Before you leave the vaccination site:
Make sure you get a vaccination card. It will say which vaccine you got and the date you received it. This is an important record. Take a picture or make a copy of it, and keep the original in a safe place.

Do I need to come back for a second dose of the vaccine?
No. The Johnson & Johnson vaccine is only one dose.

What are the side effects of the vaccine?
Common side effects are soreness or swelling on the arm where you got the shot, headache, body aches, tiredness and fever. Side effects are less common in older adults and usually:

• Are mild to moderate
• Start within the first three days after vaccination (the day after vaccination is the most common)
• Last about one to two days after they begin

What should I do if I have side effects?
Call your health care provider if you have side effects that concern you or do not go away after a few days, or if the redness or soreness where you got the shot increases after 24 hours. Talk to your provider about taking an over-the-counter medicine, such as acetaminophen (Tylenol) or ibuprofen (Advil).
You can report side effects through the Centers for Disease Control and Prevention’s (CDC) v-safe smartphone app. To learn more and sign up, visit vsafe.cdc.gov. You can also report side effects to the Vaccine Adverse Event Reporting System (VAERS), managed by the CDC and Food and Drug Administration. Reports can be made at vaers.hhs.gov/reportevent.html or by calling 800-822-7967. The information you report will be kept confidential.

There is a small risk of a rare type of blood clot from the Johnson & Johnson vaccine. Monitor yourself for potential symptoms for three weeks after getting the vaccine, such as:

- Shortness of breath
- Chest pain
- Leg swelling
- Lasting abdominal pain
- Severe or lasting headache
- Blurred vision
- Bruising easily
- Tiny red spots under the skin beyond the area of the injection site

If you have any of these symptoms, seek medical care immediately – go to a nearby hospital or call 911. Tell the treating provider you received the Johnson & Johnson vaccine.
Is it possible to have an allergic reaction to the vaccine?
Allergic reactions are uncommon and generally start within a few minutes to an hour of getting the shot. Signs of a severe allergic reaction include difficulty breathing, swelling of your face and throat, fast heartbeat, a rash all over your body, dizziness and weakness. If you think you are having a severe allergic reaction, call 911 or go to the nearest hospital.

When does the vaccine start working?
You will not have full protection from the vaccine until two weeks after your shot.

Will I be billed for the vaccine or health care visit?
No. Your insurance may be billed, but you will not be charged a copay or any other fee for the vaccine.

Is my personal information protected?
Your personal information is confidential and protected. Basic information about you (such as your name, address, phone number, date of birth, race and ethnicity, vaccination date, and vaccine received) will be shared with the New York City Department of Health and Mental Hygiene (NYC Health Department) as required by law.
Can I stop taking other COVID-19 precautions after I am vaccinated?
Once fully vaccinated, you can do most activities without wearing a face covering or physical distancing anymore! Outdoor activities are particularly safe. Our advice is to keep your face covering on indoors until even more people are vaccinated. Also, you must follow the face covering requirements of any place that you go, such as a business, school, public transportation or your workplace. Once fully vaccinated, you also do not need to quarantine following an exposure or get tested, unless you have COVID-19 symptoms.

What if I have other questions?
You can call your provider or 311.
Where can I get more information?

NYC Health Department: nyc.gov/covidvaccine

New York State Department of Health: covid19vaccine.health.ny.gov

CDC: cdc.gov/covidvaccine

The NYC Health Department may change recommendations as the situation evolves. 6.4.21
