

Healthy Swimming

Even in the best maintained pools, germs can get in the water and make people sick.

All Swimmers:

- Don't go in the pool if you have diarrhea. Don't go back in the pool until 2 weeks after you stop having diarrhea.
- Shower with soap before going in the pool.
- Wash your hands well with soap and water after using the bathroom.
- Don't swallow pool water.

Parents with Young Kids:

- Wash your children well (especially the rear end) with soap and water before they go in the pool.
- Don't allow kids in the pool if they have diarrhea.
- Take your kids to the bathroom often. When your child says "*I have to go*" it may be too late.
- Change swim diapers in the bathroom—*not* by the pool.
- Wash hands well with soap and water after changing diapers or using the bathroom.
