Spring Into Health Fair will educate, encourage, empower, and expose our community members to an array of health and holistic services. All participating Beacon sites will engage local community-based organizations and City agencies in each neighborhood to join us in promoting awareness to “Your Life Your Health”.

Our activities will focus on two main topics: awareness and education. Tabling includes food stamps screening, health insurance enrollment and jobs opportunities; lifestyle changes information, blood pressure, diabetes testing and dental screening and demonstrations such as health eating, fitness and fire safety.
