Welcome to New York City!

If you’re remaining in New York City, we request that you stay at home for 14 days after you left a country designated by the Centers for Disease Control and Prevention (CDC), to home self-monitor for symptoms of fever, cough or shortness of breath. During this time, please do not go to work or school.

If you develop fever, cough or shortness of breath during your home stay, please call the NYC Health Department at 347-396-7990 before you seek health care. We at the NYC Health Department will assist you in getting the necessary medical evaluation.

If you seek health care while requested to stay at home, make sure you call that health care provider beforehand and tell them that you may have been exposed to novel coronavirus.

Please visit our website (nyc.gov/health/coronavirus) for Frequently Asked Questions about your monitoring period, as well as a doctor’s note to use for work or school.

Thank you for your cooperation. We will be reaching out to you soon via telephone call or text message.
