"Fentanyl is not only in opioids, it’s in cocaine and pills too."

ALTHEA, Bronx

What is Fentanyl?
Fentanyl is a powerful opioid that can be found in heroin, cocaine, crack, methamphetamine, ketamine, and pressed pills.

Why is it Dangerous?
Fentanyl increases the risk of overdose especially among people who do not regularly use opioids.

Prevent overdose:
• Avoid using alone and take turns
• Start with a small dose and go slowly
• Have naloxone on hand
• Avoid mixing drugs
• Test your drugs using fentanyl test strips.
I always ask people if they know about fentanyl. Giving people information and fentanyl test strips can help save their life.

CLARA, Manhattan

What is Fentanyl?
Fentanyl is a powerful opioid that can be found in heroin, cocaine, crack, methamphetamine, ketamine, and pressed pills.
