

HOW TO NAVIGATE YOUR HOPE SURVEY AREA

1. **Walk all the streets** within the boundary area.
2. **Plan your routes before you leave your training site.** Pick a start/end point and decide what order you will to walk the streets. (Feel free to draw on the map!)
3. Cover **both sides of the street within the boundaries.** At the area boundary, only walk on the side of the street inside the survey area.
4. It's okay to **double back if needed, but do not re-canvass a segment or double-count people.**
5. **Walk anywhere pedestrians can go** within your area— go into parks and playgrounds, up staircases, over walkways, under elevated trains and highways—and survey everyone you see.
6. **Do not walk where pedestrians cannot safely go.** Stay off highways, don't climb fences, etc. Stay out of private spaces
7. **Record people in the correct survey area!**
