All children 6 months to 5 years old enrolled in child care must receive influenza vaccine by December 31.

The influenza vaccine benefits your whole family:

- Your child will be protected from serious illness caused by influenza.
- You'll be less likely to miss work because your child is sick from influenza.
- Vaccinating your child helps stop influenza from spreading in your home and in the community and protects vulnerable groups, like the elderly.

Make an appointment with your child’s health care provider or call 311 to find a location to be vaccinated. Visit nyc.gov/flu for more information.

The New York City Health Department recommends that everyone six months old and older get an influenza vaccine every year.
