

NEW YORK CITY  
DEPARTMENT OF HEALTH AND MENTAL HYGIENE  
NYC LOCAL EARLY INTERVENTION COORDINATING COUNCIL (LEICC)

BOARD MEETING

MARCH 31, 2015

Transcribed by: Geneva Worldwide, Inc.

LEICC - March 31, 2015

A P P E A R A N C E S:

Christopher Treiber, LMSW, LEICC Chair

George L. Askew, MD, FAAP, Deputy Commissioner, Division of Child and Family Health

Marie B. Casalino, MD, MPH, Assistant Commissioner, Bureau of Early Intervention

Lidiya Lednyak, Director of Policy and Quality Assurance, Bureau of Early Intervention

Nora Puffett, Director of Administration and Data Management, Bureau of Early Intervention

Jeanette Gong, PhD, Director of Intervention Quality Initiatives, Bureau of Early Intervention

Robert Stephens, MS, Training Liaison Manager/Health Services Manager, Office of Health Insurance Services

Renee Noel, MPH, Associate Public Health Sanitarian III, Bureau of Child Care

Paula Francis-Crick, MPH, Unit Chief, Program Support Unit, Bureau of Immunization

LEICC MEMBERS:

Christopher Treiber, LMSW, LEICC Chair, MS, SAS

Nancy Calderon-Cruz, MA

Cindy Lin Chau, BS, MA Ed

Mary DeBey, PhD

Tracy LeBright, LMSW

Lois Kessler

Rosalba Maistoru, MA, SDL, BCBA, Lic.BA

Anita P. Richichi, MPA

Toni Rodriguez, LMSW

Lisa Shulman, MD

Linda Silver

Mina Sputz, MS, SAS

Catherine Warkala, MS, SAS

1 LEICC - MARCH 31, 2015

2 MR. CHRISTOPHER TREIBER: Okay, good  
3 morning. I think we're going to get started.  
4 There are some more seats up here in the front if  
5 you need a chair. Welcome. My name is  
6 Christopher Treiber. I'm the Chair of the LEICC,  
7 and I'm also with the InterAgency Council. So  
8 before we get started, I just want to review the  
9 procedures for the LEICC meetings. Attendees  
10 should preregister for the LEICC meeting on the  
11 New York City Department of Health and Mental  
12 Hygiene Bureau of Early Intervention website for  
13 the meetings. The meetings are open to the  
14 public but the audience does not address the  
15 LEICC members during the meeting. Audience  
16 members may sign up with Felicia, who is right  
17 there, if you want to speak during the public  
18 comments section. And then as of May 15, 2014,  
19 the New York City Local Law number 103 of 2013  
20 and the New York State Open Meeting Law require  
21 that open meetings be both webcast and archived,  
22 and this meeting is being recorded today.  
23 Transcription is available for the meeting, and  
24 written minutes for the meeting will be  
25 available. Good morning. I first would like to

1 LEICC - MARCH 31, 2015

2 introduce to everyone a new member of the LEICC.  
3 I'm very happy that we have a new parent member,  
4 Cindy Chau, and I'll just give you a little bit  
5 of information about Cindy. Cindy is a teacher  
6 and an advocate and a mother of two. Her four-  
7 year old daughter received Early Intervention  
8 services since birth. Cindy holds a Masters in  
9 Elementary Education from Teachers College and a  
10 Masters in Marriage and Family Counseling. She's  
11 a mentor for families with children with multiple  
12 disabilities and is currently working on a  
13 project helping international offerings with  
14 special needs. Cindy is excited about being a  
15 member of the council and advocating for families  
16 receiving Early Intervention services and we're  
17 really happy to have a new parent member of the  
18 council. So, before we get started, I think I'd  
19 just like to go around so Cindy has an idea of  
20 who everybody is and so maybe we should start  
21 from here].

22 MS. MARIE CASALINO: Marie Casalino,  
23 Assistant Commissioner, Bureau of Early  
24 Intervention.

25 DR. GEORGE ASKEW: I'm George Askew, the

1 LEICC - MARCH 31, 2015

2 new Deputy Commissioner for the Division of  
3 Family and Child Health at the Department of  
4 Health and Mental Hygiene.

5 MS. ANITA RICHICHI: Anita Richichi,  
6 Bureau of Child Care, Department of Health and  
7 Mental Hygiene.

8 MS. TONI RODRIGUEZ: Toni Rodriguez,  
9 Early Childhood Direction Center.

10 MS. NANCY CALDERON-CRUZ: I'm Nancy  
11 Calderon-Cruz, provider, TheraCare.

12 MS. LOIS KESSLER: I'm Lois Kessler, New  
13 York City Department of Education.

14 MS. TRACY LEBRIGHT: Tracy LeBright,  
15 Public Health Solutions.

16 DR. MARY DEBEY: Mary DeBey, Higher  
17 Education, Brooklyn College.

18 MS. ROSALBA MAISTORU: Rosalba Maistoru  
19 provider, Little Wonders[unintelligible  
20 00:05:01]].

21 MS. LINDA SILVER: Linda Silver, Village  
22 Child Development Center.

23 MS. CATHY WARKALA: Cathy Warkala, Early  
24 Childhood Direction Center.

25 MS. MINA SPUTZ: Mina Sputz, Yeled

1 LEICC - MARCH 31, 2015

2 V'Yalda.

3 MR. TREIBER: Good morning. So, I first  
4 would like to introduce Dr. Askew, who is the  
5 Deputy Commissioner for the New Division of  
6 Family and Child Health, and we're really happy  
7 that you're able to join us today. So Dr. Askew  
8 is a pediatrician who has spent the vast majority  
9 of his professional career dedicated to  
10 addressing the health and well-being of young  
11 children and their families through a direct  
12 service advocacy and policy change. He joined  
13 the Department in November from the US Department  
14 of Health and Human Services where he was the  
15 first Chief Medical Officer for the  
16 Administration for Children and Families. In  
17 that role, he helped develop and administer  
18 initiatives and policies aimed at addressing the  
19 health needs of children, particularly young  
20 children and families facing significant economic  
21 and social challenges. Dr. Askew previously  
22 served as the Deputy CEO and Chief Development  
23 Officer for Voices for America and as CEO and  
24 President of Jumpstart for Young Children.  
25 Additionally, he is the founder of Docs for Tots,

1 LEICC - MARCH 31, 2015

2 a pediatrician-led child advocacy organization  
3 that helps doctors advocate beyond their clinical  
4 practices on behalf of the youngest children.  
5 The Division of Family and Child Health that Dr.  
6 Askew oversees was created by Commissioner  
7 Bassett and includes the Bureau of Maternal,  
8 Infant and Reproductive Health; the Office of  
9 School Health; and most recently the Bureau of  
10 Early Intervention.

11 [OFF MIC CONVERSATION]

12 DR. ASKEW: I should say something?  
13 Great. I like to stand so I can see everybody,  
14 first of all, and also as a pediatrician, you  
15 know, I have a fairly soft voice, which is great  
16 as a pediatrician, but sometimes not so great for  
17 public speaking, especially without, without a  
18 microphone. So thank you for allowing me to be  
19 here today. I'm actually very excited. How many  
20 -- raise your hands if you, if you walked into  
21 that construction as you were coming in here  
22 today? There you go, so I'm not the only dummy.  
23 How many people were delayed this morning? A lot  
24 of people delayed on the, on the subway? I was  
25 delayed, but we all made it. I'm also very happy

1 LEICC - MARCH 31, 2015

2 to see a smattering of men in the room. Being in  
3 this field for a very long time. You don't see  
4 many, many gents who are doing this kind of work  
5 and I really appreciate men who enter a field  
6 where we nurture and raise and support young  
7 children. So we're not seen very often, but I  
8 know that the ones that are there are very  
9 committed to this work. So thank you, gents, for  
10 your efforts. You know, when I met Mary Bassett,  
11 Dr. Bassett back in June of last year over  
12 coffee, it was because I had been recommended by  
13 First Deputy Barbeau who is an old colleague as  
14 a, as a senior person who can lead an early  
15 childhood effort and, and in performance  
16 supervision, I guess she means senior, she means  
17 older. I must be getting up there in my career.  
18 When she, when she told me about this new  
19 division, sort of bringing together all the child  
20 and family facing efforts in the Department and  
21 trying to put them all under one umbrella, I was,  
22 I was excited. So she said, well, you know there  
23 will also be School Health, which, which gave me  
24 a smile and there would be the Bureau of Maternal  
25 and Infant and Reproductive Health, which gave me

1 LEICC - MARCH 31, 2015

2 a smile, and then she said and we're trying to  
3 move Early Intervention into this new division  
4 and that really gave me a really big smile. And  
5 that really -- and that really was kind of a make  
6 or break, to be honest with you about a job,  
7 because if you were going to, you know, if we're  
8 really going to attack early childhood, this is  
9 one -- this is where you want to start, you know.  
10 I certainly, you know, value the Bureau of  
11 Maternal and Infant and Reproductive Health, you  
12 know, Office of School Health, but then there --  
13 but then there's a gap, that zero to three gap,  
14 and we were able to sort of fill that zero to  
15 three gap, and still have the gap, that three to  
16 four or five gap before you get to UPK, well,  
17 we're going to work on that too. So I was really  
18 excited when, when this actually came to  
19 fruition. It really is a big part of why I'm  
20 here. So, you know, the work that you're doing  
21 and the efforts that you're making are really  
22 part, a significant part of why I chose to take  
23 this job when I left Washington D.C., and left my  
24 family back there to come be here with you all.  
25 They don't mind. They get to see me on the

1 LEICC - MARCH 31, 2015

2 weekends. But when I, when I came, I didn't want  
3 to set my own vision here. I didn't want to come  
4 here and say I think this is how it should be  
5 done. I really thought that we should have a  
6 shared vision within the Division, something that  
7 we all could participate in, really did some  
8 visioning work with the team and took them  
9 offsite with a facilitator and we came away with  
10 some -- with a vision that every child, woman and  
11 family in the City of New York be empowered to  
12 reach their full health and development  
13 potential. And I think that really speaks very  
14 directly to the work that you do here, especially  
15 with regard to the word empower. You know,  
16 that's what we're trying to do with families.  
17 That's what we're trying to do with kids. And we  
18 really want the kids that we serve to reach their  
19 full health and development potential. And that  
20 is something that's a theme that flows through  
21 the entire division. So know that -- know that  
22 that's there. And then we wanted to focus on a  
23 couple of priorities and one of those priorities  
24 that emerged was early childhood. We really want  
25 to focus on something, and one of the things we

1 LEICC - MARCH 31, 2015

2 want to look at is early screening. And we're  
3 going to be pushing for universal screening of  
4 kids. And so we're really going to be banging on  
5 that, the, the childcare providers' doors and  
6 offices and saying that everybody has to do this,  
7 that this is a part of your job. And you know it  
8 is and you want to do it, I'm going to see if we  
9 can make sure you get paid to do it too. A lot  
10 of, a lot of complications in there. And also  
11 preventing unintended pregnancies is another one  
12 of our, of our big efforts. But I just wanted  
13 you to sort of know what the Division kind of  
14 looks like, what we're thinking as we're moving  
15 forward, how you fit in to the work that we're  
16 trying to do and how important you think it is,  
17 what you're doing and that my door is open. I am  
18 still in the learning mode. I've only been here  
19 for four and a half months, believe it or not.  
20 Gosh, it seems like it's much longer, because I'm  
21 having so much fun. I haven't had this much fun  
22 in a long time. So feel free to call me, send me  
23 messages, text me. I'm on Twitter. Stop in and  
24 see me. I love meeting, meeting folks and  
25 learning what you're doing. And so my door is

1 LEICC - MARCH 31, 2015

2 open and I'm sorry to say that I'm going to have  
3 to leave here about 11:00, but I'm going to get  
4 hopefully a good feel for what goes on here and  
5 certainly will be back. So, thank you.

