Health Department to Spray Pesticide to Reduce the Number of Mosquitoes and the Risk of West Nile Virus in Selected Parts of Queens

September 11, 2012 -- To reduce mosquito activity and the risk of West Nile virus, the Health Department will spray pesticide from trucks in parts of Queens on **Thursday, September, 13, between the hours of 7:30 p.m. and 6 a.m. the next morning**, weather permitting. In case of bad weather, application will be delayed until Monday, September 17. These neighborhoods are being treated due to rising West Nile virus activity with high and/or increasing mosquito populations. The areas to be treated appear below.

Locations of Application

Neighborhoods	Boundaries	Zip Codes
Parts of Middle Village, Maspeth, Rego Park and Ridgewood	Bordered by Grand Ave, Long Island Expressway and Queens Blvd to the North; Fresh Pond Road to the West; Metropolitan Avenue to the South; and 80 th Street , Farmville Ave, Woodhaven Blvd and 63 rd Road to the East	Parts of the following zip codes: 11373, 11374, 11378, 11379
Parts of Fresh Meadows, Hillcrest, Hollis, Holliswood, Jamaica Estates, Jamaica Hills and Oakland Gardens	Bordered by Long Island Express way to the North; 188 th Street, 80 th Drive, Utopia Parkway, Homelawn Street and 169 th Street to the West; 90 th Ave, 191 st Street and Hillside Ave to the South; and Hollis Hills Terrace, Richland Ave and 210 th Street to the East	Parts of the following zip codes: 11364, 11365, 11366, 11423, 11427, 11432
Parts of Pomonok, Auburndale, Flushing, and Bayside	Bordered by 33 rd to the North; Ave, 162 nd Street, Laburnum Ave, Kissena Blvd to the West; Booth Memorial Blvd, Utopia Parkway and 48 th Ave to the South; and Clearview Expressway to the East	Parts of the following zip codes: 11355, 11358 11361, 11365

For this spraying, the Health Department will use a very low concentration of Anvil®, 10 + 10 (a synthetic pyrethroid) at an application rate of one teaspoon (5 grams) of the active ingredient per three acres. When properly used, this product poses no significant risks to human health.

The Health Department recommends that people **take the following precautions to minimize direct exposure:**

- Whenever possible, stay indoors during spraying. People with asthma or other respiratory conditions are encouraged to stay inside during spraying since direct exposure could worsen these conditions.
- Air conditioners may remain on, however, if you wish to reduce the possibility of indoor exposure to pesticides, set the air conditioner vent to the closed position, or choose the re-circulate function.
- Remove children's toys, outdoor equipment, and clothes from outdoor areas during spraying. If outdoor equipment and toys are exposed to pesticides, wash them with soap and water before using again.
- Wash skin and clothing exposed to pesticides with soap and water. Always wash your produce thoroughly with water before cooking or eating.

Reducing Exposure to Mosquitoes

- Consider limiting time outdoors between dusk and dawn in areas with significant mosquito infestations.
- Wear protective clothing when outdoors, and use an approved insect repellent containing DEET, picaridin, oil of lemon eucalyptus (not for children under three), or products that contain the active ingredient IR3535.
- Make sure windows have screens and repair or replace screens that have tears or holes.
- Eliminate any standing water from your property and dispose of containers that can collect water. Standing water is a violation of the New York City Health Code.
- Make sure roof gutters are clean and draining properly.
- Clean and chlorinate swimming pools, outdoor saunas and hot tubs. Keep them empty or covered if not in use; drain water that collects in pool covers.
- Report standing water by calling **311** or visiting nyc.gov/health/wnv.
