

# USING DRUGS?

## FENTANYL IS IN NYC

Fentanyl is a dangerous opioid that's showing up in heroin, cocaine and street pills marked as Xanax®

**YOU CAN'T SEE, TASTE OR SMELL FENTANYL**

**USE WITH SOMEONE ELSE:** If you overdose, you want someone around to help.

**TAKE TURNS:** Don't use at the same time, and be prepared with naloxone. Have a phone on hand in case you need to call 911.

**TEST YOUR DRUGS:** Use a small amount first to see how strong your drugs are. Even a tiny amount of fentanyl can cause an overdose.

**CARRY NALOXONE:** More than one dose of naloxone may be needed to reverse a fentanyl overdose.

**AVOID MIXING DRUGS:** Mixing drugs—including alcohol —increases your risk of overdose.

**HELP US SPREAD THE WORD.** If you think you've come across fentanyl, let a staff member know.