6 DR. CASALINO: So, thank you all.

7 Special thanks to IEP and Chris for hosting us  
8 today. We are usually in a room at Gotham, but  
9 it has been taken over for other purposes for the  
10 Department. So we were displaced temporarily and  
11 taken in. So thank you. I'm going to start off  
12 with our Department report about talking about  
13 the local determination, which is really an  
14 annual performance report for the city and the  
15 city's Early Intervention Program, and for the  
16 work that everyone in this room is doing. So  
17 each year, we submit performance data to the  
18 State Department of Health. The State Department  
19 of Health in turn submits that performance data  
20 to the Federal Government. Over the past few  
21 years, the State Department of Health's  
22 assessment of our work showed that we needed to  
23 make some improvements. So what did we do? We  
24 updated our policies and procedures, we changed  
25 some of the aspects of the Bureau's work,

1 LEICC - MARCH 31, 2015

2 starting in the Regional Offices, and all the way  
3 up to how data was managed, how we analyze data,  
4 and how we work together within the provider  
5 community, including our enhanced provider  
6 oversight process, and are working with the  
7 provider community to improve performance. I'm  
8 pleased to report that all of that hard work and  
9 those years of efforts have paid off. Dedication  
10 to the program has shown the results and this  
11 year's local determination for New York City  
12 shows that our compliance meets requirements,  
13 which is the highest possible ranking you can  
14 get. So thank you to all. I'm going to go  
15 through some of the information that put us in  
16 that category. While we still have some work to  
17 do on our 45-day compliance, as I present some of  
18 the numbers to you, you'll hear that, we also  
19 continue to exceed state targets for, excuse me,  
20 for important indicators such as percent of  
21 children served in New York City. So indicators.  
22 The state target for the start date of services,  
23 we all know that as the 30-day, it is 100  
24 percent. So the compliance, the target is 100  
25 percent, but the Federal indicator says that we

1 LEICC - MARCH 31, 2015

2 should be achieving 100 percent. In New York

3 City, Federal fiscal year '11 to '12, our

4 performance was 69 percent. Federal fiscal year

5 '12-'13, 88.7 percent. The statewide performance

6 was 88.5 percent. So just a touch over the

7 statewide performance. State target 45-day

8 compliance again one of the Federal indicators

9 100 percent is the target and Federal fiscal year

10 '11-'12, New York City compliance was at 72

11 percent. We increased in the next fiscal year to

12 75.6 percent; statewide performance 82.5. So we

13 still have some work to do on our 45-day but

14 we're definitely going in the right direction.

15 State target for percent of children served birth

16 to one years of age, 1.22 percent. New York City

17 Federal fiscal year '11-'12, we were at 1.11

18 percent. The next year, 1.25 percent with a

19 statewide average of 1.22. Again, slightly

20 exceeding the statewide average. State target

21 for percent of children served birth to three,

22 4.09 percent. Federal fiscal year '11-'12 New

23 York City 4.12. The next year we were at 4.57

24 percent, with the state average being 4.04. So

25 it's important to remember that the work of the

1 LEICC - MARCH 31, 2015

2 Bureau is a collaboration between the Bureau,  
3 provider community. It has to do with how data  
4 is collected, how data is analyzed but it comes  
5 down to the fact that everyone is working very  
6 hard within this program to ensure that the  
7 children and the families are getting the service  
8 that they, they have been authorized for and that  
9 they should be getting in our program. It is  
10 about delivering the services to the children and  
11 families. So thank you to everyone who  
12 participated in this, beginning in the Bureau but  
13 certainly going out into the provider community.  
14 The next part of my report is on the SEICC, the  
15 early -- State Early Intervention Coordinating  
16 Council. Since our last meeting there have been  
17 two meetings. So I'm going to report on two  
18 meetings, the December meeting and the March  
19 meeting. I'm going to start off with the  
20 December meeting talking about the task force on  
21 social and emotional development and we presented  
22 some data to the task force, which was  
23 subsequently presented to the SEICC. We're going  
24 to present that data to you here, but I'm going  
25 to leave it till the end of the discussion of the

1 LEICC - MARCH 31, 2015

2 March meeting, because just to give the committee  
3 some opportunity to have a good discussion about  
4 the data that was presented statewide from New  
5 York City. So the task force on social and  
6 emotional development, we've talked about before,  
7 was created about a year and a half or so ago, by  
8 the SEICC. There are SEICC and non-SEICC members  
9 on this task force and the focus of the task  
10 force is to create a guidance document for the  
11 field. To address and highlight critical  
12 relationship between children and their parents,  
13 caregivers, promote family-driven approach to  
14 services, promote the concept of trauma informed  
15 care. By the December SEICC meeting, there had  
16 already been some draft documents presented to  
17 the committee. At the December meeting, the  
18 state informed us that they had identified some  
19 funds to be able to bring on a consultant editor  
20 to take the work of the various workgroups to put  
21 it together into one voice and make it a cohesive  
22 document because there are a number of  
23 workgroups. And this was, this was the meeting  
24 that -- this was the SEICC meeting that the task  
25 force brought the New York City data for

1 LEICC - MARCH 31, 2015

2 discussion. And as I said, we're going to -- I'm  
3 going to delay it till the end of the SEICC  
4 report, so that you can see the data. We are  
5 going to project the data on the screen and allow  
6 you some opportunity to discuss the New York City  
7 experience. Also at the December meeting, there  
8 was a report by the state on the annual  
9 performance report that is to be submitted to the  
10 Federal government. This was the 2013-14  
11 preliminary data. There was extensive discussion  
12 on timely services, children receiving services  
13 and the natural environment, some child outcome  
14 data, percent of children in New York State  
15 participating in EIP, timely IFSP or what we know  
16 as the 45-day, full discussion by the committee  
17 and there was a vote by the SEICC to submit the  
18 information to, to the Federal government. NYEIS  
19 updates. Considerable discussion. The  
20 overarching theme in any of the NYEIS discussions  
21 presented by the state is that they continue to  
22 work on enhancements on reports and  
23 functionality. There was also a presentation on  
24 the state fiscal agent and post-April 2013  
25 transition. Looking at data at the time of

1 LEICC - MARCH 31, 2015

2 transition and the subsequent years, what the  
3 state presented was that enrollment in the  
4 program essentially unchanged 2012, '13, '14.  
5 Rendering provider capacity has increased 5.8  
6 percent. Ratio of providers to children remains  
7 constant at approximately four therapists per  
8 child. This is statewide data. The number of  
9 billing providers has declined 20.4 percent, but  
10 the presentation proposed that this was probably  
11 due to rendering providers consolidating into  
12 fewer agencies. Payment cycles have improved.  
13 Mean time for full payment to provider agencies  
14 equals 15 days. Mean time for payments to  
15 independent providers, 20 days. As of the SEICC  
16 in December. The number of days from date of  
17 service -- the number of days from the date of  
18 service to the date the claim was submitted to  
19 the EIP by the provider community, mean time 54  
20 days in 2012, decreased to 39 days in 2014.  
21 Commercial insurance claims submitted and  
22 adjudicated by commercial insurance within 60  
23 days, 91.6 percent, 15 percent of submitted  
24 claims were reimbursed by third quarter of 2014.  
25 I'm going to go back to the issue of commercial

1 LEICC - MARCH 31, 2015

2 insurers because that did provoke some discussion  
3 at the table. The state also talked about the AT  
4 process that had been implemented in October 2014  
5 in New York City and was going to be  
6 incrementally rolled out to the rest of the  
7 state. There was discussion about the percent of  
8 payments received from the insurers. Brad Hutton  
9 stepped in at that point in time to clarify that  
10 there are two percentages that the state is  
11 looking at regarding the statewide fiscal agent  
12 and commercial insurance billing claiming. Two  
13 percent is the percent of all dollars spent on EI  
14 in New York State that is supported by dollars  
15 from commercial insurers, 2 percent. Fifteen  
16 percent is the percent of claims submitted to  
17 commercials that are paid. Two different  
18 percentages that the state is monitoring. There  
19 was also discussion at this particular meeting  
20 regarding the administrative burden to providers  
21 for billing post April 2013, and consideration of  
22 a rate increase to cover that burden. I'm going  
23 to switch now to the March meeting, March 12,  
24 2015 meeting. Very short beginning to the  
25 meeting because the majority of time spent at

1 LEICC - MARCH 31, 2015

2 this meeting was spent on a discussion and  
3 decisions regarding the SSIP, which is the State  
4 Systemic Improvement Plan. State now informed us  
5 at the beginning of the meeting that the update  
6 to regulations that we worked on about a year or  
7 so ago. I think many -- some of the people  
8 around the table may have presented or been  
9 involved or looked at some of the proposed  
10 regulations. And remember, these are regulations  
11 that have to be modified at the state level to  
12 come into compliance with recent changes to  
13 federal regs. So the state informed us that they  
14 were far along in the process. They still need  
15 to have public hearings. They should take place  
16 late spring/early summer, and the next package --  
17 there were two packages of regulations that were  
18 going to be sent out to us. The first package is  
19 the one we saw that they felt were the easier  
20 fixes to the regulations, but the next package  
21 that should be coming out soon was -- would  
22 involve more complex regulatory changes. Health  
23 Homes, Lidiya Lednyak is going to do a more  
24 extensive update on Health Homes as it applies to  
25 New York City and what's -- what that's going to

1 LEICC - MARCH 31, 2015

2 mean, but I can tell you from the presentation at  
3 the March meeting the state informed the  
4 committee on locations had been received, the  
5 Health Home applications from the provider  
6 community had been received. The planned  
7 implementation October 2015. EI phase-in early  
8 2016. Considerable discussion around the table  
9 regarding exactly what that was going to mean to  
10 the families. A lot of questions about  
11 eligibility determination versus determination of  
12 acuity. The CANS, those of you who have been  
13 involved, the tool that is being assessed to  
14 determine level of acuity, there is still work  
15 being done on that to be sure that it's  
16 applicable to the child population. So the  
17 remainder of the March meeting was dedicated to  
18 identifying the measure for the State Systemic  
19 Improvement Plan and this is coming from the  
20 Federal government. It is a Federal requirement  
21 for each state to identify a comprehensive  
22 ambitious achievable plan designed to improve  
23 results for infants, toddlers and their families.  
24 These have to be measurable indicators. They  
25 have to be measured, measurable, there has to be

1 LEICC - MARCH 31, 2015

2 an infrastructure in place, there has to be  
3 experience with this, there has to be involvement  
4 of stakeholders that is a significant plan for  
5 improvement focused on outcomes that will take  
6 place in the state over a number of years. The  
7 state actions to date were data analysis,  
8 extensive data analysis, infrastructure  
9 assessment, measurable -- identifying measurable  
10 results, again, important outcome not process  
11 measure and identifying the improvement  
12 strategies. So to that end, the state presented  
13 to the SEICC a multi-year experience with  
14 outcome, surveys and work. The state for  
15 approximately ten years has been doing a child  
16 outcome study and many of you have been involved  
17 in this. These are the child outcome surveys  
18 that are completed by the IFSP team at entry and  
19 at exit. I see lots of nodding heads. Yes, you  
20 have been doing this work. The items that are  
21 assessed, child functioning compared to other  
22 children his/her age, and really improvement of  
23 those skills from the point of entry to the time  
24 the child is transitioning out of the program.  
25 So child outcome survey, identifying child

1 LEICC - MARCH 31, 2015

2 outcomes as our SSIP was one of the  
3 considerations. The second consideration was  
4 family outcomes, and the state over the course of  
5 these number of years, almost ten years of work,  
6 has developed with consultants a family survey  
7 that has been either mailed to the parent hard  
8 copy or they have invited the family to complete  
9 the survey online. Three key elements to family  
10 outcomes. One is helping the family know their  
11 rights. Two, effectively communicating their  
12 children's needs and helping their children  
13 develop and learn. So presented to the SEICC,  
14 focusing the SSIP for the next number of years on  
15 child outcomes or family outcomes. The measuring  
16 scales had all been identified for both. So two  
17 paths that the SSIP could have gone down and the  
18 SEICC would be supporting. The state, at the  
19 meeting, was promoting family outcomes. I can  
20 tell you it was well received by the SEICC. The  
21 SEICC had a very rich discussion, very good  
22 discussion with the individual who had developed  
23 the scales, the surveys, presented the data,  
24 talked about the analysis that had occurred to  
25 date and the potential for the analysis. And

1 LEICC - MARCH 31, 2015

2 after much discussion, the SEICC voted to focus  
3 its SSIP on family outcomes for New York State  
4 using the tools that had been created to date.  
5 The basis for this decision is as we know it,  
6 surely as we know it in New York City is there is  
7 a strong relationship between increasing or  
8 improving family outcomes, their knowledge, their  
9 self-efficacy, their access to support. We know  
10 that family support, family knowledge, family  
11 empowerment will work to the benefit of the  
12 children. So the SEICC supported this, New York  
13 City has been working on this. Clearly, New York  
14 City supported it at the table, and the focus  
15 going forward for these next few years will be on  
16 global family outcomes. I gave you three  
17 examples, but the other items that are included  
18 in the survey are parents expressing their  
19 feeling that -- feel that my efforts are helping  
20 my child, feel more confident in my skills as a  
21 parent, find resources in the community to meet  
22 my child's needs, use services to address my  
23 child's health needs, advocate for my child. It  
24 is a very long list. I picked out some of what I  
25 believe are the most salient elements to the

1 LEICC - MARCH 31, 2015

2 survey. We are obviously entirely supportive of  
3 this plan. I am confident that the work we've  
4 been doing in the Bureau and within our provider  
5 community is going to put us in good stead and  
6 certainly shine some very positive light on the  
7 work we've been doing. So that was -- there will  
8 be more to come I'm certain on the SSIP.

