

Fact Sheet for Health Care Providers Outside of New York City

What is the Citywide Immunization Registry (CIR)?

The CIR is a computerized filing system that since 1996 has been keeping immunization records of people vaccinated in New York City (NYC). The CIR contains immunization records for children 18 years of age and under. The CIR also stores immunization reports for people 19 years of age and over with consent from the patient. The CIR makes immunization records available to individuals, parents, legal guardians and custodians, health care providers, health plans, the Women, Infants, and Children (WIC) program, schools, and other agencies concerned with health.

How can I access the CIR?

ONLINE REGISTRY ACCEPTABLE USE PROTOCOL

This Acceptable Use Protocol (AUP) is for use of the Online Registry (OR).

Access to the OR is provided by the Immunization Registry solely for the purpose of obtaining immunization information, obtaining lead test information, and adding immunization records to the Registry. The Registry should not be used in connection with any personal or non-Registry matters.

All users of the OR have the responsibility of using their access in a professional manner. Compliance with this AUP is mandatory.

Use of the OR for activities that are unacceptable under this AUP will result in removal of the user's access to the OR. The Citywide Immunization Registry and/or Lead Poisoning Prevention Program reserve the right to review violations on a case-by-case basis.

System Security Measures to be followed by all Security Administrators of the OR:

1. The security of the Online Registry is of the highest priority. System security is essential for the effective and efficient operation of the system. It is the responsibility of the Security Administrator (and authorized users) to maintain the highest possible degree of system security. If a security problem is discovered, it should be reported by telephone to the Department of Health and Mental Hygiene Online Registry Security Administrator immediately.

2. Passwords:

Choose passwords that are not easy to guess or to find using a password decoding program. A combination of 8 or more characters, with at least one number and one upper-case letter, should be selected.

3. Keep the password confidential; do not write it down.

4. Change passwords regularly (every 90 days is suggested).

5. If a password has been lost, stolen, or has been otherwise obtained by another person, or if a user has any reason to believe that someone has obtained unauthorized access to the OR, it is the responsibility of the Security Administrator to immediately notify the Department of Health and Mental Hygiene Online Registry Security Administrator.
