

Prevalence of timely screening colonoscopy (in the past 10 years) among adults ages 50+ (2003 – 2016), NYC

Source: NYC Community Health Survey, 2003 - 2016. Data are age-adjusted to the US 2000 Standard Population. CHS has included adults with landline phones since 2002 and, starting in 2009, also has included adults who can be reached by cell-phone. CHS 2016 data are weighted to the adult residential population per the American Community Survey, 2015.