9 MS. SILVER: I just have a question.

10 DR. CASALINO: Sure.

11 MS. SILVER: Not so much in the  
12 determination of focusing on family outcomes, but  
13 my question is did they mention -- they had how  
14 many years of data on child outcome? Did they  
15 present that data? Are they doing anything with  
16 that data? We just fill out those forms and then  
17 never know what they do with them?

18 DR. CASALINO: Yes, they presented some  
19 of -- yes.

20 MS. SILVER: Okay.

21 DR. CASALINO: They present -- presented  
22 some of the data at the meeting with them. I'm  
23 not sure how much of the data I have, either  
24 electr- -- if I, I will go back, because it was a  
25 very long, very detailed discussion.

1 LEICC - MARCH 31, 2015

2 MS. SILVER: I'm sure.

3 DR. CASALINO: Very interesting, I can  
4 assure you very interesting. The consultant who  
5 had been working on this, a very extensive  
6 presentation. There is some data, but there is  
7 still more work to do and that's why the SSIP is  
8 important for us to continue to do this. So I  
9 will share with you --

10 MS. SILVER: Okay.

11 DR. CASALINO: -- what they have said to  
12 date.

13 MS. SILVER: I mean I just like kind of  
14 wonder because I mean, obviously I'm listening to  
15 you who is listening to them, but one wonders if  
16 they have what 10-15 years of data, I can't -- as  
17 long as they've been doing outcome studies of, of  
18 how children have come in at entrance and leave  
19 at exit, and do -- what do they do with that data  
20 and then I would wonder if the focus is going to  
21 be on family and family outcome, would there ever  
22 be a measure, you know, against the newer data of  
23 family outcome and outcomes for children against  
24 the older data that didn't focus on family, you  
25 know, family participation. That's what I would

1 LEICC - MARCH 31, 2015

2 have -- that would have been like an interesting  
3 study. But I'm just -- so it's kind of up in the  
4 air.

5 DR. CASALINO: So, good question, good  
6 question. There -- the focus of the meeting  
7 really was on which of these --

8 MS. SILVER: Right.

9 DR. CASALINO: -- which of these  
10 outcomes are we going to focus on. I will, as I  
11 said, we've got subsequent information. I can  
12 send to you what I can send to you --

13 MS. SILVER: Right, right, right.

14 DR. CASALINO: -- what I can share with  
15 you. I expect there will be more discussion --

16 MS. SILVER: And I get, I get what  
17 you're saying, because they have a giant thing to  
18 start working on, even though they had, what, ten  
19 years to do it or some enormous thing. They have  
20 to start doing it. It's a long, long project.

21 DR. CASALINO: It's a, it's a long  
22 project, but my understanding of the process is  
23 it started out focusing on one area and then  
24 developed, there were these -- there was layering  
25 on of different aspects.

1 LEICC - MARCH 31, 2015

2 MS. SILVER: Right.

3 DR. CASALINO: Which in a way is going  
4 to really serve us well because we have this many  
5 years of the statewide --

6 MS. SILVER: Right.

7 DR. CASALINO: -- experience to get to a  
8 family outcome survey that I think is going to --

9 [CROSSTALK]

10 MS. SILVER: It's interesting and I'm  
11 glad I'm not the one who has to do it but I think  
12 it's good. Okay, thanks.

13 DR. CASALINO: Any other discussions,  
14 questions about SEICC? What I want to do now --  
15 we're done on the SEICC, yes?

16 MS. SILVER: I guess I had one other  
17 question. And I'm assuming like the easy package  
18 versus the more complicated packaging? There  
19 was, I remember when Donna had done the original  
20 presentation on the whole systemic improvement,  
21 they were talking about, you know, capitating,  
22 fixating, whatever, whatever word they're using  
23 in terms of service coordination rates, wasn't  
24 that part of that whole improvement, that they  
25 were going to do as far as legislation?

1 LEICC - MARCH 31, 2015

2 DR. CASALINO: I'm trying to -- you're  
3 right. There was, well, yes, there was this RAP,  
4 the Reimbursement Advisory Panel, and the one  
5 very specific recommendation that came from the  
6 RAP was to look at the payment structure for  
7 service coordination. And I'm trying to -- I'm  
8 trying to remember --

9 MS. SILVER: I seem to remember when  
10 Donna originally made a presentation --.

11 DR. CASALINO: Yes, it was in, it was in  
12 the regulatory corrective.

13 MS. SILVER: It was, right?

14 DR. CASALINO: Right, yes.

15 MS. SILVER: Because I remember a lot of  
16 the stuff was just conforming to the regulatory,  
17 I mean, to the Federal regulatory language and it  
18 wasn't a big deal.

19 DR. CASALINO: Right.

20 MS. SILVER: Which I'm assuming is in  
21 this first package that you referred to.

22 DR. CASALINO: Yes.

23 MS. SILVER But then there was something  
24 about the service coordination.

25 DR. CASALINO: Yes, that's right.

1 LEICC - MARCH 31, 2015

2 MS. SILVER: And changing the rate  
3 structure, and that wasn't spoken about, I guess?

4 DR. CASALINO: Not specifically.

5 MS. SILVER: Okay.

6 DR. CASALINO: Not specifically.

7 MS. SILVER:: So it's still out there?

8 Okay.

9 DR. DEBEY: So when, when you asked,  
10 when you said the global family outcome, does  
11 that mean just more variables or are they looking  
12 longitudinally or is --

13 DR. CASALINO: There were more  
14 variables. I just went down this very long list  
15 of the items that are included in the family  
16 survey and picked out a few that I thought would  
17 be most pertinent for our discussion, but it is a  
18 -- the family survey has many more elements to  
19 it, many more questions to it.

20 DR. DEBEY: So they're not increasing  
21 like the longevity of the study? They're looking  
22 at more variables in the global --

23 DR. CASALINO: To my understanding, yes.

24 DR. DEBEY: Thanks.

25 DR. CASALINO: Sure.

1 LEICC - MARCH 31, 2015

2 MS. RODRIGUEZ: So you mention as part  
3 of it is family's ability or their feeling about  
4 community resources between Early Intervention  
5 within the communities or other services that  
6 could complement Early Intervention in those  
7 communities?

8 DR. CASALINO: From my reading of the  
9 survey, it goes beyond Early Intervention and  
10 it's really in a sense empowering -- not in a  
11 sense, but empowering families to reach beyond  
12 Early Intervention for other services they would  
13 need to support their child and family. And I, I  
14 have, we, a copy of the survey was distributed at  
15 the SEICC. I don't believe I have it  
16 electronically, but I can scan it in and I can  
17 send it to the members of our LEICC for you to  
18 see. I'm not certain that that's exactly the  
19 survey that's going to be used going forward, but  
20 you can at least see the, the elements included  
21 in that, there are many questions and they're all  
22 -- I read through them and like this is good, you  
23 know, this is good, this is good, this is good.  
24 So I can, I can scan that in and send it to you.  
25 Okay? Great.

1 LEICC - MARCH 31, 2015

2 MS. WARKALA: I don't know if I missed  
3 it, did you, was there a discussion about how  
4 long that would be sent out - how would it be  
5 sent out?

6 DR. CASALINO: No, we didn't get that to  
7 that point.

8 MS. WARKALA: Okay.

9 DR. CASALINO: So what I wanted to do is  
10 go back to the data that was presented to the S-E  
11 -- the Social Emotional Task Force, from New York  
12 City, and the Social Emotional Task Force  
13 presented this information to the SEICC. So I'm  
14 going to ask Nora to do this presentation.

15 MS. NORA PUFFETT: So this was really to  
16 answer the underlying constant belief that no  
17 child is diagnosed with a social emotional delay.  
18 That was really kind of where that idea was  
19 coming from. And we were able to -- we happened  
20 to have some old data around this issue and the  
21 first thing I can tell you is that it's true. No  
22 child is diagnosed with a social emotional delay  
23 alone. I think I found three. But when you  
24 think of children zero to three that makes  
25 perfect sense that they're not -- if they have a

1 LEICC - MARCH 31, 2015

2 truly severe delay in social and emotional,  
3 that's not the only thing that's going to be  
4 manifesting. And so we looked at the data to  
5 come back to people who were saying, well, we  
6 don't see children, you know, who only a social  
7 emotional or, you know, what kind of services, if  
8 it's not this service, it's not a true social  
9 emotional. We have a lot of children with social  
10 emotional delays. We chose to make a distinction  
11 between autism spectrum disorder and other social  
12 emotional delays because they are a pretty  
13 significant spectrum even beyond the autism  
14 spectrum. And as usual, we made our usual  
15 distinction between children at the age in which  
16 they come into the program, because we do find  
17 that their delay profile tends to look very  
18 differently depending on whether they are over or  
19 under 18 months of age at entry. And so what you  
20 could see though is that first set of columns is  
21 children who come in under 18 months of age.  
22 They tend to have, you know, physical problems  
23 usually is what we're seeing there and often just  
24 one domain. Well, even with only under 18 months  
25 of age, five percent already have an ASD

1 LEICC - MARCH 31, 2015

2 diagnosis and then another 17 percent have a  
3 social emotional delay of some kind. So that 22  
4 percent of children, even under the age of 18  
5 months coming in have a social emotional delay,  
6 basically a fifth of our kids. And when you look  
7 at the older children, that second set of  
8 columns, the over 18 months, what you see is that  
9 these days incredibly 19 percent of children with  
10 an ASD diagnosis, but another 24 percent with a  
11 different kind, other kind of social emotional  
12 delay, whether it just doesn't quite meet DSM  
13 criteria or it's, you know, very distinct, it  
14 should -- which would bring you up to, if you do  
15 the math, 43 percent of children in that age  
16 group with a social emotional delay. So what we  
17 were hearing is this Social Emotional Task Force  
18 was getting underway was this is such an under  
19 recognized condition, and of course it is, the  
20 implication at times that it's completely  
21 unrecognized, that no one acknowledges the social  
22 emotional delays of very young children, it's  
23 just not true. So that even when you look at  
24 them as a whole, 13 percent of all our children  
25 regardless of age have ASD, have a diagnosis.

1 LEICC - MARCH 31, 2015

2 Most of them pick it up while they're in the  
3 program but they do get it, and then 21 percent  
4 have another social emotional delay. So 44  
5 percent of children have some form of social  
6 emotional delay that has been identified and  
7 addressed in their IFSP plan. And as I said,  
8 this was really very specific to the concern as  
9 this group got going about what is the level of  
10 awareness, do people know about these issues, do  
11 they know how to evaluate for these issues, and  
12 do they know what services to provide to address  
13 these issues. And while there's needs in all  
14 those areas, I think that the recognition piece  
15 is not as dire as people made it out to be,  
16 because we already know as while they're in our  
17 program that this many of them, we are aware of  
18 the problem. And then the next slide, I think  
19 was just a visual of the same thing. Maybe  
20 easier to look at. Next slide, next. Next page,  
21 sorry. No, we can just skip that it's just the  
22 same data. So the next slide was really a pie  
23 chart showing the data.

24 [CROSSTALK]

25 MS. PUFFETT: So it was social emotional

1 LEICC - MARCH 31, 2015

2 dark pic ASD, later pic other types of social  
3 emotional. So you can just see it jumps out a  
4 little bit more clearly that we're usually  
5 looking at anywhere from a fifth to a quarter of  
6 the kids.

7 DR. ASKEW: How's that?

8 MS. PUFFETT: Perfect.

9 DR. ASKEW: Good for something, right?

10 DR. CASALINO: So we, we presented this  
11 data, as I said, at the task force because there  
12 had been this discussion, ongoing discussion the  
13 children are not being identified with the delay.  
14 We knew that in New York City we were recognizing  
15 this delay in our children. This data was  
16 presented really to inform the work of the task  
17 force to guide the writers in preparing their  
18 drafts for the guidance document. They were  
19 extremely appreciative that New York City  
20 presented this data. There was a request to the  
21 State Department of Health to generate the same  
22 data statewide.

23 DR. SHULMAN: I'm wondering what, and if  
24 you do qualify for Early Intervention. Coming  
25 with significant severe tantrums, the parent

1 LEICC - MARCH 31, 2015

2 describing unusual emotional delay symptoms, and  
3 they don't have other delays, is a very hard  
4 population to get into Early Intervention and get  
5 services for. And so I, I'm wondering if there's  
6 some way to calculate the percentage of kids who  
7 are referred to Early Intervention with an  
8 emotional behavioral chief concern, and how they  
9 fare in terms of Early Intervention, because then  
10 that population that medically we seek to try to  
11 diagnose to give some diagnosed condition and a  
12 high probability of developmental delays in an  
13 effort to get these kids service when they don't  
14 have delays other than difficulties in that  
15 domain.

