

Coronavirus Disease 2019 (COVID-19)  
**Daily Data Summary**

The data in this report reflect events and activities as of **April 7, 2020 at 4:45 PM.**

All data in this report are preliminary and subject to change as cases continue to be investigated. These data include cases in NYC residents and foreign residents treated in NYC facilities.

The unusually high increase in confirmed COVID-19 cases, hospitalizations and deaths between April 6 and 7 is due to a combination of two factors:

- A lag in reports from laboratories
- A large transfer of hospitalization data about patients who were hospitalized before April 6

**NYC COVID-19 Cases**

|                           | <b>Total Cases</b> |
|---------------------------|--------------------|
| <b>Total</b>              | 74601              |
| <b>Median Age (Range)</b> | 50 (0-110)         |
