hard connection. A total maximum of three (3) pumps at 270 gallons per minute (gpm) will be used at one time for a period of approximately 1.5 years to facilitate this operation. The dewatering pumps will be relocated with project progress. The scope of work is shown in the following table:

Summary of Scope of Work	
Pump Capacity & Number of Pumps	Three 270 gpm well pumps at a time
Estimated Daily Drainage	1.15 MGD (800 gpm = 1.78 cfs)
Duration of pumping	1.5 years
Flow Meter	McCrometer MW500
Pre-treatment Equipment	One 12,000-gallon settling tank Two 400-gpm bag filters Two 400-gpm activated carbon filters
Discharge Pipe Location	Header pipes will convey groundwater from individual pumps to the settling tank. The discharge from the filtration system will flow to an existing storm sewer at POD. The dewatering pumps and header pipe will be relocated as the project progresses.

The POD will lead to the New York City Department of Environmental Protection (NYCDEP) Outfall PR-019 requiring a New York State Pollutant Discharge Elimination System (SPDES) permit.

3. Stakeholders and Contact List

Per New York State Department of Environmental Conservation's (NYSDEC) recommendations and in collaboration with the New York City Department of Design and Construction's (NYCDDC) Community Construction Liaison (CCL), the office of Resident Engineer, and HUCATAO Corp., a contact list of interested and affected parties was developed (see Appendix A). The list includes local government and elected officials; businesses, organizations, schools, owners or occupants who live or work within a 1-2 block distance (approximately 500 feet - see Figure 3) of the project area. This list will be used to communicate and disseminate information about the project with the affected community and stakeholders. The contact list will continue to be updated regularly to include new stakeholders.

4. Public Outreach Activities

In order to inform the public about the proposed temporary dewatering plan, SPDES permit process and to address the requirements of Commissioner Policy-29, Environmental Justice and Permitting, several outreach activities will be planned and conducted. These activities include: 1) preparing and disseminating a fact sheet about the project; 2) preparing and circulating a public meeting notice/invitation encouraging the affected community and stakeholders to attend a public informational videoconference meeting; and 3) planning and holding a public informational videoconference meeting. See sections 4.1, 4.2 and 4.3 for more details.

The public meeting notices and fact sheets will be made available and disseminated in both English and Spanish since the project is located in an area with a sizable Hispanic-American population. It is the objective of these documents to provide ample information and direct communication to the individuals and groups who live or work in the project area.

Furthermore, the NYCDDC's appointed CCL is Jeffrey Carlson who will be located in the vicinity of construction for the duration of the construction. The CCL is available to the community at all times for questions, comments and requests related to the construction of the project. The CCL is available by phone at (718) 938-9898 or by email at willowavecccl@gmail.com.

4.1 Public Meeting

In collaboration and coordination with NYCDDC, HUCATAO Corp., Inc., and the office of Resident Engineer, Applemon Corporation will facilitate a public informational tele/videoconference meeting on Thursday April 14, 2022 from 6:00 pm to 8:00 pm.

At the public tele/videoconference meeting, representatives from NYCDDC, HUCATAO Corp., Resident Engineer's office and Applemon Corporation will present an overview of the construction project, project background, scope of dewatering work, progress schedule, community impact, SPDES permit application, and contact

information. In the second part of the videoconference meeting, the floor will be open for public questions, comments, and concerns.

Attendees will also be informed of how they may submit formal comments on the permit application to the NYSDEC and obtain answers to questions after the meeting has concluded. The CCL will be available to the community at all times for questions, comments and requests related to the project construction. The CCL's contact information will be announced during the tele/videoconference meeting and included in all materials distributed to the community and the stakeholders. The public may reach out to the project team following the public meeting to obtain additional information, provide input and/or express concerns.

4.2 Public Meeting Notice/Invitation

A reader-friendly meeting notice/invitation in both English and Spanish (Appendix B) for the public tele/videoconference will be circulated to the entire affected community within the project area. Through this notice, the public will be invited and encouraged to attend the public tele/videoconference meeting scheduled on Thursday April 14, 2022 from 6:00 pm to 8:00 pm.

