

Post-COVID Care Clinics

Some COVID-19 patients continue to experience health issues for weeks or months after their initial illness, including persistent fatigue, shortness of breath, cough, muscle, joint, or chest pain and other symptoms. Several New York City (NYC) hospitals have established specialized post-COVID care clinics to provide follow-up care to patients following hospital discharge and to serve patients who had less severe illness but have lingering health effects from COVID-19. Post-COVID care clinics bring together multidisciplinary teams (including pulmonology, cardiology, rehabilitation, neurology and mental health) to provide a comprehensive treatment approach.

Following is a list of post-COVID-19 care clinics for patients experiencing persistent health issues after COVID-19 illness and for providers to refer patients who require specialized services. This list may not include every clinic in NYC. Please check facility websites or call facilities for the most up-to-date information.

Facility	Clinic Name	Address	Phone	URL
BronxCare Health System (formerly Bronx Lebenon)	Post-Covid Care Clinic	Pulmonary Clinic 199 Mount Eden Ave. 7th Floor, Bronx, NY 10457	718-99-BRONX (718-992-7669)	bronxcare.org/
