**HEALTH DEPARTMENT PESTICIDE SPRAYING IN SELECTED PARTS OF BROOKLYN
RESCHEDULED FOR TUESDAY, SEPTEMBER 3**

August 29, 2013 – To reduce mosquito activity and the risk of West Nile virus, the Health Department will spray pesticide from trucks in parts of Brooklyn on **Tuesday, September 3, 2013 between the hours of 8 p.m. and 6 a.m. the following morning**, weather permitting. In case of bad weather, application will be delayed until Monday, September 9, 2013 during the same hours. The neighborhoods listed below are being treated due to rising West Nile virus activity with high mosquito populations.

Locations of Application

Neighborhoods	Boundaries	Zip Codes
Parts of Brighton Beach, Bergen Beach, Coney Island, East Flat Bush, Flatlands, Georgetown, Gravesend, Gerritsen Beach, Homecrest, Marine Park, Manhattan Beach, Midwood, Middle Basin, Mill Island, Mill Basin, Sea Gate, Sheepshead Bay	Bordered by Avenue D, Brooklyn Avenue, East 36th Street, Avenue I, East 14th Street, Avenue U, Nostrand Avenue, Avenue X and 86th Street to the North; Bay Parkway and Gravesend Bay to the West; Atlantic Ocean, Knapp Ave, Sheepshead Bay, Avenue X and Gerritsen Avenue to the South; and Belt Parkway, Paerdegat Basin and Ralph Avenue to the East	Parts of 11203, 11210, 11214, 11223, 11224, 11229, 11230, 11234, 11235

For these sprayings, the Health Department will use a very low concentration of Anvil® 10+10, a synthetic pesticide. When properly used, this product poses no significant risks to human health. The Health Department recommends that people take the following precautions to minimize direct exposure:

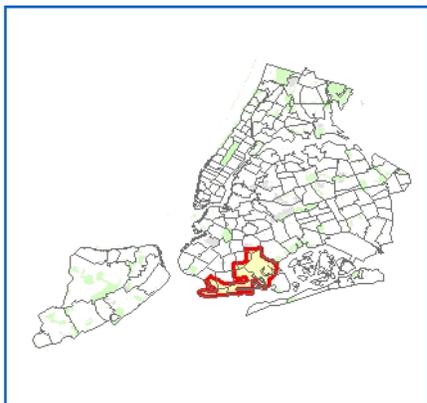

- Whenever possible, stay indoors during spraying. People with asthma or other respiratory conditions are encouraged to stay inside during spraying since direct exposure could worsen these conditions.
- Air conditioners may remain on, however, if you wish to reduce the possibility of indoor exposure to pesticides, set the air conditioner vent to the closed position, or choose the re-circulate function.
- Remove children’s toys, outdoor equipment, and clothes from outdoor areas during spraying. If outdoor equipment and toys are exposed to pesticides, wash them with soap and water before using again.
- Wash skin and clothing exposed to pesticides with soap and water. Always wash your produce thoroughly with water before cooking or eating.

Reducing Exposure to Mosquitoes

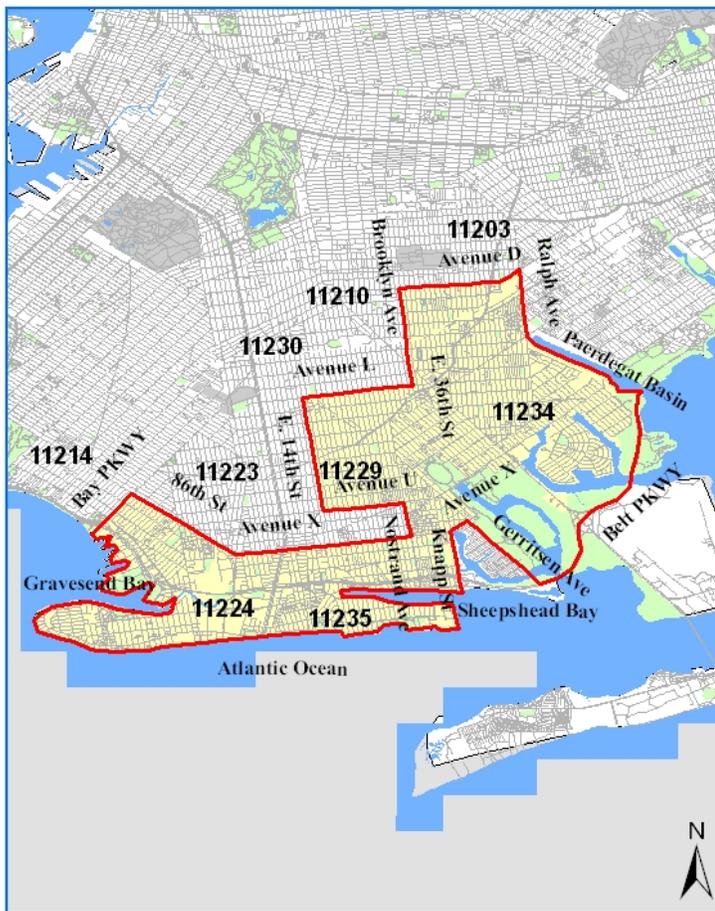

- Consider reducing the amount of time spent outdoors during the hours between dusk and dawn in areas with heavy mosquito populations.
- Use an approved insect repellent containing DEET, picaridin, or oil of lemon eucalyptus (not for children under three).
- Make sure windows have screens, and repair or replace screens that have tears or holes.
- Eliminate any standing water from your property, and dispose of containers that can collect water. Standing water is a violation of the New York City Health Code.
- Make sure roof gutters are clean and draining properly.
- Clean and chlorinate swimming pools, outdoor saunas and hot tubs. Keep them empty and covered if not in use; drain water that collects in pool covers.
- Report standing water by calling 311 or visiting nyc.gov.
