West Nile Virus activity* detected recently in the following
Manhattan zip codes: 10024, 10032

Neighborhoods: Hamilton Heights, Upper West Side

Now is the time for New Yorkers – especially people over 50 or with weakened immune systems – to take personal precautions to prevent mosquito bites:

• Use repellents that contain 2-undecanone, DEET, Oil of Lemon Eucalyptus, IR3535, or Picaridin and ALWAYS follow label instructions.
• If outside from dusk to dawn, wear protective clothing if possible, such as loose-fitting pants, long-sleeved shirts, and socks.
• Make sure that your doors and windows have tight-fitting screens.
  Fix or replace screens that have tears or holes.

Reduce mosquito exposure around your home:

• Eliminate any standing water that collects on your property.
• Remind or help neighbors to eliminate standing water on their properties.
• Call 311 to report standing water.

For more information about West Nile virus, call 311, or go to www.nyc.gov/health.