Approximately three weeks in advance of the public tele/videoconference meeting, the public meeting notice (Appendix B) will be published in the print edition of the Staten Island Advance which is a daily newspaper printed, published and circulated in Staten Island. Also, the public meeting notice will be mailed and/or hand delivered (door-to-door) to all people listed on the stakeholders and contact list (Appendix A) by the CCL and HUCATAO Corp three weeks prior to the public tele/videoconference meeting scheduled on April 14, 2022. Additionally, the public meeting notice will be posted and available at the following website once the PPP has been approved by NYSDEC:

<https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page>

4.3 Fact Sheet

In addition to the meeting notice/invitation for the public audio/videoconference, a fact sheet shown in Appendix C will be published (in both English and Spanish) and distributed via mail, email blast, and/or in person to the project stakeholders and contact list (Appendix A) by the CCL and HUCATAO Corp. Additionally, the fact sheet will be posted and available at the following website once the PPP has been approved by NYSDEC:

<https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page>

The CCL will post both English and Spanish versions of the public audio/videoconference meeting notices and fact sheets in the locations within the construction site and visible to the public. For example, they may be posted on some streetlight lampposts or bulletin boards located in the lobby of residential complex buildings or public facilities such as libraries, schools or community centers within the project site.

5. Document Repository

An online document repository has been established for the community to access and review information about the project. The established online repository available at the <https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page> will provide information and documents relating to the SPDES permit application process. Once the PPP is approved by NYSDEC and prior to conducting any outreach activities, all the documents will be added to the repository. NYCDDC will continue maintaining the online repository.

The repository will be updated on an ongoing basis, as appropriate, and will include project-related information and written materials (i.e. approved PPP, draft SPDES permit, statement of basis, and Notice of Complete Application provided by the NYSDEC) developed during the SPDES application process. The public can contact CCL if they have any questions about the project. The CCL is always available by phone at (718) 938-9898 or by email at willowavecccl@gmail.com.

6. Submittals and Reporting on PPP Activities

Upon completion and implementation of this PPP, the NYCDDC will submit a written certification that it has complied with all requirements of the PPP along with a final written summary report to NYSDEC detailing the activities that occurred in accordance with the PPP. The final summary report will summarize the PPP activities including the public notices and public meeting and all concerns expressed by the community. The report will include all the notes, Q&A and the attendance/participant list from the public tele/videoconference meeting.

APPENDIX B
Public Meeting Notice/Invitation
(English and Spanish)

YOU ARE INVITED

Public Tele/Videoconference Meeting

Thursday April 14, 2022 at 6:00 pm

Construction of Storm and Sanitary Sewers in Willow Avenue

The New York City Department of Design and Construction (NYCDDC) has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for a State Pollution Discharge Elimination System (SPDES) permit for the **Construction of Storm and Sanitary Sewers in Willow Avenue (NYCDDC Project ID SER20079)**. A Public Participation Plan has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29). The purpose of this meeting is to inform the public about the project and to involve the community during the SPDES permit application review process.

To Call In Using a Phone

Dial in using the following number

(646) 558-8656

When prompted, enter the

Meeting ID: 94622486813

Agenda:

- Project Overview
- Background
- Scope of work
- Project schedules
- Community Impacts
- Proposed Mitigation Measures
- Questions

Your Attendance is Important!

Project personnel will be available to answer any questions from the community. For additional information on the proposed project:

- Contact Community Construction Liaison, Jeffrey Carlson:
Phone at (718) 938-9898 or by email at willowavecc1@gmail.com
- Visit the repository at:
<https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page>

USTED ESTA INVITADO

Reunión en Videoconferencia Comunitaria

jueves abril 14, 2022 a las 6:00 pm

Construcción de Alcantarillado Pluvial y Sanitario en Willow Avenue

El Departamento de Diseño y Construcción de la ciudad de Nueva York (NYCDDC) ha presentado una solicitud al Departamento de Conservación Ambiental del Estado de Nueva York (NYSDEC) para obtener un permiso del Sistema de Eliminación de Descargas Contaminantes del Estado State Pollution Discharge Elimination System (SPDES) para llevar a cabo de la Construcción de Alcantarillado Pluvial y Sanitario en Willow Avenue (NYCDDC Project ID SER20079). Se ha desarrollado un Plan de participación pública en concordancia con NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29). El objetivo de esta reunión es informar al público sobre el proyecto e involucrar a la comunidad durante el proceso de revisión de la solicitud del permiso de SPDES.