16 MS. PUFFETT: From a data perspective,  
17 that would be extremely difficult and the reason  
18 is because more than - I should have looked at  
19 this - - more 50 percent of children come in  
20 without a reason for referral. They just don't  
21 enter anything and so we don't know what the  
22 initial concern was and then they go ahead and  
23 they get an evaluation in all five domains. We  
24 could potentially try to pull out results by  
25 domain, but it would actually be extremely

1 LEICC - MARCH 31, 2015

2 difficult. So I think you're right that it might  
3 be there and I don't know if that population  
4 would be more or less likely to report their  
5 reason for referral, but just that huge piece if  
6 missing data is why we've actually never looked  
7 at that question.

8 DR. CASALINO: Let me step in and just  
9 say that the work of this task force is to create  
10 a guidance document for the field, so that the  
11 field would have the basic information they need  
12 to do the quality evaluations that would identify  
13 the children to meet the eligibility standards  
14 for the Early Intervention Program, within the  
15 regulations that currently exist. The state has  
16 been very clear about the fact that there will be  
17 no change to the regulations at this point in  
18 time regarding the eligibility standards. And  
19 one of the things that has been discussed are  
20 the, the, the services that are available for  
21 children and families beyond the Early  
22 Intervention Program. So for those children that  
23 need to be monitored whether it's in the  
24 pediatric setting or in another setting, what  
25 guidance could be given to them. And we do have

1 LEICC - MARCH 31, 2015

2 different writing groups working on the different  
3 aspects of the guidance document. The guidance  
4 document is actually moving along much more  
5 quickly than I had ever anticipated and we should  
6 have a draft somewhere along the line. So if  
7 there's a way for us to generate the data, we  
8 would tell you that, but this guidance document  
9 is also for the field to present information  
10 regarding those children and families that would  
11 not be accessing Early Intervention services.

12 MR. TREIBER: I just have two questions.  
13 One is in terms of on the data, where have you  
14 got it specifically within the IFSP, within the  
15 evaluation? Like how, how did you sort of pull  
16 the information?

17 MS. PUFFETT: Yeah, so within the,  
18 within NYEIS or within the MDE and then reported  
19 within NYEIS, in the MDE summary, they have to  
20 give results by domain.

21 MR. TREIBER: Yeah.

22 MS. PUFFETT: And so we look for -- we  
23 pull out, is this just eligible children.

24 MR. TREIBER: Mm-hmm.

25 MS. PUFFETT: We pull out eligible

1 LEICC - MARCH 31, 2015

2 children, and then we have to see who had a  
3 domain delay. And then point out that it  
4 captures -- the delay may have only been like a  
5 25 percent. It wasn't going to make the child  
6 eligible on its own.

7 MR. TREIBER:: It was just identified as

8 --

9 MS. PUFFETT: Exactly, as part of their  
10 profile.

11 MR. TREIBER: As part of their profile.

12 MS. PUFFETT: Exactly.

13 MR. TREIBER: And then is there any, I  
14 know, I know at the last LEIC we talked about  
15 kids who were referred but sort of never got  
16 there.

17 MS. PUFFETT: Yes.

18 MR. TREIBER: And kids who were  
19 identified -- is there any way to look at these  
20 numbers in terms of were there kids who once were  
21 referred and then were found later like  
22 especially in regards to the social emotional  
23 issue.

24 MS. PUFFETT: So you think like maybe  
25 who were evaluated, not eligible but came back

1 LEICC - MARCH 31, 2015

2 and evaluated later?

3 MR. TREIBER: Exactly or --

4 MS. PUFFETT: That's --

5 MR. TRIBER: -- you know, like  
6 specifically if you think certainly children who,  
7 who are in like very traumatic situations,  
8 children who might be homeless and in shelters  
9 and other things, may not initially show at that  
10 young age, but certainly by 18 months --

11 MR. TREIBER: Yes.

12 UNIDENTIFIED FEMALE: Right.

13 MR. TREIBER: -- you're very, you know,  
14 so I'm just wondering because I know that was a  
15 discussion and things that the Department was  
16 starting to look at is in that issue, it might be  
17 something to look at in terms of are these kids  
18 being referred initially found not eligible and  
19 later found eligible?

20 MS. PUFFETT: Yes.

21 MR. TREIBER: I don't know if there's  
22 any way to look at that, but I think that would  
23 be important information.

24 MS. PUFFETT: I think we could try to  
25 look at that in the future. I think it may not

1 LEICC - MARCH 31, 2015

2 stand out as much as you expect because we  
3 actually, we were just doing some sort of hand  
4 data these days and almost 20 percent of children  
5 are re-referred and quite a lot of them get  
6 evaluated at both points.

7 MR. TREIBER: Mm-hmm.

8 MS. PUFFETT: And in particular delays  
9 like communication will show that same trend. --

10 MR. TREIBER: Mm-hmm.

11 MS. PUFFETT: -- we're not quite there  
12 now, but six months later you are. So instead of  
13 like something we could look at, I just don't  
14 know if it'll jump out as much as you might  
15 expect, but it's, it's something we could end up  
16 seeing.

17 MS. RODRIGUEZ: I mean, in terms of  
18 continuing that, I'm just wondering about the  
19 relationship between a parent, parent depression,  
20 post partum, poverty, noncompliance, and the  
21 social emotional piece as well.

22 MS. SILVER: I guess, I'm thinking about  
23 everything and listening to everybody and I think  
24 I'm probably going to answer my own question  
25 about something you had said, but I, I think

1 LEICC - MARCH 31, 2015

2 about kids with social emotional issues, I mean,  
3 I know you said these are kids where it may not  
4 be the primary handicapping condition. It's  
5 probably a secondary handicapping condition, and  
6 like Lisa said, you're more -- you're very  
7 concerned about the kids with the social  
8 emotional problems that might be the primary.  
9 But, and I, just as a thing, it's like in the  
10 three to five world, what I see a lot of are kids  
11 -- I don't know if I want to call it social  
12 emotional issues, but that's, for lack of a  
13 better term, that's what it is. It's like self-  
14 regulation, and I've been doing a lot of reading  
15 about self-regulation and that self-regulation in  
16 a lot of the journals how now been the major  
17 predictor of success in an adult, because you  
18 can't get your self-regulation going, you know,  
19 you have a tough time in life. So I just don't  
20 know where it all fits in, but I think where it  
21 all fits in is more that if you identify a child  
22 who might be depressed or might have some other  
23 kind of social emotional component, a self-  
24 regulatory component but don't meet the  
25 eligibility criteria, that the guidance document

1 LEICC - MARCH 31, 2015

2 is going to show, show you directions of where to  
3 go, but maybe not, I guess not an EI kid. But I  
4 think there just needs to be a greater focus. I  
5 mean, everything, every time you read a  
6 newspaper, it's some, you know, social emotional  
7 concern to just not taken seriously enough in  
8 this country or anywhere else. And so you have  
9 all these horrible things that are happening  
10 worldwide. So but it begins with the little  
11 guys. So is that the goal is to, to what, to  
12 make it clear what EI is all about and then  
13 resources if you identify a child who has a some  
14 sort of a social emotional component where to go  
15 and how to follow-up with it?

16 DR. CASALINO: There, there are set  
17 portions of the document that are being generated  
18 right now. We have -- it's a very wide spectrum  
19 of participants on this document, very wide  
20 spectrum, and if I were to go down the list, you  
21 would recognize many of the names. They are --  
22 there is a section on clinical clues. We're  
23 involved in writing the section on evaluation.  
24 We're involved and with teams, each writing team  
25 is a team, we're involved in writing the section

1 LEICC - MARCH 31, 2015

2 on the IFSP, and each person on the writing team  
3 is going to bring the appropriate information to  
4 the document. It will be a document that will  
5 provide a broad spectrum of information to the  
6 field. Again, not to say that Early Intervention  
7 is the only program. You still have to meet your  
8 eligibility requirements. We still authorize  
9 services individualized for the child and family.  
10 So it will, that theme will continue but it will  
11 be a clarifying document.

12 MS. SILVER: Sort of like the speech and  
13 language with the clinical clues and --

14 [CROSSTALK]

15 MS. SILVER:: -- replicates that type of  
16 a guidance document? That's what I'm  
17 envisioning. Okay.

18 MS. WARKALA: Actually it's more of a  
19 comment. I see a strong tie between the Social  
20 Emotional Task Force and the outcome of the  
21 guidance document, with the family outcome  
22 survey, that I know you only highlighted some of  
23 those questions. I'd be really interested if  
24 there's other questions that are talking about  
25 the composition of the family, I mean, you know,

1 LEICC - MARCH 31, 2015

2 we have to -- I mean, I don't know, you know, if  
3 there's stressors, you know, different things  
4 that are not enabling them to move forward with  
5 their child stumbling blocks or those type of  
6 issues that are kind of not enabling them. So I  
7 see a nice bridge between that in helping to  
8 identify the children, more concerns, and  
9 resources, resources one thing we talked about,  
10 more resources. That's more of a comment.

11 DR. DEBEY: Nora, when you looked at  
12 data, a child has social emotional diagnosis,  
13 what's the primary diagnosis, communication?

14 MS. PUFFETT: Yeah, I think there was a  
15 little confusion around that. So what we don't  
16 see are children with only social emotional delay  
17 and nothing else, but that doesn't mean that the  
18 social emotional delay isn't really severe. It  
19 can be the primary diagnosis. It's just that  
20 it's causing ripples in other delays. I am going  
21 to have to go back and look because we did look  
22 at that, but I would guess that, you know,  
23 obviously communication is the common one but I  
24 actually think it's, it's pretty, because like  
25 with those little guys, you know, again, you're

1 LEICC - MARCH 31, 2015

2 not necessarily seeing it with the communication  
3 yet, because it's even almost too early for them  
4 to be doing much more communicating. It can be  
5 in the physical development as well.

6 DR. DEBEY: So then the affected could  
7 be --

8 MS. PUFFETT: Yeah, I mean, it really, I  
9 mean, there's no domain that can't be affected by  
10 social emotional. I would have to go look at the  
11 combinations. I don't remember any single domain  
12 like jumping out, as this is it communication  
13 seems likely.

14 DR. DEBEY: Mm-hmm.

15 MS. PUFFETT: But mostly what I remember  
16 coming away with it was the idea of like you just  
17 cannot take the child's -- that, that apart from  
18 the rest of the --

19 DR. DEBEY: But it would be good to see  
20 if it changes as a child ages.

21 MS. PUFFETT: Which is usually the case.

22 DR. DEBEY: Which is sometimes  
23 rhetorical.

24 MS. PUFFETT: Exactly, exactly. Yeah,  
25 we could definitely run like the common

1 LEICC - MARCH 31, 2015

2 combinations, but nothing stood out so strongly  
3 that, you know, we can't screen.

4 MS. CALDERON-CRUZ: I just want to make  
5 a comment about data and then we need to move on,  
6 Dr. Casalino this is another example of New York  
7 City pushing data, and all due respect if anybody  
8 is here from the state but, you know, I just, I  
9 think that my colleagues who continue to  
10 recommend support that the city really take the  
11 leap, because I think that the Department along  
12 with the providers provide a lot of good credible  
13 data to the state. So I commend you for that. I  
14 think it's helpful really to talk about  
15 eligibility. I know for the state that it would  
16 change that. But I think the more data, the more  
17 power it gives to make a reconsider looking at  
18 eligibility because we are missing a significant  
19 amount of children. The impact of them being  
20 small kids to what we are seeing in CPSE right  
21 now, it's, it's significant. So, again, this is  
22 another example of the city really taking the  
23 lead and providing the state with very credible  
24 data. So hopefully NYEIS will one day give us  
25 even more data. So I do appreciate that and

1 LEICC - MARCH 31, 2015

2 everyone else who provides that information to  
3 your Department.

4 DR. CASALINO: So -- oh, yes?

5 MR. TREIBER: I, I had forgot to review  
6 the minutes from the last meeting of October  
7 28th, but I just wanted to make sure everybody  
8 got them and if everyone approves, then we can  
9 just have two people say they accept it. Thank  
10 you.

11 DR. CASALINO: So we're now going to do  
12 the rest of the department report. Lidiya  
13 Lednyak is going to be talking about agency  
14 updates, post April 1<sup>st</sup>, AT, Health Homes.  
15 Jeanette Gong will give us an update on academic  
16 collaborations. And Nora will talk about  
17 provider oversight and discussion we had  
18 previously about [unintelligible 00:59:34].

