TABLES

	Table No.	Page No.
Trend in new active tuberculosis cases and deaths: United States, 1953-1964	1	2
New active tuberculosis cases by age: United States, 1953-1964	2	3
New active tuberculosis case rates by age: United States, 1953-1964	3	4
New active tuberculosis cases by race and sex: United States, 1953-1964	4	4
New active tuberculosis case rates by race and sex: United States, 1953-1964	5	5
New active tuberculosis cases by age, race, and sex: United States, 1964	6	6
New active tuberculosis case rates, by age, race, and sex: United States, 1964	7	6
Tuberculosis deaths by age, race, and sex: United States, 1964	8	9
Tuberculosis death rates by age, race, and sex: United States, 1964	9	9
Range of new active tuberculosis cases by counties, United States, 1964	10	14
Tuberculosis deaths by size of community, 1964	11	14
New active tuberculosis cases among U.S. Indians and Alaska Natives	12	15
Cases on current tuberculosis registers, United States	13	18
New active tuberculosis cases and case rates: each State, 1963 and 1964	14	19
Tuberculosis deaths and death rates: each State, 1963 and 1964	15	20
New active tuberculosis cases by race and sex: each State, 1964	16	21
New active tuberculosis case rates by race and sex: each State, 1964	17	22
New active tuberculosis cases by age: each State, 1964	18	23
New active tuberculosis case rates by age: each State, 1964	19	24
Source of report for new active cases: each State, 1964	20	25
Form and extent of disease of new active tuberculosis cases: United States, 1964	21	26
Percent distribution of new active pulmonary tuberculosis cases: United States, 1953-1964	22	26
New active tuberculosis cases by form and extent of disease: each State, 1964	23	27
Percent distribution by extent of disease, new active pulmonary tuberculosis cases: each State, 1964	24	28
New active tuberculosis cases, cities of 250,000 or more population, 1964	25	29
New active tuberculosis cases, cities with 100,000 to 250,000 population, 1964	26	30
New active tuberculosis cases by age: selected American cities, 1964	27	32
New active tuberculosis cases, by race and sex: selected American cities, 1964	28	33
Tuberculosis deaths by race in large cities, 1964 (according to Place of Residence)	29	34
Tuberculosis deaths and death rates by age, race, and sex: United States, 1964	30	36
Leading causes of death, United States, 1964	31	37

FIGURES

	Figure No.	Page No.
New active tuberculosis case rate and death rate, United States, 1953-1964	1	1
New active tuberculosis case rates by age, United States, 1953-1964	2	3
New active tuberculosis case rates by race and sex, United States, 1953-1964	3	5
New active tuberculosis case rates by age, race, and sex, United States, 1964	4	6
New active tuberculosis cases and case rates by race and by sex, United States, 1964	5	7
New active tuberculosis cases and case rates by age group, United States, 1964	6	7
Tuberculosis case rates by State, United States, average 1962-1964	7	11
Tuberculosis cases reported: Counties and large urban areas, United States, 1964	8	12
Tuberculosis cases in the United States, by county, 1964	9	13
Tuberculosis cases by size of community, 1964	10	14