Para unirse en línea:
Haga clic en el siguiente enlace:
<https://zoom.us/j/94622486813>

Para llamar usando un teléfono:
• Marque el siguiente número:
(646) 558-8656
Cuando se le solicite, ingrese el
ID de la reunion: 94622486813

Agenda:

- Descripción del Proyecto
- Fondo
- Ambito de Trabajo
- Cronogramas del Proyecto
- Impacto a la Comunidad
- Medidas de Mitigación
- Preguntas

¡Su asistencia es importante!

Un representante del proyecto estará disponible para responder cualquier pregunta de la comunidad. Para información adicional sobre el proyecto:

- Contacte al enlace de construcción comunitaria, Jeffrey Carlson:
Telefono: (718) 938-9898 Correo electronico: willowavecl@gmail.com
- Visita la página web del proyecto:
<https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page>

APPENDIX C
Fact Sheet
(English and Spanish)

Construction of Storm and Sanitary Sewers in Willow Avenue

Fact Sheet

What is the Proposed Project? The Proposed Project will: improve approximately 1,500 feet of streets and sidewalk to current New York City Department of Transportation (NYCDOT) standards; install a new drainage collection system; and upgrade and replace existing sanitary sewers and water mains. To implement the proposed project, the New York City Department of Design and Construction (NYCDDC) has submitted an application to the New York State Department of Environmental Conservation (NYSDEC) for dewatering and groundwater pumping operations, which requires a New York State Pollutant Discharge Elimination System (SPDES) permit. This permit is to construct the Storm and Sanitary Sewers in Willow Avenue, Staten Island (NYCDDC Project ID SER20079). A Public Participation Plan has been developed in accordance with NYSDEC Commissioner Policy 29, Environmental Justice and Permitting (CP-29). The purpose of this fact sheet is to inform the public about the project and to involve the community during the SPDES permit application review process.

Why does NYCDDC need to upgrade the infrastructure in Staten Island Willow Avenue? The existing infrastructure is old and insufficient. This project will provide much needed street drainage for the Proposed Project Area. The reconstructed streets and new infrastructure will improve vehicular and pedestrian conditions, while reducing the potential for future flooding impacts and will support neighborhood resiliency with respect to coastal storms, while providing enhanced infrastructure that will support post-storm recovery efforts.

How might the upgrades affect the surrounding community? Community impacts will be temporary in nature and all related to construction. NYCDDC and its contractors propose to control all dust, rodent, noise and vibration during the construction period. NYCDDC will be available to answer all questions for any issues related to special needs access, service delivery coordination (e.g. trash collection), and any property damage. Water service interruptions will only be during the day, and advance notice will be provided to all affected homeowners. Traffic impacts are expected during construction; however, NYCDDC will take all the necessary measures to minimize disruptions to property access, schools, as well as access to transportation facilities, community facilities, and emergency services.

How can I participate in the permit review process?

- Attend the upcoming video/teleconference scheduled for April 14, 2022, at 6:00 pm to learn about the project, submit comments, ask questions and/or express concerns about the project.
- Submit comments in writing, by phone or email to the NYCDDC Community Construction Liaison identified below.

Where can I get more information about the proposed expansion?

- Visit the online document repository at: <https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page> to obtain application materials, relevant documents, and information about the project.
- Contact the Community Construction Liaison, Jeffrey Carlson: Phone at (718) 938-9898 or by email at willowavecccl@gmail.com for information on the project, instructions on how to attend the video/teleconference.