19 MS. LIDIYA LEDNYAK: Let's just wait for  
20 that PowerPoint to come up. Good morning. So as  
21 Dr. Casalino said, I'll be reporting on the April  
22 1st transitions, new agencies and our technical  
23 assistance process. The implementation, the  
24 October 1st implementation of Assistive  
25 Technology. And so, sort of where we are with

1 LEICC - MARCH 31, 2015

2 our understanding and what the next steps are  
3 with Health Homes. Let me just grab that  
4 clicker. I'm sorry. Okay. So this is the --  
5 the general message on the April 1, 2013 provider  
6 landscape is that in New York City, at least, is  
7 that the number of agencies continues to expand.  
8 I know that Dr. Casalino reported earlier from  
9 the state report that we have less agencies and  
10 more rendering providers and rendering providers  
11 are consolidating under less agencies but in New  
12 York City we kind of have a different story to  
13 tell on that. So as you can see, April 1, 2013  
14 we had 85 providers. And as of March 30th, we  
15 have 105 providers. I think the largest increase  
16 we're seeing is around ABA providers. I keep  
17 reporting to you on this. April 1st we had 31.  
18 Now we have 58. SC providers, there's some  
19 growth in new providers, there's some growth. I  
20 think the -- and groups are pretty much remaining  
21 a constant but it's not the same mix of  
22 providers. So in New York City you have some  
23 providers exiting while you have other newer  
24 providers coming in to sort of take their place.  
25 And, and I think and there's 40 new and existing

1 LEICC - MARCH 31, 2015

2 providers that are right now in the technical  
3 assistance process. So there's a potential for  
4 at least 40 additional agencies. I mean, these  
5 agencies are in different stages of readiness and  
6 some of these are existing providers who want to  
7 broaden what they offer in New York City but most  
8 of that 40 is new people, new folks. So I guess  
9 sort of that's the story. It's a little bit  
10 different than the story, than the statewide  
11 perspective and we've talked many times about  
12 our, with our other municipal colleagues about  
13 their, New York City's experience is not their  
14 experience. It's different. And -- yeah?

15 DR. SHULMAN: Question after that?

16 MS. LEDNYAK: Sure.

17 DR. SHULMAN: So if the, the ABA  
18 providers and the group providers --

19 MS. LEDNYAK: Mm-hmm.

20 DR. SHULMAN -- of group providers, are  
21 the group providers ABA group providers, or just  
22 developmental --?

23 MS. LEDNYAK: Both. There's both.

24 DR. SHULMAN So there's no --

25 MS. LEDNYAK: I didn't, I didn't break

1 LEICC - MARCH 31, 2015

2 that out.

3 DR. SHULMAN You didn't break it out?

4 MS. LEDNYAK: No.

5 DR. SHULMAN So we don't know if there  
6 are more.

7 MS. LEDNYAK: I can, I can break that  
8 out next time.

9 DR. SHULMAN Right.

10 MS. LEDNYAK: We know that.

11 DR. SHULMAN Okay, alright.

12 MS. LEDNYAK: Mm-hmm. And just an  
13 updated provider directory, a mass update because  
14 we have so many new providers sort of coming in,  
15 will be initiated by Provider Oversight in April.  
16 So we probably should have an updated provider  
17 directory on the website hopefully in, sometime  
18 in early to mid-summer. Okay.

19 MS. SILVER: Is there a sense that all  
20 the boroughs are being adequately covered by the  
21 new providers?

22 MS. LEDNYAK: It's actually a very good  
23 mix, I would say. No, there isn't one borough  
24 that all the providers are flocking to. It might  
25 seem that way, but it's not. I mean, I think in

1 LEICC - MARCH 31, 2015

2 certain boroughs where there was already a lot of  
3 providers, new providers are sort of may go there  
4 and then they're like, oh, this is not -- maybe  
5 this is not the best sort of business move. So  
6 they'll call and we'll talk to them, technical  
7 assistance will talk to them and say, you know,  
8 maybe you'd have better luck going to a different  
9 borough and they have been doing that. So the,  
10 we the department have been -- we work with  
11 providers to sort of help them think through  
12 where they might go and where the needs are.  
13 We've been getting folks -- these are, these are  
14 the zip codes where we have, where we have  
15 difficulty, where we have need. We, when we work  
16 with them through the TA process we will, we'll,  
17 we, we look at that list to see, you know, where,  
18 where, where can you go and sort of what are,  
19 what are the capacity needs of the system.

20 MS. SILVER: Do they -- when a, when a  
21 new person comes on, do they, like I understand  
22 you have them determine where the needs are.

23 MS. LEDNYAK: Mm-hmm.

24 MS. SILVER: That makes total sense.

25 But are they, are they the sort, are they

1 LEICC - MARCH 31, 2015

2 restricted to a particular -- when they finally  
3 become operational and decide where they want to  
4 be, are they restricted to that initial  
5 commitment?

6 MS. LEDNYAK: The initial commitment  
7 that they make to the state. So usually, they  
8 will, the new providers go and they will check  
9 off all of the five boroughs.

10 MS. SILVER: Right.

11 MS. LEDNYAK: But in terms of  
12 initiation, you know, in terms of from a planning  
13 perspective, they'll say, well, I'm going to  
14 start in a particular borough in a particular  
15 neighborhood and see how I fare. And then if  
16 they're not faring that well, they'll say, wait,  
17 maybe this wasn't the best idea.

18 MS. SILVER: So do they come back to --

19 MS. LEDNYAK: Yeah, we --

20 MS. SILVER: -- do they come back to the  
21 Department and go, okay, I decided I wanted to be  
22 in Manhattan, but that's not working out, so they  
23 go back to the department. So the Department  
24 kind of --

25 MS. LEDNYAK: We act as a broker kind of

1 LEICC - MARCH 31, 2015

2 --

3 [CROSSTALK]

4 MS. LEDNYAK: -- you know?

5 MS. SILVER: I don't want to say the  
6 word approve.

7 MS. LEDNYAK: No, we don't approve --

8 MS. SILVER: It's not approval but --

9 MS. LEDNYAK: -- we, we help them, we,  
10 we don't want people to fail, okay, because if  
11 you come into our system and you take on 200  
12 children and then all of a sudden something  
13 happens, it's a -- it's, it's a problem for the  
14 families, but it's also a problem for the system  
15 --

16 MS. SILVER: Right.

17 MS. LEDNYAK: -- and how is the system  
18 going to absorb, if that is to happen. So we  
19 need to be -- the reason that we developed this  
20 is because we need to be vigilant about, you  
21 know, what, what our system looks like now,  
22 particularly post-transition.

23 MS. SILVER: So basically the Department  
24 kind of -- I'm not going to say approve, but  
25 gives the okay to a particular borough and

1 LEICC - MARCH 31, 2015

2 there's got to be communication between the new  
3 provider and the Department in terms of where  
4 they're setting up shop, so to speak. Yes?

5 MS. LEDNYAK: Yes. You know, email  
6 eita@health.nyc.gov, if you're a new provider or  
7 if you're an existing provider who wants to, I  
8 don't know, do groups, do more OT, I don't know,  
9 some, some new service that we all need. Hey, so  
10 Health Homes, so as you all know, I hope, so  
11 Health Homes, the goal of Health Homes is to  
12 expand the availability of Medicaid care  
13 coordination services to more than 200,000  
14 children across the state who are eligible under  
15 the optional state plan benefit created by the  
16 Affordable Care Act. They -- the state sees  
17 Health Homes as being a natural linkage with EI.  
18 There have -- at the last LEICC meeting, I  
19 presented to you on what the eligibility criteria  
20 were for Health Homes. So it's two chronic  
21 conditions and they are -- and a determination of  
22 need and how need is going to be determined is  
23 something that's still being discussed up at the  
24 state. So I'm just -- I'm sort of going to glaze  
25 over that unless you guys want any sort of

1 LEICC - MARCH 31, 2015

2 additional detail on eligibility. Great.

3 Current status, so the Health Home application  
4 period ended March 2, 2015. New York City Bureau  
5 of Early Intervention is part of a Health Home  
6 review committee at the Department of Health. So  
7 we've been looking at Health Home applications  
8 along with many other programs and offices in  
9 DOHMH. There are currently 34 agencies expressed  
10 interest to become a child-serving Health Home  
11 across the state. And so we're reviewing a  
12 portion of that. Once, so like with other things  
13 with state, Health Home approvals will be  
14 rolling. So between March 2nd and June 15th, is  
15 when they expect to take on all of the Health  
16 Homes that are, you know, sort of going to be  
17 operating, and then between June 15th and  
18 September 30th is when they're going to be  
19 conducting all of the system readiness, the  
20 training, the webinars, all of that for, for new  
21 Health Homes. So they expect to take children on  
22 in Health Homes in October of 2015. EI impact,  
23 though, even though they said that it might be  
24 more towards January 2016, they have not really  
25 announced a target enrollment date for kids in EI

1 LEICC - MARCH 31, 2015

2 into Health Homes. New York City along with  
3 other municipalities are sitting on NYSACHO, you  
4 know, New York State Association of County Health  
5 Officials, with a work order with SDOH and other  
6 municipalities to really talk about how, how  
7 Health Homes are going to be implemented in New  
8 York City. And so we just pretty much started  
9 talking about the specific operational details.  
10 We have not -- I think, you know, I think from a  
11 state perspective, their priority is really,  
12 well, how are we going to phase in all of the  
13 kids who are in various, you know, Medicaid case  
14 management programs into health homes. I think  
15 they're, I think they're still developing that  
16 mechanism. So early implementation phase in will  
17 come after they have sort of taken care of that.  
18 I think that the message around Health Homes is  
19 that, you know, Medicaid redesign is very real  
20 and it's affecting all of us and Early  
21 Intervention will ultimately be, you know, rolled  
22 into that in one way or another. So as a system,  
23 we have to be vigilant about sort of what the  
24 impacts are going to be on the families and, and  
25 the children that we serve. The other message is

1 LEICC - MARCH 31, 2015

2 that we, we know that many Early Intervention  
3 providers have joined Health Home networks to  
4 become downstream Health Home providers, and we  
5 would encourage more Early Intervention providers  
6 to think about that, take that seriously and  
7 consider doing that. So that when EI kids start  
8 getting rolled into Health Homes, that there is a  
9 built-in Early Intervention expertise there. Any  
10 questions? Health Homes.

11 MS. CALDERON-CRUZ: I just have a quick  
12 question, our organization had a phone conference  
13 with Home Health just to get some more  
14 information because we were confused.

15 MS. LEDNYAK: At the state?

16 MS. CALDERON-CRUZ: Yeah, I believe it  
17 was the state, and I think part of the confusion  
18 they had when we talked about Early Intervention  
19 service coordination roles and we looked at the,  
20 the evaluation tool that they used, which is not  
21 --

22 MS. LEDNYAK: The CANS.

23 MS. CALDERON-CRUZ: Yeah, and I know  
24 that all that's going to be revised, and so what  
25 I'm hearing from you, Lidiya, there's, there's

1 LEICC - MARCH 31, 2015

2 going to be a liaison from EI working with them  
3 when we do the changes and the policy procedures  
4 that would be specific to EI? Because they were  
5 very confused with questions we asked regarding  
6 policies that currently --

7 MS. LEDNYAK: Mm-hmm.

8 MS. CALDERON-CRUZ: -- and they were  
9 like we have no idea.

10 MS. LEDNYAK: Yes.

11 MS. CALDERON-CRUZ: We're going to  
12 update all that? Because that's, that, that  
13 would be my concern is them understanding what we  
14 do, our rules and regulations and the burden on,  
15 is it the service coordinator going to be  
16 involved in doing that? Is it somebody else in  
17 addition to the service coordinator and all that?

18 MS. LEDNYAK: So we share your concern  
19 on that and that is really the work that this  
20 NYSACHO committed had started talking to -- so  
21 who's on this committee with, you know, Early  
22 Intervention, municipal representatives, is the  
23 lead, the lead Health Home team from the state  
24 and also Bureau of Early Intervention on the  
25 state side so that we could all speak together

1 LEICC - MARCH 31, 2015

2 about these issues. I think one of the, one of  
3 the big issues that was brought up on the last  
4 conference call was what's the impact on code 35  
5 on all this. And so we're -- and, you know, they  
6 don't know. The, they're thinking about it. So,  
7 and, and I think it's sort of like we need to  
8 sort of answer the basics first, because if the  
9 state is going to keep their targeted case  
10 management approval for EI and also do Health  
11 Homes, which is also targeted case management,  
12 how does that overlap, how does that, how does  
13 that work itself out. So we're hoping that this  
14 municipal group is going to play a very active  
15 role in it.

