Do not have sex or other intimate contact if you or your partners have a new rash or sores, feel sick, or were recently exposed to monkeypox. Ask your partners whether they have monkeypox symptoms and about their recent sexual history.

Frequently wash your hands, bedding, towels and other shared items. Sex toys should be washed after each use or sex act.

Get vaccinated if you may have been recently exposed to monkeypox. To find a vaccination site, visit nyc.gov/vaccinefinder.

Talk to your health care provider about testing, pain management or treatment if you have monkeypox symptoms. If you do not have a provider, call 311 to get connected to care.

For more information, including about vaccine eligibility, visit nyc.gov/monkeypox or scan the QR code. Text “MONKEYPOX” to 692-692 for the most up-to-date information.