Who is responsible for reviewing the Permit Application? NYSDEC Region 2 Headquarters, 47-40 21st St., Long Island City, NY 11101, is responsible for reviewing and issuing the required permits. Tel: (718) 482-4997; email: DEP.R2@dec.ny.gov

Construcción de Alcantarillado Pluvial y Sanitario en Willow Avenue

Hoja de Datos

¿Cuál es el proyecto propuesto? El proyecto propuesto: mejorará aproximadamente 1500 pies de calles y aceras según los estándares actuales del NYCDOT; instalar un nuevo sistema de recolección de aguas residuales; y, actualizar y reemplazar las alcantarillas sanitarias y las tuberías de agua existentes. Para implementar el proyecto propuesto, el Departamento de Diseño y Construcción de Nueva York (NYCDDC) presentó una solicitud al Departamento de Conservación Ambiental del Estado de Nueva York (NYSDEC) para operaciones de desagüe y bombeo de aguas subterráneas, lo que requiere el permiso del Sistema de Descarga de Contaminantes de la ciudad de Nueva York (SPDES). Este permiso es para construir el alcantarillado pluvial y sanitario en Willow Avenue, Staten Island (NYCDDC Project ID: SER20079). Se ha desarrollado un Plan de participación pública en concordancia con la poliza 29 del NYSDEC, Environmental Justice and Permitting (CP-29). El objetivo de hoja de datos es informar al público sobre el proyecto e involucrar a la comunidad durante el proceso de revisión de la solicitud del permiso de SPDES.

¿Por qué NYCDDC necesita actualizar la infraestructura en Staten Island Willow Avenue? La infraestructura existente es antigua e insuficiente. Este proyecto proporcionará el muy necesitado drenaje de calles para el área del proyecto propuesto. Las calles reconstruidas y la nueva infraestructura mejorarán las condiciones vehiculares y peatonales, mientras que reducirán el potencial del futuro impacto de inundaciones y respaldarán la resistencia del vecindario con respecto a las tormentas costeras, a la vez que proporcionará una infraestructura mejorada que respaldará los esfuerzos de recuperación posteriores a una tormenta.

¿Cómo pueden las actualizaciones afectar a la comunidad circundante? Los impactos de la comunidad serán de naturaleza temporal y todos estarán relacionados con la construcción. NYCDDC y sus contratistas proponen controlar todo el polvo, los roedores, el ruido y la vibración durante el período de construcción. NYCDDC estará disponible para responder todas las preguntas relacionadas con necesidades especiales de acceso, la coordinación de provisión de servicios (por ejemplo, recolección de basura) y cualquier daño a la propiedad. Las interrupciones del servicio de agua solo serán durante el día y se dará un aviso por adelantado a todos los propietarios afectados. Se esperan impactos de tráfico durante la construcción; sin embargo, NYCDDC tomará todas las medidas necesarias para minimizar las interrupciones en el acceso a las propiedades, las escuelas, así como el acceso a las instalaciones de transporte, instalaciones comunitarias y servicios de emergencia.

¿Cómo puedo participar en el proceso de revisión de permisos?

- Asista a la próxima video / teleconferencia programada para el 14 de abril de 2022 a las 6:00 p. m. para conocer el proyecto, enviar comentarios, hacer preguntas y / o expresar inquietudes sobre el proyecto.
- Envíe sus comentarios por escrito, por teléfono o correo electrónico al enlace de construcción de la comunidad de NYCDDC que se identifica a continuación.

¿Dónde puedo obtener más información sobre la expansión propuesta?

- Visite el repositorio de documentos en línea en: <https://www1.nyc.gov/site/ddc/contracts/public-participation-plan.page> para obtener materiales de solicitud, documentos relevantes e información sobre el proyecto.
- Comuníquese con el enlace de construcción de la comunidad, Jeffrey Carlson: teléfono al (718) 938-9898, envíe un correo electrónico a willowaveccl@gmail.com para obtener información sobre el proyecto, instrucciones sobre cómo asistir a la video / teleconferencia.

¿Quién es responsable de revisar la Solicitud de Permiso? NYSDEC Region 2 Headquarters, 47-40 21st St., Long Island City, NY 11101, es responsable de revisar y emitir los permisos requeridos. Tel: (718) 482-4997; email: DEP.R2@dec.ny.gov