16 MS. RODRIGUEZ: I'm just curious to  
17 know, I know previously there weren't that many  
18 independent providers.

19 MS. LEDNYAK: Mm-hmm.

20 MS. RODRIGUEZ: And you're talking about  
21 agencies. Are you still working with independent  
22 providers?

23 MS. LEDNYAK: Yes, we are.

24 MS. RODRIGUEZ: And they're increasing  
25 as well?

1 LEICC - MARCH 31, 2015

2 MS. LEDNYAK: Yes, they are. Not that  
3 many. I don't want to say that there's like, you  
4 know, 50, there's not. There's, you know, five,  
5 you know, but, but --

6 MS. RODRIGUEZ: But they're growing?

7 MS. LEDNYAK: -- it's, it's, it's  
8 starting to grow and in terms of disciplines,  
9 we've just seen speech, special instruction and  
10 now a couple of BCBAs. Nothing, no OT, no PT, no  
11 that sort of thing.

12 MS. SILVER: I, I hear everybody  
13 talking about Health Home, I'm not really sure,  
14 I'm still trying to understand it. But is there  
15 a difference between the new Health Homes and the  
16 old Medicaid Managed Care?

17 MS. LEDNYAK: Medicaid Case Management.

18 MS. SILVER: Huh?

19 MS. LEDNYAK: You meant --

20 MS. SILVER: I mean, like, like SKIP,  
21 you know?

22 MS. LEDNYAK: Mm-hmm.

23 MS. SILVER: I think of them.

24 MS. LEDNYAK: SKIP is going to be a  
25 Health Home provider.

1 LEICC - MARCH 31, 2015

2 MS. SILVER: So it's similar to that?

3 MS. LEDNYAK: It's, it is similar to  
4 that. The funding is different.

5 MS. SILVER: Okay.

6 MS. LEDNYAK: And, you know --

7 MS. SILVER: So it's a different funding  
8 scheme, but it's similar, it's very similar to  
9 that?

10 MS. LEDNYAK: And the eligibility is  
11 broadened.

12 MS. SILVER: And the eligibility is  
13 broadened.

14 MS. LEDNYAK: Right, so --

15 MS. SILVER: Okay, so that makes it  
16 easy.

17 MS. LEDNYAK: So, you know, two chronic  
18 conditions -- let's, let's just talk about it.  
19 So two chronic conditions, asthma, obesity, it's  
20 not, it's not what it is for, for, you know, for  
21 these kind of what we know today to be these  
22 Medicaid case management.

23 MS. SILVER: Right like these kids really  
24 sick kids.

25 MS. LEDNYAK: Right. This is very

1 LEICC - MARCH 31, 2015

2 different than that.

3 MS. SILVER: This is way broader?

4 MS. LEDNYAK: This is much broader, and  
5 so let's say you have a child with general  
6 developmental delay and the child has asthma,  
7 they technically met the two requirements. So  
8 that's not a --

9 MS. SILVER: Right, right, right.

10 MS. LEDNYAK: You know, the threshold  
11 isn't that -- but, I mean, then, then the other  
12 questions that come up afterwards is, well, what  
13 is the, you know, level of need? How do you  
14 determine if this child is "appropriate" for  
15 Health Homes, and that's the devil's going to be  
16 in the details on that.

17 MS. SILVER: And I remember, years ago,  
18 you know, doing this, like maybe too long, when,  
19 I mean, I was first beginning, there was, the  
20 providers were encouraged to become Medicaid  
21 managed care providers, because most of those  
22 kids were turning to be Early Intervention kids  
23 and so there were a number of agency, not a  
24 number, but a couple of agencies back then that  
25 did, that actually went and did that.

1 LEICC - MARCH 31, 2015

2 MS. LEDNYAK: Mm-hmm.

3 MS. SILVER: I don't necessarily know if  
4 they thought it was a successful thing to do at  
5 that time, and I know that dealing with the  
6 Medicaid managed cares that are in existence now  
7 from an EI perspective, they, they didn't  
8 understand EI.

9 MS. LEDNYAK: Mm-hmm.

10 MS. SILVER: It was very, very, very  
11 problematic. So I think it's like deja-vu all  
12 over again. I just get the sense it's -- but on  
13 a much broader scale.

14 MS. LEDNYAK: Mm-hmm.

15 DR. CASALINO: So should the, the --  
16 there are a lot of concerns and I think that  
17 this, as I mentioned earlier, this came up at the  
18 SEICC, there are a lot of concerns, there are a  
19 lot of questions. As Lidiya said, there's a lot  
20 of work going on --

21 MS. LEDNYAK: A lot of work.

22 DR. CASALINO: -- at the state level,  
23 and fortunately the municipalities are being  
24 involved in the work. Our understanding of, of  
25 how this is going to happen in Early Intervention

1 LEICC - MARCH 31, 2015

2 is that the children, the children and families  
3 would get referred in for initial service  
4 coordination. At the point of assignment of the  
5 ongoing service coordination, would be the point  
6 at which and we have been told this will be a  
7 family decision.

8 MS. SILVER: Okay.

9 DR. CASALINO: Whether the child will  
10 stay with a traditional OSC within Early  
11 Intervention or the family would decide to follow  
12 the path of the Health Home care coordination.  
13 So there are many steps in between that have to  
14 be worked out and, again, going back to our  
15 concern about families, we're, we're working with  
16 families that will then have to make a decision  
17 at one point in time, but our concerns is the  
18 ongoing service coordinators performing Health  
19 Home responsibilities but being aware of the  
20 Early Intervention system and functioning in the  
21 role of an ongoing service coordinator.

22 [CROSSTALK]

23 MS. SILVER: The problem I think was not  
24 so much the EI, the EI coordinator had to become  
25 an expert in Medicaid, but even more difficult

1 LEICC - MARCH 31, 2015

2 was the essentially Medicaid case manager  
3 understanding what the requirements of an EI  
4 service coordinator are. That was even much more  
5 challenging, so.

6 DR. CASALINO: And that's why we have  
7 encouraged the Early Intervention community to  
8 become involved.

9 MS. SILVER: And the rate would be, I  
10 guess the rate, the rate would be the rate,  
11 right? You don't know?

12 MS. LEDNYAK: I'm working on the rate  
13 currently.

14 MS. SILVER: Okay, more questions than  
15 answers.

16 MS. LEDNYAK: Yeah, absolutely.

17 DR. CASALINO: A lot of work to be done.

18 UNIDENTIFIED FEMALE: Okay.

19 [CROSSTALK]

20 DR. CASALINO: And we have two  
21 presentations.

22 MS. LEDNYAK: Okay. So AT is  
23 implemented. There are issues but we're working  
24 through them. We can talk about any of these  
25 concerns offline. Thanks.

1 LEICC - MARCH 31, 2015

2 DR. CASALINO: Jeanette

3 with[Unintelligible 01:20:15] academic

4 collaborations quickly then we will - -

5 [CROSSTALK]

6 DR. JEANETTE GONG: So while we're

7 waiting for the PowerPoint to come on, I wanted

8 to just introduce everyone to some of the faculty

9 members that we have academic partnerships with.

10 We have the chairperson, Dr. Shannon. And we

11 have professor Haroula Ntalla from Brooklyn

12 College. And then we have Jasmine Thomas,

13 Jasmine, stand up so we can see you --

14 MS. JASMINE THOMAS: Hi everybody.

15 DR. GONG: From SUNY Downstate OT. So I

16 just wanted to let everyone know that they're

17 here today, just in case anyone is very

18 interested in fieldwork placements for their

19 students. You should come and approach them

20 after the meeting today. Okay, so I'm going to

21 briefly talk about just a status report of where

22 we are in terms of the academic partnerships. Am

23 I doing this right? Okay. So just to talk about

24 what's happening with three of our main academic

25 partners. At the Brooklyn College right now,

1 LEICC - MARCH 31, 2015

2 they are currently and will be meeting with  
3 partners to finalize fieldwork replacements. So  
4 they, they, we just actually met with the Infant  
5 and Child Learning Center at the Research  
6 Foundation at Downstate Medical Center and they  
7 plan to also meet with TheraCare, Little Wonders,  
8 University Settlement and Bellevue for other  
9 fieldwork placements for their students, and they  
10 were also completed their field work handbook and  
11 manual, which will include the responsibilities  
12 of the graduate students, the responsibilities of  
13 the clinical supervisors and any relevant forms  
14 or surveys and they have to complete. They're  
15 also applying for continuing education credits  
16 for any EI professionals or post-graduate  
17 students across different disciplines who want to  
18 participate in this certificate program, and  
19 again for Brooklyn College, they have a State  
20 Department of Education Approved Advanced  
21 Certificate Program in Early Intervention and  
22 Parenting. So pre-service graduate students can  
23 take this course, these courses, as well as post-  
24 graduate or EI professionals who are interested.  
25 There are also piloting the use of technology in

1 LEICC - MARCH 31, 2015

2 the Human Development I and II courses, which  
3 Professor Ntalla is teaching and what they're  
4 going to use is video equipment to record the  
5 interaction of the student with the family and  
6 the parents and then use that as a tool for self-  
7 reflection and assessment of the student's use of  
8 family-centered best practices and, and Embedded  
9 Coaching. And they're also meeting and  
10 supporting our other academic partners as they  
11 come aboard with us. We had a meeting with  
12 Hunter College back in early February. We met  
13 with SUNY Downstate just a couple weeks ago at  
14 ICLC, Infant and Child Learning Center, and we're  
15 probably meeting with other partners really soon.  
16 In fact, last night, I presented to the students  
17 at Brooklyn College that are taking Dr. Haroula's  
18 class, Ntalla's class right now, and last week I  
19 met with graduate students at Teachers College,  
20 part of the QUIERE program there, who are getting  
21 a dual degree in Early Childhood and Early  
22 Childhood Special Education. So we're doing a  
23 lot of outreach in the community. And they are  
24 also finalizing their evaluation plan for the  
25 advanced certificate program which will include

1 LEICC - MARCH 31, 2015

2 surveys completed by the students themselves and  
3 by the clinical supervisors, and, and they're  
4 looking at what kind of data to collect and what  
5 kind of tools to use. And some of the tools  
6 we're thinking about using are the Natural  
7 Environments Rating Scale and Rush and Shelden's  
8 Coaching Practices Rating Scale. So that's what  
9 we're doing so far with Brooklyn College. That's  
10 a lot that we have to do. SUNY Downstate  
11 Occupational Therapy Program, they decided to  
12 create a core EI curriculum for those graduate  
13 students in the occupational therapy program who  
14 want to work in Early Intervention after they  
15 graduate. So it will consist of three courses,  
16 Intro to Early Intervention, Topics in Early  
17 Intervention, and then an elective in Early  
18 Intervention. Two of those courses are going to  
19 be online. So right now, they're creating and  
20 finalizing the curriculum for those two online  
21 courses and they're also working on completing  
22 their fieldwork handbook as well, which also will  
23 outline the responsibilities of the graduate  
24 students, include the parent consents for those  
25 students to work with those families and also a -

1 LEICC - MARCH 31, 2015

2 - they have a self-assessment tool that they're  
3 going to give each student to complete prior to  
4 the start of the EI core curriculum, after they  
5 finish their coursework, before they do their  
6 fieldwork, after they do their fieldwork, and six  
7 months after they graduate from the program to  
8 get some feedback on how well the core curriculum  
9 prepared them to work in Early Intervention. So  
10 it's like a self-assessment for competency in  
11 Early Intervention and Brooklyn College is going  
12 to do the same thing. I think they're going to  
13 do their post-assessment one year after to see  
14 how many people end up working in Early  
15 Intervention and how well the certificate program  
16 prepared them for Early Intervention as well. So  
17 we've been meeting also with Hunter College to  
18 prepare an academic partnership with them as well  
19 and they're finalizing their proposal for us to  
20 review. They're thinking about providing Early  
21 Intervention courses within their school of  
22 continuing education. In this way, graduate  
23 students or EI professionals or post-graduate  
24 students from different disciplines may register  
25 for these elective EI courses. We're going to

1 LEICC - MARCH 31, 2015

2 maybe at the next meeting -- LEICC meeting be  
3 able to report more in detail about their  
4 academic partnership, and also we recently met --  
5 Dr. Casalino, Lidiya Lednyak and I met recently  
6 with Dr. Wolf and Dr. Wang [phonetic] at Queens  
7 College and Dr. Rodriguez, Dr. Bacon and Dr.  
8 Gottlieb at Lehman College to see also if they  
9 would be interested in participating in some form  
10 of academic partnership with the Bureau. So are  
11 there any questions? It's a lot of work going  
12 on. Yeah. I keep doing this and I hope I'm  
13 doing this right. Is it the middle button?

14 UNIDENTIFIED FEMALE: No, the side  
15 button.

16 UNIDENTIFIED MALE: The side button.

17 DR. GONG: Ahh, so because we're firming  
18 up on all the field replacements, if anyone's  
19 interested in working with students from Brooklyn  
20 College, they can contact Amanda Lopez or Dr.  
21 Shannon. If anyone's interested in working,  
22 doing field work with the OT students from SUNY  
23 Downstate, please speak to Jasmine Thomas who is  
24 here today, that's her email as well, and Dr.  
25 Beth Elenko. And the last thing I want to

1 LEICC - MARCH 31, 2015

2 mention is that we have upcoming professional  
3 development trainings that will happen probably  
4 later this year, but we haven't finalized a date.  
5 One is on Reflective Supervision Training with  
6 Rebecca Shahmoon Shanok, Gail Gordon, Phyllis  
7 Ackman, and Elaine Geller, and the second  
8 training that we're going to offer from the  
9 bureau is on bilingual evaluations with Catherine  
10 Crowley. Okay, that's it. Thank you very much.

11 DR. CASALINO: Nora, just do the  
12 provider update, because we're running really  
13 short on time.

14 MS. PUFFETT: Sure, okay.

15 DR. CASALINO: We do have an agenda  
16 item. Nora was going to talk about the new  
17 committee. Do you want to -- shall we postpone  
18 yours?

19 MS. PUFFETT: Yeah, don't worry about  
20 it.

21 DR. CASALINO: Let's postpone Nora's  
22 till the next time, because we have some guests.

23 MS. PUFFETT: That's fine.

24 [CROSSTALK]

25 DR. CASALINO: Robert Stephens?

1 LEICC - MARCH 31, 2015

2 MR. ROBERT STEPHENS: Yes. Hello, how  
3 is everyone?

4 [CROSSTALK]

5 MR. STEPHENS: Good but very, very  
6 quickly, not going to take up a whole lot of your  
7 time, my name is Robert Stephens, liaison manager  
8 for the Office of Health Insurance Services,  
9 actually the new Preventive Primary Care Division  
10 under Dr. Bassett. The Office of Health  
11 Insurance Services has enjoyed a relationship  
12 with the Early Intervention Program for quite a  
13 while now, for, for a few years and basically  
14 what we've been doing is we've met with a number  
15 of the providers actually all of them and  
16 hopefully with the new providers will be meeting  
17 with you as well. Then what we've been doing is  
18 we've been training service coordinators on  
19 referring clients or their family members who may  
20 require health insurance, and it's been  
21 wonderful. We thank you for the efforts that  
22 you've made. We've conducted in the past three  
23 to four years, we've conducted close to 200  
24 trainings, meeting with close to 1700 service  
25 coordinators. Of course, some of the older

1 LEICC - MARCH 31, 2015

2 service coordinators and a new service  
3 coordinator and we've received close to 4,000  
4 referrals from you. So we thank you and we've  
5 been able to assist some 800 families with health  
6 insurance services. Not only do we do the health  
7 insurance services, but we also assist with food  
8 stamps to, to SSI and so forth. But health  
9 insurance has been primary. With the advent of  
10 the Affordable Care Act, the state has trained  
11 our facilitator enrollers and they're now all  
12 certified application counselors. So we've been  
13 able to do even greater things. We've been able  
14 to now assist anyone between the age of birth to  
15 64 years old. And you know health insurance is  
16 extremely, extremely important for the Early  
17 Intervention population and the general public.  
18 And so if you know of anyone, if you have any  
19 concerns with your family or of neighbors or  
20 anyone that you would know, please refer them to  
21 us. This particular package that we've given to  
22 you, you can make a contact with it. We're  
23 actually right now making inroads hopefully with  
24 DC 75, to gain contact with family members and  
25 parents and so forth who may require health

1 LEICC - MARCH 31, 2015

2 insurance services. And what we need to  
3 understand is that health insurance is for  
4 everyone. All of us are affected by this. So  
5 again with the advent of the Affordable Care Act,  
6 we are able to do even greater things. We  
7 concentrate again on the Early Intervention  
8 Program and their families and the EI child, the  
9 sibling and family members as well. Again, we  
10 can able -- we are able to assist anyone between  
11 the age of birth and 64 years old. So, again, to  
12 the EIP program thank you for this collaboration,  
13 for the relationship, and to the providers, thank  
14 you, you're doing a marvelous job. Thank you.

15 DR. CASALINO: Thank you.

16 MS. RENEE NOEL: Hi, good morning  
17 everyone. I'm Renee Noel from the Bureau of  
18 Child Care, Department of Health and Mental  
19 Hygiene. Thank you. And I'm here to discuss  
20 with you the flu mandate that was recently  
21 enacted, and I wanted to let you know that it's a  
22 collaborative effort between two bureaus within  
23 the Department of Health: the Bureau of Child  
24 Care and the Bureau of Immunization, and I have a  
25 colleague here with me, Paula Francis-Crick, and

1 LEICC - MARCH 31, 2015

2 she will jump in when, you know, if any of you

3 have questions. Okay, so the flu mandate, right?

4 All children ages six months to 59 months just

5 before turning five, enrolled in childcare, must

6 receive the influenza vaccine before, you know,

7 by December 31st of each year, okay? Okay, so

8 who's affected by this mandate, and the, we, we,

9 the programs that are affected by it are the

10 child, the group childcare centers that are

11 regulated under Article 47 of the New York City

12 Health Code. Also, the school-based childcare

13 regulated under Article 43. So Article 43

14 programs are children that are three to five

15 years old within a school or elementary

16 institution, educational institution. So like a

17 Yeshiva or the Archdiocese, you know, these

18 little private schools. So just that three to

19 five-year old is regulated under Article 43. So

20 those are the programs that would be affected by

21 this flu mandate, okay? So the state programs

22 are not covered under this mandate. And like, we

23 have programs that we call legally exempt, you

24 know, they are in the home. The home programs

25 are not under this mandate. The legally exempt

1 LEICC - MARCH 31, 2015

2 are programs that have less than two kids or, you  
3 know, they're, they're not regulated at all. And  
4 so the reason behind, you know, the mandate, the  
5 high, the highest priority is the daycare  
6 centers, because of the environment that these  
7 children are in. You know, close proximity, you  
8 know, personal hygiene is not at the utmost. You  
9 know, it's hard to get a two-year old to, you  
10 know, cough into their arm. So that's the --  
11 it's, the influenza can spread easily in that  
12 sort of environment. Okay. Oh, I'm sorry. And  
13 also we're, statistics were, you know, research  
14 and all of that done in regards to, you know,  
15 out-of-pocket expenses, out of stack, you know,  
16 having to go to the emergency room. The expenses  
17 that that posed. As well as parents having to  
18 stay home and lost wages. Okay, so all of that  
19 was put into, you know, brought up. And just  
20 giving you a, you know, a visual of how it can,  
21 you know, a child becomes the source of infection  
22 in the entire community, in, in to the family, to  
23 their peers, and to the larger community. And so  
24 vaccinating the child is, is promoting herd  
25 immunity. So you're helping the other

1 LEICC - MARCH 31, 2015

2 individuals in your classroom as well once you  
3 are being -- once you are vaccinated. Okay.  
4 And, sorry. Okay, so this diagram is just, it's  
5 a, it's giving you the numbers prior to the  
6 influenza mandate, the flu mandate. And we don't  
7 have -- we have some numbers for now, like  
8 recently since the mandate. So the mandate went  
9 into effect January of 2014. And so these are  
10 the, the coverage of the, of the age group that  
11 had at least one dose during the season, okay?  
12 So as of March 11th of this year, we received the  
13 data that it's at 63 percent and it's climbing  
14 obviously. And so the hope is that it would go  
15 up to 90, even 100 percent, but as high as  
16 possible. That's the goal. Alright, so all this  
17 statistical information was taken to the Board of  
18 Health. It has to be approved by the Board of  
19 Health prior to being enacted. And so we have  
20 public comments, we had -- it, it, and  
21 individuals spoke up at these public comments and  
22 we took all that information and the Board made a  
23 decision. And their decision was made on January  
24 11th of 2014. They did -- it was enacted. So  
25 programs must be in compliance by December 31st

1 LEICC - MARCH 31, 2015

2 of 2015. So the reasoning behind that, we wanted  
3 to do education as an enforcement, instead of  
4 initially coming out and doing -- citing  
5 violations. So giving people, you know,  
6 programs, daycare centers, opportunities to speak  
7 with their parents, you know, get all the  
8 information that they need provided to their  
9 parents so that by December of this year, 2015,  
10 they would, they would all be, you know,  
11 understand and be able to be in compliance with  
12 the, with the mandate. So right now we're just  
13 doing enforcement. You know, the flu mandate, we  
14 had blast emails sent out to the programs letting  
15 them know about the public comment. Notices  
16 about the, you know, the providers after the --  
17 we sent out notices to the providers after the  
18 Board of Health approval. We sent out flu  
19 mandate posters, letters that they can give to  
20 their parents. You know, we, we, we wanted to  
21 educate them and give them as much information as  
22 possible. We also did presentations at specific  
23 organizations. So the first year, education,  
24 which is promoting, sending out materials,  
25 letting them know we have a media campaign. If

1 LEICC - MARCH 31, 2015

2 you've noticed in the subways, you know, there's  
3 the flu posters in the subway stations. And so  
4 that was our hope to make sure -- so no  
5 violations are being cited. We're not issuing  
6 notices of violations to any of the programs.  
7 We're noting it in our reports. We're educating  
8 them. We're giving them the information. And  
9 year two, which is December 31, 2015, so that  
10 means January of 2016 is when we begin issuing  
11 the notices of violation. Okay? So programs  
12 will have to be in compliance by then. So the  
13 exemptions, you know, this is the main thing, you  
14 know, a lot of phone calls have been coming in.  
15 They want to know what to do. Parents are  
16 against it. A lot of parents they don't want  
17 their children vaccinated with the influenza. So  
18 there are only two exemptions, for medical  
19 contraindication and religious grounds. Okay?  
20 So for medical, you have to get a doctor's note.  
21 It has to be signed by the doctor. It cannot be  
22 the doctor which we've seen, the doctor says that  
23 the parent refuses to give the child a vaccine.  
24 That is not acceptable. It has to be it's a  
25 detriment to the child, the child is allergic to

1 LEICC - MARCH 31, 2015

2 it, the -- it would be, it would be  
3 counterintuitive, intuitive, you know, it won't  
4 do anything for the child. So that is the only  
5 reason. It has to be from a doctor and signed by  
6 the doctor. The program can ask for additional  
7 information. They can call the doctor. It's  
8 their prerogative. They can do that. Religious  
9 grounds, this is the parent giving the letter to  
10 the program, you know, just with their sincere  
11 and genuine religious belief. It cannot be  
12 philosophical or anything like that. It's just  
13 their religious belief that they don't, it's  
14 against their religion to vaccinate. And, and  
15 again the program, the director, the owner can  
16 ask for additional information. If they wish,  
17 they can ask from the clergy member or the rabbi,  
18 whoever that they, they request. But as a  
19 regulatory, we go in -- we, as long as we see the  
20 child, in the child's record that a medical doc-,  
21 the medical letter from the doctor or the  
22 religious letter from the parent, we accept that.  
23 We're not going to go dig further. You know,  
24 it's up to the program to do that. Okay, so the  
25 program's obligations. Retain completed medical

1 LEICC - MARCH 31, 2015

2 forms for all children enrolled, have medical  
3 forms readily available for our inspection,  
4 ensure all children enrolled have the required  
5 immunizations or the exemptions. Adhere to the  
6 Health Department Health Code in which they are  
7 governed under, which either 43 or 47, and the  
8 permittee may refuse, so the program may refuse  
9 to allow any child to attend a childcare service  
10 if they do not have the, the vaccine or the  
11 exemptions. As a -- we, when we go in, we're not  
12 going to say, okay, that child -- the child  
13 doesn't have anything. We are not going to say,  
14 oh, send that child home. We're going to issue  
15 the violation to the program and it's up to the  
16 program to make that corrective action, whatever  
17 that corrective action is, you know, and they can  
18 exclude the child, but we won't exclude the child  
19 or tell you this child must go home. Okay.  
20 These are the posters. I don't know, I'm not up  
21 there so I can't pull it up, but the posters are  
22 online and, and readily available and in  
23 different languages. Programs can call, parents  
24 can call, and to our 311 call center and it can  
25 be mailed out to them. And also the influenza

1 LEICC - MARCH 31, 2015

2 health bulletin is available as well on our  
3 website. Monitoring, all the -- oh, I can't even  
4 say the word anymore -- statistical information  
5 that we received is from our citywide  
6 immunization registry, which doctors, most  
7 pediatricians have this on, you know, their, they  
8 put all the information in there and we are able  
9 to monitor the what's coming in and who is being  
10 covered and who is getting the immunizations.  
11 And what we're doing with the programs, daycare  
12 centers, is asking them to register with the  
13 citywide immunization registry, which helps them  
14 in a sense because they can go in as well. They  
15 get their password and everything, they can go in  
16 and they can see if the child is up to date with  
17 their, with their immunizations. And so this is  
18 what it looks like, the citywide, it's on our  
19 website, citywide immunization registry. Sorry.  
20 And this is our contact information, the Bureau  
21 of Childcare website and borough office contact.  
22 We're decentralized. So we have all -- in four  
23 boroughs, not all five. Brooklyn and Staten  
24 Island are together in Brooklyn. And we have  
25 Queens, Bronx and Manhattan. And so all the

1 LEICC - MARCH 31, 2015

2 contact information is on our website at that  
3 link, and the phone number, our main number at  
4 central office in Manhattan is that number I just  
5 gave you, it's up there. And for immunization,  
6 the Bureau of Immunization, that's their link to  
7 the website and their contact information, their  
8 phone number. Okay? And that's it. Question?

9 MR. TREIBER: I just have one question.

10 MS. NOEL: Sure.

11 MR. TREIBER: In terms of the exclusion,  
12 the, I mean, I'm sure -- so if a program is going  
13 to be cited with a violation if they, if the  
14 child doesn't have the immunization, is there any  
15 other documentation that they can have to show,  
16 because I think the programs are in a really  
17 difficult position. I mean, because if you're  
18 not going to order them to send the child home,  
19 and, and I as a program send the child home, the  
20 parents are going to be really angry at me if I'm  
21 not ordered to do it. So I think that has to  
22 really be looked at.

23 MS. NOEL: Mm-hmm.

24 MR. TREIBER: And then secondarily, you  
25 know, if a program has notes from a parent that

1 LEICC - MARCH 31, 2015

2 they have a doctor's appointment in February or,  
3 you know, late February or whatever, is that  
4 sufficient to cover it? Because I think those  
5 are issues that programs are going to face  
6 because this year there was no enforcement so  
7 programs didn't exclude kids. What I've heard  
8 from program providers already is that they're  
9 planning to exclude kids as of January 1st, and  
10 the onus is going to be on them, if the  
11 Department isn't telling them to exclude kids.

12 MS. NOEL: Right. Okay, so we'll look  
13 into that, but we just, we, we would, we can't  
14 really -- we don't have that really, the  
15 relationship with the parent, do you understand?

16 MR. TREIBER: Mm-hmm.

17 MS. NOEL: It's the provider and the  
18 parent that has that relationship. We just  
19 oversee the daycare centers and the programs. So  
20 that's where the obligation is. So we cite the  
21 violation. We can't -- I don't know why it's  
22 written in the code that it, it's the provider's  
23 obli-, you know, decision. I believe, I believe  
24 it's because it's their business, their  
25 organization. We're just the regulatory, where

1 LEICC - MARCH 31, 2015

2 it's -- I'll, I'll take it back but I'm not sure  
3 why, you know, I know they, they, they, they want  
4 something to fall back on. They want to say,  
5 well, the Health Department told me, you know,  
6 this is the, you know, and I, I'm, I've been  
7 getting the calls and I understand. I've spoken  
8 with parents. I've explained it to -- I  
9 explained that to them as well, but I don't know.  
10 I'll have to take that back.

11 MS. SILVER: I was going to just say the  
12 same thing, because it's the word may.

13 MS. NOEL: Yeah.

14 MS. SILVER: That leaves it so open and  
15 like Chris was saying, the parent can come in but  
16 have an appointment next week and, and I know  
17 that happened this, this past year. Like you  
18 were saying, it wasn't enforced. So people kind  
19 of gave the parents the wiggle room.

20 MS. NOEL: Mm-hmm.

21 MS. SILVER: But I think what you're  
22 saying is if the daycare come and you don't have  
23 documentation to the exclusions that you  
24 mentioned --

25 MS. NOEL: Mm-hmm.

1 LEICC - MARCH 31, 2015

2 MS. SILVER: -- but there's a child here  
3 who doesn't have an immunization, then the  
4 daycare is going to get a violation.

5 MS. NOEL: Yes.

6 MS. SILVER: So it's kind of like, you  
7 know, kind of like a contradiction from the  
8 department then, you know, like you were saying,  
9 you're, you're putting the daycare or the, the  
10 school at a very difficult place.

11 MS. NOEL: Okay, alright. Duly noted.  
12 Paula --

13 MS. FRANCIS-CRICK: I do have a quick  
14 comment. In regards to, and we're not the  
15 regulatory department that oversees the childcare  
16 status of the Department.

17 MS. SILVER: Okay.

18 MS. FRANCIS-CRICK: But from the Bureau  
19 of Immunization's perspective, if a child has an  
20 appointment, a documented appointment in the  
21 record indicating that they have an appointment  
22 to get a vaccine, then it's a show of good faith,  
23 and most facility directors will accept that, and  
24 it would be considered more like a provisional  
25 the child is in a provisional status or they're

1 LEICC - MARCH 31, 2015

2 showing good faith that they will get the  
3 vaccine. It is then up to the daycare director  
4 to follow through if the child did in fact bring  
5 in documentation past that appointment date, the  
6 date of the vaccine.

7 MS. SILVER: So you can speak for the,  
8 for the daycare people but you're assuming that  
9 if they were to come and visit but they had that  
10 documentation, that they wouldn't be issued a  
11 violation, and then whatever that date is, they  
12 would show the documentation and send it to the -  
13 -

14 MS. FRANCIS-CRICK: Yeah.

15 MS. SILVER: Okay.

16 MS. FRANCIS-CRICK: It's what was also  
17 tell schools, the private schools, public  
18 schools. Once a parent is showing good faith,  
19 then there's no reason to exclude the child, then  
20 up to the person, the director of the facility to  
21 follow through and ensure that the child kept the  
22 appointment, brought in documentation. If the  
23 due dates have passed and there is no  
24 documentation, then it is up to the director to  
25 take further action, and they may exclude the

1 LEICC - MARCH 31, 2015

2 child.

3 MS. SILVER: Fair enough. Thank you.

4 DR. SHULMAN: I feel the need to say as  
5 the medical provider that the flu vaccines,  
6 unlike all the other vaccines, flu season, you  
7 really have to have it by December or you're not  
8 going to be protected for the season. So this is  
9 one of those instances it's not only a  
10 bureaucratic date, it's an actual health  
11 indicated date.

12 MS. NOEL: Okay.

13 MR. TREIBER: Any other questions?  
14 Thank you very much. Thank you. Okay, so I'm  
15 going to make my report really, really quick. I  
16 did just want to give an update. The Early  
17 Intervention Provider Association got together, I  
18 think it was in December. I don't know, it was  
19 snowing up in Albany, that's all I remember. And  
20 we came up with a recommendation to ask the  
21 legislature for a 4.8 percent increase for EI  
22 rates. My understanding is that that was turned  
23 down, it wasn't approved at all, what else is  
24 new. And one of the things, though, that, that  
25 came out from this is that there was some

1 LEICC - MARCH 31, 2015

2 questions regarding the lower utilization of  
3 Early Intervention services in the State of New  
4 York, the governor's budget lowered the amount of  
5 allocation for Early Intervention by \$4 million,  
6 and part of the justification for that was that  
7 there were fewer kids using Early Intervention,  
8 also there was an abundance of providers. There  
9 were way more providers providing the service and  
10 so they didn't feel that there was a need for any  
11 kind of Early Intervention increase. So one of  
12 the things that the advocates did ask for was  
13 legis-, in the legislation and the, in the budget  
14 bill, that both the assembly and the senate put  
15 out, we asked for language regarding data  
16 collection and so much more intensive numbers on  
17 behalf of the state and the municipalities so  
18 that we would then be able to make some arguments  
19 regarding the need for these increases and other  
20 things, and also verify whether or not the  
21 numbers have actually changed that significantly  
22 to warrant changes in the amounts of money in the  
23 allocation. And I don't know at this point  
24 whether or not that language actually ended up in  
25 the final budget bill because all I know is

1 LEICC - MARCH 31, 2015

2 that's one small piece of it, but hopefully we'll  
3 have an answer at some point regarding that. The  
4 other thing I just wanted to give you an update  
5 on was regarding the school psychology issue.  
6 And it has impact in two ways. One, it certainly  
7 has an impact on the children leaving Early  
8 Intervention, whether or not they can be  
9 evaluated or not, and the school psychology issue  
10 started regarding State Education Department's  
11 enforcement of regulations that school  
12 psychologists are no longer seen as eligible to  
13 be able to do evaluations on children who are not  
14 enrolled in 4410 programs. And then the state  
15 issued another revised memo saying basically they  
16 weren't going to enforce it. The reality though  
17 is that there are many 4410 providers that are  
18 evaluation sites that are not doing evaluations  
19 unless they have a licensed psychologist doing  
20 them, which is someone with a PhD. It's also  
21 very complicated. There's very few licensed  
22 bilingual psychologists to do any kind of  
23 bilingual evaluations. I participated in a  
24 meeting a few weeks ago with members of the State  
25 Senate, members of the Assembly, people from

1 LEICC - MARCH 31, 2015

2 State Ed, Office of the Professions, and all of  
3 their legal counsel regarding this issue, a  
4 number of provider groups were there. And one of  
5 the things they came up was a debate about  
6 whether or not they were going to proceed with  
7 one of two tracks. One was going to be a waiver  
8 that would grant a waiver for school  
9 psychologists to conduct 4410 evaluations  
10 initially for kids, and then the other was  
11 whether or not they would create a new licensure  
12 for school psychologists. The Office of the  
13 Professions and people at State Ed and others  
14 said that would be a very difficult thing to  
15 accomplish. So it looks like they're moving  
16 towards a waiver for initial evaluations allowing  
17 school psychologists to conduct those. However,  
18 the language is problematic, and just so you're  
19 aware, what the language in the proposed bill  
20 says and it's an assembly bill 5325, it was  
21 introduced by Assembly Member Glick, and the  
22 challenge in the language is it basically says  
23 that the person conducting these evaluations has  
24 to be employed in a salary position by the center  
25 based provider, and the certified school

1 LEICC - MARCH 31, 2015

2 psychologist has to then be in a salaried  
3 position. Well, we've already sort of gotten an  
4 indication that most school psychologists right  
5 now are not salaried and they are, they are hired  
6 as a consultant at an hourly basis to do the  
7 evaluations. So most of them would not be  
8 eligible for the waiver under this. So we've  
9 already started to reach out to some of the  
10 members of the assembly to start to see if the  
11 language can be adjusted because we don't know  
12 exactly why they said salaried position. And  
13 we're trying to look into that. So hopefully  
14 we'll have some more updates on this.

15 MS. SILVER: But I thought that part of  
16 the bill was going to be in the governor's budget  
17 that is going to be due tomorrow, that's what Pam  
18 had originally said --

19 MR. TREIBER: This is a separate --

20 MS. SILVER: -- that portion was going  
21 to be in the budget and, and the possibility of,  
22 of licensing school psychologists would be in the  
23 [unintelligible 01:55:27].

24 MR. TREIBER: I'm not sure. What I know  
25 is that it's a separate bill now. I don't know

1 LEICC - MARCH 31, 2015

2 if it maybe [unintelligible 01:55:33].

3 MS. SILVER: I guess we'll find out  
4 tomorrow.

5 MR. TREIBER: Yeah.

6 MS. SILVER: So --

7 MR. TREIBER: Okay? Alright. Thank  
8 you. And then I think it's just the committee  
9 reports. Cathy?

10 MS. WARKALA: I have nothing.

11 MR. TREIBER: Tracy was the new chair of  
12 our policy review committee.

13 MS. LEBRIGHT: Yeah, just very quickly.  
14 We reviewed revisions to the transportation  
15 policy. I think the EI community happened to see  
16 that parent reimbursement and car service options  
17 are again going to be available for families that  
18 need them. Our review led to one major  
19 modification. Mainly, that distribution of Metro  
20 cards and gift cards which are part of the  
21 policy, is actually going to be assumed totally  
22 by the Department so service coordinators and  
23 providers won't be involved in that. And so  
24 Chris sent the policy out to the full LEICC for  
25 review last week and comments were due yesterday.

1 LEICC - MARCH 31, 2015

2 So hopefully we'll be seeing that policy coming  
3 out soon. I think our next task is going to be  
4 tackling transition and I'm told we will actually  
5 be working our way through the, most of the  
6 policy now.

7 MR. TREIBER: Mary, anything?:

8 [Unintelligible 01:56:50]

9 DR. DEBEY: Jeanette has already --

10 MR. TREIBER: Okay.

11 DR. DEBEY: -- talked about the other  
12 CUNY meeting this quarter on how to have the  
13 family-centered emphasis throughout all Early  
14 Intervention.

15 [CROSSTALK]

16 MR. TREIBER: Okay, thank you.

17

18 [END OF MEETING]

19
